## THE FEDERAL REGISTER INDEX

The Index to the daily *Federal Register* is published separately, covering the contents of the *Federal Register* as follows: Monthly for the months of January, February, April, May, July, August, October, November, and December; quarterly for the quarters ending in March, June, and September; and annually for the calendar year.

Entries in the Index are carried primarily under the names of the issuing agencies, with the most significant entries additionally carried in appropriate alphabetical position.

A cumulative codification guide, keyed to the *Code of Federal Regulations*, is also published monthly. The guide lists titles, parts, and sections, and indicates the nature of changes effected by *Federal Register* documents published to date in the calendar year. Proposed rules are listed at the end of pertinent titles.

**Additives, Color and Food:**
*See* Food and Drug Administration.

**Agency for International Development:**
AUTHORITY DELEGATIONS by Administrator to Assistant Administrator, Latin America:
Agreements, projects, and programs financed by A.I.D. 18392
Personnel; assignment, grades, etc. 18392
COMMODITY TRANSACTIONS financed by A.I.D., rules and procedures applicable to; continuation in effect of certain prior issuances 18288
VOLUNTARY FOREIGN AID AGENCY, certificate of registration; Christian Reformed World Relief Committee, Inc. 18392

**Agricultural Conservation Programs:**
*See* Agriculture Department.

**Agriculture Department:**
ANIMALS:
*See also* Cats, dogs; Meat and meat products; Packers and Stockyards Division.
Diseases:
Foot-and-mouth 16907
Rinderpest 16807
Scabies in sheep 15943
Imports:
Animal semen 18274
Overtime services, travel time 16316
Overtime services, imports and exports; travel time 16316
AVOCADOS, marketing; Florida 16258, 19259
BARLEY; price-support program, 1964 crop 18212
BEANS, dry edible; price-support program, 1964 crop 18212
BLUEBERRIES, standards; proposed rule, extension of time 19109
CATS, DOGS, and other carnivora, products for; inspection and certification:
Composition 18418
Definitions, "poultry" and "poultry products" 18418
COMMODITY CREDIT CORPORATION. *See main heading* Commodity Credit Corporation.
COMMODITY EXCHANGE AUTHORITY. *See main heading* Commodity Exchange Authority.
CONSERVATION PROGRAMS, agricultural, national, 1964 18149
CORN; price-support program, 1964 crop 18212
COTTON:
Marketing quotas, farm acreage allotments, etc., 1965 crops:
Extra long staple 16184, 16248, 18003
Upland 16184, 16775, 18004
Price-support program; 1964 crop 18213
CRANBERRIES, marketing; certain States 16078
DAIRY PRODUCTS:
*See also* Milk and milk products.
Exports; nonfat dry milk, payment rates-by-contracts 17032
DISASTER AREAS; need for agricultural credit:
Arkansas, 16872.
Kansas, 16872, 17002.
Louisiana, 18182.
Michigan, 18514.
Montana, 19114
North Carolina, 15962.
North Dakota, 16210, 19114
Pennsylvania, 19265.
Texas, 15962, 18394.
West Virginia, 18514.
Wisconsin, 17002.
DOGS, CATS, and other carnivora, products for; inspection and certification:
Composition 18418
Definitions, "poultry" and "poultry products" 18418
EXPORTS; dairy products, payment rates by contract 17032
FARMERS HOME ADMINISTRATION, organization; assignment and reservations of functions 16214, 16840
FEDERAL CROP INSURANCE CORPORATION. *See main heading* Federal Crop Insurance Corporation.
FLAXSEED; price-support program, 1964 crop 18212
FOOD STAMP PROGRAM:
Definitions, general information 16784
State agencies and eligible households, participation 16786

Page

**Agriculture Department—Continued**
FOREST SERVICE; organization, assignment and reservations of functions 16216
GRAIN SORGHUM; price-support program; 1964 crop 18212
GRAINS:
*See also specific grains.*
Price-support program, 1964 crop 18212
GRAPEFRUIT, marketing:
Arizona, 17030.
California, 17030
Florida, 16314, 16993.
HONEY; price-support program, 1964 crop 18212
HUMANE SLAUGHTER; identification of carcasses 16210
IMPORTS:
Animal semen 18274
Meat limitations 19114
Restrictions, onions 19260
LAND USE ADJUSTMENT PROGRAM; 1964–65 cropland conversion program 18007
LEMONS, marketing; Arizona and California 16078, 16316, 17031, 18045, 18415
LETTUCE, marketing; Texas 16833, 19094
LIMES, marketing; Florida 16258, 19259
LIVESTOCK:
*See also* Meat and meat products; Packers and Stockyards Division.
Humane slaughter; identification of carcasses 16210

## Federal Maritime Commission:

FREIGHT FORWARDERS, independent, ocean:
Agreement under section 15 of Act:
United Forwarders Service, et al., 18185.
Applications for licenses:
Balfour, Williamson Inc.; withdrawn, 19267.
Barrus, Phillip A.; revoked, 17010.
Buchholz & Kuttruff, Inc., 19267.
Cuban American Forwarders Co., Inc., 19267.
Davis Van & Storage, et al., 17010.
Dunlap, Philip A. et al., 19267.
Hilann Forwarding; revoked, 19267.
Hoffman, Allen R., & Co.; withdrawn, 19267.
Korinth Container-Pak, Inc.; revoked, 19267.
Thibodeaux & Co., C. J.; withdrawn, 17010.
Velox Company; withdrawn, 19267.
West Coast Freight Tariff Bureau, Inc.:
Proceeding discontinued, 16876.
Revoked, 17010.
MARITIME CARRIERS:
*See also* Freight forwarders, *above*.
Bills of lading, predated; proposed rule discontinued — 16433
Foreign discrimination affecting U.S. ships; discriminations in U.S.-Uruguayan trade — 16195, 17121
PRACTICE AND PROCEDURE, fees and charges for special services — 18171
RATES, schedules, tariffs, etc.; investigations and hearings:
Alaska Lower Yukon River Area, 16875.
Containerships, Inc., 18020.
Mediterranean Pools, 18020.
San Diego, port of, 18185.
Transcarloading Corp., South Atlantic/Puerto Rico trade, 16876.
TRANSPORTATION AGREEMENTS, terminal agreements, etc.:
Exclusive patronage (dual rate) contract under Public Law 87–346:
North Atlantic Westbound Freight Association, 17127.

## Federal Maritime Commission—Continued

TRANSPORTATION AGREEMENTS, terminal agreements, etc.—Continued
Section 15 agreements:
A/S Det Østasiatiske Kompagni; request for cancellation, 17013.
African Coasters Ltd., 18102.
American Mail Line Ltd., 16269, 17010.
Barber-Fern Line joint service, 19120.
Barber-West African Line joint service, 19266.
Barber-Wilhelmsen Line joint service, 19119, 19120.
Blue Funnel Line, 19120.
Central Gulf Steamship Corp. et al.; request for cancellation, 17012.
Chilean Line, Inc.; terminal agreement, 16438.
Connecticut, State of; terminal agreement, 16875.
Connecticut Terminal Co., Inc.; terminal agreement, 16875.
Continental-Atlantic Corp., 18243.
Dampfschifffahrts-Gesellschaft "Neptun", 17011.
Farrell Lines Inc., 19266.
Holland Afrika Lijn, 17010.
India, Pakistan, Burma & Ceylon/West Coast United States Rate Agreement, 16269.
International Houshold Goods Rate Agreement, 18243.

## Title 3—THE PRESIDENT

### Proclamation 3630

### SIR WINSTON CHURCHILL DAY

**By the President of the United States**

**A Proclamation**

WHEREAS Sir Winston Churchill will celebrate on November 30, 1964 his 90th birthday; and

WHEREAS, in testimony of the American people's deep respect and affection for him, this great national leader and world statesman was, on April 9, 1963, proclaimed an honorary citizen of the United States; and

WHEREAS, by his courage, vision and leadership, his place in the history of freedom is permanently enshrined; and

WHEREAS, in his own lifetime he has come to embody a statesmanship that serves all men's desires for liberty and human dignity; and

WHEREAS, this significant milestone—in the life of this great man—is deserving of special recognition:

NOW, THEREFORE, I, Lyndon B. Johnson, President of the United States of America, do hereby proclaim Monday, November 30, 1964 Sir Winston Churchill Day.

I invite the people of the United States to mark this event and celebrate the occasion by arranging and participating in appropriate ceremonies worthy of this day.

IN WITNESS WHEREOF, I have herewith set my hand and caused the Seal of the United States of America to be affixed.

DONE at the City of Washington this thirtieth day of November, in the year of our Lord nineteen hundred and sixty-four, [SEAL] and of the Independence of the United States of America the one hundred and eighty-ninth.

LYNDON B. JOHNSON

By the President:

W. AVERELL HARRIMAN,
*Acting Secretary of State.*

[F.R. Doc. 64–12367; Filed, Nov. 30, 1964; 11:45 a.m.]

## Title 9—ANIMALS AND ANIMAL PRODUCTS

### Chapter I—Agricultural Research Service, Department of Agriculture

#### SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS AND POULTRY

#### PART 74—SCABIES IN SHEEP

#### Interstate Movement

On October 13, 1964, there was published in the FEDERAL REGISTER (29 F.R. 14078), a notice with respect to a proposal to amend § 74.3(a), Part 74, Subchapter C, Chapter I, Title 9, Code of Federal Regulations. After due consideration of all relevant material submitted in connection with such notice and pursuant to the provisions of the Act of March 3, 1905, as amended, the Act of February 2, 1903, as amended, and sections 4 through 7 of the Act of May 29, 1884, as amended (21 U.S.C. 111–113, 115, 117, 120, 121, 124–126), subparagraph (1) of § 74.3(a) of said Part 74 is amended to read:

**§ 74.3 Designation of eradication areas.**

(a) • • •

(1) Indiana, Iowa, Tennessee, and West Virginia;

• • • • •

(Secs. 4, 5, 23 Stat. 32, as amended, secs. 1, 2, 32 Stat. 791–792, as amended, secs. 1, 3, 33 Stat. 1264, as amended, 1265, as amended; 21 U.S.C. 111–113, 120, 121, 123, 125, Interpret or apply secs. 6, 7, 23 Stat. 32, as amended, secs. 2, 4, 33 Stat. 1264, as amended, 1265, as amended; 21 U.S.C. 115, 117, 124, 126; 19 F.R. 74, as amended)

The amendment adds the State of Indiana to the list of infected and eradication areas since the cooperative sheep scabies eradication program in such State is now being conducted in accordance with the provisions of ADE Memorandum 505.6. This State is presently included in the infected areas as sheep scabies is known to exist in such State. Hereafter, the restrictions pertaining to the interstate movement of sheep from, into, and through infected and eradication areas as contained in 9 CFR Part 74, as amended will apply to this State.

*Effective date.* The foregoing amendment shall become effective 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 25th day of November 1964.

B. T. SHAW,
*Administrator,*
*Agricultural Research Service.*

[F.R. Doc. 64–12234; Filed, Nov. 30, 1964; 8:49 a.m.]

# Title 12—BANKS AND BANKING

## Chapter II—Federal Reserve System

### SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Reg. Q]

### PART 217—PAYMENT OF INTEREST ON DEPOSITS

### Maximum Rates of Interest

1. Effective November 24, 1964, § 217.6 (Supplement to Regulation Q) is amended to read as follows:

**§ 217.6 Maximum rates of interest payable on time and savings deposits by member banks.**

Pursuant to the provisions of section 19 of the Federal Reserve Act and § 217.3, the Board of Governors of the Federal Reserve System hereby prescribes the following maximum rates[1] of interest payable by member banks of the Federal Reserve System on time and savings deposits:

(a) *Maximum rate of 4½ percent.* No member bank shall pay interest accruing at a rate in excess of 4½ percent per annum, compounded quarterly,[2] regardless of the basis upon which such interest may be computed, on any time deposit having a maturity date 90 days or more after the date of deposit or payable upon written notice of 90 days or more.

(b) *Maximum rate of 4 percent.* No member bank shall pay interest accruing at a rate in excess of 4 percent per annum, compounded quarterly,[2] regardless of the basis upon which such interest may be computed:

(1) On any savings deposit, or

(2) On any time deposit having a maturity date less than 90 days after the date of deposit or payable upon written notice of less than 90 days.

2a. The purpose of the amendment is to increase the rates that member banks are permitted to pay on savings deposits and time deposits, including certificates of deposit, to the following levels:

(1) On savings deposits, 4 percent, regardless of the time the funds have been on deposit.

(2) On time deposits and certificates of deposit, 4 percent for maturities of less than 90 days and 4½ percent for all longer maturities.

b. The notice and public procedure described in sections 4(a) and 4(b) of the Administrative Procedure Act, and the prior publication described in section 4(c) of such act, are not followed in connection with this amendment for the reasons and good cause found, as stated in section 1(e) of the Board's rules of procedure (12 CFR 262.1(e)), and especially because in connection with this liberalizing amendment such procedures would prevent the action from becoming effective as promptly as is desirable for the convenience of the banks.

(12 U.S.C. 246(1). Interprets or applies 12 U.S.C. 371b)

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM,
[SEAL] MERRITT SHERMAN,
*Secretary.*

[F.R. Doc. 64–12174; Filed, Nov. 30, 1964; 8:45 a.m.]

[1] The maximum rates of interest payable by member banks of the Federal Reserve System on time and savings deposits as prescribed herein are not applicable to any deposit which is payable only at an office of a member bank located outside of the States of the United States and the District of Columbia.

[2] This limitation is not to be interpreted as preventing the compounding of interest at other than quarterly intervals, provided that the aggregate amount of such interest so compounded does not exceed the aggregate amount of interest at the rate above prescribed when compounded quarterly.

## Chapter III—Federal Deposit Insurance Corporation

### PART 329—PAYMENT OF DEPOSITS AND INTEREST THEREON BY INSURED NONMEMBER BANKS

### Maximum Rates of Interest

Effective November 24, 1964, § 329.6 of the rules and regulations of the Federal Deposit Insurance Corporation (12 CFR 329.6) is amended to read as follows:

**§ 329.6 Maximum rates[12] of interest payable on time and savings deposits by insured nonmember banks.**

(a) *Maximum rate of 4½ percent.* No insured nonmember bank shall pay interest accruing at a rate in excess of 4½ percent per annum, compounded quarterly,[13] regardless of the basis upon which such interest may be computed, on any time deposit having a maturity date 90 days or more after the date of deposit or payable upon written notice of 90 days or more.

(b) *Maximum rate of 4 percent.* No insured nonmember bank shall pay interest accruing at a rate in excess of 4 percent per annum, compounded quarterly,[13] regardless of the basis upon which such interest may be computed:

(1) On any savings deposit, or

(2) On any time deposit having a maturity date less than 90 days after the date of deposit or payable upon written notice of less than 90 days.

The purpose of this amendment is to amend § 329.6 so as to permit insured State nonmember banks to pay a permissible maximum rate of interest of 4½ percent per annum, compounded quarterly, on time deposits which have maturities of 90 days or more from the date of deposit and to pay a permissible maximum rate of interest of 4 percent per annum, compounded quarterly, on savings deposits and time deposits having maturities of less than 90 days.

The notice and public procedure described in sections 4(a) and 4(b) of the Administrative Procedure Act, and the prior publication described in section 4(c) of such Act, are not followed in connection with this amendment for the reasons and good cause found, as stated in § 302.6 of the Federal Deposit Insurance Corporation's procedure and rules of practice, and especially because such notice, procedure, and prior publication are unnecessary as they would serve no useful purpose.

[12] The maximum rates of interest payable by insured nonmember banks on time and savings deposits as prescribed herein are not applicable to any deposit which is payable only at an office of an insured nonmember bank located outside of the States of the United States and the District of Columbia.

[13] This limitation is not to be interpreted as preventing the compounding of interest at other than quarterly intervals: *Provided*, That the aggregate amount of such interest so compounded does not exceed the aggregate amount of interest at the rate above prescribed when compounded quarterly.

(Sec. 9, 64 Stat. 881; 12 U.S.C. 1819. Interprets or applies sec. 18, 64 Stat. 891; 12 U.S.C. 1828)

FEDERAL DEPOSIT INSURANCE CORPORATION,
[SEAL] E. F. DOWNEY,
*Secretary.*

# Title 13—BUSINESS CREDIT AND ASSISTANCE

## Chapter I—Small Business Administration

[Amendment 10; Rev. 4]

### PART 121—SMALL BUSINESS SIZE STANDARDS

### Miscellaneous Amendments

The Small Business Size Standards (Revision 4) (29 F.R. 86), as amended (29 F.R. 2988, 3222, 6945, 7312, 8108, 11525, 11707, 12585, 13571), is hereby further amended by:

1. Amending paragraph (g) of section 121.3–2 by adding thereto as a last sentence "For the purpose of § 121.3–13, a concern need not have a place of business located in the United States." As amended, paragraph (g) of § 121.3–2 reads as follows:

**§ 121.3–2 Definition of terms used in this part.**

• • • • • •

(g) "Concern" means any business entity organized for profit with a place of business located in the United States, including but not limited to an individual, partnership, corporation, joint venture, association, or cooperative. For the purpose of making size determinations, any business entity, whether organized for profit or not, and any foreign business entity, shall be included. For the purpose of § 121.3–13 a concern need not have a place of business located in the United States.

• • • • • •

2. Deleting from paragraph (b) of section 121.3–13, the phrase "provided, however, that the Foreign Claims Settlement Commission certifies to SBA that the claimant qualifies under section 202 (a) of the War Claims Act of 1948, as amended."

**§ 121.3–13 Definition of small business for receiving priority payment under section 213(a) of the War Claims Act of 1948, as amended.**

• • • • • •

(b) *Request for size determination.* Requests for size determinations may be received only from the Foreign Claims Settlement Commission of the United States and determinations of the size status of a claimant shall be made by the SBA regional director for the region in which the claimant resides, or, in the case of claimants residing in foreign countries, by the SBA regional director at Richmond, Virginia.

Dated: November 19, 1964.

Effective date: October 26, 1964.

EUGENE P. FOLEY,
*Administrator.*

[F.R. Doc. 64–12183; Filed, Nov. 30, 1964; 8:45 a.m.]

# Title 14—AERONAUTICS AND SPACE

## Chapter I—Federal Aviation Agency

[Docket No. 6348; Amdt. 39–6]

### PART 39—AIRWORTHINESS DIRECTIVES [NEW]

### Beech Models P35 and S35 Aircraft

The rear elevator control stops located on the control column assembly have been overtrimmed on some Beech Models P35 and S35 aircraft when providing clearance for the elevator cable, which may permit the elevator control column stop fitting to bind between the overtrimmed stops or to go past the stops and jam the control column in the full aft (up elevator) position. To correct this condition, an airworthiness directive is being issued to require inspection and repair of the control wheel column aft stop.

As a situation exists which demands immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (25 F.R. 6489), § 39.13 of Part 39 [New] 14 CFR Part 39 [New]), is hereby amended by adding the following new airworthiness directive:

BEECH. Applies to Models P35 and S35 aircraft, Serial Numbers D–6842 through D–7630, except Serial Numbers D–7610, D–7615, D–7617, D–7620, and D–7625 through D–7628.

Compliance required within 25 hours' time in service after the effective date of this AD, unless already accomplished.

To prevent the elevator control column stop fitting from binding between overtrimmed stops or going past the stops and jamming the control column in the full aft (up elevator) position, accomplish the following:

(a) Remove the large inspection plate on the left firewall. With the control column in the most aft position, mark the contact area on the fixed stops, using the control column fitting stop as a guide. The combined contact area width on the two stops measured in a horizontal plane shall be at least 3/16 inch.

(b) Fabricate and install a new elevator control fixed stop on aircraft having less than 3/16 inch combined contact area width on the two stops measured in a horizontal plane in accordance with Beech Service Bulletin No. 64–19, or an FAA approved equivalent.

(Beech Service Bulletin No. 64–19, covers this same subject.)

This amendment shall become effective December 7, 1964.

(Secs. 313(a), 601, 603; 72 Stat. 752, 775, 776; 49 U.S.C. 1354(a), 1421, 1423)

Issued in Washington, D.C., on November 24, 1964.

C. W. WALKER,
*Acting Director,*
*Flight Standards Service.*

[F.R. Doc. 64–12184; Filed, Nov. 30, 1964; 8:45 a.m.]

[Airspace Docket No. 63–SO–54]

### PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Revocation of Control Area Extensions, Alteration of Control Zones, and Designation of Transition Areas

On October 15, 1964, a notice of proposed rule making was published in the FEDERAL REGISTER (29 F.R. 14186) stating that the Federal Aviation Agency proposed to revoke the control area extensions at Kinston and Rocky Mount, N.C., alter the control zones at Goldsboro and Rocky Mount, N.C., and designate transition areas at Kinston, Goldsboro, and Rocky Mount, N.C.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 [New] of the Federal Aviation Regulations is amended, effective 0001 e.s.t., February 4, 1965, as hereinafter set forth.

1. In § 71.165 (29 F.R. 1073) the Rocky Mount, North Carolina, and the Kinston, N.C., control area extensions are revoked.

2. In § 71.171 (29 F.R. 1101) the Rocky Mount, N.C., control zone is amended to read:

*Rocky Mount, N.C.*

Within a 5-mile radius of the Rocky Mount Municipal Airport (latitude 35°58'00" N., longitude 77°47'30" W.).

3. In § 71.171 (29 F.R. 1101) the Goldsboro, N.C., control zone is amended to read:

*Goldsboro, N.C.*

Within a 5-mile radius of Seymour Johnson AFB (latitude 35°20'20" N., longitude 77°57'50" W.); within 2 miles each side of the ILS localizer SW course extending from the 5-mile radius zone to the LOM and within 2 miles each side of the 261° radial of the Seymour Johnson VOR, extending from the 5-mile radius zone to 8 miles W of the VOR.

4. Section 71.181 (29 F.R. 1160) is amended by adding the Rocky Mount, N.C., transition area as follows:

*Rocky Mount, N.C.*

That airspace extending upward from 700 feet above the surface within 2 miles each side of the 263° and 083° radials of the Rocky Mount VOR, extending from the 5-mile radius control zone to 8 miles E of the VOR.

5. Section 71.181 (29 F.R. 1160) is amended by adding the Kinston, N.C., transition area as follows:

*Kinston, N.C.*

That airspace extending upward from 700 feet above the surface within 2 miles each side of the 047° radial of the Kinston VOR, extending from the 5-mile radius control zone to 8 miles NE of the VOR.

6. Section 71.181 (29 F.R. 1160) is amended by adding the Goldsboro, N.C., transition area as follows:

*Goldsboro, N.C.*

That airspace extending upward from 700 feet above the surface within an 8-mile radius of the Seymour Johnson Air Force Base (latitude 35°20'20" N., longitude 77°-57'50" W.); within 2 miles each side of the ILS localizer SW course, extending from the 8-mile radius area to 12 miles SW of the LOM; within 5 miles S and 8 miles N of the 283° radial of the Seymour Johnson VOR, extending from the 8-mile radius area to 12 miles SW of the VOR; including that airspace extending upward from 1200 feet above the surface bounded on the N by the arc of a 55-mile radius circle centered at latitude 36°57'44" N., longitude 76°24'-44" W., on the E by a line extending along the W boundary of V-1 until intercepting an arc of a 15-mile radius circle centered at the Kinston VOR, thence clockwise along the 15-mile radius circle to the W boundary of V-1W, thence SW along the W boundary of V-1W and V-213 to the S boundary of V-525, on the S by the S boundary of V-525, on the W by a line extending along longitude 78°30'00" W., and on the NW by a line extending through latitude 35°30'00" N., longitude 78°30'00 W. and latitude 36°38'15" N., longitude 77°19'15" W.; including that airspace extending upward from 2,700 feet MSL bounded on the N by the S boundary of V-525, on the E by the W boundary of V-213, on the S by a line extending from latitude 34°17'45" N., longitude 78°25'30" W. to latitude 34°18'30" N., longitude 79°00'00" W., on the W by a line extending from latitude 34°18'30" N., longitude 79°00'00" W. to the intersection of the S boundary of V-525 and longitude 78°30'00" W.

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348(a))

Issued in East Point, Ga., on November 20, 1964.

PAUL H. BOATMAN,
*Acting Director, Southern Region.*

[F.R. Doc. 64-12186; Filed, Nov. 30, 1964; 8:46 a.m.]

[Airspace Docket No. 63-CE-71]

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Alteration of Control Zone and Control Area Extension, Revocation of Control Area Extension and Designation of Transition Area

In a notice of proposed rule making published on December 12, 1963 (28 F.R. 13463), and a supplemental notice of proposed rule making published on May 14, 1964 (29 F.R. 6350), the Federal Aviation Agency proposed to alter the controlled airspace in the Lafayette, Ind., area.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. Due consideration was given to all relevant matter presented.

The Air Transport Association of America and the Director of the Purdue University Airport, Ind., offered no objections to the airspace designations as proposed. However, both objected to the establishment of an instrument approach procedure at Halsmer Airport until such time as communications capability down to the surface of the airport is achieved. This position is based on the contention that use of the procedure would adversely affect operations at the Purdue University Airport because of delay in notification of the completion of an operation at the Halsmer Airport.

The FAA has reviewed the procedures in the vicinity of Lafayette and has found that, with a slight adjustment of one of the missed approach procedures for Purdue University Airport, compatability of procedures can be achieved and no delay to instrument operations at the Purdue University Airport will result from the extension of instrument flight capability to Halsmer Airport.

Subsequent to the publication of the Supplemental Notice, instrument approach procedure AL-220-ADF-1 was cancelled which will permit a reduction in size of the portion of the proposed transition area having a floor of 700 feet, and a less restrictive control zone extension.

In consideration of the foregoing, Part 71 [New] of the Federal Aviation Regulations is amended, effective 0001 e.s.t., February 4, 1965, as hereinafter set forth.

1. Section 71.171 (29 F.R. 1101) is amended by redescribing the Lafayette, Ind. control zone as follows:

Within a 5-mile radius of Purdue University Airport, Lafayette, Ind. (latitude 40°-24'45" N., longitude 86°56'10" W.); within 2 miles each side of the Westpoint, Ind., VOR 038° radial, extending from the 5-mile radius zone to the VOR; within 2 miles each side of the Lafayette, Ind., VOR 144° radial, extending from the 5-mile radius zone to the VOR; and within 2 miles each side of the Purdue University ILS W course, extending from the 5-mile radius zone to the OM.

2. Section 71.181 (29 F.R. 1160) is amended by adding the following transition area:

*Lafayette, Ind.*

That airspace extending upward from 700 feet above the surface within a 6-mile radius of the Purdue University Airport, Lafayette, Ind. (latitude 40°24'45" N., longitude 86°-56'10" W.); within 2 miles each side of the Purdue University ILS W course, extending from the 6-mile radius area to 8 miles W of the OM; within a 5-mile radius of Halsmer Airport, Lafayette, Ind. (latitude 40°23'35" N., longitude 86°48'25" W.); within 2 miles each side of the Lafayette VORTAC 129° radial, extending from the 5-mile radius area to 8 miles SE of the Halsmer Airport; and that airspace extending upward from 1,200 feet above the surface bounded on the E by longitude 86°33'00" W., on the S by latitude 40°07'00" N., on the W by longitude 87°23'-00" W., and on the N by latitude 40°45'00" N.

3. In § 71.165 (29 F.R. 1073) the Lafayette, Ind., control area extension is revoked.

4. Section 71.165 (29 F.R. 1073) is amended by redescribing the Peru, Ind. control area extension as follows:

Within a 25-mile radius of the Bunker Hill AFB, Peru, Ind. (latitude 40°39'38" N., longitude 86°08'31" W.), excluding the portion which coincides with the Lafayette, Ind., transition area and the Fort Wayne, Ind., control area extension; including the airspace NW of Peru bounded on the S by the Lafayette transition area, on the W by V-7, on the N by V-38 and on the E by the Fort Wayne control area extension.

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348)

Issued in Washington, D.C., on November 20, 1964.

H. B. HELSTROM,
*Acting Chief, Airspace Regulations and Procedures Division.*

[Airspace Docket No. 63-WE-9]

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Alteration of Control Zones and Control Area, Revocation of Control Area Extension, and Designation of Transition Area

On July 18, 1964, a notice of proposed rule making was published in the FEDERAL REGISTER (29 F.R. 9721) stating that the Federal Aviation Agency proposed to alter the controlled airspace in the Los Angeles, Calif., terminal area.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

In the description of the portion of the Los Angeles transition area extending upward from 700 feet above the surface, appearing in the notice, errors were made in the printing of the second and final coordinates. The correct coordinates should have been "latitude 34°05'-00" N., longitude 118°15'00" W.", and "latitude 33°53'00" N., longitude 118°-33'00" W.", respectively. Since these errors were of minor significance, it was determined that their correction would be made in the final rule in accordance with the policy of the Federal Register.

In consideration of the foregoing, Part 71 [New] of the Federal Aviation Regulations is amended, effective February 4, 1965, as hereinafter set forth.

1. Section 71.171 (29 F.R. 1101) is amended as follows:

a. The Los Angeles, Calif., control zone is amended to read:

*Los Angeles, Calif. (Los Angeles International Airport)*

Within a 5-mile radius of the Los Angeles International Airport (latitude 33°56'25" N., longitude 118°24'10" W.); within a 3-mile radius of the Hawthorne Municipal Airport, Los Angeles, Calif. (latitude 33°55'20" N., longitude 118°20'05" W.); within 2 miles each side of the Los Angeles ILS localizer E course, extending from the Los Angeles 5-mile radius zone to the OM; within 2 miles each side of the Los Angeles VOR 096° radial, extending from the Hawthorne 3-mile radius zone to 4 miles E of the lift-off end of Hawthorne Municipal Airport Runway 7, excluding the portion N of a line extending from latitude 34°00'43" N., longitude 118°23'30" W., to latitude 33°58'03" N., longitude 118°-28'58" W., and excluding the portion within the Hawthorne Municipal Airport control zone.

b. The Long Beach, Calif., control zone is amended to read:

*Long Beach, Calif.*

Within a 5-mile radius of Long Beach Municipal Airport (latitude 33°49'07" N. longitude 118°09'04" W.) within a 5-mile radius of NAS Los Alamitos, Calif. (latitude 33°47'-30" N., longitude 118°02'50" W.); within 2 miles each side of the Long Beach ILS localizer NW course, extending from the Long Beach 5-mile radius zone to 5 miles NW of the localizer, excluding the portion within a 1-mile radius of Sunset Beach, Calif. Airport (latitude 33°43'08" N., longitude 118°-02'13" W.)

c. The Torrence, Calif., control zone is amended to read:

*Torrence, Calif.*

Within a 3-mile radius of Torrence Municipal Airport (latitude 33°48'10" N., longitude 118°20'20" W.), and within 2 miles each side of the Los Angeles, Calif., VOR 153° radial, extending from the 3-mile radius zone to 7 miles SE of the VOR. This control zone is effective from 0600 to 2200 hours, local time, daily.

d. The Santa Monica, Calif., control zone is amended to read:

*Santa Monica, Calif.*

Within a 3-mile radius of Santa Monica Municipal Airport (latitude 34°00'57" N., longitude 118°27'00" W.); within 2 miles each side of the Santa Monica VOR 231° radial, extending from the 3-mile radius zone to 3 miles SW of the VOR; within 2 miles each side of the Santa Monica VOR 056° radial, extending from the 3-mile radius zone to 5 miles NE of the VOR, excluding the portion S of a line extending from latitude 34°-00'43" N., longitude 118°23'30" W., to latitude 33°58'03" N., longitude 118°28'58" W. This control zone is effective from 0700 to 2300 hours, local time, daily.

2. Section 71.165 (29 F.R. 1073) is amended as follows: The Los Angeles, Calif., control area extension is revoked.

3. Section 71.181 (29 F.R. 1160) is amended as follows: The Los Angeles, Calif., transition area is designated to read:

*Los Angeles, Calif.*

That airspace extending upward from 700 feet above the surface bounded by a line beginning at latitude 34°05'00" N., longitude 118°33'00" W.; to latitude 34°05'00" N., longitude 118°15'00" W.; to latitude 34°00'00" N., longitude 118°15'00" W.; to latitude 34°00'00" N., longitude 118°07'00" W.; to latitude 33°56'00" N., longitude 118°07'00" W.; to latitude 33°56'00" N., longitude 117°53'00" W.; to latitude 33°46'00" N., longitude 117°45'00" W.; to latitude 33°39'00" N., longitude 117°30'00" W.; to latitude 33°30'00" N., longitude 117°30'00" W.; to latitude 33°30'00" N., longitude 117°45'00" W.; to latitude 33°45'00" N., longitude 118°15'00" W.; to latitude 33°45'00" N., longitude 118°22'00" W.; to latitude 33°53'00" N., longitude 118°33'00" W.; thence to point of beginning; and that airspace extending upward from 1,200 feet above the surface bounded by a line beginning at latitude 34°00'00" N., longitude 119°05'00" W.; to latitude 34°00'00" N., longitude 118°33'00" W.; to latitude 33°53'00" N., longitude 118°33'00" W.; to latitude 33°45'00" N., longitude 118°22'00" W.; to latitude 33°45'00" N., longitude 118°15'00" W.; to latitude 33°30'00" N., longitude 117°45'00" W.; to latitude 33°30'00" N., longitude 118°34'00" W.; to latitude 33°28'30" N., longitude 118°34'00" W.; to latitude 33°28'30" N., longitude 119°07'00" W.; to latitude 33°52'03" N., longitude 119°06'59" W.; thence to point of beginning.

4. Section 71.163 (29 F.R. 1068) is amended as follows: Control 1316 is amended to read:

*Control 1316*

That airspace within 5 miles each side of the Los Angeles, Calif., VOR 251° radial extending from the VOR to the Oakland Oceanic Control Area boundary and between lines diverging at an angle of 5° from the 251° radial extending from the Los Angeles VOR to the Oakland Oceanic Control Area boundary, excluding the airspace below 5,000 feet MSL within W-289.

(Secs. 307(a), 1110, Federal Aviation Act of 1958; 49 U.S.C. 1348, 1510, E.O. 10854 (24 F.R. 9565))

Issued in Washington, D.C., on November 20, 1964.

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Alteration of Control Zone and Designation of Transition Area

On September 1, 1964, a notice of proposed rule making was published in the FEDERAL REGISTER (29 F.R. 12478) stating that the Federal Aviation Agency proposed to alter the controlled airspace in the Beeville, Tex., terminal area.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 [New] of the Federal Aviation Regulations is amended, effective 0001 e.s.t., February 4, 1965, as hereinafter set forth.

1. In § 71.171 (29 F.R. 1105) the Beeville, Tex., control zone is amended to read as follows:

*Beeville, Tex.*

That airspace within a 5-mile radius of NAAS Chase Field, Beeville, Tex. (latitude 28°21'50" N., longitude 97°39'40" W.); within 2 miles each side of the NAAS Chase TACAN 129° and 321° radials extending from the 5-mile radius zone to 7 miles SE and NW of the TACAN; and within 2 miles each side of the NAAS Chase VOR 349° radial extending from the 5-mile radius zone to 12 miles N of the VOR.

2. In § 71.181 (29 F.R. 1160) the following transition area is added:

*Beeville, Tex.*

That airspace extending upward from 700 feet above the surface within a 7-mile radius of NAAS Chase Field (latitude 28°21'50" N., longitude 97°39'40" W.); within 2 miles each side of the NAAS Chase TACAN 129° and 321° radials extending from the 7-mile radius area to 10 miles NW and SE of the TACAN; within 2 miles each side of the 339° bearing from the NAAS Chase RBn extending from the 7-mile radius area to 12 miles N of the RBn; and that airspace extending upward from 1200 feet above the surface within an area bounded by a line beginning at latitude 29°00'00" N., longitude 97°17'00" W., thence to the N boundary of V-20 at longitude 97°05'00" W., thence SW via the N boundary of V-20 to latitude 28°07'00" N., thence W via latitude 28°07'-00" N. to the SW boundary of V-163, thence NW via the SW boundary of V-163 to longitude 98°23'00" W., thence to latitude 28°43'30" N., longitude 98°17'30" W., thence to latitude 29°00'00" N., longitude 97°43'00" W., thence to point of beginning.

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348)

Issued in Fort Worth, Tex., on November 19, 1964.

[Airspace Docket No. 63-SW-66]

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Alteration of Control Zone, Designation of Transition Area and Revocation of Control Area Extension

On August 28, 1964, a notice of proposed rule making was published in the FEDERAL REGISTER (29 F.R. 12403) stating that the Federal Aviation Agency proposed to alter the controlled airspace in the Dalhart, Tex., terminal area.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 [New] of the Federal Aviation Regulations is amended, effective 0001 e.s.t., February 4, 1965, as hereinafter set forth.

1. In § 71.171 (29 F.R. 1113) the Dalhart, Tex., control zone is amended to read:

*Dalhart, Tex.*

That airspace within a 5-mile radius of Dalhart Municipal Airport latitude 36°01'10" N., longitude 102°33'10" W.).

2. In § 71.165 (29 F.R. 1079) the Dalhart, Tex., control area extension is revoked.

3. In § 71.181 (29 F.R. 1160) the following transition area is added:

*Dalhart, Tex.*

That airspace extending upward from 700 feet above the surface within a 9-mile radius of Dalhart Municipal Airport (latitude 36°-01'10" N., longitude 102°33'10" W.), and within 2 miles each side of the Dalhart VORTAC 002° radial extending from the 9-mile radius area to 12 miles N of the VORTAC; that airspace extending upward from 1200 feet above the surface within a 12-mile radius of the Dalhart VORTAC, within 10 miles SW and 7 miles NE of the Dalhart VORTAC 324° and 144° radials extending from 20 miles NW to 9 miles SE of the VORTAC, within 10 miles W and 7 miles E of the Dalhart VORTAC 002° and 182° radials extending from 20 miles N to 9 miles S of the VORTAC; and within 5 miles each side of the Dalhart VORTAC 182° radial extending from the 12-mile radius area to 23 miles S of the VORTAC.

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348)

Issued in Fort Worth, Tex., on November 19, 1964.

[Airspace Docket No. 63-SW-90]

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Alteration of Control Zone, Designation of Transition Area, and Revocation of Control Area Extension

On August 21, 1964, a notice of proposed rule making was published in the FEDERAL REGISTER (29 F.R. 11976) stating that the Federal Aviation Agency proposed to alter the controlled airspace in the Lafayette, La., terminal area.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable. Because of the discontinuance of Navy instrument flight operations at New Iberia, La., NAAS, the New Iberia control zone was revoked in Airspace Docket No. 64-SW-48 (30 F.R. 14167) and the 700-foot floor portion of the Lafayette, La., transition area in the vicinity of New Iberia, proposed in the notice, is reduced herein; however, sufficient airspace is retained to provide protection for aircraft executing prescribed instrument arrival and departure procedures in the Lafayette terminal area, including the AL-5040-VOR approach procedure to the New Iberia Airport. Because of changes in activity at Williams Memorial Airport, the Patterson, La., transition area proposed in the notice is no longer required and is not designated herein. Since the changes in the proposed Lafayette transition area impose no additional burden on any person, additional notice and public procedure thereon are unnecessary.

In consideration of the foregoing, Part 71 [New] of the Federal Aviation Regulations is amended, effective 0001 e.s.t., April 1, 1965, as hereinafter set forth.

In § 71.171 (29 F.R. 1129) the Lafayette, La., control zone is amended to read as follows:

*Lafayette, La.*

That airspace within a 5-mile radius of Lafayette, La., Airport (latitude 30°12'00" N., longitude 91°59'40" W.); within 2 miles each side of the Lafayette ILS localizer N course extending from the 5-mile radius zone to 1 mile S of the OM, and within 2 miles each side of the Lafayette VOR 172° radial extending from the 5-mile radius zone to 7 miles S of the VOR.

2. In § 71.165 (29 F.R. 1090, 3225) the New Iberia, La., control area extension is revoked.

3. In § 71.181 (29 F.R. 1160) the following transition area is added:

*Lafayette, La.*

That airspace extending upward from 700 feet above the surface within a 5-mile radius of latitude 30°02'15" N., longitude 91°53'00" W., within 2 miles each side of the Lafayette VOR 139° radial extending from the 5-mile radius area to the VOR, within 2 miles each side of the Lafayette ILS localizer N course extending from the OM to 1 mile S, and within 2 miles each side of the Lafayette VOR 172° radial extending from the VOR to 8 miles S; and that airspace extending upward from 1,200 feet above the surface within an area bounded by a line beginning at latitude 30°46'20" N., longitude 91°50'40" W.; to latitude 30°07'40" N., longitude 91°36'45" W.; to latitude 30°13'00" N., longitude 90°57'00" W.; to latitude 29°53'00" N., longitude 91°-00'00" W.; to latitude 29°47'00" N., longitude 91°11'00" W.; to latitude 29°36'00" N., longitude 91°11'00" W.; thence west via latitude 29°36'00" N., to and clockwise along the arc of a 35-mile radius circle centered at latitude 30°02'15" N., longitude 91°53'00" W.; to latitude 29°56'00" N., thence north to latitude 30°32'00" N., longitude 92°15'00" W.; to point of beginning; within 8 miles N and 5 miles S of the White Lake VOR 090° and 270° radials extending from 7 miles W to 13 miles E of the VOR, and within 8 miles S and 5 miles N of the White Lake VOR 091° and 271° radials extending from 7 miles E to 13 miles W of the VOR.

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348)

Issued in Forth Worth, Tex., on November 19, 1964.

ARCHIE W. LEAGUE,
*Director, Southwest Region.*

[F.R. Doc. 64-12191; Filed, Nov. 30, 1964; 8:46 a.m.]

[Airspace Docket No. 64-EA-48]

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

## PART 73—SPECIAL USE AIRSPACE [NEW]

### Revocation of Restricted Area, and Alteration of Control Area Extension and Control Zone

The purpose of these amendments to Parts 71 and 73 is to revoke the Dover, Del. (Dover AFB) Restricted Area/Military Climb Corridor R-2803 and to delete references to this area from the descriptions of the Dover Control Area Extension and the Dover Control Zone.

On August 24, 1964, the Department of the Air Force submitted a proposal to revoke R-2803. Satisfactory noncorridor climb procedures have been developed for the Dover AFB by the military and air traffic control personnel. Since a requirement for R-2803 no longer exists, retention of this special use airspace is not justified. Concurrently with this action, it is necessary to delete all reference to R-2803 in the description of the Dover Control Area Extension and Control Zone.

Since this climb corridor was designated solely for use by the military, revocation thereof will be less restricted and burdensome to the public. Therefore, notice and public procedure are unnecessary and good cause exists for making this amendment effective immediately.

In consideration of the foregoing, Parts 71 and 73 [New] of the Federal Aviation Regulations are amended, effective immediately, as hereinafter set forth.

1. In § 71.165 (29 F.R. 1073), the Dover, Del. Control Area Extension is amended by deleting in the text, "The portion of this control area extension within R-2803 shall be used only after obtaining prior approval from appropriate authority."

2. In § 71.171 (29 F.R. 1101), the Dover, Del. Control Zone is amended by deleting in the text, "The portion within R-2803 shall be used only after obtaining prior approval from appropriate authority."

3. In § 73.28 (29 F.R. 1244), the Dover, Del. (Dover AFB) Restricted Area/Military Climb Corridor R-2803 is revoked.

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348)

Issued in Washington, D.C., on November 20, 1964.

CLIFFORD P. BURTON,
*Acting Director,*
*Air Traffic Service.*

[F.R. Doc. 64-12188; Filed, Nov. 30, 1964; 8:46 a.m.]

[Docket No. 6342; Amdt. 93-6]

## PART 93—SPECIAL AIR TRAFFIC RULES AND AIRPORT TRAFFIC PATTERNS [NEW]

### Anchorage, Alaska, Terminal Area Rules; Merrill Segment

The purpose of this amendment to Part 93 [New] of the Federal Aviation Regulations is to add a paragraph which provides continuity of two-way radio communications in the Merrill segment of the Anchorage Airport traffic area when the Merrill control tower is not operating.

Subpart D of FAR 93 prescribes the Anchorage, Alaska Airport traffic area. Additionally, it prescribes special rules governing the operation of aircraft at Anchorage Airport and at other airports in the vicinity.

Section 93.35 subdivides the Anchorage Airport traffic area into the International, Lake Hood, Merrill, Elmendorf, and Bryant segments. Section 93.57 sets forth the general operating rules for all segments and requires each pilot to maintain two-way radio communications with the control tower serving the airport of landing or takeoff. Section 93.63 contains the special rules pertaining to operation in the Merrill segment.

Although the Merrill control tower presently is responsible for the Merrill segment on a continuous basis, alternate controls for the Merrill Field airport lights have been installed in the Anchorage Flight Service Station. Because of a comparatively small number of airport operations after sunset during the winter months, this installation will permit the implementation of present plans for a 16-hour operation of the Merrill Tower during approximately seven months of the winter season. During the summer months, a 24-hour operation of the Merrill Tower is required due to the 20-hour day between sunrise and sunset and sufficient twilight during the remaining four hours to permit a considerable amount of airport operations. During the period of time the tower is not operating, the communications requirements for the Merrill segment will be satisfied by using the Anchorage International Airport control tower.

Since the change, herein, is made to facilitate use of the Merrill segment during the present and future winter months when the Merrill Tower is not operating on a continuous basis, and since the change necessitates only minor alterations in communications procedures, the notice and public procedure requirements of the Administrative Procedure Act are impracticable and contrary to the public interest, and the amendment will be made effective 30 days after publication in the FEDERAL REGISTER.

In consideration of the foregoing, § 93.63 of the Federal Aviation Regulations is amended, effective December 31, 1964, by adding the following new paragraph (d) at the end thereof:

§ General rules; Merrill segment.

* * * * *

(d) Whenever the Merrill control tower is not operating, each person piloting an aircraft within the segment shall maintain two-way radio communication with the Anchorage International Airport control tower.

This amendment is made under section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued in Washington, D.C., on November 23, 1964.

HAROLD W. GRANT,
*Acting Administrator.*

# Title 19—CUSTOMS DUTIES

## Chapter I—Bureau of Customs, Department of the Treasury

[T.D. 56313]

## PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

### Special Tonnage Tax and Light Money; Cyprus

NOVEMBER 19, 1964.

The Secretary of State has advised the Secretary of the Treasury that on October 30, 1964, the Department of State obtained satisfactory proof from the Government of Cyprus that no discriminating duties of tonnage or imposts are imposed or levied in ports of Cyprus upon vessels wholly belonging to citizens of the United States, or upon the produce, manufactures, or merchandise imported into Cyprus in such vessels from the United States or from any foreign country.

Therefore, by virtue of the authority vested in the President by section 4228 of the Revised Statutes, as amended (46 U.S.C. 141), which was delegated to the Secretary of the Treasury by the President by Executive Order No. 10289, September 17, 1951, as amended by Executive Order No. 10882, July 18, 1960 (3 CFR, ch. II), and pursuant to authorization given to me by Treasury Department Order No. 190, Rev. 2, October 23, 1963 (28 F.R. 11570), I declare that the foreign discriminating duties of tonnage and imposts within the United States are suspended and discontinued, so far as respects the vessels of Cyprus, and the produce, manufactures, or merchandise imported into the United States in such vessels from Cyprus or from any other foreign country. This suspension and discontinuance shall take effect from October 30, 1964, and shall continue for so long as the reciprocal exemption of vessels wholly belonging to citizens of the United States and their cargoes shall be continued and no longer.

In accordance with this declaration, § 4.22, Customs Regulations, is amended by the insertion of "Cyprus" immediately before "Denmark" in the list of countries exempt from the payment of any higher tonnage duties than are applicable to vessels of the United States and from the payment of light money.

(R.S. 161, as amended, 4219, as amended, 4225, as amended, 4228, as amended; sec. 3, 23 Stat. 119, as amended; 5 U.S.C. 22, 46 U.S.C. 3, 121, 128, 141)

### Chesapeake Bay, Md. and Va.

Pursuant to the provisions of section 10 of the River and Harbor Act of March 3, 1899 (30 Stat. 1151; 33 U.S.C. 403), § 206.50 governing the construction

and maintenance of fishing structures in Chesapeake Bay, Maryland and Virginia, and its navigable tributaries, is hereby amended revising the last sentence of subparagraph (d) (1) and renumbering the fish net stake buoys in the Norfolk District as indicated in paragraph (f), subparagraphs (1) to (14), inclusive, effective on publication in the FEDERAL REGISTER since the renumbered fish net stake buoys are already in use, as follows:

**§ 206.50 Chesapeake Bay, Md. and Va., and its navigable tributaries; fishing structures.**

* * * * *

(d) *Location—(1) Fishing structure limits.* The geographic positions of control points marking the established fishing structure limits are given in paragraphs (e) and (f) of this section, and the limits are shown on United States Coast and Geodetic Survey charts. Positions of intermediate points marking the fishing structure limits which are not given may be found by referring to the charts. The points listed are connected by straight lines unless otherwise indicated. Fishing structure buoys, which are special buoys painted with horizontal black and white stripes, have been placed to mark the fishing structure limits, and regular aids to navigation are used in conjunction with the fishing structure buoys where possible. Aids to navigation used as control points may be renumbered or shifted by the Coast Guard. In such cases the fishing structure limits do not change, and the location of the control point remains fixed at the geographic position indicated. The fishing structure buoys are identified by a series of letters and numbers. The first letter preceding a number indicates the body of water, as "J2" for James River and "H2" for Hampton Roads, for buoys in the Norfolk District. The letter "B" following a number, as "1B" and "2B", indicate buoys in the Baltimore District.

* * * * *

(f) *Norfolk District—(1) South side of Chesapeake Bay between Cape Henry and Willoughby Spit.*

[F.R. Doc. 64–12022; Filed, Nov. 30, 1964; 8:45 a.m.]

# Title 42—PUBLIC HEALTH

## Chapter I—Public Health Service, Department of Health, Education, and Welfare

SUBCHAPTER D—GRANTS

## PART 57—GRANTS FOR CONSTRUCTION OF HEALTH RESEARCH FACILITIES (INCLUDING MENTAL RETARDATION RESEARCH FACILITIES), TEACHING FACILITIES AND STUDENT LOANS

### Subpart B—Grants for Construction of Teaching Facilities

Notice of proposed rule making, public rule making procedures and postponement of effective date have been omitted in the issuance of the following Subpart B—Grants for Construction of Teaching Facilities, which relates solely to grants to public or other nonprofit agencies for the construction of teaching facilities for medical, dental and other health personnel.

These grants provide Federal financial assistance subject to the requirements of Title VI of the Civil Rights Act of 1964, approved July 2, 1964 (78 Stat. 252; P.L. 88–352). Section 601 of that Act provides that no person in the United States shall, on the ground of race, color, or national origin be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Therefore grants made pursuant to the regulations set forth below are subject to this provision and to such applicable rules, regulations or orders as may be issued with the approval of the President to effectuate the provisions of section 601.

The revision below shall become effective on the date of publication in the FEDERAL REGISTER.

New Subpart B is added as follows:

Sec.
57.101 Definitions.
57.102 Eligibility.
57.103 Priority.
57.104 Percentage of participation; amount of the construction grant.
57.105 Nondiscrimination in construction contracts.
57.106 Terms and conditions.
57.107 Good cause for other use of completed facility.
57.108 Payments
57.109 Minimum standards of construction and equipment.

AUTHORITY: The provisions of this Subpart B issued under sec. 727, 77 Stat. 170; 42 U.S.C. 293g. Interpret or apply secs. 720 to 728, 77 Stat. 164–170; 42 U.S.C. 293–293h.

**§ 57.101 Definitions.**

As used in this subpart:

(a) All terms shall have the same meaning as given them in the Act.

(b) "Act" means Part B of Title VII of the Public Health Service Act, as amended.

(c) "Construction grant" means a grant of funds for the construction of teaching facilities as authorized by the Act.

(d) "Major repair" means those repairs to an existing building which would restore the building to sound state, the estimated cost of which is no less than $100,000.

(e) "Equipment" means those items which are necessary for the functioning of the facilities and which are considered depreciable and as having an estimated life of not less than five years. Not included are items of current operating expense such as glassware, chemicals and fuel.

**§ 57.102 Eligibility.**

In order to be eligible for a construction grant, the applicant shall:

(a) Meet the requirements of section 721 of the Act;

(b) Be located in a State, the District of Columbia, Puerto Rico, or the Virgin Islands.

(c) Except in the case of an application with respect to an affiliated hospital, be accredited by a recognized body or bodies approved for such purpose by the Commissioner of Education, except that a new school which (by reason of no, or an insufficient period of operation) is not, at the time of making application for the construction grant, eligible for accreditation by such recognized body or bodies shall be deemed accredited for purposes of receiving a grant if the Commissioner finds, after consultation with the appropriate accreditation body or bodies, that there is reasonable assurance that the school, after completion of the facility and at or prior to the time of graduation of the first class to use such facility, will have met the accreditation standards of such body or bodies; and

(d) In the case of an application with respect to an affiliated hospital, have a written agreement with an accredited school of medicine or a school of osteopathy providing for effective control by the school of the teaching in the hospital.

**§ 57.103 Priority.**

The order of priority in approving applications for construction grants shall be determined on the basis of those factors specified in the Act, and the following: (a) The relative need for increased enrollment and the availability of qualified students, (b) the relative effectiveness of the project in accomplishing the purposes of the Act at the least relative cost to the Federal Government, (c) the relative extent to which financial support is committed by the applicant for the construction and operation of the facility, and (d) the relative ability of the applicant to make efficient and productive use of the facility constructed.

**§ 57.104 Percentage of participation; amount of construction grant.**

(a) *Percentage of participation.* The amount of the construction grant may not exceed 50 percentum of the necessary cost of construction except that in case of a project (1) for a new school or for major expansion of training capacity of an existing school, it may not exceed 66⅔ percentum of such cost, or (2) for a school of public health, it may not exceed 75 percentum of such cost. For the purpose of these regulations a major expansion of training capacity of an existing school occurs or will occur when the Surgeon General determines, on the basis of such information or assurances as he may require, that the first-year enrollment at such a school for each of the ten full school years after the completion of the construction will exceed the highest first-year enrollment at such school for any of the five full school years preceding the year in which the application is made by at least twenty percentum of such highest first-year enrollment, or by twenty students, whichever is greater: *Provided, however,* That where the Surgeon General finds, with respect to a particular school, that such increased enrollment cannot be achieved until the second or third full school year of operation, he may determine that a major expansion or training capacity will occur during the first or second full school year if the increased enrollment will equal such amount in excess of five percent or five students, whichever is greater, as the Surgeon General may specify.

(b) *Amount of construction grant—less than maximum.* In determining the extent to which less than the maximum allowable construction grant may be made, the Surgeon General shall take into consideration the most effective use of available Federal funds to further the purposes of the Act.

**§ 57.105 Nondiscrimination in construction contracts.**

Each construction grant shall be subject to the condition that the grantee shall comply with the requirements of Executive Order 11114, June 22, 1963 (28 F.R. 6485), and with the applicable rules, regulations and procedures prescribed pursuant thereto by the President's Committee on Equal Employment Opportunity (28 F.R. 9812).

**§ 57.106 Terms and conditions.**

In addition to any other requirements imposed by law or determined by the Surgeon General to be reasonably necessary with respect to particular projects to fulfill the purpose of the grant, each construction grant shall be subject to the condition that the applicant will furnish and comply with the following assurances. The Surgeon General may at any time approve exceptions to these terms and conditions where he finds that such exceptions are not inconsistent with the Act and the purposes of the program:

(a) That applicant has a fee simple or such other estate or interest in the site, including necessary easements and rights-of-way, sufficient to assure for a period of not less than 20 years undisturbed use and possession for the purpose of the construction and operation of the facility;

(b) That the Surgeon General's approval of the final working drawings and specifications, which conform to the minimum standards of construction and equipment (§ 57.109), will be obtained before the project is advertised or placed on the market for bidding;

(c) That applicant will perform actual construction work by the lump sum (fixed price) contract method; employ adequate methods of obtaining competitive bidding prior to awarding the construction contract, either by public advertising or circularizing three or more bidders; and award the contract to the responsible bidder submitting the lowest acceptable bid;

(d) That the applicant will enter into no construction contract or contracts for the project or a part thereof, the cost of which is in excess of the estimated cost approved in the application for that portion of the work covered by the plans and specifications, without the prior approval of the Surgeon General;

(e) That applicant will finance all costs in excess of the estimated costs approved in the application and submit to the Surgeon General for prior approval changes that substantially alter the scope of work, functions, utilities or safety of the facility;

(f) That applicant will construct the project, or cause it to be constructed, to final completion in accordance with the grant application and approved plans and specifications;

(g) That applicant will maintain adequate and separate accounting and fiscal records and accounts for all funds provided from any source to pay the cost of the project, and permit audit of such records and accounts at any reasonable time;

(h) That applicant will furnish progress reports and such other information as the Surgeon General may require;

(i) That applicant will provide and maintain competent and adequate architectural or engineering supervision and inspection at the construction site to insure that the completed work conforms with the approved plans and specifications;

(j) That sufficient funds will be available to meet the non-Federal share of the cost of constructing the facility;

(k) That sufficient funds will be available when construction is completed for effective use of the facility for the purposes for which it is being constructed;

(l) That the facility will be used for the purposes for which it is constructed for not less than 10 years after the completion of construction;

(m) That no portion of the facility constructed with funds under the Act will be used for sectarian instruction or as a place for religious worship for at least 10 years after the completion of construction;

(n) That in the case of an application to expand the training capacity of an existing school, the first-year enrollment at such school during the first full school year after the completion of the construction and for each of the next nine school years thereafter will exceed the highest first-year enrollment at such school for any of the five full years preceding the year in which the application is made by at least five percentum of such highest first-year enrollment, or by five students, whichever is greater.

(o) (1) That any laborer or mechanic employed by any contractor or subcontractor in the performance of work on the construction of the facility will be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act (40 U.S.C. 276 et seq.), and will receive compensation at a rate not less than one and one-half times his basic rate of pay for all hours worked in any work week in excess of eight hours in any calendar day or 40 hours in the work week (40 U.S.C. 327–332); and

(2) That the following conditions and provisions will be included in all construction contracts:

(i) The provisions set forth in "Labor Standards for Public Health Service Construction Grant Programs for Hospital and Related Medical Facilities" (PHS No. 930–A–5) pertaining to the Copeland Act (Anti-Kickback) Regulations and Labor Standards (prevailing rates of pay and overtime requirements) except in the case of contracts in the amount of $2,000 or less;

(ii) The contractor shall furnish performance and payment bonds in the full amount of the contract price, and shall maintain, during the life of the contract, adequate fire, workmen's compensation, public liability and property damage insurance;

(iii) Representatives of the Public Health Service and such other persons as the Surgeon General may designate, will have access at all reasonable times to work wherever it is in preparation or progress, and the contractor shall provide proper facilities for such access and inspection.

**§ 57.107 Good cause for other use of completed facility.**

If, within 10 years after completion of any construction for which a construction grant has been made the facility shall cease to be used for the teaching purposes for which it was constructed, the Surgeon General, in determining whether there is good cause for releasing the applicant or other owner of the facility from the obligation so to use the facility, shall take into consideration the extent to which:

(a) The facility will be devoted by the applicant or other owner to the teaching of other medical, dental, or health personnel;

(b) A teaching hospital will be used as a community hospital, diagnostic or treatment center, rehabilitation facility or facility for long-term care as defined in section 625 of the Public Health Service Act, as amended;

(c) There are reasonable assurances that for the remainder of the 10-year period other facilities not previously utilized for teaching professional and other health personnel will be so utilized and are substantially the equivalent in nature and extent for such purposes.

**§ 57.108 Payments.**

(a) Except as provided in paragraph (b) of this section, payments shall be made at the request of the applicant,

shall be based on the cost of the work performed, materials and equipment furnished, and services performed, as follows:

(1) The first installment when not less than 25 percent of the construction of the project has been completed;

(2) A second installment when not less than 50 percent of the construction of the project has been completed;

(3) A third installment when not less than 75 percent of the construction of the project has been completed;

(4) A fourth installment when the project is 95 percent completed; and

(5) The final payment when the project is completed and final inspection by a representative of the Public Health Service is made and the amount certified as due and payable as determined by the audit.

(b) Upon a written request and a showing of necessity by the applicant, the Surgeon General may adopt a different schedule of payments.

**§ 57.109 Minimum standards of construction and equipment.**

(a) *Introduction.* (1) The standards set forth in this subpart have been established by the Surgeon General as required by the Act. These standards constitute minimum requirements for construction and equipment and shall apply to all projects for which Federal assistance is requested under the Act. The Surgeon General may approve plans and specifications which contain deviations from the requirements prescribed, if he is satisfied that the purposes of such requirements have been fulfilled. In addition to these requirements, it is recognized that the project will have to meet the requirements of local codes and ordinances relating to construction.

(2) Hospitals constructed under this Act shall comply with the requirements of Subpart M (Appendix A), General Standards of Construction and Equipment, Public Health Service Regulations, Part 53 of this chapter.

(b) *Architectural.* (1) Facilities shall be fire safe, structurally safe, and so planned as to carry out effectively the proposed program. The following requirements have been established to assure an orderly development of the project and to provide a uniform method for the preparation and review of drawings, specifications, and estimates.

(2) The submission of programs, drawings, construction outlines and estimates shall be in three stages as follows:

(i) *First stage.* (*a*) Program.
(*b*) Schematic plans.
(*c*) Outline specifications.
(*d*) Site survey.
(*e*) Estimated construction costs.

(ii) *Second stage.* (*a*) Preliminary plans.
(*b*) Outline specifications.
(*c*) Revised cost estimates.

(iii) *Third stage.* (*a*) Working drawings.
(*b*) Specifications.
(*c*) Final cost estimates.

(c) *Construction.* (1) One-story buildings shall be constructed of noncombustible materials of not less than one-hour fire-resistive construction throughout except as follows:

(i) Boiler rooms and rooms used for the storage of combustible materials shall be of two-hour fire-resistive noncombustible construction.

(ii) Interior nonload-bearing partitions, other than those enclosing corridors and vertical shafts, may be of noncombustible construction without a fire-resistive rating.

(2) Buildings more than one story in height shall be constructed of noncombustible materials, using a structural framework of reinforced concrete or structural steel except that load-bearing masonry walls and piers may be utilized for buildings up to and including three stories in height. The fire-resistive requirements of the various building elements shall be of not less than the following hourly ratings:

| | Hours |
|---|---|
| Columns, girders, trusses | 1½ |
| Floor construction including beams | 1½ |
| Roof construction including beams | 1 |
| Beams supporting masonry; individually protected | 2 |
| Bearing walls | 2 |
| Corridor partitions | 1 |
| Walls enclosing stairways, elevator shafts, chutes and other vertical shafts, boiler rooms, and rooms used for storage of combustible materials | 2 |

(3) Interior finish walls and ceilings of all exitways, storage rooms, laboratories, and areas of unusual fire hazard shall have a flame-spread rating of less than 20. Interior finish of other areas shall have a flame-spread rating of less than 75 except that 10 percent of the aggregate wall and ceiling areas of any space may have a flame-spread rating up to 200. Flame-spread ratings shall be on the basis of tests conducted in accordance with American Society for Testing Materials, Publication No. E84.

(4) Exit facilities: Exit facilities shall comply with the requirements of the Building Exits Code, National Fire Protection Association Bulletin No. 101.

(d) *Mechanical.* All installations of fuel burning equipment, steam, heating, air conditioning and ventilation, plumbing and other piping systems shall comply with the recommendations of the following:

National Board of Fire Underwriters
85 John Street
New York 38, New York

American Standards Association
70 East 45th Street
New York 17, New York

Boilers shall meet the requirements of the American Society of Mechanical Engineers (A.S.M.E. codes relating to pressure vessels), and shall be installed to meet all requirements of State and local codes and regulations.

(e) *Electrical.* All electrical installations and equipment shall comply with the requirements of local and State codes and the applicable sections of the National Electrical Code and the following:

(1) *Hazardous locations.* Installations and equipment in rooms in which flammable anesthetic and disinfecting agents are used or stored shall comply with the requirements of NFPA No. 56 and No. 70.

(2) *Fire alarms.* Manually operated fire alarm system installations shall comply with the requirements of NFPA No. 72 and shall be located as required by the Building Exits Code, NFPA No. 101.

(3) *Radiation protection.* Radiation protection in rooms in which X-ray, gamma-ray, or beta-ray producing equipment is used shall comply with the requirements of the following handbooks of the National Bureau of Standards:

Handbook 55—Protection Against Betatron-Synchrotron Radiations up to 100 Million Electron Volts.
Handbook 73—Protection Against Radiations From Sealed Gamma Sources.
Handbook 76—Medical X-ray Protection up to Three Million Volts.

(4) *Emergency electric service.* Emergency exit lighting shall comply with the requirements of the National Electrical Code and shall be located as required by the Building Exits Code.

(f) *Elevators, dumbwaiters, and escalators.* Installation of elevators, dumbwaiters, and escalators shall comply with the requirements of the American Standard Safety Code for Elevators, Dumbwaiters, and Escalators, ASA A17.1–1960.

Dated: November 2, 1964.

[SEAL] JAMES M. HUNDLEY,
*Acting Surgeon General.*

Approved: November 23, 1964.

ANTHONY J. CELEBREZZE,
*Secretary of Health, Education, and Welfare.*

# Title 45—PUBLIC WELFARE

## Chapter I—Office of Education, Department of Health, Education, and Welfare

## PART 150—PRODUCTION AND DISTRIBUTION OF CAPTIONED FILMS FOR THE DEAF

Part 150 of Title 45 of the Code of Federal Regulations is revised, primarily to reflect the statutory amendments by P.L. 87–715, to read as follows. The regulations in this part will be subject to such applicable regulations under the Civil Rights Act of 1964 (P.L. 88–352) as may be approved by the President.

Sec.
150.1 Definitions.
150.2 Objectives of the loan service.
150.3 Objectives of research, production of films, and training of persons.
150.4 Applications to borrow films.
150.5 Obligations of borrowers.

AUTHORITY: The provisions of this Part 150 issued under secs. 1–4, 72 Stat. 1742–1743, as amended, sec. 1, 76 Stat. 654; 42 U.S.C. 2491–2494.

**§ 150.1 Definitions.**

As used in this Part 150:

(a) "Act" means Public Law 85–905, 72 Stat. 1742, approved September 2, 1958, as amended (42 U.S.C. 2491–2494).

(b) "Borrower" means an individual or a group of persons certified by the U.S. Office of Education to be eligible to use captioned films for the deaf.

(c) "Deaf person" means a person whose hearing is so severely impaired as to be non-functional for the ordinary purposes of living.

(d) "Film" means a sound or silent motion picture or kinescope, a filmstrip (with or without accompanying sound, disc, tape or film), slides, and transparencies.

(e) "Group of deaf persons" means a class, club, school or other gathering of three or more deaf persons.

(f) "Nonprofit purposes" means that the exhibition of films borrowed pursuant to the Act is not intended to result in monetary gain or other tangible economic benefit to the individual, institution, or organization borrowing or exhibiting such films. The payment of reasonable rent for the use of equipment or meeting place for such an exhibition, or reasonable payment for the hire of a projectionist, does not prevent an exhibition from being one for nonprofit purposes.

(g) "United States" means the several States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa and the other insular possessions of the United States.

**§ 150.2 Objectives of the loan service.**

(a) The objectives of the loan of captioned films under the Act are to promote the general welfare of deaf persons by:

(1) Bringing to deaf persons understanding and appreciation of those films which play such an important part in the general and cultural advancement of hearing persons;

(2) Providing to deaf persons, through such films, enriched educational and cultural experiences through which they can be brought into better touch with the realities of their environment; and

(3) Providing to deaf persons a wholesome and rewarding experience which they may share together.

(b) Such objectives are to be accomplished by acquiring and captioning films and by lending films for exhibition for nonprofit purposes under the conditions set forth in these regulations.

**§ 150.3 Objectives of research, production of films, and training of persons.**

(a) The objectives of providing for research in the use of educational and training films for deaf persons, for the production and distribution of such films, and for the training of persons in the use of films for deaf persons, are:

(1) To promote the academic, cultural and vocational advancement of deaf persons; and

(2) To foster on the part of hearing persons a better understanding of the problems encountered by deaf persons.

(b) Those objectives are to be accomplished by:

(1) Conducting or contracting for the conduct of research in the use of educational and training films for deaf persons;

(2) Producing or contracting for the production of such films;

(3) Providing materials, conducting conferences, and giving consultation and training, in the use of films for deaf persons; and

(4) Distributing, for nonprofit purposes under the conditions set forth in these regulations, educational and training films for deaf persons for exhibition to teachers and to professional workers with deaf persons.

**§ 150.4 Applications to borrow films.**

An application to borrow films shall be submitted on a form provided for that purpose, which may be obtained from Captioned Films for the Deaf, U.S. Office of Education, Department of Health, Education, and Welfare, Washington, D.C., 20202.

**§ 150.5 Obligations of borrowers.**

(a) The borrower shall be responsible for assuring that:

(1) No admission or other fee will be charged to anyone for the purpose of viewing the borrowed film;

(2) The borrowed film will not be exhibited by television without the prior approval of Captioned Films for the Deaf;

(3) The borrowed film will not be used in any manner that will infringe upon or violate any copyright interest;

(4) Exhibition of entertainment or general interest films will be limited to groups of deaf persons, or to individual deaf persons under conditions described in subparagraph (6) of this paragraph. (This does not preclude at exhibitions the occasional attendance of persons who are not deaf persons so long as the audience is composed predominately of deaf persons.)

(5) Educational and training films for deaf persons (as well as films of general interest which may be shown for the purpose of promoting better understanding, on the part of hearing persons, of deafness and the problems faced by deaf persons) may be exhibited to groups of deaf persons, to groups or individuals with hearing who may be working, or training to work, with deaf persons, such as teachers, professionals, interpreters and the like, or to individual deaf persons under conditions described in subparagraph (6) of this subparagraph.

(6) Borrowed captioned films may be exhibited to individual deaf persons only with the prior approval of Captioned Films for the Deaf. Such an approval will be granted, in the discretion of Captioned Films for the Deaf, when there are extenuating circumstances which preclude the individual deaf person from attending an exhibition for a group of deaf persons. Such extenuating circumstances include, among others:

(i) A demonstrated need for purposes of the education or training of a deaf person for the exhibition of captioned films in his home rather than at an exhibition for a group of deaf persons, and

(ii) The physical disability, quarantine or isolation of the individual deaf person such as to make it impracticable for him to attend an exhibition for a group of deaf persons.

(7) The borrower will pay the transportation costs for the return of films as provided in subparagraph (6) of paragraph (b) of this section but will not be required to pay for their use.

(b) In order to benefit the greatest possible number of persons who may wish to use films and to expedite the distribution of films:

(1) The borrower shall be responsible for the safekeeping of the borrowed film from the time of its receipt until it is returned or delivered to a common carrier for return. The borrower may be required to pay the replacement costs of any borrowed film that is lost or destroyed or to pay the cost of repairing damage occurring to a borrowed film during the period in which the borrower is responsible for the film's safekeeping.

(2) The borrower shall exercise care in the projection of films. This includes using a suitable projector and a qualified projectionist.

(3) The borrower shall not repair a borrowed film that is damaged nor rewind a borrowed film prior to its return.

(4) The borrower shall return any film primarily designed for entertainment purposes on the first day, other than a Sunday or holiday, following the scheduled date of exhibition. Return of the borrowed film may be delayed if the exhibition thereof is postponed because of late receipt of the film, but in any

event the film shall be returned within 72 hours after its receipt.

(5) Educational and training films for deaf persons will be clearly labeled and designated as such, with the maximum time of retention indicated. The borrower shall return such a film within such period of time from the date of its receipt as is specified for the particular film.

(6) The borrower shall return any film in its containers (cans and shipping cases) and pay the return transportation costs. The addressed return label which will be furnished with each film loaned must be properly affixed to the container.

(7) The borrower shall, for each exhibition of each film borrowed, report the identity of the individual or group of deaf persons who viewed the film, the date of its exhibition, the number of deaf persons and other persons present at its exhibition, and the comments made by the individuals or the group. An appropriate reporting form will be sent to each borrower for each loan.

(c) The U.S. Office of Education reserves the right to refuse the additional loan of films to a borrower in the event of flagrant or persistent violation of the regulations in this part.

Dated: November 4, 1964.

[SEAL] WAYNE O. REED,
*Acting U.S. Commissioner of Education.*

Approved: November 23, 1964.

ANTHONY J. CELEBREZZE,
*Secretary of Health, Education, and Welfare.*

## DEPARTMENT OF AGRICULTURE

### Commodity Exchange Authority

[ 17 CFR Parts 15, 19 ]

### REPORTS BY MERCHANTS, PROCESSORS, AND DEALERS; GENERAL PROVISIONS

### Notice of Proposed Rule Making

Notice is hereby given, in accordance with section 4 of the Administrative Procedure Act (5 U.S.C. 1003), that the Department of Agriculture, pursuant to the authority of section 8a of the Commodity Exchange Act, as amended (7 U.S.C. 12a), is considering the issuance of a regulation under the Commodity Exchange Act to be designated new § 19.04 of Part 19, Chapter I, Title 17, Code of Federal Regulations (17 CFR Part 19), and the amendment of §§ 15.02, 19.00, and the present 19.04 thereof (17 CFR 15.02, 19.00, and 19.04), as follows:

1. The present § 19.04, *Time and place of filing reports*, would be redesignated as § 19.10, and immediately following § 19.03, a new § 19.04 would be inserted reading as follows:

**§ 19.04 Merchants, processors, and dealers in potatoes and potato products.**

(a) *Details of cash (spot) potato position.* Merchants, processors, and dealers in potatoes and potato products shall show in each report the amount of:

(1) Potatoes being raised or expected to be raised by such persons in the ensuing 12 months, including the potato acreage in each State;

(2) Stocks of potatoes owned;

(3) Unfilled fixed-price purchase commitments of potatoes;

(4) Unfilled fixed-price sales commitments of potatoes; and

(5) Stocks of potato products owned or potatoes in process of manufacture, unfilled fixed-price purchase commitments, and unfilled fixed-price sales commitments of potato products, identified as to kind of product.

(b) *Standards and conversion factors.* Every such merchant, processor, or dealer shall, in computing his cash (spot) position, use such standards and conversion factors with respect to potato products as are usual in the potato trade. If it is the regular business practice of such merchant, processor, or dealer to exclude certain potato products in determining his cash (spot) position for hedging (as defined in section 4a of the act), the same shall be excluded in the report. Such merchant, processor, or dealer shall furnish to the Commodity Exchange Authority upon request detailed information concerning the potato products so excluded.

**§ 15.02 [Amended]**

2. In the table under § 15.02, *Reporting forms*, on the line for potatoes, "604" would be substituted for "None" in the last column, to provide the information that merchants, processors, and dealers in potatoes are required to file reports on form 604 when they hold a reportable futures position.

3. In § 19.00, the word "or" would be deleted after "19.02," and the phrase "or 19.04," would be inserted after "19.03,". As so amended, § 19.00 would read as follows:

**§ 19.00 Information to be furnished by merchants, processors, and dealers.**

Every person engaged in merchandising, processing, or dealing in any of the commodities or products listed in §§ 19.01, 19.02, 19.03, or 19.04, who holds or controls a reportable position in such commodity or commodities, shall submit a report to the Commodity Exchange Authority on the appropriate series 04 form, which shall show the information hereinafter specified. All such reports shall show such information as of the close of business on Friday of each week, unless a different reporting period is authorized in writing by the Commodity Exchange Authority.

4. Paragraph (b) of redesignated § 19.10, *Time and place of filing reports* (formerly § 19.04), would be amended by inserting after the word *"cotton"* the words *"and potatoes"*. As so amended, § 19.10(b) would read as follows:

**§ 19.10 Time and place of filing reports.**

. . . . . .

(b) Reports with respect to transactions in *cotton and potatoes*—to the Commodity Exchange Authority office in New York, N.Y.

NOTE. Sections 19.05 through 19.09 reserved for future use.

Any person who wishes to submit written data, views, or arguments on the proposed regulation and amendments to the regulations may do so by filing them with the Administrator, Commodity Exchange Authority, United States Department of Agriculture, Washington, D.C., 20250, within 30 days after publication of this notice in the FEDERAL REGISTER.

All written submissions made pursuant to this notice will be made available for public inspection at such times and places and in a manner convenient to the public business (7 CFR 1.27(b)).

Done at Washington, D.C., this 25th day of November 1964.

ALEX C. CALDWELL,
*Administrator,*
*Commodity Exchange Authority.*

## ATOMIC ENERGY COMMISSION

[ 10 CFR Ch. 1 ]

[Docket Nos. RM-102-1; PRM-102-A]

### CONSIDERATION OF POSSIBLE FINDING OF PRACTICAL VALUE

### Scheduling of Informal Conference and Public Rule Making Hearing

The Atomic Energy Commission published a notice in the FEDERAL REGISTER on July 10, 1964, that it has under consideration the question whether a finding of practical value should be made pursuant to § 102 of the Atomic Energy Act of 1954, as amended, with respect to some type or types of light water, nuclear power reactors. By notice of August 22, 1964, published in the FEDERAL REGISTER, the proceeding was consolidated with a petition for rule making filed by The National Coal Policy Conference, Inc., The National Coal Association, and The United Mine Workers of America. This notice also stated that the Commission would hold a public rule making hearing in this proceeding.

Notice is hereby given that the Commission will hold an informal Conference on December 17, 1964, at 9:30 a.m., in the hearing room of the United States Atomic Energy Commission, 4915 St. Elmo Avenue, Bethesda, Md. The purpose of the conference will be to assist those who plan to participate in the hearing to focus upon the principal matters to be considered at the hearing.

Notice is also given that a public rule making hearing will be held on January 28, 1965, at 10:00 a.m., in the auditorium of the United States Atomic Energy

Commission, Germantown, Md. The hearing will be conducted as a legislative type hearing without the right accorded to public participants to examine or cross-examine witnesses.

(Sec. 102, 68 Stat. 936; 42 U.S.C. 2132; sec. 161, 68 Stat. 948; 42 U.S.C. 2201)

Dated at Washington, D.C., this 30th day of November 1964.

For the Atomic Energy Commission.

W. B. McCool,
*Secretary to the Commission.*

[F.R. Doc. 64-12368; Filed, Nov. 30, 1964; 12:02 p.m.]

# FEDERAL AVIATION AGENCY

## [ 14 CFR Part 71 [New] ]

[Airspace Docket No. 64-CE-62]

## CONTROL ZONE AND TRANSITION AREA

### Proposed Alteration and Designation

The Federal Aviation Agency is considering an amendment to Part 71 [NEW] of the Federal Aviation Regulations to alter controlled airspace in the Lincoln, Nebr., terminal area.

The following controlled airspace is presently designated in the Lincoln, Nebraska, terminal area:

The Lincoln, Nebraska, control zone is designated as that airspace within a 5-mile radius of Lincoln AFB (latitude 40°50'35'' N., longitude 96°45'42'' W.); and within 2 miles either side of the Raymond, Nebraska, VORTAC 195° and 015° radials, extending from the 5-mile radius zone to 12 miles NE of the VORTAC, and within 2 miles either side of the Lincoln ILS localizer S course extending from the 5-mile radius zone to 5 miles S of the OM.

The Federal Aviation Agency, having completed a comprehensive review of the terminal airspace structure requirements in the Lincoln terminal area, including studies attendant to the implementation of the provisions of Civil Air Regulations Amendments 60-21 and 60-29, proposes to take the following airspace actions:

1. Alter the Lincoln control zone by redesignating it as that airspace within a 6-mile radius of Lincoln AFB (latitude 40°50'48'' N., longitude 96°45'32'' W.); and within 2 miles each side of the Lincoln ILS localizer N course extending from the 6-mile radius to 14 miles N of Lincoln AFB and within 2 miles either side of the Raymond VORTAC 015° radial extending from the 6-mile radius to 8 miles N of the Raymond VORTAC; and within 2 miles each side of the Raymond VORTAC 187° radial extending from the 6-mile radius to 13 miles S of the Raymond VORTAC, excluding the airspace within a 1-mile radius of Arrow Airport (latitude 40°52'00'' N., longitude 96°39'15'' W.).

2. Designate a Lincoln, Nebraska, transition area as that airspace extending upward from 700 feet above the surface within a 9-mile radius of Lincoln AFB (latitude 40°50'48'' N., longitude 96°45'32'' W.); and within 5 miles W and 9 miles E of the Lincoln AFB ILS localizer S course, extending from the 9-mile radius to 13 miles S of ILS OM; and that airspace extending upward from 1,200 feet above the surface bounded on the E by longitude 96°23' W., on the S by the N edge of V-216, on the W by longitude 97°30' W., and on the N by the S edge of V-172; and that airspace extending upward from 3,500 feet MSL SW of Lincoln, bounded on the E by longitude 97°30' W., on the S by the N edge of V-216, on the W by longitude 98°00' W., and on the N by the S edge of V-138; and that airspace, NW of Lincoln, bounded on the E by longitude 97°30' W., on the S by the N edge of V-6, on the W by a line 5 miles E of and parallel to the Grand Island VORTAC 360° radial, and on the N by the S edge of V-172, excluding the Hastings, Nebraska, transition area.

The proposed 3,500 foot MSL transition area northwest of Lincoln is designed to abut the proposed Grand Island, Nebraska, transition area, as set forth in the Notice of Proposed Rule Making, Docket No. 64-CE-66. The proposed transition area also excludes the Hastings, Nebr., transition area which is the subject of Notice of Proposed Rule Making, Docket 64-CE-62.

The floors of the airways which traverse the transition area proposed would automatically coincide with the floors of the transition area.

The proposed control zone is required to contain aircraft executing departures and missed approach procedures until reaching 700 feet above the ground. The control zone extensions to the south and north are required to protect the aircraft executing approach procedures, both civil and military, to Lincoln AFB. New public use approach procedures are proposed utilizing the Lincoln ILS back course, and Raymond VOR which provide straight-in landing minimums to the south.

The proposed 700-foot AG, 1,200-foot AG, and 3,500-foot MSL transition areas are necessary to contain all holding, random departures, missed approaches, transition procedures, and random radar vectoring by Lincoln approach control and Kansas City Air Traffic Control Center of arrivals and departures operating to and from Lincoln AFB and the Omaha terminal area.

Certain minor revisions to prescribed instrument procedures would be effected with the actions proposed herein, but operational complexities would not be increased nor would aircraft performance characteristics or present landing minimums be adversely affected.

The majority of the area proposed in the Lincoln transition area is presently contained within the Omaha Control Area Extension. A new Omaha transition area will be proposed in the near future. If the proposed Lincoln transition area and future proposed Omaha transition area becomes effective, the Omaha control area extension will be cancelled.

Specific details of procedures and minimum instrument flight rule altitudes that would be required may be examined by contacting the Chief, Airspace Branch, Air Traffic Division, Central Region, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Director, Central Region, ATTN: Chief, Air Traffic Division, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110. All communications received within forty-five days after publication of this notice in the Federal Register will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The public Docket will be available for examination by interested persons in the office of the Regional Counsel, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110.

This amendment is proposed under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued at Kansas City, Mo., on November 18, 1964.

Edward C. Marsh,
*Director, Central Region.*

[F.R. Doc. 64-12193; Filed, Nov. 30, 1964; 8:46 a.m.]

## [ 14 CFR Parts 71, 73 [New] ]

[Airspace Docket No. 64-WE-47]

## TEMPORARY RESTRICTED AREA AND CONTROLLED AIRSPACE

### Proposed Designation and Alteration

The Federal Aviation Agency is considering an amendment to Parts 71 and 73 [New] of the Federal Aviation Regulations which would establish a restricted area at Hanksville, Utah and alter the description of the continental control area in order to reflect the establishment of the restricted area.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Western Region, Attention: Chief, Air Traffic Division, Federal Aviation Agency, 5651 West Manchester Avenue, Post Office Box 90007, Airport Station, Los Angeles, Calif., 90009. All communications received within 45 days after publication of this notice in the Federal Register will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Agency, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, D.C. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

The Air Force has advised the FAA that a restricted area is required to contain a series of off-range missile firings in support of a classified project. The launch area for these firings would be located near Hanksville, Utah, and the missile payload would impact in the White Sands, New Mexico, restricted area complex. No restricted area corridor from the launch site to the impact area is required since the in-flight portion of the project will be conducted at or above FL 600 and would not affect present aeronautical activity. However, this in-flight phase will be the subject of a waiver to Part 101 of the Federal Aviation Regulations to be issued by the FAA.

The Air Force has stated that the restricted area is needed for two periods of no more than 30 days each year, with notification of intended use to be given at least six months in advance. The first launch period requested would be from May 15, 1965 to June 15, 1965. Three to five missile launches would be scheduled for each 30-day period and missiles would be launched only between 0530 and 1800 hours m.s.t. The launch-site restricted area would be activated only long enough to clear the area of air traffic and to launch the missile. Immediately after the launching, air traffic control of the area would be returned to the FAA under a joint-use agreement. Direct communications would be available between the launch director and the Denver ARTC Center.

The Air Force has assured the FAA that the proposed restricted area would not be activated at the same time as restricted areas R-6408 and R-6409. This would permit the establishment of convenient alternate or by-pass routes for other users of the airspace whenever necessary. Also, notice of a proposed missile launching would be given to the Denver ARTC Center to permit sufficient time to clear the area of non-participating air traffic. In an emergency situation, the launch director would be able to hold the missile firing any time prior to "lift-off."

Almost all of the land underlying the proposed restricted area is State or Federally-owned and there are no known inhabitants within the area. Agreements for use of the land during missile firings will be negotiated, including agreements with lessees of the State and Federal lands and the owners of any privately-owned property.

In consideration of the foregoing, the FAA proposes the airspace actions as hereinafter set forth.

1. R-6411, Hanksville, Utah, would be designated as follows:

*Boundaries.* Beginning at latitude 38°34'-50'' N., longitude 110°33'00'' W.; to latitude 38°27'45'' N., longitude 110°23'30'' W.; to latitude 38°06'40'' N., longitude 110°03'50'' W.; to latitude 38°01'15'' N., longitude 110°-14'30'' W.; to latitude 38°23'35'' N., longitude 110°31'30'' W.; to latitude 38°33'10'' N., longitude 110°36'10'' W.; thence clockwise along the arc of a circle with a 1.5 nmi radius centered at latitude 38°34'00'' N., longitude 110°34'36'' W.; to the point of beginning.

*Designated altitudes:* Surface to FL 600.

*Time of designation:* 0530 to 1800 hours MST, May 15, 1965, through June 15, 1965 unless cancelled sooner by a Notice to Airmen.

*Controlling Agency:* Federal Aviation Agency, Denver ARTC Center.

*Using Agency:* Air Force Missile Development Center, Air Force Systems Command, Holloman AFB, New Mexico.

2. The description of the continental control area would be altered to include R-6411.

These amendments are proposed under section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued in Washington, D.C., on November 24, 1964.

H. B. Helstrom,
*Acting Chief, Airspace Regulations and Procedures Division.*

[F.R. Doc. 64-12194; Filed, Nov. 30, 1964; 8:47 a.m.]

## [ 14 CFR Part 91 [New] ]

[Docket No. 6247; Notice 64-47A]

## FLIGHT TEST AREAS

### Extension of Comment Period

The Federal Aviation Agency published a Notice of Proposed Rule Making in the Federal Register on October 17, 1964 (29 F.R. 14368), announcing its consideration of amendments to Part 91 [New] of the Federal Aviation Regulations which eliminate the present requirement for obtaining an approved flight test area for flight testing of aircraft.

The Aerospace Industries Association of America (AIA), which represents a substantial number of aircraft manufacturers in the United States, has requested additional time in which to consolidate the AIA position with respect to the proposed amendment and an opportunity to meet with Agency personnel to discuss the subject.

Accordingly, I find that the Aerospace Industries Association has a substantial interest in the proposed rule making and that good cause exists for granting of its request. Therefore, the time period for submission of comment on Notice No. 64-47 is extended to December 31, 1964.

The substance of any meetings between the AIA and the FAA will be documented and placed in the Rules Docket for examination by interested persons.

Communications should identify the regulatory docket or notice number and be submitted in duplicate to the Federal Aviation Agency, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, D.C., 20553. All comments received will be available before and after the closing date for comments in the Rules Docket for examination by interested persons.

Issued in Washington, D.C., on November 25, 1964.

Clifford P. Burton,
*Acting Director, Air Traffic Service.*

## DEPARTMENT OF DEFENSE

### Department of the Army

### DESCRIPTION OF CENTRAL AND FIELD AGENCIES

### Statement of Organization and Functions

Section 2 of the Statement of Organization and Functions, Department of the Army, appearing at 28 F.R. 4029, April 24, 1963, and amended at 28 F.R. 4624, May 8, 1963, is further amended by revising paragraph (a); by designating the present text of paragraph (b) as subparagraph (1), and adding new subparagraph (2); by revising paragraphs (c), (d), (e), (f), and (g); by adding new paragraph (g–1); by revising paragraph (h); by adding new paragraphs (h–1), (s–1) and (s–2); and by revising paragraphs (v–1), (dd) and (ll), to read as follows:

(a) *Office of the Secretary of the Army.* The Office of the Secretary of the Army is composed of the Secretary, the Under Secretary, three Assistant Secretaries, the Director of Civil Defense, the General Counsel, the Administrative Assistant, the Chief of Legislative Liaison, the Chief of Public Information, and such staff as may be required.

(b) *Secretary of the Army.* (1) • • •

(2) The Secretary of the Army, pursuant to Executive Order 10952 of July 20, 1961 (26 F.R. 6577), as amended, has been assigned responsibility for the development and execution of the civil defense program assigned by the President to the Secretary of Defense.

(c) *Authority of the Under and Assistant Secretaries, the Director of Civil Defense, the General Counsel, and the Administrative Assistant.* Subject to the direction and control of the Secretary of the Army, the Under Secretary of the Army, the Assistant Secretaries of the Army, the Director of Civil Defense, the General Counsel, and the Administrative Assistant are authorized and directed to act for the Secretary of the Army within their respective fields of responsibility as set forth in DA General Orders and as further directed by the Secretary. This authority extends not only to actions within the DA, but also to relationships and transactions with the Congress and other governmental and nongovernment organizations and individuals. These officials are responsible for the exercise of direction and supervision over matters pertaining to the formulation, execution, and review of policies, plans, and programs within their respective functional areas, including the establishment of objectives and appraisal of performance.

(d) *Under Secretary of the Army.* The Under Secretary of the Army is the deputy to the Secretary of the Army and, as his principal civilian assistant, acts with full authority of the Secretary in the general management of the department. He is responsible for the following:

(1) Manpower, including:

(i) Manpower management.

(ii) Military and civilian personnel administration.

(iii) National Guard, Reserve and ROTC affairs.

(iv) Health and medical matters.

(v) Personnel security.

(vi) Morale and welfare.

(vii) Disciplinary matters and custody of military prisoners.

(viii) Troop information and education.

(ix) Employee grievances and fair employment matters.

(2) International affairs, including:

(i) Civil affairs, including civil administration of the Ryukyu Islands.

(ii) Canal Zone Government and Panama Canal Company.

(iii) Military support of the Civil Defense Program.

(iv) Cold war activities, including special warfare, civic action, and counterinsurgency.

(v) Intelligence, counterintelligence, and communications security.

(e) *Assistant Secretary of the Army (Financial Management).* The Assistant Secretary of the Army (Financial Management) is responsible for the following:

(1) Financial Management, including:

(i) Budget and Funding.

(ii) Accounting and accounting systems.

(iii) Disbursement and collection of funds.

(iv) Claims, reports of survey and matters pertaining to loss of funds.

(v) Contract financing.

(vi) Audit activities.

(vii) Programing concepts and systems.

(viii) Automatic Data Processing Equipment Program (exclusive of procurement), and all aspects of ADP policy and administration.

(ix) Operations research.

(x) Management engineering policy and programs.

(xi) Progress and statistical reporting.

(2) Civil aviation affairs.

(f) *Assistant Secretary of the Army (Installations and Logistics).* The Assistant Secretary of the Army (Installations and Logistics) is responsible for the following:

(1) Logistics, including:

(i) Determination of materiel requirements.

(ii) Procurement and production.

(iii) Materiel management.

(iv) Logistic services.

(v) Military Assistance Program (exclusive of Financial Management).

(vi) Industrial mobilization.

(2) Installations, including:

(i) Installations planning and programing.

(ii) Facilities and real property management.

(iii) Construction.

(iv) Housing and public quarters.

(g) *Assistant Secretary of the Army (Research and Development).* The Assistant Secretary of the Army (Research and Development) is responsible for the following:

(1) Research and Development, including:

(i) Basic and applied research.

(ii) Research, development, test and evaluation (RDTE) of weapons, weapons systems, and Army materiel.

(iii) RDTE budget and funding programs.

(iv) Acquisition and utilization of research and development facilities and equipment.

(v) RDTE procurement, including the application of procurement policy thereto.

(vi) Integration of technology with military requirements.

(vii) Army Scientific Advisory Panel matters.

(2) Mapping and Geodetic Programs.

(g–1) *Director of Civil Defense.* The Director of Civil Defense is responsible for the formulation, development, execution, and administration of the civil defense program. This includes:

(1) Fallout Shelter Program.

(2) Civilian chemical, biological, and radiological (CBR) warfare program.

(3) Civil defense warning, alerting, and communications.

(4) Emergency assistance to State and local governments in a post-attack period.

(5) Protection and emergency operational capability of State and local governments.

(6) Financial assistance and donation of Federal surplus property to the States for civil defense purposes.

(7) Post-attack damage assessment.

(8) Civil Defense Research and Development.

(9) Civil defense training, education, public information, and industrial participation.

(10) Advising the Secretary of the Army on policy and program aspects of military support of civil defense.

(h) *General Counsel.* The General Counsel is directly responsible to the Secretary of the Army. He serves as civilian legal adviser to the Secretary, the Under Secretary, and the Assistant Secretaries of the Army and provides professional guidance to the legal staff of the Director of Civil Defense.

(h–1) *Special Assistant to the Secretary of the Army for Civil Functions.* The Special Assistant to the Secretary of the Army for Civil Functions is directly responsible to the Secretary of the Army and is assigned responsibility for the civil functions of the DA, including the Civil Works Program, and the administration of national cemeteries and furnishing of Government headstones and markers.

• • • • • •

(s–1) *Special Assistant to the Chief of Staff for Army Information and Data Systems.* The Special Assistant for Army Information and Data Systems is the principal assistant to the Chief of Staff and Vice Chief of Staff on matters pertaining to Army information and data systems, and his office serves as the coordinating agency on the Army Staff for overall development of all such systems. This includes specific responsibility for development and implementation of plans, policies, and guidance for the Army's automatic data processing systems; supervision, coordination, and integration of the overall information and data system effort; and establishment, maintenance, and supervision of a standardized and automated information system for HQDA in coordination with the Army Staff.

(s–2) *Director of Special Studies.* The Director of Special Studies personally monitors, reviews, and makes appropriate recommendations to the Vice Chief of Staff, the Chief of Staff, and the Secretary of the Army concerning such important studies affecting the readiness and capabilities of the Army as may be assigned to him for action. He acts as chairman of DA steering groups of senior officers to provide guidance for and to monitor, develop, and review designated studies. When directed, he conducts special studies personally, with support from the Secretary of the General Staff as required.

• • • • • •

(v–1) *Deputy Secretary of the General Staff (Staff Action Control).* The Deputy Secretary of the General Staff (Staff Action Control) is the principal assistant to the Secretary of the General Staff for the control of staff actions. He is charged with providing improved control over and responsiveness of staff actions by recommending guidance for their preparation and maintaining records of guidance and decisions concerning related major actions; arranging for the interim review of proposed responses, and for the interjection of appropriate guidance and alternatives from the Army Secretariat, Chief of Staff, and Vice Chief of Staff during the formative stages of major staff actions; performing for the Chief of Staff and Vice Chief of Staff the initial substantive review and analysis of staff actions in processing these papers for decision; and providing the principal point of contact for members of the Army Secretariat and, in appropriate instances, the Defense Secretariat and Joint Chiefs of Staff, in matters relating to Army Staff actions.

• • • • • •

(dd) *Special Staff.* (1) The Special Staff consists of the following, listed in the order of official anniversary dates:

(i) The offices of:

(a) The Adjutant General.

(b) Chief of Engineers.

(c) Chief of Finance.

(d) The Surgeon General.

(e) Chief of Chaplains.

(f) The Judge Advocate General.

(g) The Inspector General.

(h) Chief of Communications-Electronics.

(i) Chief, National Guard Bureau.

(j) Chief of Information.

(k) Chief of Military History.

(l) Chief, Army Reserve.

(m) The Provost Marshal General.

(n) Chief of Transportation.

(o) Chief of Personnel Operations.

(ii) The Chief, United States Army Audit Agency.

(iii) The Office of the Chief of Support Services.

(2) The heads of Special Staff agencies provide advice and assistance to the Secretary of the Army, the Chief of Staff, other members of the Army Staff, and to all other elements of the DA on specialized matters specifically within their respective fields of responsibility. As staff officers of HQDA, they are responsible for the preparation of plans, estimates, and orders, review of technical doctrine, and the coordination of their technical, administrative, and operational plans and activities with other agencies of the Army Staff.

(3) The heads of certain Special Staff agencies exercise dual functions of staff and command. These two functions, although vested in a single individual, are separate and distinct in that each involves different responsibilities and duties; the exercise of one should not be confused with the exercise of the other.

• • • • • •

(ll) *Chief of Communications-Electronics.* The Chief of Communications-Electronics, under the general staff supervision of the Deputy Chief of Staff for Military Operations, has Army Staff responsibility for assigned communications-electronics matters.

(1) He has staff responsibility for:

(i) Radio frequency spectrum and call sign management and utilization, and the Army electromagnetic compatibility program.

(ii) Army representation on the United States Military Communications-Electronics Board and, as designated, other joint, combined, national and international boards, committees and groups which consider communications-electronics matters with Army implications and interest.

(iii) Joint actions pertaining to communications-electronics.

(iv) Preparation or review of the communications-electronics annexes of Army and joint plans.

(v) Program and budget functions relating to communications-electronics, except those specifically assigned to other Army Staff agencies.

(2) He provides a focal point for staff advice and coordination for communications, including communications security pertaining thereto.

(3) He advises the Army Staff on the technical communications-electronics aspects of:

(i) Missile systems.

(ii) Audio-visual systems.

(iii) Aviation electronics.

(iv) Electronic warfare.

(v) Fire coordination.

(vi) Combat surveillance and target acquisition.

(vii) Meteorology.

(viii) ADPS.

(4) Within the scope of responsibility, he exercises staff supervision of the United States Army Strategic Communications Command.

• • • • • •

J. C. LAMBERT,
*Major General, U.S. Army,*
*The Adjutant General.*

[F.R. Doc. 64–12198; Filed, Nov. 30, 1964; 8:47 a.m.]

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

### ALASKA

### Cancelling Small Tract Classification Order No. 27

NOVEMBER 23, 1964.

1. Pursuant to the authority delegated to me by the Alaska State Director and published in 29 F.R. 3015 March 5, 1964, I hereby cancel Small Tract Classification Order No. 27.

2. The subject lands formerly within Small Tract Classification Order No. 27 are described as follows:

FAIRBANKS MERIDIAN

T. 1 S., R. 2 W.,
Sec. 12, lot 4, except that portion which if described in terms of a normal subdivision would be S½SW¼SE¼SE¼.

3. This order will take effect as soon as published in the FEDERAL REGISTER.

ROSS A. YOUNGBLOOD,
*Manager, District and Land Office.*

[F.R. Doc. 64–12199; Filed, Nov. 30, 1964; 8:47 a.m.]

### Geological Survey

### CERTAIN OFFICIALS AND EMPLOYEES

### Delegation of Authority

NOVEMBER 23, 1964.

The following material is a revision of that portion of the Geological Survey Manual and the numbering system is that of the Manual. (Part 205, General Redelegations, Chapter 4 Procurement) (27 F.R. 2574 and amendment 28 F.R. 3704 are revoked.)

.1 *Delegation.* Under authority delegated to heads of bureaus by the Secretary of the Interior in Departmental Manual, Part 205, General Delegations dated November 30, 1961 (26 F.R. 11748), redelegation of authority to officials and employees of the Geological Survey is hereby made.

.2 *Exercise of authority.* The redelegation hereby made is of authority, on behalf of the United States and the Geological Survey, to enter into contracts for construction, supplies, or services, in conformity with applicable regulations and statutory requirements and subject to the availability of appropriations; with

respect to any such contract, to issue change orders and extra work orders pursuant to the contracts, to enter into modifications of the contract which are legally permissible, and to terminate the contract if such action is legally authorized. This authority is redelegated under categories depending upon the amount involved.

A. Irrespective of the amount involved, to:

Executive Officer

B. With respect to contracts for helicopter services not exceeding $100,000 in amount, to:

Procurement Officer
Management Officer, Denver, Colo.
Management Officer, Menlo Park, Calif.

C. With respect to contracts not exceeding $25,000 in amount, to:

Chief, Branch of Service and Supply Procurement Officer

D. With respect to contracts not exceeding $10,000 in amount, to:

Assistant Procurement Officer
Management Officer, Denver, Colo.
Management Officer, Menlo Park, Calif.

E. With respect to contracts not exceeding $5,000 in amount, to:

Management Officer, Anchorage, Alaska

F. With respect to contracts for construction, including drilling, not exceeding $2,000 to:

Branch Chiefs, Water Resources Division
Branch Area Chiefs, Water Resources Division
Chief, Instrumentation Unit, Research Section, Surface Water Branch, Water Resources Division, Columbus, Ohio

G. With respect to contracts for test drilling and construction not exceeding $1,000, to:

Heads of Feld Offices
Water Reeources Division

H. With respect to contracts for test drilling or other sampling processes not exceeding $1,000, to:

Heads of Field Offices,
Branch of Mineral Classification,
Conservation Division

ARTHUR A. BAKER,
*Acting Director.*

### Office of the Secretary

### WILLIAM ANGUS DAVIS

### Statement of Changes in Financial Interests

In accordance with the requirements of section 710(b)(6) of the Defense Production Act of 1950, as amended, and Executive Order 10647 of November 28, 1955, the following changes have taken place in my financial interests during the past six months:

(1) No change.
(2) No change.
(3) No change.
(4) No change.

This statement is made as of November 17, 1964.

Dated: November 17, 1964.

WILLIAM ANGUS DAVIS.

[F.R. Doc. 64-12224; Filed, Nov. 30, 1964; 8:49 a.m.]

## DEPARTMENT OF AGRICULTURE

### Office of the Secretary

### NORTH CAROLINA AND TEXAS

### Designation of Areas for Emergency Loans

For the purpose of making emergency loans pursuant to section 321 of the Consolidated Farmers Home Administration Act of 1961 (7 U.S.C. 1961), it has been determined that in the hereinafter-named counties in the States of North Carolina and Texas natural disasters have caused a need for agricultural credit not readily available from commercial banks, cooperative lending agencies, or other responsible sources.

NORTH CAROLINA

Yancey.

TEXAS

| | |
|---|---|
| Jeff Davis | Presidio |
| Pecos | Upton |

Pursuant to the authority set forth above, emergency loans will not be made in the above-named counties after June 30, 1965, except to applicants who previously received emergency or special livestock loan assistance and who can qualify under established policies and procedures.

Done at Washington, D.C., this 25th day of November 1964.

ORVILLE L. FREEMAN,
*Secretary.*

## DEPARTMENT OF COMMERCE

### Bureau of International Commerce

[File 22-65]

### FIRMA A. BAKKEREN

### Order Terminating Temporary Denial of Export Privileges

In the matter of A. Bakkeren also known as P. A. G. Bakkeren doing business as Firma A. Bakkeren, Kerkhofweg 3, Bréda, The Netherlands, respondent; File 22-65.

On August 25, 1964 (29 F.R. 12481) an order temporarily denying export privileges for 60 days was entered against the above respondent. Said order was extended on October 21, 1964 (29 F.R. 14648) until the completion of administrative compliance proceedings. The order was entered on the basis of evidence in possession of the Bureau of International Commerce which gave substantial reason to believe that respondent had knowingly participated in transactions in violation of the U.S. Export Control Act and regulations.

The respondent has moved to terminate the temporary denial order and has submitted evidence in support of said motion. On the basis of the evidence submitted, it now appears that respondent did not participate in transactions in violation of the U.S. Export Control Act and regulations.

Accordingly, the motion to terminate the temporary denial order is granted and it is hereby ordered that the order of August 25, 1964 as extended on October 21, 1964, temporarily denying export privileges, is hereby terminated.

Dated: November 24, 1964.

FORREST D. HOCKERSMITH,
*Director, Office of Export Control.*

[F.R. Doc. 64-12223; Filed, Nov. 30, 1964; 8:49 a.m.]

## FEDERAL TRADE COMMISSION

### MARKETING OF AUTOMOBILE TIRES

### Notice of Public Hearing and of Opportunity To Present Data, Views and Arguments

Notice is hereby given that the Federal Trade Commission will hold a public hearing before the full Commission on January 13 and 14, 1965 to afford all persons, including members of the consuming public, an opportunity to present their views concerning practices used by tire manufacturers, dealers and other sellers in the marketing of automobile tires.

Information received in a preliminary study indicates that consumer-purchasers are frequently confused and deceived in buying replacement tires for their automobiles. In view of the large number of tires purchased annually by car owners, the price, quality, size and safety of tires and the nature and effect of guarantees issued by tire manufacturers are matters of considerable concern to the public. The purpose of this hearing is to afford the Commission the benefit of the views of all concerned to assist it in reaching a determination as to what action, if any, the Commission may properly take in the public interest under statutes administered by it. Such information would also enable the Commission to make appropriate recommendations to the Congress for legislation in the area under consideration. Among the subjects to be considered are:

1. *Price advertising.* Extensive use is made of advertising which purports to offer tires at substantial savings or reductions in price. This may be in the form of represented direct or implied price reductions or savings, or special promotions or combination offers such as the purported gift of a "free" tire with the purchase of other tires.

These represented price reductions and savings are usually based on a price, sometimes designated the "list" or "no trade-in" price, which purportedly is the price the purchaser pays without a used tire to trade in. This is not the price, however, at which tires are usually sold since in most instances the purchaser has a used tire to trade in and, accordingly, would not pay the higher price. Further, in many areas tires are usually sold at substantial discounts from the "list" or "no trade-in" price.

As a result of this type of advertising purchasers may be led to believe that they are receiving substantial savings or price reductions when in fact they are paying the advertiser's usual selling price for the tires. Thus, the purported savings and reductions may be nothing more than the illusion of a bargain.

2. *Guarantees.* Tire guarantees are generally adjusted on the basis of "list" or "no trade-in" prices which are usually higher than the prices actually paid for the guaranteed tires. Most guarantees provide for a credit on a new tire in proportion to the guarantee time or tread remaining at the time of adjustment. A purchaser when required under the guarantee to purchase a new tire at the higher "list" or "no trade-in" price may realize little or no price advantage by reason of his guarantee. For example, assume that a tire for which the purchaser paid $16.00 and which is guaranteed for 24 months, fails after 16 months. If the tire has a "list" or "no trade-in" price of $24.00, the purchaser is entitled under his guarantee to a credit of one-third or $8.00 toward the purchaser of a tire at the "list" or "no trade-in" price of $24.00. Thus, the purchaser would pay $16.00 for a new tire under the guarantee which is the price he would have paid without a guarantee.

3. *Grade and quality.* Except in the advertising of so-called "premium" tires, tires are usually advertised in such a manner as to afford the buyer no clear information as to the grade or quality of the tire advertised. As an illustration, no disclosure is made as to whether a tire is a second, third or fourth line tire. Moreover, similar brand names are frequently used for different grades or lines of tires. For example, words such as "super" and "de luxe" appear in the brand names of premium, first, second and third line tires. No clue as to tire grade or line is usually furnished except price, and when the tire is offered at a purported bargain price, price may serve to mislead rather than enlighten as to the grade or line of the tire advertised. Furthermore, the absence of any recognized system of grade labeling or quality rating for tires serves to compound the confusion as the consumer has no basis for a comparison of the various tire brands. To dispel this confusion and deception of consumer-purchasers it seems necessary that the public be given the facts as to the various grades or lines of tires offered for sale.

4. *Tire safety.* The increasing number of super highways with higher speed limits, and the ever increasing number of automobiles making use of these highways have caused a growing awareness of the importance of tire safety. This awareness has been manifested in a variety of ways, including legislative interest in the subject, both at the State and Federal level. In addition, the Rubber Manufacturers Association, Inc., 444 Madison Avenue, New York, N.Y., announced on July 1, 1964, the adoption of "Recommended Minimum Standards for New Passenger Car Tires" by all domestic automobile tire manufacturers. These standards relate to tire carcass strength, endurance, high speed performance and minimum size for cross section width but do not deal with minimum outside circumferential dimensions. The adequacy of these standards has been questioned.

5. *Tire size.* Information received in the preliminary study indicates that in many instances tires are not of the size designated on the tire and in advertising. This has particular reference to the cross section width of the tire which is the first dimension stated in the customary size designation. The designation 7.50×14, for example, represents the cross section width to be 7½ inches with a rim size of 14 inches. No information is furnished the purchaser as to the overall outside circumference dimensions, which measurement appears to vary with the quality of the tire. It also appears that tire size has a significant bearing on safety as well as on other tire functions.

Interested persons are invited to submit any information pertinent to the subjects described above or other aspects of the general subject of tire marketing as it affects the public. The Commission would be particularly interested in receiving the comments of interested persons as to the extent of the deception in the above described areas and any suggestions as to appropriate action which might be taken to remedy these conditions.

After consideration of all available information bearing on the subject, including the views and data presented at the hearing, the Commission will proceed to a determination as to what action, if any, is warranted under statutes administered by it, and what recommendations, if any, it should make to the Congress for legislation in this area.

All interested persons, including members of the consuming public, are hereby notified that they may file written data, views or arguments concerning the subject matter of this hearing with the Secretary, Federal Trade Commission, Pennsylvania Avenue and Sixth Street NW., Washington, D.C., 20580, not later than January 8, 1965. To the extent practicable ten copies of all written submissions should be filed.

The oral hearing will be held at 10 a.m., e.s.t., on January 13 and 14, 1965, in Room 532 of the Federal Trade Commission Building, Washington, D.C. At the hearing interested persons may express their views as to the subjects outlined above. Any person desiring to present orally his views at the hearing should so inform the Secretary not later than January 8, 1965, and state the estimated time required for his oral presentation. The Commission may impose reasonable limitations upon the length of time alloted to any person.

The data, views or arguments presented orally or in writing will be available for examination by interested parties at the Federal Trade Commission, Washington, D.C.

Issued: November 30, 1964.

By the Commission.

[SEAL] JOSEPH W. SHEA,
*Secretary.*

## SECURITIES AND EXCHANGE COMMISSION

[File No. 70-4240]

### CENTRAL POWER AND LIGHT CO. AND CENTRAL SOUTH WEST CORP.

### Notice of Proposed Transfer of Portion of Earned Surplus to Capital Stock Account

NOVEMBER 24, 1964.

Notice is hereby given that Central and South West Corp., a registered holding company, and its public-utility subsidiary company, Central Power and Light Co. ("Central"), 120 North Chaparral Street, Corpus Christi, Tex., have filed with this Commission a joint application-declaration pursuant to the Public Utility Holding Company Act of 1935 ("Act"), and have designated sections 6(a), 7, 9, and 10 of the Act as applicable to the proposed transaction.

All interested persons are referred to the joint application-declaration on file at the office of the Commission for a statement of the transaction therein proposed, which is summarized as follows:

Central proposes to transfer from its earned surplus account to its common capital stock account an aggregate of $30,571,100 which is equivalent to $7 per share on its outstanding $10 par value common stock, all of which is held by Central and South West Corp. Central's common capital stock account, as of September 30, 1964, will thereby be increased from $43,673,000 to $74,244,100, and its presently outstanding 4,367,300 shares of $10 par value common stock will constitute, and be treated as, shares of common stock with a par value of $17 per share. As of the same date, Central's earned surplus account will be reduced from $47,682,808 per books, to $17,111,708 after giving effect to the proposed transaction. During the twelve months then ended, dividends charged to Central's earned surplus account aggregated $9,777,147, consisting of $715,000 on its outstanding preferred stock (all publicly held) and $9,062,147 on its outstanding common stock. The earned surplus proposed to be transferred to capital stock account includes an amount estimated at $17,464,089 which is now restricted, subject to certain exceptions, against the payment of cash dividends on Central's common stock.

The joint application-declaration states that no State regulatory agency

and no Federal commission, other than this Commission, has jurisdiction over the proposed transaction. Miscellaneous fees and expenses, estimated at $500, are to be paid by Central. Legal fees are covered by an annual retainer, $1,000 of which is estimated by Central as being reasonably allocable to the proposed transaction.

Notice is further given that any interested person may, not later than December 14, 1964, request in writing that a hearing be held in respect of such matter, stating the nature of his interest, the reasons for the request, and the issues of fact or law which he desires to controvert; or he may request that he be notified should the Commission order a hearing thereon. Any such request should be addressed; Secretary, Securities and Exchange Commission, Washington, D.C., 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicants-declarants at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed contemporaneously with the request. At any time after said date the joint application-declaration as filed or as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from its rules under the Act as provided by Rules 20(a) and 100 thereof or take such other action as it deems appropriate.

For the Commission (pursuant to delegated authority).

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

[F.R. Doc. 64-12195; Filed, Nov. 30, 1964; 8:47 a.m.]

# SMALL BUSINESS ADMINISTRATION

[Delegation of Authority 30-X, Disaster No. 4]

## MANAGER, DISASTER FIELD OFFICE, HOUMA, LOUISIANA

### Delegation Relating to Financial Assistance Functions

Notice is hereby given that Delegation of Authority No. 30-X, Disaster 4 (29 F.R. 14513), is hereby rescinded in its entirety.

Effective date: November 21, 1964.

ROBERT E. WEST,
*Regional Director,*
*Dallas, Texas.*

# TARIFF COMMISSION

[TEA I-A-6]

## SAFETY PINS

### Notice of Investigation and Hearing

*Investigation instituted.* On November 23, 1964, the United States Tariff Commission, upon request of the President, instituted an investigation in connection with the preparation of advice to the President, pursuant to section 351 (d)(2) of the Trade Expansion Act of 1962, with respect to safety pins of the kind described in item 943.10 in part 2A of the Appendix to the Tariff Schedules of the United States.

In 1957 an increased duty was imposed by Presidential proclamation upon imports of safety pins, following an escape-clause investigation by the Tariff Commission under section 7 of the Trade Agreements Extension Act of 1951. The Commission's function under section 351 (d)(2) is to advise the President of its judgment of the probable economic effect on the domestic industry concerned of the reduction or termination of increased import restrictions imposed under the escape-clause procedure.

*Public hearing ordered.* A public hearing in connection with the aforementioned investigation will be held beginning at 10 a.m. e.s.t., on February 2, 1965, in the Hearing Room, Tariff Commission Building, 8th and E Streets, NW., Washington, D.C. Interested parties desiring to appear and to be heard at the hearing should notify the Secretary of the Commission, in writing, at least three days in advance of the date set for the hearing.

Issued: November 24, 1964.

By order of the Commission.

[SEAL] DONN N. BENT,
*Secretary.*

[F.R. Doc. 64-12175; Filed, Nov. 30, 1964; 8:45 a.m.]

[TEA I-A-7]

## CLINICAL THERMOMETERS

### Notice of Investigation and Hearing

*Investigation instituted.* On November 23, 1964, the United States Tariff Commission, upon request of the President, instituted an investigation in connection with the preparation of advice to the President, pursuant to section 351 (d)(2) of the Trade Expansion Act of 1962, with respect to clinical thermometers of the kind described in item 930.00 in part 2A of the Appendix to the Tariff Schedules of the United States.

In 1958 an increased duty was imposed by Presidential proclamation upon imports of clinical thermometers following an escape-clause investigation by the Tariff Commission under section 7 of the Trade Agreements Extension Act of 1951. The Commission's function under section 351(d)(2) is to advise the President of its judgment of the probable economic effect on the domestic industry concerned of the reduction or termination of increased import restrictions imposed under the escape-clause procedure.

*Public hearing ordered.* A public hearing in connection with the aforementioned investigation will be held beginning at 10 a.m., e.s.t., on February 9, 1965, in the Hearing Room, Tariff Commission Building, Eighth and E Streets NW., Washington, D.C. Interested parties desiring to appear and to be heard at the hearing should notify the Secretary of the Commission, in writing, at least three days in advance of the date set for the hearing.

Issued: November 24, 1964.

By order of the Commission.

[SEAL] DONN N. BENT,
*Secretary.*

[F.R. Doc. 64-12176; Filed, Nov. 30, 1964; 8:45 a.m.]

# INTERSTATE COMMERCE COMMISSION

## FOURTH SECTION APPLICATIONS FOR RELIEF

NOVEMBER 25, 1964.

Protests to the granting of an application must be prepared in accordance with Rule 1.40 of the general rules of practice (49 CFR 1.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

LONG-AND-SHORT HAUL

FSA No. 39417: *Chemicals to Chicago, Ill.* Filed by O. W. South, Jr., agent (No. A4596), for and on behalf of Illinois Central Railroad Co. Rates on trichloroethane, perchloroethylene and trichloroethylene, in tank carloads, from Baton Rouge and North Baton Rouge, La., to Chicago, Ill.

Grounds for relief: Market competition.

Tariff: Supplement 56 to Southern Freight Association, agent, tariff I.C.C. S-272.

FSA No. 39419: *Grains to gulf ports for export.* Filed by Southwestern Freight Bureau, agent (No. B-8646), for interested rail carriers. Rates on grain (other than wheat) and soybeans in carloads from points in Arkansas, Colorado, Iowa, Kansas, Missouri, Nebraska, Oklahoma, Texas, and Wyoming, to gulf ports, Pensacola, Fla., to Corpus Christi, Tex. (for export).

Grounds for relief: Motor-truck and barge competition.

Tariff: Supplement 41 to the Atchison, Topeka and Santa Fe Railway Company's tariff I.C.C. 14945, and other schedules.

FSA No. 39420: *Vinyl acetate to Illiopolis, Ill.* Filed by O. W. South, Jr., agent (No. A4595), for interested rail carriers. Rates on vinyl acetate, in tank carloads, from Geismar, La., to Illiopolis, Ill.

Grounds for relief: Market competition.

Tariff: Supplement 56 to Southern Freight Association, agent, tariff I.C.C. S-272.

FSA No. 39421: *Liquid caustic soda to Coosa Pines, Ala.* Filed by O. W. South, Jr., agent (No. A4600), for interested rail carriers. Rates on liquid caustic soda, in tank carloads, from Baton Rouge and North Baton Rouge, La., to Coosa Pines, Ala.

Grounds for relief: Market competition.

Tariff: Supplement 35 to Southern Freight Association, agent, tariff I.C.C. S-397.

FSA No. 39422: *Liquefied chlorine gas from Calvert, Ky.* Filed by O. W. South, Jr., agent (No. A4601), for interested rail carriers. Rates on liquefied chlorine gas, in tank carloads, subject to minimum shipments of 550,000 pounds, from Calvert, Ky., to Charleston and Institute, W. Va.

Grounds for relief: Market competition.

Tariff: Supplement 67 to Southern Freight Association, agent, tariff I.C.C. S-263.

AGGREGATE-OF-INTERMEDIATES

FSA No. 39418: *Chemicals to Chicago, Ill.* Filed by O. W. South, Jr., agent (No. A4597), for interested rail carriers. Rates on trichloroethane, perchloroethylene and trichloroethylene, in tank carloads, from Baton Rouge and North Baton Rouge, La., to Chicago, Ill.

Grounds for relief: Maintenance of depressed rates published to meet market competition without use of such rates as factors in constructing combination rates.

Tariff: Supplement 56 to Southern Freight Association, agent, tariff I.C.C. S-272.

By the Commission.

[SEAL] HAROLD D. McCOY,
*Secretary.*

[Notice 6]

## FINANCE APPLICATIONS

NOVEMBER 25, 1964.

The following publications are governed by the Interstate Commerce Commission's General Requirements governing notice of filing of applications under sections 20a except (12) and 214 of the Interstate Commerce Act. The Commission's order of May 20, 1964, providing for such publication of notice, was published in the FEDERAL REGISTER issue of July 31, 1964 (29 F.R. 11126) and became effective October 1, 1964.

All hearings and prehearing conferences, if any, will be called at 9:30 a.m., U.S. standard time unless otherwise specified.

F.D. No. 23396—By application filed November 23, 1964, Southern Industrial Railroad, Inc., 13th Street at East Washington Street, Centerville, Iowa, seeks authority under section 20a of the Act to issue 150 shares of Common Stock of the par value of $100 per share. Applicant's attorney: Robert Valentine, Valentine, Greenleaf & Griffing, 303 West State Street, Centerville, Iowa. Protests must be filed no later than 15 days from date of publication in the FEDERAL REGISTER.

F.D. No. 23397—By application filed November 24, 1964, Atlantic Coast Line Railroad Co., 500 Water Street, Jacksonville, Fla., 32202, seeks authority under section 20a of the Act to assume obligation and liability in respect of $6,480,000 principal amount Atlantic Coast Line Railroad Equipment Trust Certificates, Series V, to be dated as of January 1, 1965. Applicant's attorneys: F. J. Primosch, Secretary and Assistant Vice President, 220 East 42d Street, New York, N.Y., 10017, and Leonard G. Anderson, General Attorney, 500 Water Street, Jacksonville, Fla., 32202. Protests must be filed no later than 15 days from date of publication in the FEDERAL REGISTER.

By the Commission.

[SEAL] HAROLD D. McCOY,
*Secretary.*

## ALL RAILROADS

### Expiration Date

Upon further consideration of Revised Taylor's Car Distribution Order No. 1 and good cause appearing therefor:

*It is ordered,* That:

Revised Taylor's Car Distribution Order No. 1 be, and it is hereby, amended by substituting the following paragraph (d) for paragraph (d) thereof:

(d) *Expiration date.* This order shall expire at 11:59 p.m., December 8, 1964, unless otherwise modified, changed, suspended, or annulled.

*It is further ordered,* That this amendment shall become effective at 11:59 p.m., November 30, 1964, and that this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement, and by filing it with the Director, Office of the Federal Register.

Issued at Washington, D.C., November 24, 1964.

INTERSTATE COMMERCE COMMISSION,
[SEAL] CHARLES W. TAYLOR,
*Agent.*

## BALTIMORE AND OHIO RAIL ROAD CO.

### Shortage of Freight Cars

Pursuant to Section 1 (15) and (17) of the Interstate Commerce Act and authority vested in me by paragraph (5) (b) of Interstate Commerce Commission Service Order No. 947 (28 F.R. 12127, 29 F.R. 6014, and 29 F.R. 9670).

I find that there exists a shortage of freight cars in certain areas because of inequitable distribution and, because of such emergency, notice and public procedure on this order would be impracticable and contrary to the public interest, and this order shall be made effective upon less than 30 days' notice.

*Therefore, it is ordered,* That:

(a) The Baltimore and Ohio Rail Road Co. shall deliver to the Chicago, Burlington & Quincy Railroad Co. a daily average of 25 plain serviceable box cars inside length less than 44'8".

(b) Cars delivered under this order shall be carded to the Chicago, Burlington & Quincy Railroad Co. and each car shall be identified by the Baltimore and Ohio Rail Road Co. as moving under the provisions of this order.

(c) Effective date: This order shall become effective at 11:59 p.m., November 25, 1964.

(d) Expiration date: This order shall expire at 11:59 p.m. December 8, 1964 unless otherwise ordered.

*It is further ordered,* That this order shall be served upon the Association of American Railroads, Car Service Division, as Agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement and by filing it with the Director, Office of the Federal Register.

Issued at Washington, D.C., November 23, 1964.

FEDERAL REGISTER
Area Code 202 Phone 963-3261

Published daily, Tuesday through Saturday (no publication on Sundays, Mondays, or on the day after an official Federal holiday), by the Office of the Federal Register, National Archives and Records Service, General Services Administration (mail address National Archives Building, Washington, D.C. 20408), pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U.S.C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15 cents) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended. The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of books and pocket supplements are listed in the first FEDERAL REGISTER issue of each month.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER or the CODE OF FEDERAL REGULATIONS.

PART II

FEDERAL REGISTER

VOLUME 29 NUMBER 233

Washington, Tuesday, December 1, 1964

General Services Administration

# Federal Property Management Regulations

## Addition of Parts

# Title 41—PUBLIC CONTRACTS AND PROPERTY MANAGEMENT

SUBTITLE C—FEDERAL PROPERTY MANAGEMENT REGULATIONS SYSTEM

## Chapter 101—Federal Property Management Regulations

### ADDITION OF PARTS

Chapter 101 of Title 41, Code of Federal Regulations is amended by the addition of the following parts:

Part 101–6—Miscellaneous Regulations
Part 101–18—Acquisition
Part 101–19—Management of Buildings and Grounds
Part 101–20—Assignment and Utilization of Space
Part 101–27—Inventory Management
Part 101–28—Storage and Distribution
Part 101–29—Federal Specifications and Standards
Part 101–30—Federal Catalog System
Part 101–40—Transportation and Traffic Management
Part 101–43—Utilization of Personal Property
Part 101–44—Donation of Personal Property
Part 101–45—Sale, Abandonment, or destruction of Personal Property

Part 101–25 of Chapter 101 is also amended by the addition of two sections (§§ 101–25.102 and 101–25.103) and the following subparts:

Subpart 101–25.2—Interagency Purchase Assignments
Subpart 101–25.3—Use Standards
Subpart 101–25.4—Replacement Standards
Subpart 101–25.48—Reports
Subpart 101–25.49—Illustration of Forms

The following material represents a substantial portion of the newly established Federal Property Management Regulations (29 F.R. 13255, Sept. 24, 1964; 29 F.R. 14724, Oct. 29, 1964; 29 F.R. 15593, Nov. 20, 1964). It is primarily a conversion of existing requirements concerning the subjects captioned in the above-listed Parts and Subparts. Subpart 101–44.3, Donation for Educational, Public Health, and Civil Defense, Including Research or Public Airport Purposes, is a complete revision. To Part 101–40, Transportation and Traffic Management, has been added material on transportation surveys, seminars and training courses, small business assistance, and utilization of special contracts.

SUBCHAPTER A—GENERAL

## PART 101–6—MISCELLANEOUS REGULATIONS

Sec.
101–6.000 Scope of part.

Subpart 101–6.1—Commuted Rate Schedule for Transportation of Household Goods

101–6.100 Scope of subpart.
101–6.101 Authority.
101–6.102 Applicability.

AUTHORITY: The provisions of this Part 101–6 issued under sec. 1(b), 60 Stat. 807; 5 U.S.C. 73b–1(b); and E.O. No. 11012 of March 27, 1962 (27 F.R. 2983; 3 CFR).

### § 101–6.000 Scope of part.

This part sets forth miscellaneous regulations regarding Federal Property Mangement Regulations matters which do not come within the scope of any other subchapter of Chapter 101.

### Subpart 101–6.1—Commuted Rate Schedule for Transportation of Household Goods

### § 101–6.100 Scope of subpart.

This subpart sets forth regulations covering the issuance and use of a commuted rate schedule containing rates to be used in reimbursing civilian employees of the United States Government for transportation, temporary storage, and related expenses incurred in moving their household goods and personal effects on transfer from one official station to another, or on initial appointment to certain positions, for permanent duty within the continental United States, excluding Alaska.

### § 101–6.101 Authority.

These regulations stem from section 1(b) of the Administrative Expenses Act of 1946 (5 U.S.C. 73b–1(b)) and Executive Order No. 11012 of March 27, 1962 (27 F.R. 2983; 3 CFR), wherein the President delegated to the Administrator of General Services authority to prescribe such commuted rates.

### § 101–6.102 Applicability.

The commuted rates contained in GSA Circular No. 263, Commuted Rate Schedule for Transportation of Household Goods, Revision No. 5, dated September 8, 1964, and Supplement No. 1, dated September 28, 1964, are prescribed by this Subpart 101–6.1 for use where reimbursement is made to civilian employees of the United States Government on the commuted rate basis, in lieu of the payment of actual transportation, temporary storage, and related expenses incurred in the movement of their household goods and personal effects. These rates are applicable only when the transportation and related services involved have been authorized or approved by the department or agency concerned and only in accordance with regulations prescribed in Bureau of the Budget Circular No. A–56 covering eligibility for reimbursement, maximum weight allowed and other requirements.

SUBCHAPTER D—PUBLIC BUILDINGS AND SPACE

## PART 101–18—ACQUISITION OF REAL PROPERTY

Sec.
101–18.000 Scope of part.

Subpart 101–18.1—Acquisition by Lease

101–18.100 Scope of subpart.
101–18.101 Authorities of subpart.
101–18.102 Basic policy.
101–18.103 Acquisition by GSA.
101–18.104 Acquisition by other agencies.
101–18.105 Agency cooperation.
101–18.106 Delegation of leasing authority.
101–18.106–1 List of special purpose space.
101–18.107 Limitations on the use of delegated authority.

AUTHORITY: The provisions of this Part 101–18 issued under sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).

### § 101–18.000 Scope of part.

This part prescribes policies and procedures governing acquisition of interests in real property.

## Subpart 101–18.1—Acquisition by Lease

### § 101–18.100 Scope of subpart.

This subpart prescribes the policies and methods governing the acquisition by lease of interests in real property in the United States, the Commonwealth of Puerto Rico, and the possessions of the United States.

### § 101–18.101 Authorities of subpart.

This Subpart 101–18.1 implements section 210(h)(1) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 490(h)(1)); the Act of August 27, 1935 (40 U.S.C. 304c); Reorganization Plan No. 18 of 1950; and E.O. No. 11035 of July 9, 1962 (3 CFR; 40 U.S.C. 490 note).

### § 101–18.102 Basic policy.

The basic policy in the acquisition of interests in real property by lease is to:

(a) Acquire space in privately owned buildings only when space needs cannot be otherwise accommodated in satisfactory, existing Government-owned or -leased space and when the economical construction or alteration of a public building, or the purchase of a privately owned building, is not warranted because the total Federal agency requirements in a community are insufficient in scope or duration.

(b) Enter into leases on terms and conditions most favorable to the Government, with due consideration given to the maintenance and operational efficiency of the offered space as well as the rental rates, and only at rental charges which are consistent with prevailing scales in the community for comparable facilities.

### § 101–18.103 Acquisition by GSA.

(a) GSA will perform all leasing functions of building space, and land incidental thereto, for Federal agencies except as provided in this Subpart 101–18.1.

(b) Agencies authorized to acquire space by lease may request GSA to perform such leasing functions in specific instances.

### § 101–18.104 Acquisition by other agencies.

(a) The Departments of Agriculture, Commerce, and Defense may lease their own building space, and land incidental to its use, and provide for its operation, maintenance, and custody when the space is situated outside an urban center. Urban centers are:

(b) The Department of the Treasury may lease building space, and land incidental thereto, for the use of the Comptroller of the Currency and provide for its operation, maintenance, and custody.

(c) The Tennessee Valley Authority may lease building space, and land incidental thereto, and provide for its operation, maintainence, and custody.

(d) The National Aeronautics and Space Administration may lease building space, and land incidental thereto, and provide for its operation, maintenance, and custody outside the District of Columbia.

(e) A Federal agency may lease space in buildings, and land incidental thereto, for its use when:

(1) The space is located in any foreign country;

(2) The space is in buildings which are located on the grounds of any fort, camp, post, arsenal, Navy Yard, naval training station, airfield, proving ground, military supply depot, or school, or of any similar facility, of the Department of Defense, unless and to such extent as a permit for its use shall have been issued by the Secretary of Defense or his duly authorized representative;

(3) The space is acquired by the Post Office Department for post office purposes.

### § 101–18.105 Agency cooperation.

The heads of executive agencies shall (a) cooperate with and assist the Administrator of General Services in carrying out his responsibilities respecting office buildings and space, (b) take measures to give GSA early notice of new or changing space requirements, (c) seek to economize in their requirements for space, and (d) review continuously their needs for space in and near the District of Columbia, taking into account the feasibility of decentralizing services or activities which can be carried on elsewhere without excessive costs, or significant loss of efficiency.

### § 101–18.106 Delegation of leasing authority.

Subject to the limitations stated in § 101–18.107, agencies are hereby authorized to perform for themselves all functions with respect to acquisition of space by lease in buildings, and land incidental thereto, when the following conditions are met:

(a) The space may be leased for no rental, or for a nominal consideration of $1.00 per annum; or

(b) When authority has been requested by an executive agency and a specific delegation has been granted by the Administrator of General Services; or

(c) The space is found by the Administrator of General Services to be wholly or predominantly utilized for the special purposes of the agency to have custody thereof, and is not generally suitable for the use of other agencies; including but not limited to hospitals, housing, laboratories, mints, manufacturing plants, and penal institutions. The types of space listed in § 101–18.106–1 have been found to be wholly or predominantly utilized for the special purposes of the agency named, and are not generally suitable for the uses of other agencies.

### § 101–18.106–1 List of special purpose space.

(a) Department of Agriculture:
(1) Aircraft storage and repair shops.
(2) Fumigation areas.
(3) Garage space held under service contract.
(4) Greenhouses.
(5) Land.
(6) Miscellaneous storage by cubic foot or weight basis.
(7) Office space when required to be located in or adjacent to stockyards.
(8) Space for agricultural commodities stored in licensed warehouses and utilized under warehousing contracts.
(9) Space utilized in cooperation with State and local governments, or instrumentalities thereof, where a portion of such space is occupied by and a portion of the rental is paid by the cooperating State or local government.

(b) Department of Commerce:
(1) Maritime training stations.
(2) Radio stations.
(3) Laboratories for testing materials, classified ordnance devices, and calibration of instruments.
(4) Weather bureau offices at airports.
(5) Docks, piers, and mooring facilities.
(6) Garage space held under service contract.
(7) Hangars used for airplane storage.
(8) Oil and gasoline storage.
(9) Shipbuilding materials storage.
(10) Stockpiling depots.
(11) Torpedo net depots.

(c) Department of Defense:
(1) Air Force—Civil Air Patrol Liaison Office when required for use incidental to, in conjunction with, and in close proximity to airports.
(2) Armories.
(3) Cold and freezer storage.
(4) Depot storage.
(5) Dock and piers.
(6) Film library in the vicinity of Washington, D.C.
(7) Filter centers.
(8) Garage space held under service contract.
(9) Hangars and other airport operating facilities.
(10) Hospitals.
(11) Hotels.
(12) Housing.
(13) Land (including aircraft and warning stations).
(14) Laundries.
(15) Leased buildings at Jackson, Mississippi, Air Force Base.
(16) Lumber storage.
(17) Mess halls.
(18) Mooring space.
(19) Oil and gasoline storage.
(20) Open storage.
(21) Ports of embarkation and debarkation.
(22) Post exhanges.
(23) Postal Concentration Center at Long Island City, New York.
(24) Recreation centers.
(25) Reserve training space.
(26) Schools.
(27) Service clubs.
(28) Testing laboratories.
(29) Troop detachments.

(d) Federal Aviation Agency:
(1) Aeronautical Center at Oklahoma City, Oklahoma.
(2) Air route traffic control centers.
(3) All space located at airports.

(4) Garage space held under service contract.

(5) Land.

(e) Home Loan Bank Board: Space for field offices of Examining Division required to be located within Federal Home Loan Bank Buildings or immediately adjoining or adjacent thereto.

(f) Housing and Home Finance Agency: Space used for residential purposes and space used in connection therewith by the Public Housing Administration.

(g) Department of Justice: U.S. Marshal's offices in Alaska and Border Patrol Offices similar in character and utilization to police stations, involving the handling of prisoners, firearms, and motor vehicles, regardless of location.

(h) Panama Canal Company: Present space in New York, New York.

(i) Tax Court of the United States: Present courtroom in Grand Central Terminal Building, New York, New York.

(j) Treasury Department:

(1) United States Coast Guard: Plots of land and pier sites, including closed storage space required in combinations with piers, docking and mooring facilities; space for the oceanic unit at Woods Hole, Massachusetts; and space for port security activities.

(2) Garage space held under service contracts.

(k) Veterans Administration:

(1) Guidance and training centers located at schools and colleges.

(2) Space used for Veterans Administration hospitals and related purposes.

(l) Department of the Interior: Space in buildings used by field crews of the Bureau of Reclamation for periods of less than one year in remote areas where no other Government agency is quartered.

(m) Department of Health, Education, and Welfare: Space used for hospitals, quarantine stations, and laboratories.

(n) Atomic Energy Commission: Present space in St. Louis, Missouri.

(o) Federal Communications Commission: Monitoring station sites.

**§ 101–18.107 Limitations on the use of delegated authority.**

(a) Agencies authorized by this Subpart 101–18.1 to perform functions with respect to acquiring space by lease may perform such functions only:

(1) When the utilization requirements of Part 101–20 have been met; and

(2) In accordance with the authorities and policies cited in §§ 101–18.101 and 101–18.102 and applicable provisions of Chapters 1 and 101 of Title 41, Code of Federal Regulations.

(b) Agencies may not exercise the long-term leasing authority contained in section 210(h)(1) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 490(h)(1)) in the performance of the functions delegated under this Subpart 101–18.1 without specific authorization from the Administrator of General Services.

101–19.402–12 Conversion.
101–19.402–13 Alteration.
101–19.402–14 Public improvement.
101–19.402–15 Legally available (As applicable to funds.)
101–19.403 Standard practices.
101–19.403–1 General conditions.
101–19.403–2 GSA financed services.
101–19.403–3 Reimbursable services.
101–19.403–4 Newly constructed buildings.
101–19.403–5 Furniture and furnishings.

AUTHORITY: The provisions of this Part 101–19 issued under sec. 205(c), 63 Stat 390; 40 U.S.C. 486(c).

### § 101–19.000 Scope of part.

The regulations in this part prescribe policies and methods under which GSA provides for the management, operation, protection, and maintenance of Government-owned and -leased buildings and grounds required by the Federal agencies to undertake their assigned missions.

### § 101–19.001 Authority.

This Part 101–19 implements the Act of July 1, 1898 (40 U.S.C. 285); the Act of April 28, 1902 (40 U.S.C. 19); the Act of March 1, 1919 (40 U.S.C. 1); the Act of June 23, 1923 (40 U.S.C. 281); the Act of May 27, 1924 (D.C. Code, 1961 ed., 4–208); the Act of June 20, 1936 (20 U.S.C. 107 et seq.); the Act of December 10, 1941 (40 U.S.C. 291); the Act of May 14, 1948 (40 U.S.C. 130); the Act of June 1, 1949 (40 U.S.C. 318 et seq.); the Federal Property and Administrative Services Act of 1949 (63 Stat. 377 as amended); and the Reorganization Plan No. 18 of 1950 (40 U.S.C. 490 note; 3 CFR).

### Subpart 101–19.1—Operation and Maintenance

### § 101–19.100 Scope of subpart.

This subpart is applicable to all buildings and grounds managed by and under the custody of GSA for which funds for rent, operation, maintenance and protection, repair, and improvement are appropriated directly to GSA and all buildings and grounds managed on a reimbursable basis.

### § 101–19.101 Government-owned buildings.

Services and utilities necessary to make space usable for ordinary purposes will be provided. Buildings and equipment, including grounds and approaches, will be operated, maintained, and repaired in accordance with standards prescribed by GSA. Wholly owned Government corporations are required to pay such rental for Government-owned space occupied at the seat of Government as may be determined by GSA, such rental to include all costs of maintenance, upkeep, and repair.

### § 101–19.102 Leased buildings.

Operation of space in leased buildings will be based on the same standards and levels of service provided in Government-owned space. However, the scope of the operation and maintenance performed by GSA will be predicated on the extent of the lessor's liability therefor under the terms of the lease.

### § 101–19.103 Protection.

Normal safety, fire, and guard protection will be furnished to provide for the safety of visitors and occupants of the building, the maintenance of order, and the protection of the Government's interest in the property. Security guarding can be made available on a reimbursable basis at the request of tenants, provided specific authority for such expenditure is given in agency appropriation act language or other law.

### § 101–19.104 Policy.

(a) It is the policy of GSA, with due regard to the program activities of the agencies concerned, to hold all improvement and alteration work to the absolute minimum required to house the agencies and to permit them to carry out their programs in an efficient manner.

(b) Alterations, improvements, and repairs will be made to buildings and facilities as necessary to protect the investment of the Government, within the limit of funds available therefor. Such work shall be performed in leased premises by GSA to the extent that the Government is responsible therefor under the provisions of the lease and the limitations of section 322 of the Economy Act (40 U.S.C. 278a), are not exceeded, except as otherwise provided by law.

(c) Alterations in space in buildings for which GSA controls operation and maintenance will be made to the extent necessary as a result of moves ordered by GSA in the assignment or reassignment of space.

(d) Space adjustments or alterations requested by an agency for its convenience in rearranging, expanding, or consolidating activities, or for laboratory, scientific, or other special functions will be performed on a reimbursable basis, subject to approval of the changes by GSA. Approval will be based on engineering and structural limitations of the building, conformance with policy and normal practice in the building, and limitations due to lease provisions or law. All such work shall be performed under the supervision of GSA.

(e) Agencies assigned space by GSA are not authorized to negotiate with lessors or other sources for alterations, utilities, or other services, exchanges of space, or changes of any nature without prior approval of GSA.

### § 101–19.105 Furniture and furnishings.

### § 101–19.105–1 Definition.

For the purposes of this section, the term "furniture and furnishings" means items normally required in office occupancy, such as desks, tables, chairs, costumers, file cabinets, bookcases, and floor coverings. It does not include desk top items, office machines, or labor-saving devices; nor special desks, tables, or cabinets involved in the use of such equipment; nor items peculiar to an agency's specialized functions.

### § 101–19.105–2 Funding for moving.

Moving of office equipment, furniture and furnishings, and other personal property will be accomplished when required as a result of moves ordered by GSA in the assignment, reassignment, and control of space. Moving services requested by an agency for its convenience in rearranging or consolidating activities will be performed on a reimbursable basis.

### § 101–19.105–3 Moving of furniture and furnishings.

The moving of furniture and furnishings in the reassignment of space under the control of GSA for space assignment purposes shall be restricted to the fullest extent practicable in the interest of efficiency and economy. Furniture and furnishings (except filled file cabinets) shall not be moved when suitable furniture and furnishings can be made available to the agency or segment of an agency reassigned to a new location.

### § 101–19.105–4 Determinations.

(a) Since the determinations with respect to the availability of furniture and furnishings for outfitting an office are dependent to a large degree on the size, location, and type of occupancy of the individual blocks of space which may be involved, the determinations required by section 210(g) of the Federal Property and Administrative Services Act (40 U.S.C. 490(g)) shall be made by appropriate GSA officials, in consultation with duly authorized agency officials, at the local level as circumstances in each case warrant. Determinations shall be based on accomplishing the move:

(1) At the least total cost to the Government;

(2) Without engaging in new or extensive procurement of furniture; and

(3) Without causing undue delay in the work schedule of the moving agency.

### § 101–19.105–5 Furniture control.

The furniture and furnishings previously used by the moving agency or unit and not moved to the new space shall pass to the control of GSA without reimbursement, except when purchased from trust funds. Such furniture will be reassigned to other using agencies or reported excess. When furniture is reassigned by GSA, custody and accountability therefor will be transferred to the using agency. Internal moves made by agencies within assigned areas and not subject to space reassignment action by GSA are exempt from the requirements of this § 101–19.105. However, in the interest of efficiency and economy, agencies should restrict the moving of furniture to the extent feasible.

### § 101–19.106 Conservation of services.

Occupant agencies should assist in the management of buildings by practicing good housekeeping methods and, wherever possible, by exercising economy in the use of electric current, heat, cooling, building supplies, facilities, and other services. Utilities should be conserved by turning off lights and equipment when not needed. Supplies furnished in the servicing of buildings should be conserved. Equipment and furnishings should be kept neat and orderly. Storage of books, papers, and other materials on the floor or on top of equipment, desks, or tables should be avoided. Trash and other waste materials should be disposed of in the receptacles provided. Soiling or damaging walls and other painted surfaces is prohibited. It is the responsibility of agencies occupying space in Government-owned or -leased quarters to require their employees to observe such conservation practices.

### § 101–19.107 Door title cards and holders.

Cards indicating the room number and the occupants of the room are provided by GSA at no cost to the occupant, when the space is managed by GSA. Cards are normally 8" x 6" in size and are available in several colors with contrasting lettering. A standard color combination is assigned for each building. The aluminum holder for the cards is also supplied free of charge and is cemented to the corridor wall on the knob side at each door. Agencies requiring identification of the occupant of the space should fill out Optional Form 12, Request for Door Title Cards and Holders, and submit it to the Buildings Manager for that building. Usually, the card carries only the name of the operational unit which is occupying the room. Occasionally, it may be desirable to list the name of the chief of the unit also. Lettering painted on doors is to be avoided. Optional Form 12 should be used for requesting GSA to furnish other cards, signs, and sign writing for the benefit of the tenant, as a reimbursable service.

**§ 101–19.108 Property pass.**

(a) Optional Form 7, Property Pass, shall be used by all agencies requiring a pass for the removal of tenant agency controlled Government property from Federal buildings. The form may be used for the removal of personally owned property when security regulations are in force in a given building.

(b) It is to be filled in and signed by the person authorizing the removal of the property. The person authorized to remove the property is to surrender the pass to the guard when leaving the building. The disposition of the pass after collection by the guard is a matter of administrative determination to be made by the using agency.

**§ 101–19.109 Decorations.**

**§ 101–19.109–1 Manufactured decorations.**

Manufactured decorations such as crepe paper, drapes, curtains, cotton, cardboard, flock, and similar material shall be flameproof.

**§ 101–19.109–2 Christmas trees.**

The use of natural Christmas trees shall be subject to the following requirements:

(a) In buildings of fire-resistive construction and in buildings provided with automatic sprinkler protection, a reasonable number of trees may be placed regardless of the tree size. In other buildings, the number of trees should be held to a minimum and restricted to 3 feet in height.

(b) Trees shall be placed away from radiators and other heating equipment, away from curtains and other combustible materials, away from water pipes and other exposed electrical grounds, and in locations that will not interfere with ingress or egress facilities. Trees shall not be located near open stairs.

(c) Freshly cut trees should be obtained insofar as possible. The freshness of the tree should be maintained by sawing it off at an angle at least 1 inch above the original cut and keeping the tree standing in water during the entire time it is kept in the building. This will aid in reducing its flammability.

(d) Trees shall be removed from the building as promptly as possible, and in no case shall a tree remain for more than 10 days after installation.

**§ 101–19.109–3 Natural decorations.**

Holly, cornstalks, and similar material may be used for decorative purposes only with the approval of GSA Buildings Manager or custodian. Only sparing quantities of such material shall be used.

**§ 101–19.109–4 Electric lights.**

Electric lights may be used for decorative purposes only with the approval of the GSA Buildings Manager or custodian. All installations shall be made under the supervision of a competent electrician and shall meet accepted wiring methods and materials standards. All equipment, including tree lighting sets, shall be checked for defects and repaired or replaced if necessary. Tree lighting sets shall not be used on metal trees, whether grounded or not, or on other trees treated with conductive coatings because of the electrical shock hazard.

**§ 101–19.109–5 Lighted candles.**

Lighted candles shall not be used for decorative purposes in any Government building.

**§ 101–19.110 Employee-owned electrical equipment.**

An agency desiring to have an employee-owned electrical appliance installed in a building under the jurisdiction of GSA shall submit a request in writing to the GSA Buildings Manager in charge of the building in which the installation is to be made. The request shall describe the appliance and its intended use and shall have been approved by an authorized representative of the agency. The Buildings Manager will inform the requesting agency of the approval or disapproval of the request. All installations shall be made by or under his direction and in conformance with the safety and installation requirements. Whether payment will be required therefor shall be determined from the applicable provisions of Subpart 101–19.4. The Buildings Manager will provide for the periodic inspection of all installations of electrical appliances to guard against possible fire hazards and to ensure the observance of good housekeeping practices. When the use or installation of the appliance does not conform to the appropriate safety, installation, and sanitary requirements, the agency will be requested to order its removal.

**§ 101–19.111 Vehicle parking facilities.**

**§ 101–19.111–1 General.**

GSA is responsible for determining what space in and around existing Government-owned properties under its custody and control may be utilized for vehicle parking purposes.

**§ 101–19.111–2 Policy.**

(a) It is the policy of the GSA to establish, to the extent funds are available therefor, vehicle parking facilities in and around existing Government-owned properties under the custody and control of GSA. Such facilities will be consistent with the character of other properties in the neighborhood, will not adversely affect the use or appearance of the Government property, and will not constitute a traffic hazard. GSA will assign parking space at a facility in the following order or priority:

(1) Government-owned vehicles of agencies;

(2) Privately owned vehicles used for Government business;

(3) Vehicles of persons transacting business within the property; and

(4) Vehicles of employees of agencies after the needs in § 101–19.111–2(a) (1), (2), and (3) have been satisfied.

**§ 101–19.111–3 Parking space assignment.**

Allotment of areas will be made to agencies which shall administer such areas for parking purposes. Policing of public buildings and grounds, including parking areas, are set forth in Subpart 101–19.3. Formal space assignment procedures shall not apply to parking areas. If agencies wish GSA to assign spaces at a facility, the order or priority indicated in § 101–19.111–2 will be followed. If necessary, and at occupant agency request, provisions will be made by GSA to regulate the use of parking areas by policing with GSA or other Government personnel, or by arrangement with local law enforcing authority. Unusual protection requirements shall be subject to reimbursement.

**§ 101–19.112 Concessions.**

**§ 101–19.112–1 Scope of section.**

This section applies to concessions in buildings operated by GSA, except vending stands operated by blind persons under the Randolph-Sheppard Act (20 U.S.C. 107 et seq.).

**§ 101–19.112–2 General.**

(a) Concessions require the use of space and the provision of various building facilities and services. The type and location of each concession may seriously affect GSA costs for its installation, as well as later costs for building maintenance and operation.

(b) It is essential, therefore, that the type and location of each concession be satisfactory to GSA, and that each concession contract definitely establish the responsibilities of the concessionaire with respect to costs and other matters which affect building maintenance and operation. It also is imperative that consideration be given to pertinent legislation and the terms of existing contracts between GSA and concessionaires.

(c) GSA will arrange for the establishment of all concessions, including public telephones, in buildings under its custody and control. It will provide suitable space for approved concessions, arrange for necessary alterations and installations, enter into contracts or issue permits, and select concessionaires.

**§ 101–19.112–3 Transferred buildings.**

Concessions which were contracted for or otherwise arranged for by a Federal agency having custody and control of a building before its transfer to GSA, except concessions operated by the blind, may be continued under the supervision of that agency upon written approval of GSA subject to the following:

(a) Proposed alterations and improvements, purchases of equipment for replacement, and other matters affecting the building structure or its maintenance and operation, shall be approved by GSA.

(b) GSA will arrange for periodic inspections to insure compliance with safety, health, and sanitary codes.

**§ 101–19.112–4 Supervision.**

(a) Responsibility for supervision and administration of all concessions, except as provided in § 101–19.112–3, is vested in GSA.

(b) In the case of contracts and permits to which GSA is a party, officials of tenant agencies shall not, unless authorized by GSA, instruct concessionaries concerning types of service, articles to be sold, prices, or any other phase of operations. They shall communicate their wishes and requirements in such matters and shall refer suggestions and criticisms of Federal employees to the GSA Buildings Manager or to the appropriate regional official of GSA who will take such action in consequence thereof as may be deemed appropriate.

**§ 101–19.112–5 Determination of need.**

GSA will determine the need for concessions based on the following requirements:

(a) There must be adequate justification for each concession.

(b) Sufficient funds shall be available to defray the cost of providing necessary utility lines, preparing space, and doing other things for which the Federal Government will be responsible.

(c) Sufficient and satisfactory space must be available for the purpose.

(d) It shall be possible to establish and operate each concession in conformance with safety, health, and sanitary codes.

(e) There shall be no contravention of the provisions of law, or the terms of any lease (except with the prior consent of the lessor).

(f) The proposed concession shall not be detrimental or objectionable to other tenant agencies in the building.

(g) Commodities and services sold shall be limited to those which Federal employees may need to obtain while on duty, which are essential to their health, comfort, or efficiency, and which cannot be obtained conveniently from nearby existing facilities; *Provided:* That this requirement shall not prevent the approval of concessions required to serve a functional need of a tenant agency, as when the Government provides meals to inductees into the armed forces; or vending stands to be operated by the blind.

(h) Except when unusual conditions prevail, each concession shall be such as will serve all Federal employees in the building. This does not preclude the establishment of duplicate facilities when justified by the size of the building.

**§ 101–19.112–6 Scheduling patronage.**

When requested by GSA, each tenant agency should endeavor to schedule the times at which its employees may use concession services, so that patronage will be distributed evenly over a reasonable serving period.

**§ 101–19.112–7 Safety, cleanliness, and sanitation.**

(a) In the interest of safety, cleanliness, and sanitation, patrons shall be encouraged to consume foods and beverages at the point of purchase. When foods or beverages are removed from the concession area for consumption, agency heads shall require the following:

(1) Beverages and liquid foods be in covered containers.

(2) Empty cans be placed in receptacles provided by the concessionaires, or be placed alongside office waste receptacles.

(3) Liquids not be poured into waste receptacles.

(4) Spillage of liquids in corridors, lobbies, or work areas be avoided.

(5) Nondisposable dishes, silverware, and other utensils not be removed from concession areas without the permission of the concessionaire, and those removed with his permission be returned promptly after each use by the person granted permission.

(6) Violation of these requirements may make it necessary to withdraw the privilege of carrying foods and beverages from concession areas.

**§ 101–19.112–8 Music.**

(a) As in the case of other concessions, the broadcasting of music in work or concession areas shall be subject to the prior approval of GSA.

(b) Approval will be subject to the applicable provisions of § 101–19.112–4, and to the following requirements:

(1) The interested tenant agency shall accept responsibility for the satisfactory selection of music and other aspects of the service.

(2) The music shall be provided without expense to GSA, and in concession areas without expense to the concessionaire, except with his prior concurrence.

(3) Installations incident to the provision of the music shall be satisfactory to the superintendent of the building.

(4) The provision of the music shall not unduly interfere with the satisfactory operation of a concession.

(5) The installation shall not be used for commercial advertising.

## Subpart 101–19.2 [Reserved]

## Subpart 101–19.3—Conduct on Federal Property

**§ 101–19.300 General.**

The rules and regulations in this subpart apply to all Federal property under the control of GSA and to all persons entering in or on such property. Unless otherwise stated herein, Federal property under the charge and control of GSA is referred to as "property", and "public space" means GSA controlled entrances, lobbies, foyers, corridors, and auditoriums when used for public meetings. It is the responsibility of the occupant agencies to require observance of these rules and regulations by their employees.

**§ 101–19.301 Recording presence.**

Persons entering or leaving properties during periods when such properties are closed to the public shall sign the register and/or display authorized identification documents when requested by the guard, watchman, or other authorized individuals.

**§ 101–19.302 Preservation of property.**

It is unlawful to willfully destroy, damage, or remove property or any part thereof.

**§ 101–19.303 Conformity with signs and emergency directions.**

Persons in and on property shall comply with official signs of a prohibitory or directory nature, and, during emergencies, with the directions of authorized individuals.

**§ 101–19.304 Nuisances.**

The use of loud, abusive, or otherwise improper language, unwarranted loitering, sleeping or assembly, the creation of any hazard to persons or things, improper disposal of rubbish, spitting, prurient prying, the commission of any obscene or indecent act, or any other unseemly or disorderly conduct on property, throwing articles of any kind from a building and climbing upon any part of a building, is prohibited.

**§ 101–19.305 Gambling.**

Participating in games for money or other personal property, or the operation of gambling devices, the conduct of a lottery or pool, or the selling or purchasing of numbers tickets, in or on property, is prohibited.

**§ 101–19.306 Intoxicating beverages and narcotics.**

Entering property or the operating of a motor vehicle thereon, by a person under the influence of intoxicating beverages or narcotic drug, or the consumption of such beverages or the use of such drug in or on property, is prohibited.

**§ 101–19.307 Soliciting, vending, debt collection, and distribution of handbills.**

The soliciting of alms and contributions, commercial soliciting and vending of all kinds, the display or distribution of commercial advertising, or the collecting of private debts, in or on property, is prohibited. This section does not apply to national or local drives for funds for welfare, health, and other purposes sponsored or approved by the occupant agencies, concessions, or personal notices posted by employees on authorized bulletin boards. Distribution of material such as pamphlets, handbills, and flyers is prohibited without prior approval of authorized individuals.

**§ 101–19.308 Photographs for news, advertising, or commercial purposes.**

Except where security regulations apply, or a Federal court order or rule prohibits it, photographs for news purposes may be taken in public space without prior permission. Photographs for advertising and commercial purposes may be taken in public space only with the prior written permission of the Building Manager. Photographs for news, advertising, or commercial purposes may be taken in space occupied by a tenant agency only with the consent of the occupying agency concerned.

**§ 101–19.309 Dogs and other animals.**

Dogs and other animals, except seeing-eye dogs, shall not be brought upon property for other than official purposes.

**§ 101–19.310 Vehicular and pedestrian traffic.**

(a) Drivers of all vehicles in or on property shall drive in a careful and safe manner at all times and shall comply

with the signals and directions of guards and all posted traffic signs;

(b) The blocking of entrances, driveways, walks, loading platforms, or fire hydrants in or on property is prohibited;

(c) Except in emergencies, parking in or on property is not allowed without a permit. Parking without authority, parking in unauthorized locations or in locations reserved for other persons or continuously in excess of 18 hours without permission, or contrary to the direction of posted signs is prohibited. This section may be supplemented from time to time, with the approval of the appropriate Regional Administrator, by the issuance and posting of specific traffic directives as may be required, and when so issued and posted such directives shall have the same force and effect as if made a part hereof.

**§ 101–19.311 Weapons and explosives.**

No person while on property shall carry firearms, other dangerous or deadly weapons, or explosives, either openly or concealed, except for official purposes.

**§ 101–19.312 Nondiscrimination.**

There shall be no discrimination by segregation or otherwise against any person or persons because of race, creed, color, or national origin, in furnishing, or by refusing to furnish to such person or persons the use of any facility of a public nature, including all services, privileges, accommodations, and activities provided thereby on property.

**§ 101–19.313 Penalties and other law.**

Whoever shall be found guilty of violating the rules and regulations in this Subpart 101–19.3, while on property over which the United States exercises exclusive or concurrent legislative jurisdiction, is subject to fine of not more than $50 or imprisonment of not more than 30 days, or both (see 40 U.S.C. 318c). Nothing contained in the rules and regulations in this Subpart 101–19.3 shall be construed to abrogate any other Federal laws or regulations, or any State and local laws and regulations, applicable to any area in which property is situated.

## Subpart 101–19.4—Standard Practices for Financing

**§ 101–19.400 Scope of subpart.**

This subpart prescribes the standards and the division of responsibility as between Federal agencies and GSA for financing building operations.

**§ 101–19.401 Policy.**

With respect to buildings under its control, the policy of GSA, in providing space and related services to Federal agencies, is as set forth in § 101–19.401–1.

**§ 101–19.401–1 GSA responsibility.**

(a) GSA shall be responsible, within the funds appropriated to it for such purposes, for:

(1) Providing general purpose space and related services necessary to meet the needs of tenant agencies.

(2) Making repairs, betterments, and alterations, and providing building equipment for occupant agencies in Government-owned buildings, except such space occupied or to be occupied by the Post Office Department in post office buildings where the services will be limited to repairs.

(b) The suitability of space for tenant agency use, the scope, degree, and level of service to be rendered to all agencies in Government, and the adequacy of appropriations to GSA therefor will be for ultimate determination by GSA with due regard for agency program requirements.

**§ 101–19.401–2 Other agencies' responsibility.**

(a) To the extent that GSA appropriations are not adequate for providing necessary space and related services, other agencies shall be responsible for paying all or part of the cost thereof, providing their appropriations are legally available for the purpose.

(b) It shall be the responsibility of tenant agencies to notify GSA in writing of desired changes in occupancy, space use, or requirements for more than one shift operation. Notification shall be given in time to permit consideration of the cost of the desired changes in GSA annual budget estimates.

(c) Occupant and tenant agencies shall also be responsible for services as outlined in § 101–19.403. When such services involve public improvements, as defined in § 101–19.402, the work may not be undertaken in the absence of an appropriation legally available for the purpose. (See 41 U.S.C. 12).

(d) If new or additional rented space is required in the District of Columbia, for which GSA has not budgeted, specific authority for the payment thereof is required in the agency appropriation or in other law clearly applicable to the appropriation to be charged, or through an appropriation for a purpose which clearly implies that the rental of a building or a part thereof is authorized by the Congress. (See 40 U.S.C. 34).

**§ 101–19.402 Definitions.**

For the purposes of this Subpart 101–19.4, terms shall have the meanings described in this section.

**§ 101–19.402–1 Buildings under the control of GSA.**

"Buildings under the control of GSA" means Government-owned and -leased buildings, but excludes the following buildings and construction projects:

(a) On the public domain (including that reserved for national forests and other purposes).

(b) On properties of the United States in foreign countries.

(c) On Indian and native Eskimo properties held in trust by the United States.

(d) On lands used in connection with Federal programs for agricultural, recreational, and conservation purposes, including research in connection therewith.

(e) On or used in connection with river, harbor, flood control, reclamation or power projects, or for chemical manufacturing or development projects, or for nuclear production, research, or development projects.

(f) On or used in connection with housing and residential projects.

(g) On military installations (including any fort, camp, post, naval training station, airfield, proving ground, military supply depot, military school, or any similar facility of the Department of Defense).

(h) On Veterans Administration installations used for hospital or domiciliary purposes.

(i) Acquired by lease by Post Office Department for post office purposes.

(j) Acquired by lease by other Government agencies under authority delegated by GSA.

(k) Which the President may deem, from time to time hereafter, to be justified in the public interest.

**§ 101–19.402–2 General purpose space.**

"General purpose space" means space in buildings under the control of GSA, including land incidental to the use thereof, which may be suitable for the use of agencies generally, as determined by GSA.

**§ 101–19.402–3 Special purpose space.**

"Special purpose space" means space in buildings under the control of GSA, including land incidental to the use thereof, which is wholly or predominantly utilized for the special purposes of an agency and not generally suitable for the use of other agencies, as determined by GSA.

**§ 101–19.402–4 Related services.**

"Related services" includes rent, operation, protection, maintenance, repair, betterment, and alteration of buildings, and initial adjustment of space; providing necessary building equipment; and moving tenant agencies when assigned to space at the direction of GSA.

**§ 101–19.402–5 Tenant agency.**

"Tenant agency" means any Federal agency occupying space in a building for which GSA has the responsibility for the functions of operation and maintenance.

**§ 101–19.402–6 Occupant agency.**

"Occupant agency" means any Federal agency occupying space in a building, under the control of GSA, for which GSA has space assignment responsibility but does not have the responsibility for the functions of operation and maintenance.

**§ 101–19.402–7 Maintenance.**

"Maintenance" means to preserve or keep in an existing state or condition by periodic or occasional inspection, adjustment, lubrication, cleaning, and making necessary minor repairs. Ordinary maintenance is that routine recurring work which is incidental to everyday operations. Preventive maintenance is that work which is programmed at scheduled intervals.

**§ 101–19.402–8 Repair.**

"Repair" means the restoration of a facility to a condition substantially equivalent to its original state and efficiency. The distinction is made that whereas maintenance is preventive, repairs are curative. Repairs may involve replacement of component units in whole or in part where the new unit substituted is no better than the old one was when it was acquired. Routine and incidental replacements of parts constitute ordinary repairs; extensive replacements of parts constitute extraordinary repairs.

**§ 101–19.402–9 Betterment.**

"Betterment" means a substitution where the new unit is better than the old one was when it was acquired. The term "betterment" may also include actions referred to as modernizations.

**§ 101–19.402–10 Space adjustment.**

"Space adjustment" means a rearrangement of space, or relocation of equipment, which does not increase building capacity or improve its quality. A "space adjustment" is made usually to accommodate a specific agency operation or to permit the most efficient use of space and facilities.

**§ 101–19.402–11 Extension.**

"Extension" means an addition, enlargement, or expansion of an existing building which results in an increase in capacity.

**§ 101–19.402–12 Conversion.**

"Conversion" includes the redesign, remodeling, and conversion of a building from one use to another, i.e., hospital or warehouse to office space.

**§ 101–19.402–13 Alteration.**

"Alteration" means to repair, remodel, improve, extend, or make other changes in a public building.

**§ 101–19.402–14 Public improvement.**

The term "public improvement" is of statutory origin and has a meaning peculiar to the law (see 41 U.S.C. 12). A "public improvement" is interpreted to include any alteration, and such betterments and extraordinary repairs as will appreciably prolong the life or increase the value of a building.

**§ 101–19.402–15 Legally available (as applicable to funds).**

The term "legally available" means that specific agency appropriations are authorized for use for particular purposes, when there is (a) specific language therefor in an appropriation act or in a substantive statute to which the appropriation act is related or (b) adequate support for the use thereof in the legislative history of the appropriation act, notwithstanding the availability of general appropriations to GSA for similar purposes. Evidence of legal availability will be established, when required, by certification from the requisitioning agency to GSA.

**§ 101–19.403 Standard practices.**

The following standard practices are prescribed for carrying out the policy as outlined in § 101–19.401. These practices, which are similar to those followed in commercial building operations, are the basis for GSA appropriation estimates.

**§ 101–19.403–1 General conditions.**

Services and facilities made available to the agencies are subject to the following:

(a) General purpose space and related services will be provided without cost to the tenant agencies occupying the buildings to the extent that current appropriations are adequate therefor.

(b) GSA financed services, as set forth herein, are generally provided for occupancy of the building during the usual business hours (one shift) of a 5-day workweek, unless arrangements are made otherwise pursuant to § 101–19.401–2(b). An exception to this standard is guard service which is provided as required by the need for normal protection of the facility.

(c) Where air-conditioning, fans, and water cooling units are not furnished by GSA, such equipment may be purchased, and accountability thereto retained by the tenant agency, when its appropriation is legally available, and if approved by GSA. Where approval is given for installation of agency-owned equipment, the agency shall reimburse GSA for installation, maintenance, and repair.

(d) Funds for public improvements normally are appropriated to GSA and an agency may not finance the cost thereof in the absence of an appropriation legally available for the purpose.

**§ 101–19.403–2 GSA financed services.**

Subject to the general conditions in § 101–19.403–1, the following services are provided by GSA without cost:

(a) Installing, removing, and relocating partitions, and the physical moving of furniture and of office equipment within and between buildings when such services are required as a result of moves ordered by GSA in the assignment, reassignment, and control of space.

(b) Rent for leased quarters.

(c) Cleaning, including window washing and floor maintenance.

(d) Electric current, water, and heat.

(e) Normal protection or guarding.

(f) Operation, maintenance, and repair of elevators and electric, heating, air-conditioning, ventilating, refrigeration, plumbing, and sewerage systems.

(g) Repair, betterment, alteration, and necessary building equipment in Government-owned buildings.

(h) Repairs to leased buildings and building equipment, including periodic painting.

(i) Maintenance of grounds, including approaches, sidewalks, and roads.

(j) The furnishing and maintenance of building equipment, such as directory and bulletin boards at the main entrances, clocks, door closers, water coolers, electric outlets for normal office use, door keys and changing locks except for security purposes, door title cards and holders, and window shades or venetian blinds.

(k) Refinishing of floors and laying of floor covering, such as linoleum or tile.

**§ 101–19.403–3 Reimbursable services.**

In accordance with the general conditions in § 101–19.403–1 no provision is made in the appropriation estimates of GSA for services set forth in this § 101–19.403–3. Consequently, agencies should arrange to have funds therefor provided in their appropriations and GSA will furnish such services on a reimbursable basis (see 38 Comp. Gen. 758). Expenses of providing services of the types described in paragraphs (a) and (c) through (i) in this section, may normally be reimbursed to GSA out of funds appropriated to tenant or occupant agencies without specific appropriation

language or legislative history authorizing or supporting such expenditures, except as may be required by the provisions of section 3733 of the Revised Statutes (41 U.S.C. 12).

(a) Services which are over and above the GSA financed services prescribed in § 101–19.401–1, and which are performed for the convenience of and at the request of tenant agencies, such as the installation, removal, and relocation of partitions, electric outlets (subject to approval of Buildings Manager) the installation of annunciator and buzzer systems, and the moving of furniture and office equipment.

(b) Security guarding and protection of classified records and property, when specifically provided in an agency's appropriation.

(c) Installations, operation, and maintenance of burglar alarms and other automatic protective devices and systems for security protection due to the special nature of an agency's activities.

(d) Utilities for specialized installations, such as food storage, preparation, and serving in cafeterias and lunch stands (except authorized stands operated by the blind), printing, duplicating, photographic plants, laboratories, electronic computers, machine installations, and the like.

(e) Construction, installation, operation, maintenance, and repair of special equipment and space adjustments required in buildings as a result of such installations.

(f) Construction, installation, and maintenance of exhibits.

(g) Washing and polishing furniture and cleaning inside file cabinets, bookcases, desks, and other personal property.

(h) Space adjustments in buildings for scientific, laboratory, or for other specialized purposes, including installation of ventilating and temperature and humidity control equipment.

(i) Service of motion picture operators and other personnel required in the use of auditoriums and conference rooms.

### § 101–19.403–4 Newly constructed buildings.

The following services and equipment are provided by GSA without cost to prospective occupants of new buildings constructed out of funds appropriated to GSA, including buildings acquired by purchase-contract arrangements under the Public Buildings Purchase Contract Act of 1954 (40 U.S.C. 356).

(a) Payment of principal, interests, and taxes under purchase-contract.

(b) The usual built-in and fixed building equipment, including courtroom equipment where applicable, and such miscellaneous items as directory and bulletin boards in public space, water coolers, wall fans, and venetian blinds.

(c) Moving and installation of existing special equipment, such as laboratory, clinical, and protection equipment.

(d) Moving of furniture, furnishings, and office equipment in use of temporary space or new buildings.

(e) Space for interim occupancy for agencies temporarily displaced to make way for construction.

(f) Special purpose requirements of prospective occupants will be financed in accordance with § 101–17.602(c).

### § 101–19.403–5 Furniture and furnishings.

Each agency, unless otherwise provided by statute, will be responsible for financing its furniture and furnishings requirements at all locations. In this connection, to the maximum extent practicable, requirements shall be met from excess stock including rehabilitated equipment, even though such items may not conform to present standards.

## PART 101–20—ASSIGNMENT AND UTILIZATION OF SPACE

Sec.

101–20.000 Scope of part.
101–20.001 Authority.
101–20.002 Basic policy.

Subpart 101–20.1—Assignment of Space

101–20.100 Scope of subpart.
101–20.101 Definition of terms.
101–20.101–1 Space assignment.
101–20.101–2 General purpose space.
101–20.101–3 Special purpose space.
101–20.101–4 Government-owned space.
101–20.101–5 Leased space.
101–20.101–6 Permit space.
101–20.102 Requests for space.
101–20.102–1 Form of request.
101–20.102–2 Exceptions to submitting requests for space.
101–20.102–3 Action when space is not available.
101–20.103 Procedures for assigning space.
101–20.103–1 Assignment by GSA.
101–20.103–2 Assignment by agencies.

Subpart 101–20.2—Utilization of Space

101–20.200 Scope of subpart.
101–20.201 Definition of terms.
101–20.201–1 Space utilization.
101–20.201–2 Space inspection.
101–20.201–3 Space utilization survey.
101–20.202 Responsibility of GSA.
101–20.202–1 Conduct of space inspections.
101–20.202–2 Conduct of space utilization surveys.
101–20.203 Responsibility of agencies.
101–20.204 Release of space not fully utilized.

Subpart 101–20.3—Space Standards, Criteria, and Guidelines

101–20.300 Scope of subpart.
101–20.301 Definition of terms.
101–20.301–1 Occupancy guides.
101–20.301–2 Private office.
101–20.301–3 Work station.
101–20.301–4 File space.
101–20.302 Space allowances.
101–20.303 Use of occupancy guides.
101–20.304 [Reserved.]
101–20.305 Interim space allowances.
101–20.305–1 List of interim space allowances.
101–20.306 Allowance for private offices.
101–20.307 Allowance for work stations.
101–20.308 Allowance for file space.

Subpart 101–20.4—Space Planning and Layout

101–20.400 Scope of subpart.
101–20.401 Definition of terms.
101–20.401–1 Space planning.
101–20.401–2 Space layout.
101–20.402 Space planning assistance.
101–20.403 [Reserved]
101–20.404 Use of contractual services for space planning.

Subpart 101–20.5—Providing Space in New Public Buildings

101–20.500 Scope of subpart.
101–20.501 General.
101–20.502 Responsibility of GSA.
101–20.503 Responsibility of agencies.
101–20.504 Postoccupancy evaluation.

Subparts 101–20.6—101–20.8 [Reserved]

Subpart 101–20.9—Space Reports

101–20.900 Scope of subpart.
101–20.901 Report of space use, Washington, D.C., Metropolitan Area.

Subparts 101–20.10—101–20.47 [Reserved]

Subpart 101–20.48—GSA Regional Offices

101–20.4800 Scope of subpart.
101–20.4801 GSA regional offices.

Subpart 101–20.49—Forms

101–20.4900 Scope of subpart.
101–20.4901 Standard forms.
101–20.4901–81 Standard Form 81, Request for Space.
101–20.4901–111 Standard Form 111, Agency Space Report.
Standard Form 111A, Agency Space Summarization.
101–20.4902 GSA forms.
101–20.4902–144 GSA Form 144, Space Requirements.

AUTHORITY: The provisions of this Part 101–20 issued under sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).

### § 101–20.000 Scope of part.

This part prescribes the policies and procedures relative to the assignment and utilization of space in Government-owned and -leased buildings, or portions thereof, in the United States, Puerto Rico, and the Virgin Islands.

### § 101–20.001 Authority.

This part implements the applicable provisions of the Federal Property and Administrative Services Act of 1949 (63 Stat. 377, as amended); the Act of July 1, 1898 (40 U.S.C. 285); the Act of March 1, 1919 (40 U.S.C. 1); the Act of August 27, 1935 (40 U.S.C. 304c); the Public Buildings Act of 1959 (40 U.S.C. 601 et seq.); Reorganization Plan No. 18 of 1950 (3 CFR; 40 U.S.C. 490 note); and E.O. No. 11035 of July 9, 1962 (27 F.R. 6519; 3 CFR).

### § 101–20.002 Basic policy.

(a) GSA will provide agencies with sufficient and adequate general purpose space to carry out their programs.

(b) In the provision of general purpose space, GSA will establish and maintain a balance between functional efficiency and customer agencies and economy in its use.

## Subpart 101–20.1—Assignment of Space

### § 101–20.100 Scope of subpart.

This subpart prescribes the responsibilities and procedures which are applicable to the assignment of space to Federal agencies and other entities entitled to occupy space in Government-owned and -leased buildings, or portions thereof.

### § 101–20.101 Definition of terms.

The following definitions in this section are established for terms used in this subpart.

### § 101–20.101–1 Space assignment.

"Space assignment" means an administrative action which authorizes the occupancy and use of building space, and land areas incidental thereto, by a Federal agency or other eligible entity.

### § 101–20.101–2 General purpose space.

"General purpose space" means space in buildings and land area incidental thereto, which, as determined by GSA, is suitable for use by several Federal agencies. The physical characteristics of the space may be of the office, storage, or special types, or any combination thereof. The following categories of space are specifically excluded from this definition:

(a) Space in any building located in a foreign country.

(b) Space in buildings which are located on the grounds of any fort, camp, post, arsenal, navy yard, naval training station, airbase, proving ground, missile site, military academy or school, or any similar facility of the Department of Defense or U.S. Coast Guard, unless and to such an extent as a permit for its use by other agencies shall have been issued by the Secretary of Defense, or the Secretary of the Treasury, as appropriate, or their duly authorized representatives.

### § 101–20.101–3 Special purpose space.

"Special purpose space" means space found by the Administrator of General Services to be wholly or predominantly utilized for the special purposes of the agency to have custody thereof, and is not generally suitable for the use of other agencies; including but not limited to hospitals, housing, laboratories, mints, manufacturing plants, and penal institutions. The types of space listed in § 101–18.106–1 have been found to be wholly or predominantly utilized for the special purposes of the agency named, and are not generally suitable for the uses of other agencies.

### § 101–20.101–4 Government-owned Space.

"Government-owned space" means space in buildings, and land incidental thereto, the title to which is vested in the United States Government.

### § 101–20.101–5 Leased space.

"Leased space" means space in buildings, and land incidental thereto, for which the Government has a right of occupancy by virtue of having acquired a leasehold interest.

### § 101–20.101–6 Permit space.

"Permit space" means space in buildings, and land incidental thereto, for which a right of occupancy has been granted by permit from another Federal agency.

### § 101–20.102 Requests for space.

Except as provided in § 101–20.102–2, Federal agencies shall satisfy their space needs by submitting a request in the proper form to the GSA regional office responsible for the geographic area in which the space is required.

### § 101–20.102–1 Form of request.

Space requests, except for space in proposed buildings included in the Public Buildings Construction Program, shall be submitted on Standard Form 81, Revised, request for space (see § 101–20.4901–81). Requests for space in buildings proposed for construction shall be submitted to GSA on GSA Form 144, Net Space Requirements for Future Federal Building Construction (See § 101–20.4902–144).

Standard Form 81 need not be filed by Federal agencies when the space desired or to be acquired is:

(a) General purpose space of 2,500 square feet or less falling within the geographical area where leasing authority has been delegated to the agency. (See § 101–18.106.)

(b) Special purpose space of 2,500 square feet or less irrespective of geographical location. (See § 101–18.107–2.)

(c) Commercial space acquired by lease by the Post Office Department for

postal purposes. (See § 101–18.106(c)(3).)

**§ 101–20.102–3 Action when space is not available.**

If no suitable Government-controlled space is available, GSA will so advise by the return of a signed copy of the Standard Form 81, showing thereon the action to be taken.

(a) When the agency has acquisition authority, or has been delegated such authority by the Administrator of General Services, it may thereupon proceed to acquire the requested space. The signed copy of the Standard Form 81 shall be attached to the leasing or related instrument made available to the General Accounting Office. Such clearances are extended on a fiscal year or part of a fiscal year basis, except in those cases where the acquiring activity uses longer term leasing authority.

(b) GSA may take necessary action to acquire space for agencies having acquisition authority when the latter so request by checking the appropriate block on Standard Form 81.

(c) GSA will take the necessary action to acquire the space for agencies having no acquisition authority.

**§ 101–20.103 Procedures for assigning space.**

**§ 101–20.103–1 Assignment by GSA.**

(a) GSA will perform all functions with respect to the assignment and reassignment of space:

(1) In Government-owned buildings which GSA controlled for assignment and reassignment purposes on June 30, 1950.

(2) In specific Government-owned buildings for which assignment and reassignment functions were transferred to GSA pursuant to section 1 of Reorganization Plan No. 18 of 1950 (3 CFR; 40 U.S.C. 490 note).

(3) In Government-owned buildings or space acquired by GSA by purchase, condemnation, transfer, lease, or otherwise.

(b) GSA may, in accordance with policies and directives prescribed by the President, including E.O. No. 11035 of July 9, 1962 (27 F.R. 6519; 3 CFR), under sec. 205(a) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 486(a)), and after consultation with the agencies affected, assign and reassign space of any executive agencies after determining that such assignment or reassignment is advantageous to the Government in terms of economy, efficiency, or national security.

**§ 101–20.103–2 Assignment by agencies.**

Except for the space covered by § 101–20.103–1(a), and subject to the provisions of § 101–20.103–1(b), agencies may perform all functions with respect to the assignment and reassignment of space. The Administrator of General Services may, in specific cases, authorize executive agencies to perform any of the functions described in § 101–20.103–1(a).

## Subpart 101–20.2—Utilization of Space

**§ 101–20.200 Scope of subpart.**

This subpart prescribes the principles and objectives of GSA in regard to the full and efficient utilization of Government-owned and leased space. The efficient utilization of space is closely related to the assignment functions of GSA, and therefore, this subpart shall be considered in the light of the policies and procedures in Subpart 101–20.1, Assignment of Space.

**§ 101–20.201 Definition of terms.**

The following definitions in this § 101–20.201 are established for terms used in this subpart.

**§ 101–20.201–1 Space utilization.**

"Space utilization" means the degree and manner in which Government-owned and -leased facilities are occupied.

**§ 101–20.201–2 Space inspection.**

"Space inspection" means a reconnaissance-type evaluation of the manner in which space assignments are being utilized to determine if immediate, or scheduled, corrective action is indicated.

**§ 101–20.201–3 Space utilization survey.**

"Space utilization survey" means a detailed analysis, using recognized space management procedures and techniques, of the manner in which an agency is utilizing its space.

**§ 101–20.202 Responsibility of GSA.**

(a) GSA will assign agencies sufficient space to carry out their programs, provided that the need for such space is justified to the satisfaction of GSA.

(b) GSA will conduct space inspections and space utilization surveys to promote and enforce efficient utilization, recapturing for release or reassignment any space which the agencies do not justify to the satisfaction of GSA as being required. Adequate advance notice of the planned survey will be given to the agency concerned.

**§ 101–20.202–1 Conduct of space inspections.**

GSA will plan space inspections at periodic intervals on a community, building, or agency basis as appropriate. Inspections will be made in an orderly manner, on the basis of a floor-by-floor and room-by-room check of all assigned space. The agency will be provided with a written summary of significant findings and recommendations, together with data concerning improvements which can be effected by the agency, and those which are planned by GSA.

**§ 101–20.202–2 Conduct of space utilization surveys.**

Space utilization surveys are made to ascertain if a current assignment can be made more efficient and economical. These may be scheduled as a result of a request for space, an action to improve utilization, an assignment action requiring a relocation of an activity, or result from a space inspection. Agencies will be kept informed of space utilization surveys and actions related thereto by the appropriate GSA regional office listed in § 101–20.4801.

**§ 101–20.203 Responsibility of agencies.**

It is the responsibility of the agencies to assist and cooperate with GSA in the assignment and utilization of space, including the furnishing of data relative to the use of the space occupied, and personnel housed or to be housed. It is the further responsibility of the agencies continuously to study and survey space occupied under assignment by GSA and other space which is controlled by the agencies, to insure efficient and economical space utilization. It is also the responsibility of those agencies which control space to report to GSA any space which is excess to their needs and which might be assigned to other agencies.

**§ 101–20.204 Release of space not fully utilized.**

The space utilization program is designed to effect maximum efficient utilization of Government-owned and -leased space. Space for which there is no current foreseeable need will be relinquished.

## Subpart 101–20.3—Space Standards, Criteria, and Guidelines

**§ 101–20.300 Scope of subpart.**

This subpart identifies those factors affecting office layout which must be considered in connection with achieving more efficient layouts and better space utilization.

**§ 101–20.301 Definition of terms.**

The following definitions in this § 101–20.301 are established for terms used in this subpart.

**§ 101–20.301–1 Occupancy guides.**

"Occupancy guides" means printed guidelines which outline the space requirements based on the functions, operations, and staffing of the particular agency for which they are developed.

**§ 101–20.301–2 Private office.**

"Private office" means a room occupied by one individual; this includes rooms enclosed by either ceiling-high or bank-type partitions.

**§ 101–20.301–3 Work station.**

"Work station" means the area, furniture, equipment, and configuration required for one worker.

**§ 101–20.301–4 File space.**

"File space" means an area used either predominantly or exclusively for filing operations.

**§ 101–20.302 Space allowances.**

Space allowances are derived from specific studies of the operations of the agencies, and are directed toward providing each employee with enough space to work efficiently.

**§ 101–20.303 Use of occupancy guides.**

The objectives of the occupancy guide program are to improve agency operations and promote economic and prudent utilization of federally owned and leased space through the development and application of occupancy standards and criteria for specific agencies and activities. Each occupancy guide represents an agreement between GSA and the agency as to the latter's space requirements and is written in terms which permit nationwide application. Occupancy guides will be used as the basis of authorization and layout of agency space.

**§ 101–20.304 [Reserved]**

**§ 101–20.305 Interim space allowances.**

(a) The interim space allowances listed in § 101–20.305–1 are to be used in office space planning for all agencies or components thereof, for which occupancy guides have not been published. In addition, these allowances are applicable for all agency headquarters activities. The application of these space allowances is canceled immediately upon publication of the appropriate occupancy guide.

(b) Allowances listed in § 101–20.305–1 shall not be used as criteria for assigning space to individuals or even to small units of an office. Rather, they are to be used to evaluate the total amount of space required for specific agency locations.

**§ 101–20.305–1 List of interim space allowances.**

| Grade | Type of assignment | Office space allowance (sq. ft. per person) [1] |
|---|---|---|
| GS 1–6 | [1] | 60 |
| GS 7–11 | Supervisory | 100 |
| GS 7–11 | Nonsupervisory | 75 |
| GS 12–13 | Supervisory | 150 |
| GS 12–13 | Nonsupervisory | 100 |
| GS 14–15 | Supervisory | 250 |
| GS 14–15 | Nonsupervisory | 150 |
| GS–16–18 | | 300 |

[1] Head of agency and deputy (not prescribed).

**§ 101–20.306 Allowance for private offices.**

Private offices should be provided only when there is a demonstrated functional need; and then they should be only large enough for the occupant to conduct his normal business in an efficient manner and with a reasonable degree of dignity. The normal maximum allowance for private offices is 300 square feet, but this should be approached only in cases where it is necessary for the occupant to confer frequently with sizeable groups of people, and a conference room is not convenient.

**§ 101–20.307 Allowance for work stations.**

The work station concept is an office layout technique which identifies those items of furniture and equipment actually required for the proper performance of an employee's duties, and arranges them in a manner intended to stimulate efficient work processing. Space allowances for individual work stations generally range in area from 42 square feet to 100 square feet, depending on the specific furniture and equipment requirements of the position. Proper positioning of work stations will result in increased efficiency and economy of operation.

**§ 101–20.308 Allowance for file space.**

In any space layout, consideration should be given to records storage, and a determination made as to whether the files are active or inactive. (An inactive file is one in which reference service is not more frequent than one reference per file drawer per month.) Inactive files should be removed from expensive office space and transferred to a Federal Records Center for temporary storage and ready reference, or to nonoffice space. Study should be made of the need for and use of filing equipment to insure that all drawers are used for files only, and are at least three-fourths full. Office supplies, etc., should not be stored in filing equipment.

## Subpart 101–20.4—Space Planning and Layout

**§ 101–20.400 Scope of subpart.**

This subpart outlines the methods used in the planning and layout of space assignments and prescribes the conditions governing GSA—agency coordination.

**§ 101–20.401 Definition of terms.**

The following definitions in this § 101–20.401 are established for terms used in this subpart.

**§ 101–20.401–1 Space planning.**

"Space planning" means a study which results in placing agency operations according to geographic location, position within a building, and space layout of furniture, on a scientific basis.

**§ 101–20.401–2 Space layout.**

"Space layout" means the specific placement of work stations, furniture, and equipment, to provide maximum efficiency of an agency operation. This is normally accomplished by the use of templates.

**§ 101–20.402 Space planning assistance.**

When in the discharge of its responsibility for efficient use of space an agency requires space layout assistance, a request for such assistance should be made to the regional office of GSA responsible for the geographical area in which the space is located. In consultation with the agency, GSA will determine the scope of assistance required and will provide such service either by use of existing staff or by contract.

**§ 101–20.403 [Reserved]**

**§ 101–20.404 Use of contractual services for space planning.**

No Federal agency shall, without the written approval of GSA, enter into a contract for interior office design or space layout, with any non-Federal firm or individual. When it is determined that a contract is required, GSA, with the advice of the agency, will enter into the contract and supervise the contractor's performance. The contract will be completely reimbursable by the requesting agency.

## Subpart 101–20.5—Providing Space in New Public Buildings

**§ 101–20.500 Scope of subpart.**

This subpart prescribes the procedures and objectives governing space planning for new public buildings.

**§ 101–20.501 General.**

Modern space layout principles, which contribute to good space management and operational efficiency, are particularly appropriate in the case of new buildings. Full coordination, strict observance of the design schedule, and followup action are required to insure maximum return to the Government in terms of efficiency and economy.

**§ 101–20.502 Responsibility of GSA.**

GSA will be responsible for the space planning and layout in all new buildings. The regional office of GSA will forward layout plans to the tenant agencies for review and coordination and, at the same time, notify the agencies of the date beyond which design changes cannot be accepted.

**§ 101–20.503 Responsibility of agencies.**

Agencies are responsible for making their needs known to GSA on a timely basis; providing cooperation and assistance if required, in the preparation of space layouts; and requesting necessary changes prior to the design cutoff date. (See also § 101–17.204.)

**§101–20.504 Postoccupancy evaluation.**

GSA will conduct a postoccupancy evaluation of major new buildings approximately six months after the date of occupancy. This evaluation, which will take the form of space inspections or space utilization surveys as described in Subpart 101–20.2, Utilization of Space, will be conducted to promote space economy.

**Subparts 101–20.6—101–20.8 [Reserved]**

## Subpart 101–20.9—Space Reports

**§ 101–20.900 Scope of subpart.**

This subpart prescribes the preparation and submission of reports of space use and requirements.

**§ 101–20.901 Report of space use Washington, D.C., Metropolitan Area.**

(a) Each Federal agency shall report formally to the General Services Administration, Region 3, Public Buildings Service, Washington, D.C., 20407, the use being made of space occupied by the agency in the Washington, D.C., Metropolitan Area.

(b) For the purposes of this § 101–20.901, the Washington, D.C., Metropolitan Area includes:

(1) The District of Columbia.

(2) In Maryland: Montgomery and Prince Georges Counties.

(3) In Virginia: Arlington and Fairfax Counties; the cities of Alexandria, Fairfax, and Falls Church.

(c) Reports shall be prepared as of the end of each calendar quarter certifying to the space occupied by the agency.

(d) Reports shall be prepared on Standard Form 111, Agency Space Report, and Standard Form 111A, Agency Space Summarization. (Forms are illustrated in Subpart 101–20.4901–111.)

(e) Reports shall be submitted to reach GSA within ten days after the end of each calendar quarter ending in March, June, September, and December.

**Subparts 101–20.10—101–20.47 [Reserved]**

## Subpart 101–20.48—GSA Regional Offices

**§ 101–20.4800 Scope of subpart.**

This subpart identifies the regional offices of GSA, describes the geographical areas of jurisdiction, and lists the office address.

**§ 101–20.4801 GSA regional offices.**

| GSA region | Area served | Mailing address |
|---|---|---|
| 1 | Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont. | General Services Administration, Post Office and Courthouse, Boston, Mass., 02109. |
| 2 | Delaware, New Jersey, New York, Pennsylvania, Puerto Rico, and the Virgin Islands. | General Services Administration, 30 Church St., New York, N.Y., 10007. |
| 3 | District of Columbia, Maryland, Virginia, and West Virginia. | General Services Administration, Region 3, Washington, D.C., 20407. |
| 4 | Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina, and Tennessee. | General Services Administration, 1776 Peachtree St. NW., Atlanta, Ga., 30309. |
| 5 | Illinois, Indiana, Kentucky, Michigan, Ohio, and Wisconsin. | General Services Administration, 219 South Dearborn St., Chicago, Ill., 60604. |
| 6 | Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota. | General Services Administration, 1500 East Bannister Rd., Kansas City, Mo., 64131. |
| 7 | Arkansas, Louisiana, Oklahoma, and Texas | General Services Administration, 1114 Commerce St., Dallas, Tex., 75202. |
| 8 | Arizona, Colorado, New Mexico, Utah, and Wyoming. | General Services Administration, Building 41, Denver Federal Center, Denver, Colo., 80225. |
| 9 | California, Hawaii, and Nevada | General Services Administration, 49 Fourth St., San Francisco, Calif., 94103. |
| 10 | Alaska, Idaho, Montana, Oregon, and Washington. | General Services Administration, GSA Center, Auburn, Wash., 98002. |

### Subpart 101–20.49—Forms

**§ 101–20.4900 Scope of subpart.**

This subpart contains information on forms that pertain to the assignment and utilization of space and instructions in their use.

**§ 101–20.4901 Standard forms.**

All forms referenced to this § 101–20.4901 are Government standard forms. The subsection numbers in this section correspond with the standard form numbers.

**§ 101–20.4901–81 Standard Form 81, Request for Space.**

NOTE: Form filed as part of original document. Copies may be obtained from Central Office, GSA.

**§ 101–20.4901–111 Standard Form 111, Agency Space Report.**

(a) Standard Form 111, Agency Space Report.

(b) Standard Form 111A, Agency Space Summarization.

NOTE: Form filed as part of original document. Copies may be obtained from Central Office, GSA.

**§ 101–20.4902 GSA forms.**

All forms referenced to this § 101–20.4902 are forms developed by GSA to provide for uniform transmission of data or information internally but which may be prescribed for tenant agency use when dealing with GSA. The subsection numbers in this section correspond with the GSA form numbers.

**§ 101–20.4902–144 GSA Form 144, Space Requirements.**

NOTE: Form filed as part of original document. Copies may be obtained from Central Office, GSA.

## SUBCHAPTER E—SUPPLY AND PROCUREMENT

## PART 101–25—GENERAL

### Subpart 101–25.2—Interagency Purchase Assignments

Sec.
101–25.201 General.
101–25.202 Factors to be used to determine assignment of purchase responsibility.
101–25.203 Centralized purchases by GSA.
101–25.204 Centralized purchases by designated executive agencies under authority delegated by the Administrator of General Services.
101–25.205 Arrangement for performance of purchasing functions other than centralized.
101–25.206 Independent purchases by executive agencies.

### Subpart 101–25.3—Use Standards

101–25.301 General.
101–25.302 Office furniture, furnishings, and equipment.
101–25.302–1 Executive type office furniture and furnishings.
Sec.
101–25.302–2 Filing cabinets.
101–25.302–3 Electric typewriters.
101–25.302–4 Portable computing machines.
101–25.303 Gasoline for use in motor vehicles.

### Subpart 101–25.4—Replacement Standards

101–25.401 General.
101–25.402 Motor vehicles.
101–25.403 Typewriters.
101–25.404 Furniture.
101–25.405 Materials handling equipment.

### Subparts 101–25.5—101–25.47 [Reserved]

### Subpart 101–25.48—Reports

101–25.4800 Scope of subpart.
101–25.4801 Supply Activity Report.

### Subpart 101–25.49—Illustration of Forms

101–25.4900 Scope of subpart.
101–25.4901 [Reserved]
101–25.4902 GSA forms.
101–25.4902–1473 GSA Form 1473: Supply Activity Report.

AUTHORITY: The provisions of this Part 101–25 issued under sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).

### Subpart 101–25.1—General Policies

**§ 101–25.102 Exchange or sale of personal property for replacement purposes.**

Policies and methods governing executive agencies in exercising the authority granted under section 201(c) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 481(c)), are prescribed in Part 101–43.

**§ 101–25.103 Trading stamps.**

Policy relative to trading stamps received in connection with Government purchases is prescribed in Part 101–43.

### Subpart 101–25.2—Interagency Purchase Assignments

**§ 101–25.201 General.**

(a) This subpart prescribes the basic policy for interagency purchase assignments within the executive branch of the Government. It is directly applicable to excutive agencies and concerns other Federal agencies in their purchasing from, through, or under contracts made by executive agencies.

(b) The term "purchase assignment" as used in this subpart shall normally be considered to include performance of the following functions:

(1) Arranging with requiring agencies for phased submission of requirements and procurement requisitions.

(2) Soliciting and analyzing bids and negotiating, awarding, and executing contracts.

(3) General contract administration.

(4) Arranging for inspection and delivery.

(5) Promotion of a maximum practicable degree of standardization in specifications and establishment of Federal Specifications, when possible, in accordance with applicable regulations.

(c) Notice of purchase assignments and applicable delegations of authority made under the provisions of this Subpart 101–25.2, shall be furnished to the General Accounting Office by GSA.

**§ 101–25.202 Factors to be used to determine assignment of purchase responsibility.**

With their consent or upon direction of the President, executive agencies will be designated and authorized by the Administrator of General Services exclusively, or with specified limited exceptions, to make purchases and contracts on a continuing basis for items or item groups of articles and services for the executive branch of the Government, after due consideration of the following factors, weighted as appropriate:

(a) Current or potential predominant use or consumption by a given agency.

(b) Availability of funds to carry out the assignment on a Government-wide basis or with limited exceptions.

(c) Specialized personnel, or the nucleus of such personnel; regularly employed by the agency, such as scientific, research, and operating technicians, especially qualified or experienced in specification writing, buying, inspecting, testing, using, installing, or operating a particular item or group of items.

(d) Custodianship and operation of special facilities such as research and testing laboratories and inspection or testing stations and devices.

(e) Actual or potential qualifications and experience of agency purchasing and contracting officials and their operating units with due regard to adequacy of staff.

(f) Past experience of the agency in performing services to other agencies on an informal or joint cooperative basis.

(g) Relations of the agency with the industry involved.

(h) Physical proximity of the agency purchasing office or offices to the requirement-compiling elements of the principal using agencies.

(i) Physical location of the agency purchasing office or offices in relation to market areas.

(j) Physical proximity of the agency purchasing offices in relation to engineering or design offices, in the interest of speed in processing modifications in design and specifications, and also reviewing bids for specifications compliance.

(k) Relative interest of agency heads in receiving the purchase assignment and specific requests of agency heads to do the buying of a given item or group of items on a Government-wide basis.

**§ 101–25.203 Centralized purchases by GSA.**

GSA will exclusively, or with specified limited exceptions, make purchases and contracts on a continuing basis for articles and services for the executive branch of the Government in the interest of lower prices, improved quality, and service or standardization when:

(a) The item or item groups of articles and services are items of "common-use" which are defined as items of standard commercial production or items covered by Federal Specifications commonly used by both civilian and military activities, or by two or more civilian activities, and not requiring such substantial alterations to adapt them to military or other particular application as to render inclusion in a centralized purchasing program impracticable; or

(b) A number of agencies, representing the majority users according to dollar volume, request GSA to make purchases

and contracts exclusively for a given item or item groups of articles and services even though not "common-use" items as defined in § 101–25.203(a); and

(c) GSA is best equipped to do the buying based upon the factors listed in § 101–25.202, or must of necessity act as the central purchasing office when other agencies more appropriately suited to make central purchases do not do so and are not so directed by the President; and

(d) The head of another executive agency has not been delegated authority by the Administrator of General Services exclusively, or with specified limited exceptions, to make purchases and contracts for prescribed items or item groups of articles and services for the executive branch of the Government in accordance with §§ 101–25.202 and 101–25.204.

(e) GSA has issued appropriate regulations, or a Federal Supply Schedule, specifically designating the item or item groups of articles or services that fall within (a), (b), and (c) of this § 101–25.203 that are thereafter to be purchased exclusively for all executive agencies, or with specified limited exceptions, by GSA.

**§ 101–25.204 Centralized purchases by designated executive agencies under authority delegated by the Administrator of General Services.**

Designated executive agencies will exclusively, or with specified limited exceptions, make purchases and contracts on a continuing basis for items or item groups of articles and services for the executive branch of the Government in the interest of lower prices, improved quality, and service or standardization when:

(a) The Administrator of General Services has determined, based upon the factors listed in § 101–25.202, that a selected executive agency is best equipped to perform certain purchasing and contracting functions, and the Administrator of General Services has issued appropriate regulations designating the categories of articles or services complying with (a), (b), and (c) of § 101–25.203 that are to be purchased exclusively by the named executive agency under authority delegated by the Administrator of General Services; and

(b) The head of the designated executive agency has issued appropriate instructions, or a Federal Supply Schedule, under authority as delegated by and in the form approved by the Administrator, specifically designating the item or item groups of articles or services that are thereafter to be purchased exclusively for all executive agencies, or with specified limited exceptions, by the designated executive agency.

**§ 101–25.205 Arrangement for performance of purchasing functions other than centralized.**

(a) Upon request, GSA will make purchases and contracts for any of the items or item groups of articles or services authorized to be purchased independently by executive agencies. GSA will also arrange, on a basis mutually agreeable, with any executive agency to perform its purchase and contracting functions on a continuing basis, if requested in writing to do so by the agency head, provided the arrangements agreed upon will result in lowered cost or improved service either to the individual agency or to the Government as a whole.

(b) In those instances where lowered cost or improved service, either to an individual agency or to the Government as a whole will result, GSA will arrange, on a basis mutually agreeable to the agencies involved, to assign all or a portion of the purchase and contracting functions of one executive agency to another executive agency on a continuing basis.

**§ 101–25.206 Independent purchases by executive agencies.**

Items or groups of items of articles or services may be purchased independently by executive agencies, in accordance with regulations of GSA otherwise applicable, when:

(a) Not otherwise prescribed in current regulations, or included in mandatory Federal Supply Schedules, issued by GSA or by another executive agency designated by the Administrator of General Services.

(b) For emergency requirements when time does not permit purchasing through the authorized central purchasing agency. A record shall be maintained of such transactions and be made available to the responsible central purchasing agency upon request.

(c) By consultation between GSA and agencies concerned, it is determined that interagency purchase assignment would adversely affect the national security or military operations.

(d) The purchases cannot be publicly disclosed in the interest of national security.

## *Subpart 101–25.3—Use Standards*

**§ 101–25.301 General.**

(a) This subpart prescribes minimum use standards for certain Government-owned personal property which shall be applied by all executive agencies. Additional criteria above these minimum standards should be established by each executive agency, limiting its property to the minimum requirements necessary for the efficient functioning of the particular office concerned.

(b) Additional use standards should be established by all executive agencies for other Government-owned property under their control whenever use standards will effect economy and efficiency in the use of such property.

(c) All items of property, determined to be excess to the needs of an agency as a result of the application of use standards, shall be promptly reported in accordance with Part 101–43.

**§ 101–25.302 Office furniture, furnishings, and equipment.**

(a) Each executive agency shall establish criteria for the use of office furniture, furnishings, and equipment. Such criteria shall be limited to the minimum requirements as established by the agency head for authorized functions and programs which will, beyond a reasonable doubt, be in operation within the following six months.

(b) In developing such criteria, a distinction shall be made between the requirements of organizational elements concerned with purely administrative functions, and those of a technical, scientific, or specialized nature.

(c) Items of office equipment, used only occasionally, should be pooled within an agency and made available to activities of the agency when and as necessary.

**§ 101–25.302–1 Executive type office furniture and furnishings.**

(a) The use of executive type office furniture and furnishings shall be limited to personnel in Grade GS–15 and above, or the equivalent thereto. Executive type office furniture and furnishings includes, but is not limited to, desks, tables, telephone stands and cabinets, wardrobes, bookcases, costumers, fully upholstered chairs and davenports, lamps, smoking stands, desk trays, receptacles, and rugs. Executive type office furniture and furnishings are:

(1) Those items covered by Federal Supply Schedule, Executive Type Office Furniture, or by Federal Standards and Specifications which have "executive type" in their titles.

(2) Those items generally known to or considered by the trade as the "executive line" of office furniture and furnishings.

(3) Those items of furniture which cost, new, 60 percent more than the standard common-use items generally used in the Government.

(b) The standard prescribed by this § 101–25.302–1 shall not apply to unitized or built-in furniture in an installation. In instances where lack of space is a problem, the use of unitized furniture, including conference desks, is more economical and is recommended as a substitute for executive type office furniture.

(c) In cases where executive type furniture actually in use cannot be replaced by other types within an agency, or where other circumstances require special consideration, exceptions to this limitation in the use of executive type furniture and furnishings may be granted under criteria established by the head of the agency.

**§ 101–25.302–2 Filing cabinets.**

Executive agencies shall make every effort to effect maximum use of filing cabinets and to limit the purchase of new equipment. Filing cabinets should be replaced only in accordance with the standards in Subpart 101–25.4. Maximum utilization of equipment should be obtained by:

(a) Disposing of all records that have been authorized for disposition by the Congress or, where such authorization has not been obtained, through the preparation and obtaining of authorized disposal schedules with the assistance of the National Archives and Records Service of GSA.

(b) Removing office supplies, publications, and other nonrecord material from filing cabinets to more suitable storage equipment, except where the quantity of such material is small (as a rule, less than half a cabinet).

(c) Transferring to Federal Records Centers or approved agency records centers (to the extent that facilities are made available) inactive records not needed in daily business but not yet ready for disposal, when filing equipment can be released by such action.

(d) Shifting less active files, not transferable to approved records centers, to wood cabinets or transfer cases when available, using steel filing cabinets only when files are constantly used.

(e) Using filing cabinets with locks only when required by special needs that cannot be satisfied less expensively.

(f) Using letter-size filing cabinets instead of legal-size whenever possible.

(g) Using 5-drawer filing cabinets whenever available in lieu of 4-drawer cabinets.

**§ 101–25.302–3 Electric typewriters.**

(a) Each agency shall restrict the use of each electric typewriter to a typing station, which is an assigned post filled by an experienced operator for the purpose of preparing typewritten material, where one or more of the following standards are met:

(1) The typing time averages four hours or more of routine typing per machine daily.

(2) The typing time averages two hours or more per machine daily in the preparation of one or more of the following:

(i) Forms requiring an original and five or more carbons, or correspondence requiring an original and seven or more carbons.

(ii) Reproduction copy, such as photo masters and stencils.

(iii) Statistics and reports requiring decimal tabulation.

(3) The machine is used in the preparation of copy for printing. The assignment of proportional spacing machines shall be limited to this use, unless otherwise specifically justified under paragraph (b) of this section.

(4) The machine is used by the physically handicapped.

(b) Exceptions to the above criteria may be granted upon written justification approved by the head of the agency or his authorized representative and made a part of the purchase file.

**§ 101–25.302–4 Portable computing machines.**

Standards for the use of portable computing machines shall be established by each agency, using as a base the minimum standards prescribed in this § 101–25.302–4. Portable computing machines include adding machines, calculators, and comptometers, manually or electrically operated, listing or nonlisting, but do not include posting or accounting machines.

(a) When the need for a machine has been determined, the following standards shall be used in determining the type of machine to be acquired:

(1) Manual machines should be used where electric current is not conveniently available or portability is required, where reasonable protection is desired against emergency shutdown (for example, in the event of continued power failures or civil defense dispersal), or where limited requirement does not warrant electric machines. Electric machines should be used in all other instances.

(2) Listing machines should be used where it is definitely determined that a printed result is necessary to the operation.

(3) Calculators or comptometers shall be used where the operation to be performed contains a volume of work which is impractical of accomplishment by the use of slide rules, computation tables, or adding and subtracting machines.

(b) Features required in a machine for a particular operation should be determined in advance and makes and models of machines having such features should be evaluated carefully with a view to the selection of the machine which will result in the lowest overall cost to the Government.

**§ 101–25.303 Gasoline for use in motor vehicles.**

(a) Each agency shall, except as provided in § 101–25.303(b), use regular grade gasoline in the operation of its motor vehicles, the majority of which have engines designed to render unimpaired performance with use of regular grade gasoline.

(b) The use of premium grade gasoline shall be restricted to:

(1) Vehicles whose engines are specifically designed for and require a higher octane fuel than regular grade

gasolines (manufacturers' printed specifications or operating instructions shall be the determining factor for such use).

(2) Unusual operating conditions, such as a vehicle passing from a zone of very high altitude to one of very low altitude in the course of routine operation, or in operation requiring high torque at low speed and elevated air temperature.

(3) Special services where accelerated pickup or sustained speed is required, such as law enforcement, firefighting, and emergency vehicles.

(4) Specific situations where regular grade gasoline is unobtainable.

## Subpart 101–25.4—Replacement Standards

### § 101–25.401 General.

This subpart prescribes minimum replacement standards to be used by executive agencies desiring to replace specified types of items indicated in this subpart. Executive agencies shall retain items which are in usable and workable conditions even though the standard permits replacement, provided the item can continue to be used or operated without excessive maintenance cost or substantial reduction in trade-in value.

### § 101–25.402 Motor vehicles.

If a motor vehicle has been wrecked or damaged (including wear caused by abnormal operating conditions) beyond economical repair, such unit may be replaced without regard to the standards in this § 101–25.402 after certification to that effect by the head of the agency or his designee. The standards prescribed in this § 101–25.402 are not applicable to the Department of Defense.

(a) Passenger cars and station wagons may be replaced when they have been operated for six years or 60,000 miles, whichever occurs first.

(b) Ambulances may be replaced when they have been operated for seven years or 60,000 miles, whichever occurs first.

(c) Buses for 11 or more passengers may be replaced when they have been operated for eight years. Without regard to years of use, such buses may be replaced when they have been operated the following number of miles:

| | *Miles* |
|---|---|
| Intercity-type bus | 280,000 |
| City-type bus | 150,000 |
| School-type bus | 80,000 |

(d) Multiple-drive (4- or 6-wheel drive) truck-chassis combination personnel and property carrying motor vehicles may be replaced when they have been operated for six years or 40,000 miles, whichever occurs first.

(e) Motor trucks provided with pickup or express, panel or sedan-delivery, carryall, van, open van, platform, stake, rack, dump, truck-tractor, or tank bodies may be replaced in accordance with the following table of years or mileage operation, whichever occurs first:

| Maximum GVW pounds | Total years | Total miles | Pay load rating |
|---|---|---|---|
| Less than 12,500 | 6 | 80,000 | 1 ton and less. |
| 12,500 through 16,999 | 7 | 80,000 | 1½ through 2½ tons. |
| 17,000 and over | 9 | 80,000 | 3 tons and over. |

(f) Where a bureau or comparable organizational unit owns eight or more vehicles in any one of the following classes, not more than 25 percent of the vehicles in such class may be replaced in any one fiscal year. Where the total number of vehicles in any one class is less than eight, not more than two of such vehicles may be replaced in any fiscal year. However, all vehicles to be replaced shall meet the age or mileage replacement standards contained in this § 101–25.402.

(1) Automobiles (sedans, coupes, etc.).

(2) All other passenger-carrying vehicles (station wagons, ambulances, buses).

(3) All trucks and truck tractors.

### § 101–25.403 Typewriters.

(a) Replacement of a typewriter shall not be made unless the estimated cost of necessary repairs or reconditioning of each typewriter being replaced equals or exceeds, at lowest available rates, the percentage of replacement cost in lieu of repair or reconditioning, based on the year after year of manufacture as shown by the manufacturer's serial number. This is shown in the following percentage scale.

| Year: | *Percentage of replacement cost* |
|---|---|
| Second | 80 |
| Third | 80 |
| Fourth | 80 |
| Fifth | 70 |
| Sixth | 70 |
| Seventh | 60 |
| Eighth | 50 |
| Ninth | 40 |
| Tenth | 30 |
| Eleventh | 20 |
| Twelfth | 10 |

(b) An example of the application of the "Standard Replacement Cost Percentage Scale" to a typewriter costing $109 is as follows:

| Year | Assumed trade-in or sale value | Replacement cost | Estimated repair cost justifying replacement |
|---|---|---|---|
| Second | $50.00 | $59.00 | $47.20 |
| Third | 50.00 | 59.00 | 47.20 |
| Fourth | 50.00 | 59.00 | 47.20 |
| Fifth | 45.00 | 64.00 | 44.80 |
| Sixth | 45.00 | 64.00 | 44.80 |
| Seventh | 45.00 | 64.00 | 38.40 |
| Eighth | 45.00 | 64.00 | 32.00 |
| Ninth | 40.00 | 69.00 | 27.60 |
| Tenth | 37.50 | 71.50 | 21.45 |
| Eleventh | 37.50 | 71.50 | 14.30 |
| Twelfth | 30.00 | 79.00 | 7.90 |

(c) When unusual circumstances justify replacement of a typewriter at a date earlier than would be permitted by application of the "Standard Replacement Cost Percentage Scale," a written justification for such replacement shall be prepared by the head of the executive agency or his designated representative, and the replacement of the typewriter may be made. The justification shall be retained as a part of the requisitioning file of the agency.

### § 101–25.404 Furniture.

(a) Items of office furniture, household and quarters furniture, and hospital and institutional type furniture, whether made of metal, wood, or other material, may be replaced by new items only when:

(1) It is determined that replacement is essential for the efficient and economical performance of the functions of the agency in accordance with the criteria established by the head of the agency concerned which may include such factors as extreme obsolescence, or use of built-in or unitized furniture to meet space problems.

(2) The estimated cost of necessary rehabilitation thereof at lowest available rates, including any transportation expense, equals or exceeds 55 percent of the current GSA Stores Stock Catalog price, the Federal Supply Schedule price, or current market price of new items of the same type and class.

(b) The 55 percent criterion prescribed in § 101–25.404(a)(2) is the minimum standard and may be exceeded when it is to the advantage of the Government to do so. Executive agencies may rehabilitate items of furniture subject to replacement under the standard when the rehabilitation improves the appearance and operation of the item and the life expectancy is extended for an additional period of time.

### § 101–25.405 Materials handling equipment.

(a) Except as provided in § 101–25.405 (b) and (c), materials handling equipment shall not be replaced unless the estimated cost of necessary one-time repair or reconditioning of each piece of equipment equals or exceeds, at lowest available rates, the percentage of replacement cost shown in column 3 of the following table. It is imperative that equipment which has exceeded its years of expected economical use be continued in service as long as it is in usable and workable condition and the one-time repair costs do not exceed the last percentages in column 3 of the table. When, due to extenuating circumstances, it is necessary to expend for repair a larger amount than allowable by the table, and if such major repair job increases the life expectancy of the equipment, the repair limits shown in the table need not be strictly adhered to for subsequent repairs of such equipment.

| Column 1 | Column 2 | Column 3 | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Type of unit | Expected years of economical use | Maximum allowable one-time repair limits as percentage of replacement cost (Years in use) | | | | | | | | | | | |
| | | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
| *Gasoline* | | | | | | | | | | | | | |
| Fork Truck (2000#–6000#) | 6 | 50 | 40 | 30 | 20 | 15 | 10 | ---- | ---- | ---- | ---- | ---- | ---- |
| Fork Truck (7500#–15000#) | 8 | 50 | 40 | 35 | 30 | 25 | 20 | 15 | 10 | ---- | ---- | ---- | ---- |
| Tractor | 6 | 50 | 40 | 30 | 20 | 15 | 10 | ---- | ---- | ---- | ---- | ---- | ---- |
| Crane | 10 | 50 | 50 | 45 | 45 | 40 | 35 | 30 | 20 | 15 | 10 | ---- | ---- |
| Platform Truck | 7 | 50 | 40 | 35 | 30 | 25 | 20 | 10 | ---- | ---- | ---- | ---- | ---- |
| Straddle Truck | 10 | 50 | 50 | 45 | 40 | 35 | 30 | 25 | 20 | 15 | 10 | ---- | ---- |
| *Electric* | | | | | | | | | | | | | |
| Fork Truck (2000#–6000#) | 12 | 50 | 50 | 45 | 45 | 40 | 40 | 35 | 30 | 25 | 20 | 15 | 10 |
| Tractor | 12 | 50 | 50 | 45 | 45 | 40 | 40 | 35 | 30 | 25 | 20 | 15 | 10 |
| Crane | 12 | 50 | 50 | 45 | 45 | 40 | 40 | 35 | 30 | 25 | 20 | 15 | 10 |
| Platform | 12 | 50 | 50 | 45 | 45 | 40 | 40 | 35 | 30 | 25 | 20 | 15 | 10 |
| Pallet Truck | 12 | 50 | 50 | 45 | 45 | 40 | 40 | 35 | 30 | 25 | 20 | 15 | 10 |

(1) Years in use shall be determined in accordance with the following:

(i) The number of operating months is obtained by using a month of 100 operating hours, plus 20 hours for time used in servicing, idling, etc., or 1.2. For example, 1,720 hours of operating use for a unit should be multiplied by 1.2 and the result divided by 100, which will give the number of operating months.

(ii) The number of operating years is determined by dividing the number of operating months by 12, except that where the equipment has been in storage, the months in storage should be calculated on the basis of a 30-day month and divided by 2. The result of the months in storage shall then be added to the months in operating use and divided by 12 to get the number of years in actual use.

(iii) The fractional result of years in use determined by this formula should be rounded to the nearest full year and applied to column 3 for determining the maximum repair limits. For example, 1.89 would be rounded to 2 years in use, or 1,39 would be rounded to 1 year in use.

(2) In using the maximum allowable one-time repair limits in column 3 of the table, all direct labor, parts, and materials are to be included in computing one-time repair costs.

(3) An example of the application of the maximum one-time repair limits as percentage of replacement cost to a fork truck, electric-powered, capacity 2,000 pounds, and costing $3,500, is as follows:

| Years in use: | *Estimated maximum one-time repair cost justifying replacement* |
|---|---|
| 1 | $1,750 |
| 2 | 1,750 |
| 3 | 1,575 |
| 4 | 1,575 |
| 5 | 1,400 |
| 6 | 1,400 |
| 7 | 1,225 |
| 8 | 1,050 |
| 9 | 850 |
| 10 | 700 |
| 11 | 525 |
| 12 | 350 |

(b) Replacement may also be considered when the cumulative repairs of a piece of equipment equals 100 percent of the replacement cost.

(c) Cost of replacement of batteries required for the operating of electric-powered trucks will not be included in cumulative repairs of equipment. Repairs costing less than $15 at one time will not be included in cumulative repair costs.

(d) When unusual circumstances justify the replacement of an item of materials handling equipment at a date earlier than would be permitted by application of the percentages in column 3 of the table, a written justification for such replacement shall be prepared by the head of the agency, or his designated representative, and the replacement of the equipment may be made. The justification shall be retained as a part of the purchase file of the agency.

No. 232—Pt. II——4

## Subpart 101–25.48—Reports

### § 101–25.4800 Scope of subpart.

This subpart prescribes the requirements for reporting to GSA on matters pertaining to the general area of supply management.

### § 101–25.4801 Supply Activity Report.

(a) Executive agencies, except the Department of Defense, shall submit reports on GSA Form 1473, Supply Activity Report (see § 101–25.4902–1473 for illustration and instructions for preparation), for each fiscal year in an original and two copies. Reports shall be forwarded to General Services Administration, Federal Supply Service, Supply Management Services Division, Washington, D.C., 20405, not later than September 15.

(b) Copies of GSA Form 1473 may be obtained from General Services Administration Region 3, Printing and Publications Division, Washington, D.C., 20407.

(c) Submission of GSA Form 1473 is not required for the following:

(1) Stockpiles specifically authorized by statute.

(2) Raw materials and component parts stocked for incorporation into the end product of industrial operations and the end products of industrial operations. (Inventories of materials other than those for incorporation into the end product; that is, those used in the operation and maintenance of industrial plants, shall be reported.)

(3) Optional forms, agency forms, and publications, such as, manuals, pamphlets, and brochures. (Standard forms and blankbook stock shall be reported.)

(d) One set of reports shall be prepared to cover only supply activities located in the United States. Separate reports shall be prepared to cover supply activities in the possessions, trust territories, and the Canal Zone. Reports on foreign supply activities are not required. Each set of reports shall consist of separate reports for each agency, bureau, or comparable major subdivision. In addition, agencies operating warehouses or depots shall submit a separate report for each warehouse or depot.

(e) Copies of the individual supply point reports or equivalent information shall be kept available at some central point in the reporting agency for at least six months following submission of the report, for inspection as required by GSA representatives.

## Subpart 101–25.49—Illustrations of Forms

### § 101–25.4900 Scope of subpart.

This subpart illustrates forms prescribed or available for use in connection with subject matter in other subparts of Part 101–25. When applicable, this includes instructions for preparation of the forms illustrated.

### § 101–25.4901 [Reserved]

### § 101–25.4902 GSA forms.

The GSA forms are illustrated in this section to show their text, format, and arrangement and to provide a ready source of reference. The subsection numbers in this section correspond with the GSA form numbers.

### § 101–25.4902–1473 GSA Form 1473, Supply Activity Report.

NOTE: Form filed as part of original document. Copies may be obtained from Central Office, GSA.

# PART 101–27—INVENTORY MANAGEMENT

Sec.
101–27.000 Scope of part.

Subpart 101–27.1—Stock Replenishment

101–27.101 General.
101–27.102 Economic order quantity principle.
101–27.102–1 Applicability.
101–27.102–2 Guidelines.
101–27.102–3 Limitations on use.
101–27.103 Acquisition of excess property.

AUTHORITY: The provisions of this Part 101–27 issued under sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).

### § 101–27.000 Scope of part.

This part provides policies, principles, and guidelines to be used in the management of Government-owned inventories of personal property.

## Subpart 101–27.1—Stock Replenishment

### § 101–27.101 General.

Each agency shall establish and maintain such control of personal property inventories as will assure that the total cost involved will be kept to the minimum consistent with program needs. For purposes of stock replenishment, inventories may be considered to be composed of active inventory which is that portion carried to satisfy average expected demand, and safety stock which is that portion carried for protection against stock depletion occurring when demand exceeds average expected demand, or when leadtime is greater than anticipated.

(a) In establishing active inventory levels, consideration shall be given to the average demand of individual items, space availability, procurement costs, inventory carrying costs, purchase prices, quantity discounts, transportation costs other pertinent costs, and statutory and budgetary limitations.

(b) In establishing safety stock levels, consideration shall be given to demand and leadtime fluctuations, essentiality of items, and the additional costs required to achieve additional availability.

### § 101–27.102 Economic order quantity principle.

### § 101–27.102–1 Applicability.

All executive agencies, except the Department of Defense, within the United States, excluding Alaska and Hawaii, shall replenish inventories of stock items having recurring demands, except items held at points of final use, in accordance with the economic order quantity (EOQ) principle.

### § 101–27.102–2 Guidelines.

The EOQ principle and its applications are described in the GSA Handbook, Economic Order Quantity (Federal Stock Number 7610–543–6765), available from General Services Administration, Region 3, Washington, D.C., 20407. In addition, guidelines for the development of appropriate implementation of the EOQ principle of stock replenishment, including detailed instructions for installation of EOQ procedures, are described in the GSA Handbook, Application of the EOQ Principle of Stock Replenishment, issued by the Commissioner, Federal Supply Service, GSA.

### § 101–27.102–3 Limitations on use.

(a) When there are no limiting factors which preclude its application, such as space or budgetary limitations, the basic EOQ technique, which reduces total variable costs of procurement and possession to a minimum, shall be used.

(b) When a space, personnel, or budgetary limitation precludes application of the basic EOQ technique, a modification of EOQ which produces the fewest possible replenishments for a given level of inventory investment, or the lowest possible level of inventory investment for a given number of replenishments, shall be used.

### § 101–27.103 Acquisition of excess property.

To encourage the use of excess property which might otherwise be disposed of as surplus, inventory levels may be adjusted upward when items of stock are to be acquired from excess sources. Such adjustments should be tempered by caution and arrived at after careful consideration. Generally, acquisitions of items for inventory from excess shall not exceed a 2-year supply except when:

(a) A greater quantity is needed to meet known requirements for an authorized planned program.

(b) The item is not available without special manufacture and a predictable requirement exists.

(c) Administrative determination has been made that in application of the EOQ principle of stock replenishment within an agency an inventory level in excess of two years is appropriate for low dollar-volume items.

(d) The items are being transferred into authorized stock funds for resale to other Government agencies.

## PART 101–28—STORAGE AND DISTRIBUTION

Sec.
101–28.000 Scope of part.

Subpart 101–28.1—General

101–28.100 Scope of subpart.
101–28.101 Uniform terminology.
101–28.101–1 Bay.
101–28.101–2 Bin storage area.
101–28.101–3 Bulk storage.
101–28.101–4 Bulk storage area.
101–28.101–5 Cross-servicing in storage activities.
101–28.101–6 Distribution points.
101–28.101–7 Dunnage.
101–28.101–8 Forklift truck.
101–28.101–9 Gross storage space.
101–28.101–10 Inventory.
101–28.101–11 Load length.
101–28.101–12 Locator system.
101–28.101–13 Materials handling equipment.
101–28.101–14 Pallet.
101–28.101–15 Pallet racks.
101–28.101–16 Pallet rack storage space.
101–28.101–17 Reserve points.
101–28.101–18 Section.
101–28.101–19 Space layout.
101–28.101–20 Storage.
101–28.101–21 Storage aids.
101–28.101–22 Storage space.

Subpart 101–28.2—Interagency Cross-Servicing in Storage Activities

Sec.
101–28.200 Scope of subpart.
101–28.201 Applicability.
101–28.202 G S A/D O D Cross-Servicing Agreement.
101–28.203 Definitions.
101–28.203–1 Government storage activity.
101–28.203–2 Case lot quantities.
101–28.203–3 Commodity classification.
101–28.203–4 Contact points.
101–28.204 Determining location of storage activities.
101–28.205 Requests for services.
101–28.206 Cancellation of cross-servicing arrangements.
101–28.207 Cross-servicing rates.
101–28.208 Reimbursement for services.

AUTHORITY: The provisions of this Part 101–28 issued under sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).

### § 101–28.000 Scope of part.

This part prescribes policy and procedures for the economical and efficient management of warehousing and related activities by executive agencies.

## Subpart 101–28.1—General

### § 101–28.100 Scope of subpart.

This subpart contains uniform terms to be used by executive agencies to describe warehouse areas, types of equipment and storage space, methods of storage, and other elements common to warehousing activities.

### § 101–28.101 Uniform terminology.

The terms set forth in this § 101–28.101 are designed to promote uniformity in describing warehousing activities and are to be used in the reporting, controlling, and evaluation of these activities.

### § 101–28.101–1 Bay.

"Bay" means a designated area within a section of a storage area, outlined by markings on columns, posts, or floor; normally, a specific area within a section such as 20′ by 20′ squares.

### § 101–28.101–2 Bin storage area.

"Bin storage area" means an area involving gross storage space where bins are consolidated and erected. Aisles and working areas utilized in connection with bin operations are part of the gross bin area.

### § 101–28.101–3 Bulk storage.

"Bulk storage" means the storage of supplies and equipment in large quantities, usually in original containers, as distinguished from bin storage. Also, storage of liquids such as petroleum products in tanks, as distinguished from drum or packaged storage.

### § 101–28.101–4 Bulk storage area.

"Bulk storage area" means that space available for the storage of bulk stock.

### § 101–28.101–5 Cross-servicing in storage activities.

"Cross-servicing in storage activities" means the providing by one Government agency of storage and warehousing services for another Government agency on a reimbursable basis. The agency operating the storage facility or activity will furnish all space, personnel, supplies, and equipment required for the receipt, storage, care, handling, and shipment of materials. It excludes those operations where one agency provides space on a permit or license basis for another agency to operate an activity.

### § 101–28.101–6 Distribution points.

"Distribution points" include depots, warehouses, or other warehousing activities having the mission for the receipt, storage, and issue of supplies normally for a given geographical area.

### § 101–28.101–7 Dunnage.

"Dunnage" means any material such as boards, planks, blocks, or metal bracing that is used in transportation and storage to support and secure supplies, to protect them from damage, or for convenience in handling.

### § 101–28.101–8 Forklift truck.

"Forklift truck" means a type of materials handling equipment which is designed to pick up, carry, and stack unit loads of materials.

### § 101–28.101–9 Gross storage space.

"Gross storage space" means a type of space is the gross area (regardless of its location or the purpose for which the space being used was designed or is designated) which is assigned or used for any operation concerning storage or the support of storage functions. (In covered space, the space between exterior walls without deduction for fire walls and structural losses, and in open improved space, the overall measurement with no deduction for trackage and permanent roads.) For management purposes, gross storage space is broken down into two main categories, defined as follows:

(a) "Support storage space" which means, gross storage space used in functions that directly support the storage operations, such as:

(1) "Assembly space": That gross storage space used for collecting and combining material components into kits, units, assemblies, etc.

(2) "Battery charging space": That gross storage space utilized as charging area for storage batteries of electric-powered materials handling equipment. It includes the area for parking equipment for battery charging purposes.

(3) "Office space": That space utilized as office space at storage activities by warehousing personnel for operations in direct support of storage functions.

(4) "Packing and crating space": That gross storage space utilized for packing or crating of material for shipment or storage.

(5) "Preservation and packaging space": That gross storage space utilized in processing, preservation, and packaging of materials and taking similar protective measures to prevent deterioration during storage or shipment.

(6) "Receiving space": That gross storage space within an authorized storage area which is designated as a work area for receipt of materials. Includes necessary space for inspection, identification, and consolidation of materials received when such activities are performed in the designated work area.

(7) "Shipping space": That gross storage space within an authorized storage area which is designated as a work area for shipment of materials. It includes any necessary space for inspection, identification, marking, and consolidation of materials when such activities are performed in the designated work area.

(8) "Other support space": That gross storage space utilized by other similar activities for the receipt, storage, and issue of materials, when such activities are performed by warehousing personnel, e.g., storage space for operating supplies, fumigation areas, etc.

(b) "Gross available storage space", which means gross storage space less the total amount of support storage space. Gross available storage space includes structural loss space, aisles, and net storage space, as follows:

(1) "Structural loss space": That gross storage space not usable for storage of materials because of construction features. Within covered storage areas, space used for toilets, posts, firewalls, elevator shafts, stair wells, ramps, steam pits, switch panels, loading walls (rail and truck), door clearances, etc., is considered structural loss space. Within improved open storage areas, space required for such additional items as firebreaks, streams, stream beds, railroad tracks, clearances maintained for utility lines, etc., is considered structural loss space.

(2) "Aisles": Any passageway within the storage area, and further defined as:

(i) "Cross aisle": A passageway at right angles to main aisles, used for the movement of supplies, equipment, and personnel.

(ii) "Fire aisle": A passageway established to aid in fighting or preventing the spread of fires, or for access to firefighting equipment.

(iii) "Main aisle": A passageway wide enough to permit the easy flow of equipment, supplies, and personnel; generally running lengthwise of the building.

(iv) "Personnel aisle": A passageway used only as pedestrian routes for access to doors or to special interior areas.

(v) "Service aisle": A passageway necessary to provide access to interiors of stacks for inventory, inspection, or for protective processing.

(3) "Net storage space": That portion of gross available storage space upon which material can actually be stored, including floor area upon which bins and pallet racks are erected.

### § 101–28.101–10 Inventory.

"Inventory" means the physical count of items located within a depot, warehouse, installation, or other warehousing activity. Types of inventories include:

(a) "Complete shut-down": The counting of all items located within a depot, warehouse, installation, or other warehousing activity as of a particular date. In accomplishing this type of inventory, all activity such as receiving and shipping (except emergency) is suspended during the actual counting period.

(b) "Cycle": The counting of total stocks by designated items on a progressive basis, over a predetermined space of time.

(c) "Special": The counting of items on a nonscheduled basis, or the counting of items for specific purposes.

### § 101–28.101–11 Load length.

"Load length" means the length of the load being handled by a forklift truck. It is measured from the heel of the forks to the front of the load.

### § 101–28.101–12 Locator system.

"Locator system" means a record which shows the exact location of supplies stored within a storage activity.

### § 101–28.101–13 Materials handling equipment.

"Materials handling equipment" means such items as forklift trucks, towing tractors, warehousing industrial cranes, straddle-carry trucks, pallet trucks, platform trucks, warehousing trailers, and conveyor systems, used in storage and handling operations.

### § 101–28.101–14 Pallet.

"Pallet" means a platform built to specified dimensions, on which supplies are loaded, transported, or stored in units, normally made of wood.

### § 101–28.101–15 Pallet rack.

"Pallet rack" means a storage aid which provides a support for pallets that are independent of lower loads. It is used where the material to be stored is not strong enough to support the superimposed load, is irregular in shape, is too small for bulk storage or too large for bin storage, or it is desirable to remove pallets from a lower tier without disturbing upper tiers. It may be constructed of metal or wood, and is usually erected to the maximum height of storage space or maximum lifting height of materials handling equipment utilized.

### § 101–28.101–16 Pallet rack storage space.

"Pallet rack storage space" means floor area occupied by pallet racks erected for the purpose of storing supplies.

### § 101–28.101–17 Reserve points.

"Reserve points" means depots, warehouses, installations, or other warehousing activities having the mission for receiving, storing, and issuing of reserve stocks of supplies and equipment.

### § 101–28.101–18 Section.

"Section" means an area in a warehouse extending from one wall to the next; usually the largest subdivision of one floor.

### § 101–28.101–19 Space layout.

"Space layout" means the detailed, planned arrangement of storage space for storage, aisles, and other necessary use.

### § 101–28.101–20 Storage.

"Storage" means the act of storing, the state of being stored, or keeping or placing of material in a warehouse, shed, or open area. Storage is the continuation of the receiving operations and is preliminary to the shipping operation.

### § 101–28.101–21 Storage aids.

"Storage aids" include devices, accessories, equipment, and materials used to facilitate the storage and handling of materials, and which are designed specifically to provide a means of storage which will permit the greatest utilization of storage space with a minimum of handling and the maximum of accessibility.

### § 101–28.101–22 Storage space.

"Storage space" means any covered or open area designated for storage operations. Various types of storage space include:

(a) "Bulk-liquid storage space": Area inside tanks designated for the storage of liquids in bulk.

(b) "Caged": Storage space segregated within an area and specially screened or barricaded to prevent pilferage or to otherwise isolate materials.

(c) "Covered": Storage area within any roofed structure that is being used for, or in support of, storage functions.

(d) "Controlled humidity": Area equipped with humidity controlling equipment.

(e) "Dry tank space": Area in tanks designated for the storage of materials other than bulk liquids or gases.

(f) "Flammable": Storage area designed for the storage of highly flammable materials.

(g) "Heated": Area within a storage structure in which the temperature can be controlled by the application of heat.

(h) "Igloo": Area in an earth-covered structure of concrete and/or steel designed for the storage of ammunition and explosives.

(i) "Magazine": Area in a structure, above or below ground, constructed for the storage of ammunition and explosives.

(j) "Open improved": Area which has been graded and hard surfaced or prepared with topping of some suitable material so as to permit effective materials handling operations.

(k) "Open unimproved": Area which has not been surfaced but is actually in use for storage purposes.

(l) "Refrigerated warehouse": Cold storage area where the temperature can be controlled below 50 degrees Fahrenheit. It is generally classed as chill or freeze space, which is defined as:

(1) "Chill": Refrigerated warehouse area in which the temperature can be controlled between 32 and 50 degrees Fahrenheit.

(2) "Freeze": Refrigerated warehouse area in which the temperature can be controlled below 32 degrees Fahrenheit.

(m) "Security": Storage area specially constructed, designed, or barricaded for storage of material requiring specialized protection, or to isolate hazardous, classified, or dangerous materials.

(n) "Shed": Area in a roofed structure, but without complete side and end walls.

(o) "Subterranean": Any area below the surface of the ground used for storage, such as a mine, cave, or a specially constructed underground facility.

(p) "Unheated": Area within a structure that is not equipped with heating facilities.

(q) "Vault": Area in a specially constructed, burglar-proof, fire-resistant structure for storage of materials requiring maximum protection against loss.

(r) "Warehouse": Area in a building designed for storage purposes which is constructed with roof and complete side and end walls.

## Subpart 101–28.2—Interagency Cross-Servicing in Storage Activities

### § 101–28.200 Scope of subpart.

This subpart prescribes policies and procedures to be followed in the cross-servicing of storage and warehousing services between executive agencies of the Government. It implements the provisions of the cross-servicing agreement between the Department of Defense (DOD) and GSA and extends the provisions of the agreement to provide cross-servicing between the civilian agencies of the Government.

### § 101–28.201 Applicability.

(a) The policies and procedures established by this Subpart 101–28.2 are primarily for storage activities within the continental limits of the United States. However, the policies and procedures shall be used when it is feasible to cross-service storage and warehousing requirements in overseas storage activities.

(b) Each executive agency of the Government shall make every effort to utilize, to the maximum extent feasible, available Government storage services of other executive agencies as required, with a view toward avoiding new construction of storage facilities, acquisition of temporary space, and unnecessary transportation of supplies, material, and equipment to distant storage points. The provisions of this subpart do not apply to those storage functions performed by GSA for the Office of Civil Defense.

(c) Available storage services of the executive agencies shall be made available for cross-servicing the requirements of other Federal agencies when requested. Other Federal agencies are encouraged to participate in the cross-servicing arrangements when feasible.

(d) The provisions of this Subpart 101–28.2 do not apply to ocean terminals and those activities concerned with the storage and handling of bulk petroleum, oils, lubricants, and strategic and critical materials stored under the GSA Stockpiling Programs.

### § 101–28.202 GSA/DOD Cross-Servicing Agreement.

(a) A formal agreement between GSA and DOD establishes and prescribes procedures to be followed in the cross-servicing of storage and warehousing services between DOD and civilian agencies of the Government. Copies of the agreement, containing a schedule of services and charges, together with contact points (civil and military) for cross-servicing in storage activities, are available from the General Services Administration, Office of Supply Management, Federal Supply Service, Washington, D.C., 20405.

### § 101–28.203 Definitions.

As used in this Subpart 101–28.2, definitions in this § 101–28.203 shall apply.

#### § 101–28.203–1 Government storage activity.

"Government storage activity" means a Government activity or facility utilized for the receipt, storage, and issue of supplies, materials, and equipment. Activities used for storage, and issue of supplies, materials, and equipment. Activities used for storage of reserve or excess stocks or intransit storage are included. The activity may be either Government-owned or -leased, and it may be either Government-operated or contract-operated.

#### § 101–28.203–2 Case lot quantities.

"Case lot quantities" means one or more of an item contained in an exterior pack (case, crate, carton, box, etc.) which is received, stored, and shipped without opening or otherwise disturbing the exterior pack.

#### § 101–28.203–3 Commodity classification.

"Commodity classification" means any supplies, material, and equipment falling into categories listed in the GSA–DOD cross-servicing agreement.

#### § 101–28.203–4 Contact point.

"Contact point" means the point within the headquarters of a military service or civilian agency to which requests should be forwarded. Coordination necessary with various organizational elements within a military service or civilian agency shall be accomplished by the contact point.

### § 101–28.204 Determining location of storage activities.

(a) The locations of military installations within the United States are published semiannually, as of June and December, by the Army Map Service on a map of the United States with the title of "Major Army, Navy, and Air Force Installations in the United States." Agencies may make arrangements to obtain required number of copies of this map from the Army Map Service, Corps of Engineers, U.S. Army, Washington, D.C., 20315.

(b) The location of storage activities of civilian agencies may be obtained by forwarding requests to the General Services Administration, Office of Supply Management, Federal Supply Service, Washington, D.C., 20405.

(c) Agencies having a requirement for storage and warehousing services in overseas areas shall determine, at the time the requirement develops, the possibility of cross-servicing such requirements by directly contacting the agency contact points referred to in § 101–28.202.

### § 101–28.205 Requests for services.

(a) Requests shall be forwarded to appropriate contact points that have storage activities in the desired location. A separate request shall be forwarded for each requirement. Estimates furnished in such requests shall be the best that can be determined, and advance knowledge of any major variances to estimates shall be provided the operating agency as soon as possible.

(b) The acceptance of a request obligates the accepting agency to provide the specific services requested. Any additional services to an accepted request shall be made only when agreed to by the accepting agency. Requests may be accepted under specific limitations, terms, and conditions which are acceptable to the requesting and accepting agencies.

(c) Replies to requests shall be in writing. Those replies which do not accept a request shall contain a statement advising the requesting agency of the possibility of accepting a future request for services at the locations.

### § 101–28.206 Cancellation of cross-servicing arrangements.

(a) Accepted requests may be canceled by the requesting agency prior to delivery of supplies, material, and equipment to the storage activity when logistical developments make cancellation necessary or a cancellation is the best interest of the Government. The agency which accepted the request shall be advised in writing as soon as possible in regard to the cancellation.

(b) Cancellation of arrangements in facilities to be inactivated or disposed of by an operating agency may be made as provided for in the GSA–DOD agreement. Also, after supplies, material, and equipment have been received at a storage activity, cancellation may be made when unforeseen emergencies arise which justify such cancellation. Advice of these necessary cancellations shall be in writing and the agency owning the material given the maximum amount of time to make other arrangements for their property.

(c) When a facility, in which cross-servicing is being accomplished, is to be transferred from an operating agency to another agency, the operating agency shall advise the agency owning the property at least 90 days in advance of such contemplated transfer. The agency owning the property shall negotiate with the agency gaining the facility for continued cross-servicing of the property at the facility. The agency gaining the facility shall continue the cross-servicing arrangements unless contrary to the best interest of the Government.

### § 101–28.207 Cross-servicing rates.

(a) The rates contained in the GSA–DOD cross-servicing agreement for each type of service rendered shall be used for charging, billing, and reimbursement for services rendered. However, when it is not feasible to accept a request in contract-operated activities, Government corporation activities, and leased facilities, based on these rates, and the rates are the only reason for not accepting the request, different rates may be established which are acceptable to the requesting and accepting agencies.

(b) Rates shall be revised when data are furnished GSA or DOD or developed by these agencies, which justify revision of rates. Agencies are encouraged to submit any available data which may be the basis for properly adjusting established rates. Civilian agencies shall submit such data to GSA and the military services shall submit such data to DOD.

### § 101–28.208 Reimbursement for services.

Reimbursement for services rendered shall be made promptly after receipt of billing. Frequency and method of billing and reimbursement shall be established by the agencies requesting and accepting requests for services.

# PART 101–29—FEDERAL SPECIFICATIONS AND STANDARDS

Sec.

101–29.00 Scope of part.

Subpart 101–29.1—General

101–29.101 Federal standardization documents.
101–29.102 Procedures for development of Federal standardization documents.
101–29.103 Availability of Federal standardization documents.

Subpart 101–29.2—Specifications

101–29.201 General definition of a specification.
101–29.201–1 Federal Specifications.
101–29.201–2 Interim Federal Specifications.
101–29.201–3 Military specifications.
101–29.201–4 Departmental specifications.
101–29.202 Federal Qualified Products Lists.
101–29.203 Mandatory use of Federal Specifications.
101–29.204 Exceptions to mandatory use of Federal Specifications.
101–29.205 Deviations from Federal Specifications.
101–29.205–1 Agency responsibility relative to deviations from Federal Specifications.
101–29.205–2 Limitations on continued deviations.
101–29.206 Optional use of Interim Federal Specifications.
101–29.207 Use of Federal and Interim Federal Specifications in Federal construction contracts.
101–29.208 Military and departmental specifications.

Subpart 101–29.3—Standards

101–29.301 General definition of standards.
101–29.301–1 Federal Standards.
101–29.301–2 Interim Federal Standards.
101–29.301–3 Military standards.
101–29.301–4 Departmental standards.
101–29.302 Mandatory use of Federal Standards.

AUTHORITY: The provisions of this Part 101–29 issued under sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).

## § 101–29.00 Scope of part.

This part sets forth the policy and procedures for the development and use of Federal and Interim Federal Specifications and associated Qualified Products Lists and Federal and Interim Federal Standards.

## Subpart 101–29.1—General

### § 101–29.101 Federal standardization documents.

Federal Specifications, Federal Qualified Products Lists, and Federal Standards are referred to collectively as Federal standardization documents. They are developed and issued by GSA or by other Federal agencies under the Assigned Agency Plan described in the "Federal Standardization Handbook" issued by the Commissioner, Federal Supply Service, GSA. They are coordinated with other Federal agencies having technical, statutory, or regulatory interest in the commodity or other subject matter covered. Technical societies and organizations representing industrial producers and consumers also review Federal Specifications prior to issuance.

### § 101–29.102 Procedures for development of Federal standardization documents.

The Commissioner, Federal Supply Service will issue and maintain, on a current basis, a "Federal Standardization Handbook." The "Federal Standardization Handbook" sets forth operating procedures and applicable definitions used in the development of Federal standardization documents under the Assigned Agency Plan described therein. Federal agencies shall adhere to the provisions of the Handbook in the development, coordination, or issuance of Federal standardization documents.

### § 101–29.103 Availability of Federal standardization documents.

The Commissioner, Federal Supply Service will promulgate and maintain on a current basis the "Index of Federal Specifications and Standards." The Index lists Federal standardization documents which have been printed and distributed, including those which are mandatory for use, and identifies the sources from which these documents may be obtained. The Index also provides information on other Government standardization documents and recognized industry standards adopted by reference in Federal standardization documents. Supplements to the Index indicate the dates on which the use of new Federal Specifications and Standards become mandatory. The Department of Defense also lists Federal Specifications and Standards in the "Department of Defense Index of Specifications and Standards."

## Subpart 101–29.2—Specifications

### § 101–29.201 General definition of a specification.

A "specification" is a document intended for use in procurement. It describes the essential and technical requirements for items, materials, or services, including the procedures for determining that the requirements have been met. Specifications for items and materials also contain preservation, packaging, packing, and marking requirements.

### § 101–29.201–1 Federal Specifications.

"Federal Specification" means a Government specification which covers those materials, products, or services used by or for potential use of two or more Federal agencies (at least one of which is a civil agency). Federal Specifications are promulgated by GSA and are mandatory for use by all Federal agencies.

### § 101–29.201–2 Interim Federal Specifications.

An "Interim Federal Specification" is a potential Federal Specification issued in interim form for optional use by all Federal agencies. Interim amendments to Federal Specifications and amendments to Interim Federal Specifications are included in this definition.

### § 101–29.201–3 Military specifications.

"Military specification" means a specification issued by the Department of Defense, used solely or predominantly by and mandatory on military activities. (This definition includes both fully coordinated and limited coordination military specifications.)

### § 101–29.201–4 Departmental specifications.

"Departmental specification" means a specification prepared by and of interest primarily to a particular Federal civil agency, but which may be of use in procurement by other Federal agencies.

### § 101–29.202 Federal Qualified Products Lists.

"Federal Qualified Products Lists" (QPL's) means lists of products tested and approved under qualification tests set forth in certain Federal or Interim Federal Specifications. The qualification test requirement is included in the specification only when the Government requires this assurance of requisite quality of the product prior to the award of a contract. For procurement purposes, a qualified product is one which has been tested and approved for inclusion in the Federal QPL, whether or not the product has actually been so listed, prior to the bid opening date or award of a negotiated contract.

### § 101–29.203 Mandatory use of Federal Specifications.

Federal Specifications shall be used by all Federal agencies, in the procurement of supplies and services covered by such specifications, except as provided in §§ 101–29.204 and 101–29.205.

### § 101–29.204 Exceptions to mandatory use of Federal Specifications.

Federal Specifications need not be used under any of the following circumstances:

(a) The purchase is required under a public exigency and a delay in obtaining agency requirements would be involved in using the applicable specification.

(b) The total amount of the purchase does not exceed the monetary limits imposed in § 1–1.305.2.

(c) The purchase involves items required in the construction of facilities for new processes, new installations of equipment, or items for experiment, test, or research and development. However, in connection with such deviations, existing Federal Specifications shall be used to the extent that they are applicable.

(d) The purchase involves spare parts, components, or materials required for operation, repair, or maintenance of existing equipment. However, existing Federal Specifications shall be used to the extent that they are applicable.

(e) The items are purchased in foreign markets for use of overseas activities of agencies.

(f) An Interim Federal Specification is used by an agency in lieu of the Federal Specification.

(g) Where otherwise authorized by law.

### § 101–29.205 Deviations from Federal Specifications.

When the essential needs of an agency are not adequately covered by an existing Federal Specification, and the proposed purchase does not come within the exceptions described in § 101–29.204, the agency may authorize deviations from the Federal Specifications. However, requirements of existing Federal Specifications shall be used to the maximum extent practicable.

### § 101–29.205–1 Agency responsibility relative to deviations from Federal Specifications.

Each agency taking such deviations shall establish procedures whereby a designated official having substantial procurement responsibility shall be responsible for assuring that:

(a) Federal Specifications are used, and provisions for exceptions and deviations are complied with.

(b) Justification for exceptions and deviations are subject to competent review before authorization, and that such justifications can be fully substantiated if post audit is required.

(c) Major or repeated deviations are not taken except as prescribed in this § 101–29.205.

(d) Notification of deviation or recommendation for change in the specification is sent promptly in duplicate to the General Services Administration, Federal Supply Service, Standardization Division, Washington, D.C., 20407. A statement of the deviations with justification therefor and, where applicable, recommendation for revision or amendment of the specification shall be included. Such notification is required when deviations taken are of a major nature such as to result in the introduction of a new item of supply as evidenced by the development of a new item identification or a deviation is taken repeatedly.

### § 101–29.205–2 Limitations on continued deviations.

Deviations taken and reported by the agency in accordance with § 101–29.205–1 may not be continued except under the following conditions:

(a) When an agency submits notification of major or repeated deviations that have been taken but makes no recommendation for change in the specification, GSA will notify the agency as to whether such deviations may be continued in subsequent procurement. In cases where continued deviations are not approved and where procurement by the agency has progressed to a point where it would be impracticable to amend or cancel the action, such action may be completed, but the deviation shall not be continued by the agency in subsequent procurement.

(b) When an agency has recommended changing the specification consistent with the deviations it has taken and reported, those deviations may be continued until such time as the recommended change is incorporated in the specification. When coordination with Federal agencies and industry does not result in acceptance of the change, such deviations shall not be continued by the agency in subsequent procurement.

### § 101–29.206 Optional use of Interim Federal Specifications.

Interim Federal Specifications are for optional use. All agencies are urged to make maximum use of them and to submit suggested changes to the assigned agency for consideration in further development of the specifications for promulgation as Federal Specifications. Interim revisions or amendments to Federal Specifications are for optional use as valid exceptions to the Federal Specifications so revised or amended and must therefore be specifically identified by symbol and date in the invitation for bids or request for proposal.

### § 101–29.207 Use of Federal and Interim Federal Specifications in Federal construction contracts.

When material, equipment, or services covered by an available Federal or Interim Federal Specification are specified in connection with Federal construction, the Federal or Interim Federal Specification shall be made a part of the specification for the construction contract, subject to the provisions in § 101–29.204, § 101–29.205, and § 101–29.206.

### § 101–29.208 Military and departmental specifications.

If no Federal Specification is available, existing Interim Federal, military, and departmental specifications which are listed in the Index of Federal Specifications and Standards should be used by all agencies consistent with each agency's procedures establishing priority for use of such specifications.

### Subpart 101–29.3—Standards

**§ 101–29.301 General definition of standards.**

"Standards" means documents that establish engineering and technical limitations and applications for items, materials, processes, methods, designs, and engineering practices. They include any related criteria deemed essential to achieve the highest practical degree of uniformity in materials or products, or interchangeability of parts used in those products. Standards may be used in specifications, invitations for bids, proposals, and contracts. The identification of the categories and intended use of such standards are as set forth in this § 101–29.301.

**§ 101–29.301–1 Federal Standards.**

"Federal Standard" means a standard promulgated by GSA which is mandatory for use by all Federal agencies, including the Department of Defense.

**§ 101–29.301–2 Interim Federal Standards.**

"Interim Federal Standard" means a standard issued in interim form for optional use by all Federal agencies and intended for final processing as a new or revised Federal Standard.

**§ 101–29.301–3 Military standards.**

"Military standard" means a standard issued solely or predominantly by and mandatory on military activities. (This definition includes both fully coordinated and limited coordination military standards.)

**§ 101–29.301–4 Departmental standards.**

"Departmental standard" means a standard prepared by and of interest primarily to a particular Federal civil agency, but which may be used in procurement by other agencies.

**§ 101–29.302 Mandatory use of Federal Standards.**

Federal Standards shall be used by all Federal agencies, including the Department of Defense. The exceptions in § 101–29.204 relating to the mandatory use of Federal Specifications are applicable to the use of Federal Standards. A Federal agency may be granted an exception by GSA only upon submission of adequate justification to the General Services Administration, Federal Supply Service, Standardization Division, Washington, D.C., 20407.

## PART 101–30—FEDERAL CATALOG SYSTEM

Sec.
101–30.000 Scope of part.

Subpart 101–30.1—General

101–30.100 Scope of subpart.
101–30.101 Definitions.
101–30.101–1 Cataloging.
101–30.101–2 Cataloging activity.
101–30.101–3 Civil agency items.
101–30.101–4 Conversion.
101–30.101–5 Federal Catalog System.
101–30.101–6 Federal item identification.
101–30.101–7 Item of supply.
101–30.102 Objectives.
101–30.103 Responsibilities.
101–30.103–1 General.
101–30.103–2 Agency responsibilities.

Subpart 101–30.2—Cataloging Handbooks and Manuals

101–30.201 General.
101–30.202 Policies.

Subpart 101–30.3—Cataloging Items of Supply

101–30.300 Scope of subpart.
101–30.301 Types of items to be cataloged.
101–30.302 Types of items excluded from cataloging.
101–30.303 Identification.

Subpart 101–30.4—Use of the Federal Catalog System

101–30.400 Scope of subpart.
101–30.401 Publication of Federal catalog data.
101–30.401–1 Data for military agencies.
101–30.401–2 Data for civil agencies.
101–30.401–3 Federal item identification cards.
101–30.402 Conversion.
101–30.403 Utilization.
101–30.403–1 Reports of excess and surplus personal property.
101–30.403–2 Management codes.

Subpart 101–30.5—Maintenance of the Federal Catalog System

101–30.500 Scope of subpart.
101–30.501 Maintenance.
101–30.502 Assistance by Government suppliers.

AUTHORITY: The provisions of this Part 101–30 issued under sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).

**§ 101–30.000 Scope of part.**

This part prescribes a Federal catalog program for the development, maintenance, and utilization of a uniform Federal Catalog System in the supply operations of all Federal agencies, and for the conversion of existing systems to the uniform system. Except as may be specifically provided, this part is not mandatory on the Department of Defense.

### Subpart 101–30.1—General

**§ 101–30.100 Scope of subpart.**

This subpart defines the objectives of the Federal Catalog System, and assigns responsibilities for its operation. The basic principles and procedures of the Federal Catalog System are contained in published cataloging handbooks and manuals described in Subpart 101–30.2.

**§ 101–30.101 Definitions.**

As used in this Part 101–30, the following terms shall have the meanings set forth in this § 101–30.101.

**§ 101–30.101–1 Cataloging.**

"Cataloging" means the process of uniformly identifying, describing, classifying, numbering, and publishing in the Federal Catalog System all items of personal property (items of supply) repetitively procured, stored, issued, and used by Federal agencies.

**§ 101–30.101–2 Cataloging activity.**

"Cataloging activity" means the activity of a Federal agency having responsibility for performing cataloging operations in identifying and describing items of supply in the Federal Catalog System.

**§ 101–30.101–3 Civil agency items.**

"Civil agency item" means items of personal property entering the supply systems of civil agencies, including materials stocked for subsequent issue as well as direct delivery requirements.

**§ 101–30.101–4 Conversion.**

"Conversion" means the changeover from the use of existing supply classifications, stock numbers, names, and identification data to those of the Federal Catalog System in all supply operations, from determination of requirements to final disposal.

**§ 101–30.101–5 Federal Catalog System.**

"Federal Catalog System" means a single supply catalog system designed to uniformly identify, classify, name, describe, and number the items of personal property used by the Federal Government by providing but one classification, one name, one description, and one item identification number for each item of supply. It provides a standard reference language or terminology to be used by all persons engaged in the process of supply.

**§ 101–30.101–6 Federal item identification.**

"Federal item identification" means the approved item identification for the item of supply, plus the Federal stock number assigned to that item identification. It consists of four basic elements: the name of the item, the identifying characteristics, the Federal Supply Classification code, and the Federal item identification number.

**§ 101–30.101–7 Item of supply.**

"Item of supply" means a single item of production, or two or more items of production that are functionally interchangeable in required applications. An item of supply may consist of any number of pieces or objects which are treated in the supply operations of a Government activity as being identical. The concept of each item of supply is expressed in, and fixed by, an item identification.

**§ 101–30.102 Objectives.**

The objectives of the Federal cataloging program are:

(a) To provide for the development and maintenance of a uniform Federal supply catalog system and the conversion to and exclusive use of this system by all Federal agencies.

(b) To name, identify, classify, and number each item of personal property to be included in the Federal Catalog System so that the same items will have a single Federal item identification within and among the organizational elements of all Federal agencies.

(c) To collect, maintain, and publish such Federal catalog data and related supply management data as may be determined to be necessary or desirable to reflect such benefits to supply management as:

(1) Assistance in standardization of supplies and equipment;

(2) Reduction in inventories of stock with increased rates of turnover;

(3) Disclosure of interchangeability and substitutability of items;

(4) Greater vendor competition and broader sources of supply;

(5) Facilitation of better interagency and intragency utilization of supplies, equipment, and excess stocks, and more

exact identification of surplus personal property; and

(6) Assistance in providing precise statistics for budget and financial accounting purposes.

**§ 101–30.103 Responsibilities.**

**§ 101–30.103–1 General.**

(a) The provisions of section 206 of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 487) authorize the Administrator of General Services to establish and maintain a uniform Federal supply catalog system to identify and classify personal property under the control of Federal agencies. Under this law each Federal agency is required to utilize the uniform Federal supply catalog system, except as the Administrator of General Services taking into consideration efficiency, economy, and other interests of the Government, shall otherwise provide.

(b) The Defense Cataloging and Standardization Act (Chapter 145, Title 10, U.S. Code) authorizes the Secretary of Defense to develop a single supply catalog system for the Department of Defense.

(c) Both laws require that the Administrator of General Services and the Secretary of Defense shall coordinate the cataloging activities of GSA and the Department of Defense so as to avoid unnecessary duplication.

**§ 101–30.103–2 Agency responsibilities.**

(a) Each civil agency shall:

(1) Participate in the preparation and maintenance of the civil agency portion of the Federal Catalog System and in the conversion to and utilization of this system, and

(2) Comply with the policies, principles, rules, and procedures of the Federal Catalog System as prescribed in this Part 101–30.

(b) Adherence by the Department of Defense to the single supply catalog system developed for the military departments under Chapter 145, Title 10, U.S. Code, shall be deemed to constitute full coordination of cataloging activities with GSA.

## Subpart 101–30.2—Cataloging Handbooks and Manuals

**§ 101–30.201 General.**

(a) This subpart describes the cataloging handbooks and manuals prepared by the Cataloging Division, Defense Supply Agency, Department of Defense, in coordination with GSA.

(b) The following basic cataloging handbooks and manuals are available for purchase from the Superintendent of Documents, Government Printing Office, Washington, D.C., 20402. The requirements of these publications shall be followed by all cataloging activities participating in the Federal Catalog System.

(1) Federal Manual for Supply Cataloging (Cataloging Manual M1).

(2) Federal Supply Classification (Cataloging Handbook H2).

(3) Federal Supply Code for Manufacturers (Cataloging Handbook H4).

(4) Federal Item Identification Guides for Supply Cataloging (Cataloging Handbook H6).

**§ 101–30.202 Policies.**

The cataloging publications indicated in § 101–30.201 provide a ready reference to the following operating policies and rules covering the uniform catalog system:

(a) *Identification.* (1) Each civil agency shall insure that each of its items authorized for cataloging is included and maintained in the Federal Catalog System as prescribed in the Federal Manual for Supply Cataloging.

(2) Each item of supply shall have applicable to it one, and only one, Federal item identification; each Federal item identification shall be applicable to one, and only one, item of supply.

(b) *Federal Supply Classification (FSC).* (1) The Federal Supply Classification shall be used in supply management within the civil agencies.

(2) Each item included in the Federal Catalog System shall be classified under the Federal Supply Classification and shall be assigned to one, and only one, 4-digit class, in accordance with the rules prescribed in the Federal Manual for Supply Cataloging.

(c) *Numbering.* (1) Each item of supply identified in the Federal Catalog System shall be assigned a Federal stock number, which shall consist of the applicable 4-digit FSC class code and a 7-digit Federal item identification number.

(2) The Federal stock number shall be the only stock number used in supply operations for items within the scope of the Federal Catalog System. The integrity of the Federal stock number shall always be maintained whenever it is employed in any operation or document. Supply management codes, or other management symbols, may be associated with, but never included as a part of, the Federal stock number. These management codes or symbols must always be separated from the Federal stock number in such a manner that the Federal stock number is clearly distinguishable.

## Subpart 101–30.3—Cataloging Items of Supply

**§ 101–30.300 Scope of subpart.**

This subpart prescribes the types of items to be cataloged, the types of items excluded from the Federal Catalog System, and the method of submitting items for cataloging.

**§ 101–30.301 Types of items to be cataloged.**

Items of personal property in the civil agency systems that are subject to repetitive procurement, storage, distribution and issue, and all locally purchased, centrally managed items will be named, identified, classified, and numbered (cataloged) in the Federal Catalog System. Other locally purchased items may be cataloged based upon civil agency requirements. The term "repetitive" will be construed to mean continual or recurring and applies to those items for which a need is deemed to exist within the appropriate civil agency.

**§ 101–30.302 Types of items excluded from cataloging.**

Items of personal property in the following categories are to be excluded from the Federal Catalog System except when an agency determines that Federal item identification data will be of value in its supply management operations:

(a) Capital equipment items which are nonexpendable and are especially designed for a specific purpose, such as elevators or central air-conditioning system installations.

(b) Items of personal property on which security classification is imposed.

(c) Items procured on a one-time or infrequent basis for use in research and development, experimentation, construction, or test and not subject to centralized item inventory management, reporting, or stock control.

(d) Items procured in foreign markets for use in overseas activities of Federal agencies.

(e) Printed forms, except those carried in GSA stores stock.

**§ 101–30.303 Identification.**

Each agency shall insure that each of its items to be cataloged is included and maintained in the Federal Catalog System as prescribed in the Federal Manual for Supply Cataloging.

## Subpart 101–30.4—Use of the Federal Catalog System

**§ 101–30.400 Scope of subpart.**

This subpart prescribes the policies and procedures governing the publication of Federal catalog data, and the conversion to and utilization of the Federal Catalog System by Federal agencies.

**§ 101–30.401 Publication of Federal catalog data.**

Approved Federal item identification data is published and maintained in card form and is distributed to cataloging and supply management activities as required to meet their varying operational needs.

**§ 101–30.401–1 Data for military agencies.**

Segments of the Federal Supply Catalog, Department of Defense section, are published in specified commodity areas as operating catalogs and stock lists for activities of the Department of Defense, as defined in Department of Defense Directive 4130.2, Development, Maintenance and Utilization of the Federal Catalog System within the Department of Defense.

**§ 101–30.401–2 Data for civil agencies.**

Catalog data will be furnished participating civil agencies by means of electric accounting machine cards and/or Federal item identification cards.

**§ 101–30.401–3 Federal item identification cards.**

On request, extra cards will be provided to agencies by GSA on a reimbursable basis.

**§ 101–30.402 Conversion.**

Following completion of cataloging action, GSA will establish a time period in which conversion to the Federal Catalog System shall be accomplished by all civil agencies. The terminal dates for conversion will be established after consultation with the civil agencies concerned.

**§ 101–30.403 Utilization.**

On and after the established date for completion of conversion, all interagency and intra-agency transactions involving item identifications, commodity classification, or stock numbers shall be in the terms of the Federal Catalog System.

**§ 101–30.403–1 Reports of excess and surplus personal property.**

For items of personal property which have been identified in the Federal Catalog System, Federal stock numbers and Federal item identifications, with such additional descriptive detail as is required, shall be utilized in reports and listings of excess and surplus personal property. The assignment of Federal stock numbers and Federal item identifications shall not be required for items of excess or surplus personal property which have not been identified in the Federal Catalog System.

**§ 101–30.403–2 Management codes.**

For internal use within an agency, alphabetic codes excluding letters "I" and "O" may be prefixed to the Federal stock number as may be required for supply management operations as CM 7520–123–4567 or 7520–123–4567CM. Numeric codes shall not be affixed immediately adjacent to or as a part of the Federal stock number nor shall codes be intermingled in the Federal stock number.

## Subpart 101–30.5—Maintenance of the Federal Catalog System

### § 101–30.500 Scope of subpart.

This subpart prescribes the policies and procedures governing the maintenance of the Federal Catalog System.

### § 101–30.501 Maintenance.

GSA will, after consultation with the agencies concerned, provide for the proper maintenance of the Federal Catalog System requiring the addition, revision, or deletion of item identifications. As provisions for maintenance are developed, GSA will prescribe the procedures and frequency for presenting civil agency requests for cataloging action on new items entering their supply system, and for revision or deletion of their Federal item identifications.

### § 101–30.502 Assistance by Government suppliers.

When identification data for adequate cataloging of a new item is not available, or cannot be obtained through other means, the Federal agency establishing the need for the new item shall obtain the required identification data from the contractor by specifying in procurement documents the use of Federal Standard No. 5, Standard Guides for Preparation of Item Identifications by Government Suppliers.

SUBCHAPTER G—TRANSPORTATION AND MOTOR VEHICLES

# PART 101–40—TRANSPORTATION AND TRAFFIC MANAGEMENT

Sec.

101–40.000 Scope of part.

Subpart 101–40.1—General Provisions

101–40.101 Transportation assistance.
101–40.102 Representation before regulatory bodies.
101–40.103 Specifying modes of transportation.
101–40.104 Insurance against transportation hazards.
101–40.105 Use of Government-owned equipment.
101–40.106 Reports.
101–40.107 Surveys.
101–40.108 Seminars and training courses.
101–40.109 Utilization of special contracts and agreements.
101–40.110 Small business assistance.
101–40.111 Maintenance of tariff files.
101–40.112 Transportation factors in the location of Government facilities.

Subpart 101–40.2 [Reserved]

Subpart 101–40.3—Freight Rates, Routes, and Services

101–40.300 Scope of subpart.
101–40.301 Rate and routing services.
101–40.302 Standard routing principle.
101–40.303 Implementation of standard routing principle.
101–40.303–1 Service requirements.
101–40.303–2 Cost considerations.
101–40.303–3 Equitable distribution of traffic among carriers.
101–40.304 Description of property for shipment.
101–40.305 Negotiations for changes in rates, ratings, rules, and services.
101–40.305–1 Negotiations by GSA.
101–40.305–2 Rate analysis required on substantial movements.
101–40.305–3 Negotiation by other executive agencies.
101–40.305–4 Method of publication.
101–40.305–5 Reports of agency negotiations.
101–40.306 Rate tenders to the Government.
101–40.306–1 Form and format.
101–40.306–2 Government-wide application.
101–40.306–3 Distribution.
101–40.307 Tonnage reports.
101–40.307–1 Shipments covered.
101–40.307–2 Form of report.

Subparts 101–40.4—101–40.48 [Reserved]

Subpart 101–40.49—Forms, Formats, and Agreements

101–40.4900 Scope of subpart.
101–40.4901 GSA forms.
101–40.4902 [Reserved]
101–40.4903 Formats.
101–40.4904 [Reserved]
101–40.4905 [Reserved]
101–40.4906 Illustrations.
101–40.4906–1 GSA Form 420, Request for Traffic Data.
101–40.4906–2 Uniform Tender of Rates and/or Charges for Transportation Services.

AUTHORITY: The provisions of this Part 101–40 issued under sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).

### § 101–40.000 Scope of part.

This part prescribes regulations governing the transportation and traffic management activities of the executive agencies. It also covers arrangements for transportation and related services by bill of lading type commitments. These regulations are designed to assure that all transportation and traffic management functions will be carried out on the basis most advantageous to the Government in terms of economy, efficiency, and service.

## Subpart 101–40.1—General Provisions

### § 101–40.101 Transportation assistance.

Executive agencies without transportation officers, or those in need of assistance on transportation matters, shall obtain assistance from transportation officers, Transportation and Communications Service, located in the 10 GSA regional offices; except that agencies located in the metropolitan area of Washington, D.C., shall obtain such assistance from the General Services Administration, Transportation and Communications Service, Washington, D.C., 20405.

### § 101–40.102 Representation before regulatory bodies.

GSA, in behalf of executive agencies, will institute formal or informal action, with respect to tariff, rate, or service matters, as required, before Federal and State regulatory bodies. Executive agencies shall submit their requests and recommendations for action before Federal and State regulatory bodies to the General Services Administration, Transportation and Communications Service, Washington, D.C., 20405, or the Transportation and Communications Service at the appropriate GSA regional office.

### § 101–40.103 Specifying modes of transportation.

Preferential treatment, normally, shall not be accorded to any mode of transportation or to any particular carrier in arranging for transportation services. However, where for valid reasons, use of a particular type of carrier is necessary to meet program requirements, only the specified type of carrier will be considered. Examples of the need for a particular type of carrier would be where only a certain mode of transportation could provide the required service or meet the required delivery date; or where the consignee's installation and related facilities preclude, or are not conducive to, service by particular modes of transportation.

### § 101–40.104 Insurance against transportation hazards.

The policy of the Government with respect to insurance of its property while in the possession of commercial carriers is set forth in § 1–19.107 of this title.

### § 101–40.105 Use of Government-owned equipment.

Generally, the preferred method of transporting property for the Government is through use of the facilities of commercial carriers. However, Government vehicles may be used when they are available and are not being fully utilized and when their use will result in substantial economies. They may be used for such purposes as local transfer of property, pickup and delivery services which are not performed by the commercial carriers in connection with the linehaul transportation, transportation of property to meet emergencies, and accomplishment of program objectives which cannot be attained through use of commercial carriers.

### § 101–40.106 Reports.

Each agency shall submit reports to GSA concerning its transportation procedures, practices, and operations whenever so requested or as prescribed by this Part 101–40. The format of such reports shall be as prescribed for the subject or as provided in the specific request.

### § 101–40.107 Surveys.

As deemed necessary and after adequate advance notice to the agencies affected, or upon request of agencies, GSA will make on-site surveys of transportation activities and will make recommendations, when necessary, for changes in agencies' policies, standards, practices, and procedures to improve transportation concepts and operations at all levels.

### § 101–40.108 Seminars and training courses.

GSA will, from time to time, conduct seminars and training courses for the benefit of executive agency personnel assigned functions having transportation aspects. The objective of such training will be to broaden traffic management knowledge and experience within the agencies and to assist in making improvements leading to greater efficiency and economy of operations.

### § 101–40.109 Utilization of special contracts and agreements.

GSA will, as deemed necessary, enter into special contracts and agreements covering such matters as demurrage, services of ocean freight forwarders, and arrangements for stevedoring, storage, drayage, packing, marking, weighing, teleticketing, and related accessorial services. GSA bulletins outlining the services and terms of such contracts and agreements will be distributed by GSA to all executive agencies, and copies of such contracts will be distributed to the various agencies in the quantities requested. After distribution of such bulletins, agencies will arrange for dissemination of appropriate contracts and information to affected installations. To the extent that such services are thus made available and use thereof is mandatory, affected agencies shall utilize such contracts or agreements. When use is permissive, agencies should use them whenever it is in the best interest of the Government.

### § 101–40.110 Small business assistance.

Consistent with the policies of the Government with respect to small business, as set forth in Subpart 1–1.7 of this title, executive agencies shall place with small business concerns a fair proportion of the total purchases and contracts for transportation and related services, such as packing and crating, loading and unloading, and local drayage.

### § 101–40.111 Maintenance of tariff files.

(a) The General Services Administration, Transportation and Communications Service, Washington, D.C., 20405, will maintain the master file of carrier tariffs for all modes of transportation. Each GSA regional office will maintain a tariff file sufficient to meet the normal needs of the agencies in the region.

(b) Executive agencies may maintain only the tariff files necessary to meet their routine operational requirements. To meet unusual or abnormal tariff needs, executive agencies may be permitted to use GSA tariff files; or, in the alternative, rate, routing, or other tariff information will be provided by GSA.

### § 101–40.112 Transportation factors in the location of Government facilities.

(a) Transportation rates, charges, and services shall be carefully evaluated in the selection of locations and in the planning, construction, alteration, expansion, purchasing, or leasing of facilities or sites for the establishment, relocation, or deactivation of Government installations.

(b) Executive agencies shall utilize the services of GSA, when planning and selecting such facilities to assure that proper consideration is given to the transportation factors in their construction and location.

## Subpart 101–40.2 [Reserved]

## Subpart 101–40.3—Freight Rates, Routes, and Services

**§ 101–40.300 Scope of subpart.**

This subpart prescribes regulations governing the determination and use of freight rates and related data in the transportation of property for the Government, selection of the mode of transportation, and the carrier or carriers within the mode, and negotiation of classification ratings, rates, and services.

**§ 101–40.301 Rate and routing services.**

Upon request, GSA will provide rate and route information and related traffic data to any executive agency (see § 101–40.101). Requests for such information may be submitted to the appropriate office of the GSA, Transportation and Communications Service, by means of GSA Form 420, Request for Traffic Data (see § 101–40.4906–1). Urgent requests may be made by whatever method necessary to expedite the request; and data will be supplied by similar means and confirmed by transmittal of a GSA Form 420.

**§ 101–40.302 Standard routing principle.**

Shipments shall be routed via the carrier or carriers which can provide the required service at the lowest overall cost to the Government.

**§ 101–40.303 Implementation of standard routing principle.**

In the implementation of the standard routing principle, the major factors to be considered are, in the order of their importance, service requirements, cost considerations, and equitable distribution of traffic among carriers.

**§ 101–40.303–1 Service requirements.**

The following factors shall be considered in determining whether a carrier can meet the service requirements:

(a) Availability and suitability of carrier equipment.

(b) Shipping and receiving facilities at origin and destination.

(c) Pickup and delivery service.

(d) Availability of required accessorial and special services.

(e) Time in transit.

(f) Record of past performance of carrier.

(g) Availability and advantages of any transit privileges.

**§ 101–40.303–2 Cost considerations.**

When developing cost comparisons to determine the most economical routing of shipments consistent with service requirements, consideration shall be given to costs of packing, loading and unloading, bracing, blocking, extra handling, drayage, pickup and delivery, and other accessorial services, as well as the linehaul rate.

**§ 101–40.303–3 Equitable distribution of traffic among carriers.**

When more than one mode of transportation, or more than one carrier within a mode, can provide equally satisfactory service at the same overall cost, the traffic shall be distributed as equitably as practicable among the modes and among the carriers within the mode.

**§ 101–40.304 Description of property for shipment.**

Each shipment shall be described on the bill of lading in terms of the governing freight classification, carrier tariff, or rate tender to the Government. Shipments shall not be described by trade names; e.g., "Foamite," or in general terms; e.g., "machinery," "furniture," or "Government supplies."

**§ 101–40.305 Negotiation for changes in rates, ratings, rules, and services.**

**§ 101–40.305–1 Negotiations by GSA.**

Except as provided in § 101–40.305–3, GSA, on behalf of the executive agencies, will conduct all negotiations for the establishment or modification of classification ratings, rates, charges, services, and the rules and regulations pertaining thereto.

**§ 101–40.305–2 Rate analysis required on substantial movements.**

When the volume of tonnage to be moved exceeds the limitations imposed by § 101–40.305–3, agencies shall submit complete details of prospective movements to the General Services Administration, Transportation and Communications Service, Washington, D.C., 20405, or the Transportation and Communications Service at the appropriate GSA regional office for rate analysis to determine whether negotiations shall be initiated. Such data shall be submitted as far in advance of the prospective shipping date as circumstances will permit and shall include all pertinent shipping information, such as complete description of the commodity, packaging, volume, origin and destination, and prospective shipping schedule. (See § 1–19.201 of this title.)

**§ 101–40.305–3 Negotiation by other executive agencies.**

(a) Executive agencies other than GSA are authorized to initiate and conduct negotiations for freight rates and services only when the quantity of property involved is 100 short tons or less. Agencies may be granted authority to conduct negotiations on larger volumes of traffic when it is considered in the best interests of the Government. Requests for such additional authority should be directed to the General Services Administration, Transportation and Communications Service, Washington, D.C., 20405, or the Transportation and Communications Service at the appropriate GSA regional office.

(b) Agencies shall not initiate negotiations for rates or services for shipments of property which, individually, are less than 100 short tons if the property is part of a larger volume which, in the aggregate, would exceed 100 short tons, even though the individual shipments take place on different dates.

**§ 101–40.305–4 Method of publication.**

Whether rates negotiated with the carriers by the Government are to be published in tariffs or in rate tenders to the Government (under section 22, Interstate Commerce Act (24 Stat. 387, as amended; 49 U.S.C. 22) or under Section 6, Intercoastal Shipping Act, 1933 (47 Stat. 1427 and 52 Stat. 964; 46 U.S.C. 846) shall be left to the discretion of the carrier.

**§ 101–40.305–5 Reports of agency negotiations.**

Executive agencies shall submit a complete report of each negotiation conducted to the General Services Administration, Transportation and Communications Service, Washington, D.C., 20405, or the Transportation and Communications Service at the appropriate GSA regional office, promptly after such negotiation is completed. The report shall refer to this § 101–40.305–5 and shall cite name of carrier or bureau with which the negotiation was conducted and any tariff change, or shall include a copy of any contract or rate tender resulting from the negotiation. The report shall set forth the quantity and description of tonnage involved, origin, destination, old and new rates, and other pertinent information.

**§ 101–40.306 Rate tenders to the Government.**

**§ 101–40.306–1 Form and format.**

Only those rate tenders which have been submitted by the carriers in writing shall be considered for use by executive agencies. Carriers should be encouraged to use the format illustrated in § 101–40.4906–2 when submitting rate tenders, and to use explicit terms and conditions, in order to convey the meaning and intention clearly and concisely and to prevent future controversy with regard to interpretation.

**§ 101–40.306–2 Government-wide application.**

The negotiating officer of an executive agency shall endeavor to have rate tenders made applicable, by their terms, to shipments of the United States Government, rather than to those of a particular agency.

**§ 101–40.306–3 Distribution.**

Six copies (including at least one signed copy) of each rate tender shall be promptly submitted by the agency receiving it to the General Services Administration, Transportation and Communications Service, Washington, D.C., 20405, or the Transportation and Communications Service at the appropriate GSA regional office; also, six copies (including at least one signed copy) shall be promptly submitted to the U.S. General Accounting Office, Transportation Division, Washington, D.C., 20548.

**§ 101–40.307 Tonnage reports.**

Each executive agency shall furnish monthly reports to the General Services Administration, Transportation and Communications Service, Washington, D.C., 20405, of outbound shipments on which freight charges are to be paid or allowed by a Government agency, in accordance with the provisions of this § 101–40.307.

**§ 101–40.307–1 Shipments covered.**

The reporting requirement under this § 101–40.307 applies only to shipments totaling 100 short tons or more of a single commodity or of mixed commodities moving by common carrier from the same point of origin to the same point of destination within a calendar month.

**§ 101–40.307–2 Form of report.**

The report may be submitted by means of copies of the bills of lading covering the shipments involved or by a listing of the following data:

(a) Bill of lading number (if commercial, so indicate).

(b) Date shipped.

(c) Origin.

(d) Destination.

(e) Commodity (mixed shipments may be described, for this purpose, in general terms; e.g., "subsistence supplies," "stationery," or "building material").

(f) Rate.

(g) Gross weight of shipment.

(h) Routing.

## Subparts 101–40.4—101–40.48 [Reserved]

## Subpart 101–40.49—Forms, Formats, and Agreements

**§ 101–40.4900 Scope of subpart.**

This subpart contains forms, formats, and agreements to be used in implementing the provisions of this Part 101–40. These forms and formats are designed to provide uniform methods of requesting and transmitting transportation advice and assistance, and uniform documentation of transactions between Government agencies and between Government and the transportation industry and related industries. The agreements reproduced in this Subpart 101–40.49 are intended as a ready source of reference to agreements existing between the Government and the transportation industry and related industries.

**§ 101–40.4901 GSA forms.**

(a) The GSA forms in this Subpart 101–40.49 are for optional use by executive agencies. Their use, however, is recommended in the interest of efficiency and economy in Government operations.

(b) Supplies of GSA forms may be obtained by addressing requests to: General Services Administration Region 3, Office of Regional Manpower and Administration, ORFA, Printing and Publications Division, Washington, D. C., 20407.

**§ 101–40.4902 [Reserved]**

**§ 101–40.4903 Formats.**

(a) The formats in this Subpart 101–40.49 are for optional use by executive agencies. Their use, however, is recommended in the interest of uniformity in documentation of Government transactions.

(b) Supplies of formats illustrated in this Subpart 101–40.49 are not available to either executive agencies or the public. Such formats may be duplicated in whatever quantities and by whatever methods desired without prior permission of GSA.

**§ 101–40.4904 [Reserved]**

**§ 101–40.4905 [Reserved]**

**§ 101–40.4906 Illustrations.**

NOTE: Forms filed as part of the original document. Copies may be obtained from Central Office, GSA.

**§ 101–40.4906–1 GSA Form 420, Request for Traffic Data.**

**§ 101–40.4906–2 Uniform Tender of Rates and/or Charges for Transportation Services.**

SUBCHAPTER H—UTILIZATION AND DISPOSAL

# PART 101–43—UTILIZATION OF PERSONAL PROPERTY

Sec.
101–43.000 Scope of part.

Subpart 101–43.1—General Provisions

101–43.101 Surveys.
101–43.102 Reassignment of property within executive agencies.
101–43.102–1 Acquisition of office furniture.
101–43.103 Agency utilization officials.
101–43.104 Definitions.
101–43.104–1 Atomic Energy Commission—controlled materials.
101–43.104–2 Combat materiel.
101–43.104–3 Contractor inventory.
101–43.104–4 Electronic data processing equipment.
101–43.104–5 Excess personal property.
101–43.104–6 Executive agency.
101–43.104–7 Federal agency.
101–43.104–8 Holding agency.
101–43.104–9 Inspection.
101–43.104–10 Intangible personal property.
101–43.104–11 Materiel.
101–43.104–12 Narcotics.
101–43.104–13 Personal property.
101–43.104–14 Possessions.
101–43.104–15 Related personal property.
101–43.104–16 Salvage.
101–43.104–17 Scrap.
101–43.104–18 Surplus personal property.
101–43.104–19 Trust territory.
101–43.104–20 Typewriters.
101–43.104–21 United States.

Subpart 101–43.2—Utilization of Property Proposed for Processing for Exchange/Sale

101–43.200 Scope of subpart.
101–43.201 [Reserved]
101–43.202 Definition.
101–43.203 General authorization.
101–43.203–1 Restrictions and limitations.
101–43.204 Agency responsibility.
101–43.204–1 Dangerous property and combat materiel.
101–43.205 Reimbursement.
101–43.205–1 Books and periodicals.
101–43.206 Records.

Subpart 101–43.3—Utilization of Excess

101–43.301 Federal Government procedure.
101–43.302 Agency responsibility.
101–43.303 Suspension of procurement.
101–43.303–1 Acquisition of mercury.
101–43.304 Retention of custody.
101–43.305 Strategic and critical materials: excess related personal property.
101–43.306 Property not required to be reported.
101–43.307 Legislative and judicial Federal agencies.
101–43.308 Assistance in major disaster relief.
101–43.309 Narcotics.
101–43.310 [Reserved]
101–43.311 Reporting requirements.
101–43.311–1 Reporting.
101–43.311–2 Form and distribution of reports.
101–43.311–3 Typewriters.
101–43.311–4 Excess personal property on or within excess real property.
101–43.311–5 Property at installations due to be discontinued.
101–43.312 Exceptions to reporting.
101–43.313 Items requiring special handling.
101–43.313–1 Narcotics.
101–43.313–2 Printing, binding, and blankbook equipment and supplies.
101–43.313–3 Intangible property.
101–43.313–4 Conditional gifts.
101–43.313–5 Electronic data processing equipment.
101–43.313–6 Trading stamps.
101–43.313–7 Atomic Energy Commission—controlled materials.
101–43.314 Withdrawals and corrections.
101–43.314–1 Withdrawals.
101–43.314–2 Corrections.
101–43.315 Transfers of excess property.
101–43.315–1 Agencies eligible.
101–43.315–2 Information of availability.
101–43.315–3 Fair value reimbursement.
101–43.315–4 Transfer for redistribution.
101–43.315–5 Procedure for effecting transfers.
101–43.315–6 Report on condition and description.
101–43.316 Contractor inventory.
101–43.316–1 Utilization.
101–43.317 Costs and proceeds.
101–43.317–1 Cost of care and handling.
101–43.317–2 Proceeds.
101–43.318 Determination of excess as surplus.
101–43.318–1 Reportable property.
101–43.318–2 Nonreportable property.
101–43.318–3 Donation and sale of surplus property.
101–43.319 Performance reports.

Subpart 101–43.4—Utilization of Abandoned and Forfeited Personal Property

101–43.400 Scope of subpart.
101–43.401 Definitions.
101–43.402 Sources of property available for utilization.
101–43.403 Custody of property.
101–43.404 Cost of care and handling.
101–43.405 Status of property assigned or transferred.
101–43.406 Reporting abandoned and forfeited personal property.
101–43.407 Information of availability.
101–43.408 Transfer of abandoned and forfeited personal property.
101–43.408–1 Transfer for official use to seizing agency.
101–43.408–2 Transfers to other Federal agencies.
101–43.408–3 Transfers—reimbursement.
101–43.409 Proceeds.
101–43.409–1 Billing.
101–43.409–2 Disposition of proceeds.

Subparts 101–43.5—101–43.48 [Reserved]

Subpart 101–43.49—Illustrations

101–43.4900 Scope of subpart.
101–43.4901 Excess personal property reporting requirements.
101–43.4902 Standard Form 120, Report of Excess Personal Property.
101–43.4902–1 Instructions for preparing Standard Form 120.
101–43.4902–2 Standard Form 120 A, Continuation Sheet (report of excess personal property).
101–43.4903 Regional offices' addresses and assigned areas.
101–43.4904 GSA Form 1539, Request for excess personal property.
101–43.4904–1 Instructions for preparing GSA Form 1539.
101–43.4905 List of Government corporations (31 U.S.C. 846, 856).
101–43.4906 Standard Form 122, Transfer Order Excess Personal Property.
101–43.4906–1 Instructions for preparing Standard Form 122.
101–43.4907 Standard Form 121, Quarterly Report Utilization and Disposal of Excess and Surplus Personal Property.
101–43.4908 Exchange/sale category list.
101–43.4909 Specimen description of reported excess EDP equipment.

AUTHORITY: The provisions of this Part 101–43 issued under sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).

## § 101–43.000 Scope of part.

This part prescribes the policies and methods governing the economic and efficient utilization of personal property located within the United States, Puerto Rico, and the Virgin Islands.

## Subpart 101–43.1—General Provisions

### § 101–43.101 Surveys.

Each executive agency shall continuously survey property under its control to assure maximum use and shall promptly make property that is excess to its needs available for transfer in accordance with this Part 101–43.

### § 101–43.102 Reassignment of property within executive agencies.

Each executive agency shall, to the maximum extent feasible, reassign property within activities of the agency, including its cost-reimbursement type contractors as described in § 1–3.405 of this title, when such property is determined to be no longer required for the purpose of the appropriation from which it was purchased or the use to which it has been applied, and shall immediately discontinue procurement of items for which such property can be substituted or adapted. A quarterly performance report of such internal property reassignments shall be submitted to GSA on Standard Form 121, Revised, Quarterly Report Utilization and Disposal of Excess and Surplus Personal Property (see § 101–43.4907).

### § 101–43.102–1 Acquisition of office furniture.

Office furniture shall be purchased only after agency compliance with the reassignment requirements in this section and applicable replacement standards. Such items should then be obtained from GSA stores stock or through Federal Supply Schedules pursuant to Part 101–26.

### § 101–43.103 Agency utilization officials.

To promote the maximum utilization of excess personal property, agencies are requested to name national and regional utilization officials who will be responsible, among other things, for promoting the acquisition and profitable use of available excess. It is suggested that wherever possible, the responsibility for training personnel concerned directly or indirectly with the acquisition and use of excess be given to these utilization officials.

### § 101–43.104 Definitions.

As used throughout this Part 101–43, the terms enumerated in this section shall have the meanings set forth in this § 101–43.104.

### § 101–43.104–1 Atomic Energy Commission-controlled materials.

The possession, use, and transfer of certain materials are subject to the regulatory controls of the Atomic Energy Commission, pursuant to the Atomic Energy Act of 1954, as amended. The materials are:

(a) "Byproduct material," meaning any radioactive material (except special nuclear material) yielded in or made radioactive by exposure to the radiation incident to the process of producing or utilizing special nuclear material (see Atomic Energy Commission Regulation, 10 CFR Part 30);

(b) "Source material," meaning (1) uranium, thorium, or any other material which is determined by the Atomic Energy Commission pursuant to the provisions of the Atomic Energy Act of 1954, as amended, to be source material, or (2) ores containing one or more of the foregoing materials, in such concentration as the Commission may by regulation determine from time to time (see AEC Regulation, 10 CFR Part 40); and

(c) "Special nuclear material," meaning (1) plutonium, uranium enriched in the isotope 233 or in the isotope 235, and any other material which the Commission, pursuant to the provisions of the Atomic Energy Act of 1954, as amended, determines to be special nuclear material, or (2) any material artificially enriched by any of the foregoing (see AEC Regulation, 10 CFR Part 70).

### § 101–43.104–2 Combat materiel.

Arms, ammunition, and implements of war listed in currently effective designations (22 U.S.C. 1934).

### § 101–43.104–3 Contractor inventory.

(a) Any property acquired by and in the possession of a contractor or subcontractor (including Government-furnished property) under a contract pursuant to the terms of which title is vested in the Government, and in excess of the amounts needed to complete full performance under the entire contract; and

(b) Any property which the Government is obligated or has the option to take over under any type of contract as a result either of any changes in the specifications or plans thereunder or of the termination of such contract (or subcontract thereunder), prior to completion of the work, for the convenience or at the option of the Government.

### § 101–43.104–4 Electronic data processing equipment.

Electronic data processing (EDP) equipment refers to a machine or a group of interconnected machines which use electronic circuitry to perform arithmetic and/or logical operations under control of internally stored programed instructions. Punched card machines which cannot be electrically interconnected with one or more machines controlled by internally stored programs are excluded.

### § 101–43.104–5 Excess personal property.

Any personal property under the control of any Federal agency which is not required for its needs and the discharge of its responsibilities, as determined by the head thereof.

### § 101–43.104–6 Executive agency.

Any executive department or independent establishment in the executive branch of the Government, including any wholly owned Government corporation.

### § 101–43.104–7 Federal agency.

Any executive agency or any establishment in the legislative or judicial branch of the Government (except the Senate, the House of Representatives, and the Architect of the Capitol and any activities under his direction).

### § 101–43.104–8 Holding agency.

The executive agency which has accountability for the property involved.

### § 101–43.104–9 Inspection.

The critical examination of material to verify quantity, determine condition, or to compare actual characteristics with those given in applicable specifications. The term includes laboratory analyses and other technical testing operations which may be required. The term is used in a similar sense with respect to services performed and other stipulated performances in general.

### § 101–43.104–10 Intangible personal property.

Includes but is not limited to such classes of personal property as patents, patent rights, processes, techniques, inventions, copyrights, negotiable instruments, money orders, bonds, shares of stock, and similar evidences of value, except as, in a given case or class of cases, may be excluded by the Administrator of General Services.

### § 101–43.104–11 Materiel.

All items necessary for the equipment, maintenance, operation, and support of governmental activities without distinction as to use for administrative or operational purposes.

### § 101–43.104–12 Narcotics.

The following drugs or preparations thereof: (a) opium, coca leaves, cocaine, or any salt, derivative, or preparation of opium, coca leaves or cocaine; (b) isonipecaine (demarol); (c) any drug found by the Secretary of the Treasury and proclaimed by the President to have addiction-forming or addiction-sustaining liability similar to morphine or cocaine, such as methadon (delephine, adanon) and nisentil; and (d) marihuana (Cannabis Sativa L.).

### § 101–43.104–13 Personal property.

Property of any kind or any interest therein, except real property, records of the Federal Government, and naval vessels of the following categories: battleships, cruisers, aircraft-carriers, destroyers, and submarines.

### § 101–43.104–14 Possessions.

Includes the Virgin Islands, the Canal Zone, Guam, American Samoa, Wake Island, Midway Island, and the Guano Islands, but does not include the Commonwealth of Puerto Rico.

### § 101–43.104–15 Related personal property.

Any personal property:

(a) Which is located on, or is an integral part of, real property, or used or useful in connection with such property or the productive capacity thereof, or

(b) Determined by the Administrator of General Services to be otherwise related to the real property.

§ 101–43.104–16 Salvage.

Personal property that has some value in excess of its basic material content but which is in such condition that it has no reasonable prospect of use for any purpose as a unit (either by the holding or any other Federal agency) and its repair or rehabilitation for use as a unit (either by the holding or any other Federal agency) is clearly impracticable. Repairs or rehabilitation estimated to cost in excess of 65 percent of acquisition cost would be considered "clearly impracticable" for purposes of this definition.

§ 101–43.104–17 Scrap.

Materiel that has no value except for its basic material content.

§ 101–43.104–18 Surplus personal property.

Any excess personal property not required for the needs and the discharge of the responsibilities of all Federal agencies, as determined by the Administrator of General Services.

§ 101–43.104–19 Trust territory.

Applies to the Trust Territory of the Pacific Islands, which the United States administers pursuant to the trusteeship agreement approved by the President of the United States pursuant to the Act of July 18, 1947 (48 U.S.C. 1681 note).

§ 101–43.104–20 Typewriters.

Manually and electrically operated machines having standard or special keyboards, designed to produce printed characters by impression of type upon paper through the medium of an inked ribbon. It includes the varityper, hektowriter, proportional spacer, flexowriter, justowriter, and portable type machines but does not include bookkeeping, billing, or teletype machines.

§ 101–43.104–21 United States.

In the geographical sense, "United States" means all the States and the District of Columbia.

## Subpart 101–43.2—Utilization of Property Proposed for Processing for Exchange/Sale

§ 101–43.200 Scope of subpart.

This Subpart 101–43.2 prescribes the utilization policies incumbent upon executive agencies exercising the exchange/sale authority granted under section 201(c) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 481(c)).

§ 101–43.201 [Reserved]

§ 101–43.202 Definition.

The term "acquire", as used in this Subpart 101–43.2, means procure, purchase, or obtain in any manner, including transfer, or manufacture, or production at Government-owned or -operated plants or facilities.

§ 101–43.203 General authorization.

Subject to the provisions of this Subpart 101–43.2, executive agencies are hereby authorized, in acquiring replacement personal property within the United States or elsewhere, to exchange or sell similar items and apply the exchange allowance or the proceeds of sale in such cases, in whole or in part payment for the replacement property acquired.

§ 101–43.203–1 Restrictions and limitations.

(a) The application of exchange allowances or proceeds of sale in whole or part payment for personal property acquired is authorized only when all the following conditions apply:

(1) The items sold or exchanged are similar to the items acquired (see § 101–43.203–1(b) for explanation of the word, "similar");

(2) The items sold or exchanged are not excess, and the items acquired are needed in the conduct of approved programs;

(3) The items acquired are to be used (whether or not intended for additional uses) in the performance of all or substantially all of the tasks or operations in which the items exchanged or sold would otherwise be used, but the items acquired need not be the same in number nor used in the same location as the items sold or exchanged (Example: two ½-ton dump trucks may be replaced with one 1-ton dump truck which performs tasks previously requiring the two trucks): *Provided*, That the limitation prescribed in this subparagraph shall not apply with respect to parts or containers; And provided further, That detailed cross reference between old and new items will not be required in the absence of specific requirements of law. In the absence of such cross reference, however, there shall be made available to the General Accounting Office sufficient data to establish that the items acquired were similar to the items exchanged or sold, that any exchange allowances or proceeds of sale applied in whole or part payment for property acquired were in fact available for such application, and that the transaction was otherwise in accordance with the provisions of this § 101–43.203–1;

(4) There has been at the time of exchange or sale (or at time of acquisition if it precedes the sale) a written administrative determination to apply the exchange allowance or proceeds of sale in acquiring property in accordance with this section; and

(5) The transaction will foster the economical and efficient accomplishment of an approved program.

(b) The item of personal property to be exchanged or sold and the item to be acquired shall be deemed similar for the purpose of this section when:

(1) Both fall within any one of the categories listed in § 101–43.4908; or

(2) In the case of personal property not falling within the categories of § 101–43.4908, the item to be acquired is designed and constructed for the same specific purpose as the item to be replaced; or

(3) Both constitute containers for items which are similar within the meaning of subparagraph (2) of this paragraph; or

(4) Both constitute containers for items which are similar within the meaning of subparagraph (1) or (2) of this paragraph.

(c) Items falling within the following categories shall not be eligible for handling under the provisions of this Subpart 101–43.2.

(1) Hand tools.

(2) Hardware, general purpose.

(3) Lumber, millwork, plywood, and veneer.

(4) Furniture, office, household and quarters, hospital, shipboard, and cafeteria located in the United States and its possessions.

(5) Office supplies.

(6) Textiles.

(7) Wearing apparel.

(d) This Subpart 101–43.2 shall not be construed to authorize:

(1) The acquisition of personal property by an executive agency when such acquisition is not otherwise authorized by law.

(2) The acquisition of personal property by an executive agency in contravention of (i) any restriction upon the procurement of a commodity or commodities, or (ii) any replacement policy or standard, prescribed by the President, the Congress, or by the Administrator of General Services.

(3) The purchase or acquisition of personal property otherwise than under a consolidated purchasing or stores program of Federal Supply Schedule contract where procurement under such program or contract is required by regulations or other directives prescribed by the Administrator of General Services. However, an executive agency acquiring an item or items under and in accordance with such program or contract may sell or exchange similar items and apply the exchange allowance or proceeds of sale as provided in this Subpart 101–43.2.

(4) The sale, transfer, or exchange of excess or surplus property in connection with the purchase or acquisition of personal property. However, an executive agency may sell or exchange items originally acquired as excess or surplus from another agency and apply the exchange allowance or proceeds of sale in accordance with this Part 101–43.

(5) The sale, transfer, or exchange of strategic and critical materials, unless such materials at any one location are in lots of less than the minimum quantities specified in Part 101–14, and the agency determines that there is no reasonable prospect of accumulating, within 12 months, the minimum quantities specified in said part.

(6) The sale, transfer, or exchange of Atomic Energy Commission-controlled materials as defined in § 101–43.104 except in accordance with applicable regulations of the Atomic Energy Commission (see 10 CFR Parts 30, 40, and 70).

(7) The sale or exchange of narcotics, except in accordance with Parts 101–44 and 101–45.

(8) The sale of personal property in new or unused condition in connection with the purchase or acquisition of personal property.

(9) The sale, transfer, or exchange of scrap in connection with the purchase or acquisition of personal property.

(e) This Subpart 101–43.2 does not apply to strategic and critical materials which have been accepted for the national stockpile. Materials no longer needed for the stockpile are required to be disposed of in accordance with the provisions of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98–98b) and Part 101–45.

§ 101–43.204 Agency responsibility.

Executive agencies having property determined to be available for exchange or sale pursuant to this Subpart 101–43.2 shall, to the fullest extent practicable or economical and prior to any disposal action, solicit Federal agencies known to use or distribute such property and arrange for transfers thereto, except that no attempt need be made to obtain further utilization of property which is eligible for replacement in accordance with standards prescribed by GSA. Executive agencies may also exchange similar property with other Federal agencies (including the Senate, the House of Representatives, the Architect of the Capitol and any activities under his direction, the District of Columbia, and mixed-ownership Government corporations).

§ 101–43.204–1 Dangerous property and combat materiel.

(a) No property which is dangerous to public health or safety shall be exchanged or sold pursuant to this Subpart 101–43.2, without first rendering such property innocuous or providing adequate safeguards therefor.

(b) No combat materiel shall be exchanged or sold pursuant to this Subpart 101–43.2 without first demilitarizing such property if such demilitarization is found by a duly authorized official of the executive agency concerned to be in the best interest of public health, safety, or security. Such demilitarization may include rendering such property innocuous, stripping from it any confidential or secret characteristics, or otherwise making it unfit for military use. Demilitarization of property to be exchanged or sold shall be accomplished in such manner as to preserve so far as possible any civilian utility or commercial value of the property.

§ 101–43.205 Reimbursement.

Transfers of personal property under this Subpart 101–43.2 shall be made upon such terms as shall be agreed to by the Federal agencies concerned (including the organizations specified in § 101–43.204). However, agencies offering property for transfer for further utilization within the Government shall not in any case require reimbursement of an amount greater than the best estimate of the gross proceeds if the property were to be sold on a competitive bid basis. Funds shall be transferred in accordance with such terms, and the exchange allowance or other proceeds of transfer shall be applied in whole or part payment for personal property acquired. Funds transferred as representing the difference in value between items which are exchanged shall be deposited to miscellaneous receipts by the transferee agency unless (1) other disposition is authorized by law or (2) acquisition of items in addition to the items received in exchange is required for the performance of the tasks or operations in which similar items exchanged would otherwise have been used.

§ 101–43.205–1 Books and periodicals.

Notwithstanding any other provision of this Subpart 101–43.2, executive agencies may exchange, without monetary appraisal or detailed listing or reporting, books and periodicals in their libraries not needed for permanent use for other books and periodicals.

§ 101–43.206 Records.

Executive agencies shall prepare and maintain such records as will show full compliance with the provisions of this Subpart 101–43.2 and with section 201(c) of the Federal Property Act (40 U.S.C. 481(c)).

## Subpart 101–43.3—Utilization of Excess

### § 101–43.301 Federal Government procedure.

The first source of supply is excess personal property, which should be utilized by agencies to the fullest extent practicable, as prescribed in this Part 101–43. Any need for personal property expressed by any Federal agency (including the Senate, the House of Representatives, the Architect of the Capitol and any activities under his direction, the District of Columbia, and mixed-ownership corporations as defined in the Government Corporation Control Act) shall be paramount to any disposal, if such need is made known to the holding agency prior to shipment or delivery in the case of donation, or prior to an award in the case of sale.

### § 101–43.302 Agency responsibility.

(a) In order to obtain maximum utilization and minimize the procurement of new items, each executive agency shall be responsible for making excess property available and facilitating the transfer of the property to other Federal agencies, to its cost-reimbursement type contractors, and to the organizations specified in § 101–43.315. The transfer of excess property to a cost-reimbursement type contractor shall be made only by the agency administering the contract. Each executive agency shall, to the maximum practicable extent, fulfill its requirements for property, including those of its cost-reimbursement type contractors, by obtaining excess from other Federal agencies in lieu of new procurement.

(1) Prior to procurement of new property, careful and receptive consideration shall be given to utilization of known usable excess property of a similar type, including the possibility of substitution or adaptation of excess items not identical with requested items, whether the excess items are unused, rehabilitated, or in used condition, and regardless of whether the intended new procurement would be from GSA stores stock or other sources of supply. Executive agencies shall accept, to the fullest extent practicable, the reasonable substitution of such excess property in lieu of new procurement.

(2) GSA will assist agencies in meeting their requirements for property of the types excepted from reporting as excess by this Part 101–43. Federal agencies requiring such property should contact the appropriate GSA regional office as indicated by § 101–43.4903. GSA area utilization officers, stationed at key military excess generating points throughout the United States, are screening and offering nonreported personal property as it becomes available for transfer.

(b) To implement the policy for maximum utilization of excess personal property, as outlined in paragraph (a) of this § 101–43.302, the regional offices of the GSA will screen all requests for replenishment of stores stock and direct delivery purchase requests submitted by executive agencies against lists of excess personal property available in their respective regions.

(1) GSA may take physical custody of such excess personal property for redistribution, or may direct its transfer to executive agencies in lieu of procurement of new property from commercial sources of supply. If the excess property is used, rehabilitated, or differs in some substantial characteristic from the item ordered, notice of intent to substitute will be given the ordering agency to permit such agency the opportunity to inspect the property prior to shipment.

(c) Acceptance of excess property under the above circumstances shall be required unless the using agency submits a full and convincing written justification that such transfers or substitutions would result in serious hardship or impairment to its operations programs.

(d) Part 101–27 prescribes standards for executive agencies in computing inventory levels. To encourage the use of excess property which might otherwise be disposed of as surplus, inventory levels may be adjusted upward when items of stock are to be acquired from excess sources. Such adjustments should be tempered by caution and arrived at after careful analysis which gives consideration to the factors set forth in Part 101–27 and in this Part 101–43. Generally, acquisitions of items for inventory from excess shall not exceed a two years' supply except when:

(1) A greater quantity is needed to meet known requirements for an authorized planned program.

(2) The item is not available without special manufacture and a predictable requirement exists.

(3) Administrative determination has been made that in application of the EOQ principle of stock replenishment within an agency an inventory level in excess of two years is appropriate for low dollar-volume items.

(4) The items are being transferred into authorized stock funds for resale to other Government agencies.

(5) In addition, the following conditions should be met prior to acquisition of excess:

(i) There must be a predictable requirement for an authorized program.

(ii) The cost of acquisition, including packing and shipping, carrying in inventory, and preservation shall not exceed delivered cost of new material.

(iii) The supply acquired does not exceed the expected shelf life, considering condition at time of acquisition.

(iv) The supply of spare parts acquired shall not exceed the life expectancy of the equipment supported.

### § 101–43,303 Suspension of procurement.

The Administrator of General Services may, as circumstances warrant, suspend the initiation of procurement for new items of property when these same items, or those which can be substituted or adapted for them, are available from excess property.

### § 101–43.303–1 Acquisition of mercury.

(a) Executive agencies of the Federal Government are prohibited from purchasing mercury in quantities of 76 pounds or more from commercial sources without prior clearance from GSA.

(b) Mercury, prime, virgin, 99.9 percent pure (not triple distilled), in 76 lb. flasks, with unit acquisition cost of $235.60 per flask, is available for transfer from AEC excess personal property with reimbursement at fair-market value.

(1) Requests for the mercury shall be made on Standard Form 122, Transfer Order Excess Personal Property, submitted in quadruplicate to the General Services Administration, Utilization and Disposal Service, Personal Property Division, 1776 Peachtree Street NW., Atlanta, Ga., 30309. Orders will show the holding agency as the U.S. Atomic Energy Commission, Oak Ridge Operations Office, Post Office Box E, Oak Ridge, Tenn., Attention: R. H. Miller. The unit of issue is 76 lb. flask.

(2) Requests for clearance to purchase quantities of 76 pounds or more from other sources than the U.S. AEC submitted to GSA's regional office, Atlanta, Ga., will receive prompt review provided such requests are accompanied by a statement of the reasons that make the available excess mercury unsuitable for the purposes of the requesting agency. Requesting agencies will be notified as to the approval or disapproval of such requests.

### § 101–43.304 Retention of custody.

GSA may direct the holding agency to retain custody of excess property, or order custody of whole or part transferred to other executive agencies, with their consent.

### § 101–43.305 Strategic and critical materials; excess related personal property.

With respect to strategic and critical materials, and excess related property, this Part 101–43 shall apply to them only to the extent not precluded by the provisions of Part 101–14 and Part 101–47, respectively.

### § 101–43.306 Property not required to be reported.

Excess property which is not required to be reported to GSA is nonetheless a valuable source of supply for Federal agencies. Regional offices and area utilization officers of GSA are responsible for local screening of such property, for making it available to Federal agencies, and for consummating its expeditious transfer to such agencies. Federal holding agencies shall cooperate with GSA representatives in making information available and in providing access to their nonreportable excess property. To the extent such property is not covered by the utilization screening processes of GSA, executive agencies shall make reasonable efforts to obtain utilization among Federal agencies of that property having utilization potential. In the case of narcotics, this solicitation shall be limited to those agencies shown in § 101–43.309.

### § 101–43.307 Legislative and judicial Federal agencies.

Federal agencies in the legislative and judicial branches are encouraged to report and transfer excess property and fill their requirements from excess property of other Federal agencies, in accordance with the provisions of this Part 101–43. In reporting property as excess, each Federal agency shall comply with the provisions of this Part 101–43.

### § 101–43.308 Assistance in major disaster relief.

In accordance with instructions of the Director, Office of Emergency Planning, or of any officer of his agency designated by him, excess property shall be utilized in behalf of or loaned to States and local governments, with or without compensation therefor, pursuant to the Act of September 30, 1950 (42 U.S.C. 1855 et seq.), and Executive Order No. 10427 of January 16, 1953, as amended, Executive Order No. 10737 of October 29, 1957, as amended, and Executive Order No. 11051 of September 27, 1962 (3 CFR), to provide assistance to such States and local governments in alleviating suffering and damage resulting from major disasters. Excess medicines, foods, and other consumable supplies may be distributed to States and local governments for such purposes. In the event such property has been reported to GSA pursuant to § 101–43.311, it shall be withdrawn by the holding agency pursuant to § 101–43.314.

### § 101–43.309 Narcotics.

Holding agencies shall arrange for transfers in accordance with § 101–43.315–5. In effecting the utilization of excess narcotic drugs, the holding agencies shall solicit only the following Federal agencies and may transfer excess narcotics to these agencies only:

(a) Department of Defense;

(b) Veterans Administration;

(c) Department of Health, Education, and Welfare;

(d) Office of Territories, Department of the Interior; and

(e) Such other Federal agencies as may be designated by the Administrator of General Services in special cases.

### § 101–43.310 [Reserved]

### § 101–43.311 Reporting requirements.

### § 101–43.311–1 Reporting.

Except as set forth in § 101–43.312, excess personal property shall be reported promptly as provided in this § 101–43.311–1 and in accordance with the Federal Supply Classification Groups and Classes contained in § 101–43.4901. Full descriptions will be used, when available. In the absence of such descriptions, adequate commercial descriptions will be furnished. Whenever possible, Federal stock numbers should be provided as part of the description. It is especially important that the excess property report reflect the true condition of the property as of the date it is reported excess, through assignment of the appropriate code designation, as defined in § 101–43.4902–1.

### § 101–43.311–2 Form and distribution of reports.

Reports of excess property shall be made on Standard Form 120, Report of Excess Personal Property, and Standard Form 120A, Continuation Sheet (see §§ 101–43.4902 and 101–43.4902–2), in accordance with the instructions in § 101–43.4902–1. Reports to GSA shall be submitted in original and three copies to the appropriate GSA regional office for the region in which the property is located (see § 101–43.4903), except that reports of excess standard forms, and samples of such forms shall be submitted to the General Services Administration Region 3, Federal Supply Service, Washington, D.C., 20407, in accordance with Part 101–26 of this chapter.

### § 101–43.311–3 Typewriters.

Typewriters shall not be included on Standard Form 120 with any other personal property and the following additional descriptive information shall be provided: make, model, type (standard, silent, noiseless, portable, or electric), carriage width, typeface, and serial number.

### § 101–43.311–4 Excess personal property on or within excess real property.

Excess related personal property shall be reported to GSA in accordance with Part 101–47 of this chapter. Excess personal property, other than related personal property, which may be located on or within excess real property, is governed by this Part 101–43. The fact of location on excess real property shall be noted on the report.

### § 101–43.311–5 Property at installations due to be discontinued.

Executive agencies that have installations which are due to be discontinued, closed, or abandoned and at which there will be excess personal property shall, unless inadvisable in the interest of national security, give advance notice of such situations as early as possible by letter to the appropriate GSA regional office. In such cases, agencies shall identify the installation to be discontinued, and provide the scheduled date for the removal of personnel from the location, and the last date when the personal property will be needed. As soon as possible after filing the advance notice, the excess personal property shall be reported in accordance with this § 101–43.311 to provide time for screening for Federal utilization and donation purposes. Seventy-five days are usually required.

### § 101–43.312 Exceptions to reporting.

Unless otherwise directed by GSA, the following excess property shall not be reported:

(a) Perishables, defined for the purposes of this section, as any foodstuffs which are subject to spoilage or decay;

(b) Property dangerous to public health and safety;

(c) Scrap and/or salvage, provided the property strictly conforms to the definitions for scrap and/or salvage (§ 101–43.4902–1).

(d) Property determined by competent authority to be classified for reasons of national security;

(e) Other items excepted from reporting as listed in § 101–43.4901;

(f) Otherwise reportable property which, prior to reporting as required in § 101–43.311, is transferred directly between Federal agencies to fill a known need; and

(g) Trading stamps.

### § 101–43.313 Items requiring special handling.

### § 101–43.313–1 Narcotics.

All excess narcotic drugs may be determined to be surplus by the holding agency without reporting as excess, after such agency has complied with the utilization requirements of §§ 101–43.102 and 101–43.309.

### § 101–43.313–2 Printing, binding, and blankbook equipment and supplies.

Excess machinery, equipment, material, and supplies for printing, binding, and blankbook work should be reported to the Public Printer for possible transfer, as provided in section 3 of the Act of July 19, 1919 (44 U.S.C. 59), prior to reporting to GSA.

### § 101–43.313–3 Intangible property.

Excess intangible property shall be reported to the General Services Administration, Utilization and Disposal Service, Washington, D.C., 20405, and shall not be transferred or disposed of without prior approval of GSA, except that bonds, notes, or other securities authorized to be disposed of by the Secretary of the Treasury under section 5 of the Act of April 3, 1945 (31 U.S.C. 741a), shall not be reported to GSA.

### § 101–43.313–4 Conditional gifts.

(a) Any agency receiving an offer of a conditional gift (other than money or intangible property) for a particular defense purpose within the purview of the Act of July 27, 1954 (50 U.S.C. 1151–1156), shall notify the appropriate regional office of GSA and shall submit a recommendation as to acceptance or rejection of the gift.

(b) Prior to such notification, the receiving agency shall acknowledge receipt of the offer and advise the donor of its referral to a GSA regional office but should not indicate acceptance or rejection of the gift on behalf of the United States. A copy of the acknowledgment shall accompany the notification and recomendation to the regional office.

(c) When the gift is determined to be acceptable and it can be used in the form in which offered, it will be transferred without reimbursement to a Federal agency designated by GSA for use for the

particular purpose for which it was donated.

(d) If the gift is one which GSA determines shall be converted to money, the funds, after conversion, will be deposited with the Treasury Department for transfer to an appropriate account which will best effectuate the intent of the donor, as provided in Treasury Department Circular No. 957, dated February 24, 1955.

(e) Such conditional gifts of property will be accepted or rejected on behalf of the United States or transferred to an agency by GSA only after consultation with the interested agencies.

(f) GSA will advise the donor and the agencies concerned of the action taken with respect to acceptance or rejection of the conditional gift and of its final disposition.

(g) The provisions in this § 101–43.-313–4 are applicable only to the acceptance of gifts under the provisions of the Act of July 27, 1954 (50 U.S.C. 1151–1156).

**§ 101–43.313–5 Electronic data processing equipment.**

(a) This § 101–43.313–5 provides for: (i) maximum utilization of Government-owned personal property; and (ii) achievement of economic advantages available to the Government through the purchase and continued use of electronic data processing (EDP) equipment previously leased by the Government. This § 101–43.313–5 prescribes requirements for reporting Government-owned and -leased equipment which is either excess or available for exchange or sale pursuant to Parts 101–43 and 101–45, and prescribes policy and procedures for transfer of such EDP equipment for further Federal use.

(1) The provisions of this § 101–43.313–5 are applicable to all electronic data processing equipment capable of performing those applications listed in the Code Sheet for Applications, Attachment A of Bureau of the Budget Circular No. A–55 (Revised) of November 15, 1963, when such equipment is either Government-owned or -leased. Included in this section is general purpose commercial type equipment that is a part of a weapons system or used in research, development, test, and evaluation, or classified programs. However, specialized equipment designed for use exclusively in the foregoing systems or programs is excluded.

(2) Government-wide policy for the selection and acquisition of Automatic Data Processing (ADP) equipment is contained in Bureau of the Budget Circular No. A–54. Consistent with the policy contained therein, executive agencies shall acquire available Government-owned or -leased electronic data processing equipment in lieu of purchase or lease from sources outside of the Government of new or used equipment where technically feasible and determined economically advantageous to the Government.

(b) Reporting property by owning or leasing agencies:

(1) Most agencies can predict planned replacement dates a year or more in advance of replacement. Some maintain centralized records of the status of all owned and leased EDP equipment. Written notice of planned replacements, by letter or other means, will greatly assist GSA in later efforts to obtain utilization among other Government agencies for this equipment. All advance notices submitted to GSA should contain as much information as is considered essential to determine effectively future utilization potential. When the status of such equipment changes, notification to this effect should be submitted on a situational basis, or reports of the status of all previously reported planned replacements or new planned replacements may be submitted quarterly.

(2) When an agency has determined the release date for EDP equipment being replaced, or considered excess to its needs, that fact shall be reported to GSA on Standard Form 120, Report of Excess Personal Property. The report shall be submitted at the earliest practicable date and, in any event, no later than 120 days prior to the anticipated release date. Specific reference to the advance notification previously furnished to GSA shall be made. The release date may be indicated as tentative if necessary. When a firm release date is established, or a previously reported firm release date is changed, this fact shall be reported by submission of a revised Standard Form 120. The basic Standard Form 120 report, in original and three copies, shall include the following:

(i) A complete listing of each equipment item identified by manufacturer's series and model number or other identification, as applicable, and a complete listing of modifications and attachments applied to each component. With each component listed there shall be an indication as to whether it has been purchased, leased, or leased with an option to purchase. If leased with option to purchase, and the option has not been exercised, the time available in which it may be exercised shall be reported. Also, since the reporting agency is in the best position to determine the acquisition cost to the Government at the time leased equipment will be released, such information shall be obtained from the supplier and reported. In addition, for each machine listed, the time in service and average down time per month for a twelve month period immediately preceding the report shall be reported on an attachment to the Standard Form 120.

(ii) An attachment that will indicate applications for each machine utilizing the application code contained in Attachment A of BOB Circular A–55. If no code is determined to be applicable, then a brief narrative statement of machine applications should be included. In the instance of a complete equipment configuration, the report shall include information regarding power and air-conditioning requirements. Also the attachment shall include a listing of compilers and other software packages (such as executive routines), and a listing of engineering drawings and maintenance manuals available with the equipment and indicate the availability of maintenance, supplies, and spare parts.

(iii) The notation "Exchange/Sale Property" prominently displayed on the face of the SF 120 in those instances where the reporting agency is releasing Government-owned equipment for the purpose of replacement and plans to employ the exchange/sale provisions of Parts 101–43 and 101–45.

(3) In consideration of the time factors involved, agencies, particularly large ones, may elect to forego any canvass of other internal EDP needs and to request that GSA perform this service simultaneously with its canvass of the requirements of other agencies. In such instances, GSA will direct its catalogs and bulletins to those addressee offices within the reporting agency supplied by the reporting agency. Any needs of the reporting agency will be given priority over those of other agencies for a reasonable period of time. This reasonable period will be established by GSA in collaboration with the agencies involved.

(4) If, after submission of a Standard Form 120, an agency determines that the equipment will still be required and intends to continue the use, continue the lease, or exercise a purchase option and retain said equipment, notification to this effect shall be immediately submitted to GSA on an appropriately noted SF 120 in order to prevent unnecessary expense to other agencies in attempting to obtain utilization of the property.

(c) The Utilization and Disposal Service, GSA, will circularize catalogs and bulletins to all Federal agencies, including the reporting agency, advising of the availability of the equipment by transfer, by purchase from the supplier at reduced prices to be agreed upon by the requiring agency and the supplier, or by exercise of the purchase option contained in the leasing agency's contract. Price information will be included in catalogs and bulletins, when available, but final pricing on Government-owned equipment will normally be arrived at in accordance with § 101–43.313–5(d).

(1) Catalogs will be released by GSA for distribution on or before the fifteenth day of the first month of each calendar quarter, listing all equipment available for transfer as of the last day of the preceding quarter. Bulletins will be issued to update the most recent catalog publication.

(2) Executive agencies shall: (i) provide GSA with quantitative requirements and/or distribution lists for catalogs and bulletins; (ii) take steps to insure expedited distribution of catalogs and bulletins internally; and (iii) inform all appropriate officials in the agency concerning the use and applicability of the catalogs and bulletins.

(d) In the case of Government-owned equipment, transfers shall be governed by the fair value reimbursement provisions of § 101–43.315, which means that in most instances transfers between agencies will be without reimbursement of fair value. However, when replacement is involved, and the owning agency plans to employ the exchange/sale provisions of Parts 101–43 and 101–45, and so annotate the report, then reimbursement will be required of the acquiring agency in accordance with the criteria set forth in § 101–43.205, except that reimbursement will be at least equal to the trade-in value as stipulated in the Federal Supply Schedule contract, or otherwise allowed by the supplier.

(e) The costs of care and handling of owned or leased equipment prior to the release date stated by the holding agency on the SF 120, including movement and temporary storage, shall be borne by the holding agency. Any costs directly involved for temporary storage incurred subsequent to the stated release date may be billed to the acquiring agency provided that the date of original submission of the SF 120 to GSA was at least 120 calendar days in advance of the release date stated in that declaration. The obligation rests with the acquiring agency to make arrangements with the holding agency whenever physical transfer of the equipment to the acquiring agency cannot be completed immediately after the stated release date and temporary storage by the holding agency is therefore required. All other costs incident to transfer shall be borne in accordance with § 101–43.317–1.

(f) When an executive agency has developed systems specifications, as required by BOB Circular A–54, and has determined its equipment requirements, it will screen information catalogs and bulletins furnished by GSA to determine the availability of equipment or components to meet its specifications. Each requiring agency shall acquire, where economically and technically feasible, the items offered through the circularization media referred to in § 101–43.313–5(c) in lieu of leasing or purchasing new or used equipment from commercial sources. In making its determination pursuant to § 101–43.313–5(a)(2) relative to the offered equipment, appropriate consideration shall be given to operational suitability, installation time requirements, budgetary implications, and economic factors. In instances where no suitable used equipment appears to be available, study should be made to determine the feasibility of modifying available used items, or adding peripheral equipment, to meet specifications. When the information listed in a GSA catalog or bulletin is not sufficient to make a determination, further information may be obtained by contacting the holding agency or the GSA office set forth in this § 101–43.313–5. Since planning for obtaining EDP equipment considerably precedes actual procurement, agencies are cautioned to screen continuously the GSA catalogs and bulletins until a firm contract to purchase or lease new equipment has been let.

(1) Agencies desiring to acquire owned or leased equipment will submit a Standard Form 122, Transfer Order Excess Personal Property, to GSA in an original and three copies. (See § 101–43.4906–1 for instructions for preparation of the SF 122.)

(2) When an agency, after consideration in accordance with this § 101–43.313–5(f), has determined that acquisition of the offered equipment, if it is identical or substantially similar to equipment required, is not in the best interest of the Government, it shall place in its official records a written statement setting forth the basis for its decision.

(g) When a Standard Form 122 is received in accordance with § 101–43.313–5(f)(1), GSA will notify the releasing agency. The following actions will then be taken:

(1) The releasing agency shall notify the supplier in writing of the intention of the requiring agency to further utilize the equipment when it is wholly owned by the Government and a maintenance agreement with the supplier is in effect, when it is leased, or when it is leased with option to purchase. This communication will indicate the name of the requiring agency and will state that the requiring agency will contact the supplier. Copies of this correspondence will be furnished the requiring agency and GSA.

(2) When the requiring agency receives a copy of the releasing agency's notice to the supplier, the requiring agency shall contact the supplier to establish a firm purchase agreement, if applicable, and/or support agreements. Copies of key correspondence and agreement documents shall be furnished GSA and the releasing agency. In the instance where equipment being acquired is Government owned and maintained, the requiring agency shall take the necessary action to effect transfer as set forth in § 101–43.315–5.

(h) No executive agency shall exchange or sell electronic data processing equipment under the exchange/sale provisions of Parts 101–43 and 101–45 of this chapter until the items have been reported and released in accordance with the provisions of this § 101–43.313–5.

(1) Equipment reported in accordance with § 101–43.313–5(b)(2), will remain available for transfer until the release date specified on the Standard Form 120 has been reached at which time it is automatically released to the owning agency for appropriate disposition.

(2) Reports prescribed by this § 101–43.313–5 shall be addressed to General Services Administration, Utilization and Disposal Service, Office of Personal Property, Utilization Division, Washington, D.C., 20405.

**§ 101–43.313–6 Trading stamps.**

Trading stamps are exempted from reporting to GSA as excess intangible personal property pursuant to § 101–43.312. Executive agencies in a position to receive trading stamps should establish such internal procedures for handling trading stamps as will result in the least administrative burden or cost. Such procedures should provide for a minimum of administrative and accounting controls.

(a) Arrangements for redemption by the lowest appropriate organizational level should be made where redemption of trading stamps by the procuring agency is practical and in the best interest of the Government.

(b) Arrangements for transfer, without reimbursement or accountability, to a nearby Federal hospital or similar institution operated, managed, or supervised by VA, DHEW, or DOD, should be made where the procuring agency has no need for trading stamps received, provided it has been ascertained that the proposed recipient is prepared to receive and utilize such trading stamps.

(c) Other Federal agencies are encouraged to adopt these procedures.

**§ 101–43.313–7 Atomic Energy Commission-controlled materials.**

Atomic Energy Commission-controlled materials, defined in § 101–43.104, are exempted from reporting to GSA as excess personal property. Transfers of such materials shall be made in accordance with applicable regulations of the AEC (see 10 CFR Parts 30, 40, and 70).

**§ 101–43.314 Withdrawals and corrections.**

**§ 101–43.314–1 Withdrawals.**

Requests for withdrawals shall be addressed to the GSA regional office to which the report of excess property was forwarded. Disposition of property shall not be made until after approval of withdrawal is received from GSA except in cases involving the physical transfer of property for purposes of major disaster relief. This will enable the GSA regional offices to provide firm listings of excess property and assure agencies that property selected is available. It will preclude the expense of inspection and preparation of correspondence and transfer documents on property to be withdrawn and will assist in providing a uniform and orderly program for the utilization of excess property.

**§ 101–43.314–2 Corrections.**

Corrected reports of excess property shall be submitted to the appropriate GSA regional office for necessary action.

**§ 101–43.315 Transfers of excess property.**

**§ 101–43.315–1 Agencies eligible.**

Transfers of excess personal property may be made among Federal agencies (which include wholly owned Government Corporations), to cost-reimbursement type contractors, and to the Senate, the House of Representatives, the Architect of the Capitol and any activities under his direction, mixed-ownership Government corporations as defined in the Government Corporation Control Act (31 U.S.C. 841), the municipal government of the District of Columbia, or non-Federal agencies for which GSA procures, such as State forestry activities engaged in forest fire control, or Soil Conservation Districts.

**§ 101–43.315–2 Information of availability.**

There are several methods of obtaining reliable information regarding the availability of excess property. Agencies are encouraged to inspect or arrange for inspection of excess property, prior to placing an order, as a means of verifying description and condition. GSA regional

No. 232—Pt. II——7

offices will make such inspection, upon request, to the extent of available manpower resources.

(a) Personal contact with GSA or the holding installation;

(b) Review of excess property catalogs and bulletins circularized by GSA;

(c) Submission of property requirements to the GSA regional offices, using GSA Form 1539, Request for Excess Personal Property; see § 101–43.4905 for instructions about acquisition and use of the form;

(d) Examination and inspection of reports and samples of excess property assembled for this purpose in GSA regional offices.

**§ 101–43.315–3 Fair value reimbursement.**

(a) All transfers of excess personal property shall be without reimbursement of fair value (the costs specified in § 101–43.317 will be chargeable to the transferee agency), except that such reimbursement shall be required when:

(1) The property transferred was acquired by the use of funds either not appropriated from the general fund of the Treasury or appropriated therefrom but by law reimbursable from assessment, tax, or other revenue or receipts and payment of fair value is requested. It is the current policy of the executive branch of the Government that transfers of working capital fund property shall be without reimbursement.

(2) Either the transferor or the transferee agency (or the organizational unit affected) is a wholly owned or a mixed-ownership Government Corporation as defined in the Government Corporation Control Act (31 U.S.C. 841), is the municipal government of the District of Columbia, or is a non-Federal agency when the function of a Federal agency authorized to procure for it is transferred to the General Services Administration. (See § 101–43.4905 for List of Government Corporations.)

(3) Reimbursement is directed by GSA.

(b) The fair value of excess property transferred with reimbursement pursuant to this § 43.315–3 shall be determined by the holding agency in accordance with the following formula:

| Fair value code | Explanation | Percentage of original or estimated acquisition cost |
|---|---|---|
| A | New or unused personal property falling in condition code designations N–1 and N–2 (see § 101–43.4902). | 20 |
| B | All other personal property | 0 |

(c) Where application of the above formula will not achieve the intended purpose because of special circumstances or the peculiar nature of the property, the holding agency may use other criteria for arriving at fair value if approved or directed by GSA. Where circumstances warrant, and the agencies concerned agree thereto, fair value prices higher than those arrived at by use of the formula specified in this § 101–43.315–3 may be used.

(d) Disagreement between agencies as to the fair value shall be referred for final determination to the Regional Administrator, GSA, for the region in which the property is located, or his designated representative.

**§ 101–43.315–4 Transfer for redistribution.**

(a) Any organizational unit of GSA authorized to perform redistribution functions is authorized to make necessary arrangements for the transfer to it for redistribution of available excess property in the custody of any Federal agency.

(b) Items reported as excess and determined by GSA to be suitable for redistribution within the Federal Government may be taken into physical custody by GSA and redistributed through an authorized organizational unit or, when notified, shall be retained by the holding agency until such time as redistribution is directed by GSA.

(c) Items which are identical to or can be substituted for items listed in GSA Stores Stock Catalog shall be supplied to agencies through the stores program of GSA at prices to be determined by GSA.

(d) To assure maximum redistribution of items available from excess, GSA may require from time to time that all orders for such items be forwarded to a GSA regional office until excess stocks are exhausted.

**§ 101–43.315–5 Procedure for effecting transfers.**

(a) All transfers of excess personal property between Federal agencies shall be accomplished by use of Standard Form 122, Transfer Order Excess Personal Property (see § 101–43.4906). Each transferee agency shall forward the original and three copies of SF 122 to the appropriate GSA regional office (see § 101–43.4903) for approval. Such prior approval need not be obtained where the property involved in the given transaction is:

(1) Reportable under § 101–43.311 but has not yet been reported to GSA and its total acquisition cost does not exceed $1,000, and the owning agency's regulations relative to internal redistribution have been satisfied; or

(2) Nonreportable under § 101–43.311 and has not been reserved at the holding location for special screening by the appropriate GSA regional office.

(3) An information copy of each direct transfer order shall be furnished by the transferee agency to the appropriate GSA regional office within ten days from the date of the order.

(b) Transfer order shall be completed in accordance with the example (§ 101–43.4906).

(c) When articles are offered for transportation, the condition of the articles shall be shown on the bill of lading. In order that the Federal Government may obtain the most economical rates for the movement of excess personal property in other than new condition, particular attention shall be given to the use of the appropriate classification description as required by carriers' tariffs.

(d) In approving transfer orders, GSA will take into consideration national defense requirements, emergency needs, equitable distribution, transportation costs, and other appropriate factors. If there are no other compelling factors, transfer order will be approved on a "first come, first served" basis.

(e) A copy of each approved or disapproved transfer order will be returned to the ordering agency by GSA regional office with appropriate notation. Two copies of approved orders will be appropriately noted and transmitted by the GSA regional office to the holding agency for transfer action. Any billing by the holding agency shall be accomplished in accordance with § 101–43.317.

(f) (1) If the transfer order does not contain complete shipping instructions, the transferee agency is required to transmit these to the holding activity within 15 days after receipt of the transfer order by the holding activity in the case of domestic shipments, or 45 days in the case of export shipments. The holding activity will communicate failure to receive such shipping instructions to the GSA regional office which approved the transfer.

(2) If the transfer order indicates the property is to be picked up by the transferee agency, this action must be accomplished within 20 days from the time such agency is notified by the property custodian that the shipment is ready. The holding activity will communicate with the GSA regional office concerning the failure of the transferee agency to pick up property within the allotted time.

(g) Whenever a transfer order covers excess property which has deteriorated materially below the reported condition, the holding agency shall advise the GSA regional office of its current condition. The GSA regional office will so advise the ordering agency. Shipment will not be made until the ordering agency has advised the GSA regional office that the existing condition is acceptable, and the GSA regional office has so advised the holding agency.

(1) Holding activities will carry out shipping instructions within 20 days from receipt or make property available for pickup promptly.

(2) If the holding activity is unable to ship or deliver as required, the ordering activity must be advised of the reason for delay and scheduled shipping or delivery date.

**§ 101–43.315–6 Report on condition and description.**

Transferee Federal agencies are encouraged to advise the appropriate GSA regional office of instances in which the condition or description of excess items they acquired was improperly reported to them. This action shall not be taken when the items involved were inspected by the transferee agency.

**§ 101–43.316 Contractor inventory.**

Subject to the limitations contained in this Part 101–43, and Parts 101–44 and 101–45, any executive agency may authorize any of its contractors or their subcontractors to retain or dispose of any contractor inventory under such orders as such agency may prescribe.

**§ 101–43.316–1 Utilization.**

(a) Each executive agency shall provide for use of contractor inventory within such agency to the maximum extent feasible, prior to retention or disposal by a contractor. In addition, each executive agency shall comply with the utilization requirements and procedures in Part 101–43 with respect to the following types of contractor inventory:

(1) Typewriting machines; office furniture, machines, equipment, and supplies; motor vehicles and automotive equipment; printing and binding equipment; construction equipment (except hand tools); and all items included in the GSA Stores Stock Catalog.

(2) Types of property for which known requirements exist either in the contracting agency or other Federal agencies. Contractors shall be kept currently advised by the contracting agency of such types.

(3) Excess property, the quantity or dollar amount of which is substantial, in accordance with criteria established by each agency, or as may be directed from time to time by GSA.

(4) Atomic Energy Commission—controlled materials.

(5) Narcotics.

(6) Intangible personal property.

(7) Strategic and critical materials.

(8) Such other types of property as may, from time to time, be designated by GSA.

(b) In the case of contractor-owned contractor inventory, compliance with the utilization requirements and procedures in Part 101–43 with respect to the categories in § 101–43.316–1 should ordinarily occur prior to the Government's exercising the applicable option to take over such property. When utilization efforts disclose that an agency will accept transfer of such property, the appropriate agency shall take the necessary action to acquire title for the Government.

**§ 101–43.317 Costs and proceeds.**

**§ 101–43.317–1 Cost of care and handling.**

Each holding agency shall be responsible for and bear the costs of performing care and handling of excess pending disposition. The direct costs incurred incident to the transfer shall be borne by the transferee agency. Overhead or administrative costs or charges shall not be included. Only costs incurred in the actual packing, preparation for shipment, and loading may be recovered by the holding agency; and where such costs are incurred, they shall be reimbursed by the transferee agency upon appropriate billing, unless the holding agency waives the amount involved as being uneconomical or impracticable to collect. For example, collection of amounts of $15 or less where a transaction is otherwise without exchange of funds would appear uneconomical.

In those cases where reimbursement for fair value is to be made, the fair value proceeds shall be deposited in the Treasury to miscellaneous receipts or the appropriate agency account by the transferee agency with a copy of the deposit action furnished the agency determining the property to be excess.

**§ 101–43.318 Determination of excess as surplus.**

**§ 101–43.318–1 Reportable property.**

Excess property reported to GSA, and not transferred to other agencies, shall be deemed surplus only when released by the Administrator of General Services. Property so reported will be released for disposal as surplus at the earliest possible time consistent with utilization objectives.

**§ 101–43.318–2 Nonreportable property.**

Executive agencies having property not required to be reported shall, after screening for a reasonable time in accordance with § 101–43.306 and finding no need for such property, determine it to be surplus.

**§ 101–43.318–3 Donation and sale of surplus property.**

Property determined to be surplus in accordance with § 101–43.318 shall not be offered for sale until a period of 15 calendar days has been afforded for donation program screening, in accordance with Part 101–44.

**§ 101–43.319 Performance reports.**

A quarterly performance report of the utilization of excess property shall be submitted to GSA on Standard Form 121, Revised, Quarterly Report of Utilization and Disposal of Excess and Surplus Personal Property (§ 101–43.4907).

## Subpart 101–43.4—Utilization of Abandoned and Forfeited Personal Property

### § 101–43.400 Scope of subpart.

This Subpart 101–43.4 prescribes the policies and methods for the utilization and transfer within the Government of abandoned and forfeited personal property which may come into the custody or control of any Federal agency in the United States, Puerto Rico, and the Virgin Islands. Such property located elsewhere shall be utilized and transferred in accordance with the regulations of the agency having custody thereof.

### § 101–43.401 Definitions.

As used in this Subpart 101–43.4, the following terms have the meanings set forth in this § 101–43.401.

(a) "Distilled spirits": Ethyl alcohol, hydrated oxide of ethyl, spirits of wine, whiskey, rum, brandy, gin, and other distilled spirits, including all dilutions and mixtures thereof.

(b) "Forfeited": Forfeitures, whether by summary process or by order of a court of competent jurisdiction pursuant to any law of the United States.

(c) "Malt beverage": A beverage made by the alcoholic fermentation of an infusion or decoction, or combination of both, in potable brewing water, of malted barley with hops, or their parts, or their products, and with or without other malted cereals, other carbohydrates or products prepared therefrom, and with or without the addition of carbon dioxide, and with or without other wholesome products suitable for human food consumption.

(d) "Property": All personal property, including but not limited to vessels, vehicles, aircraft, and alcoholic beverages.

(e) "Regional Administrator": General Services Administration, Region 3, Regional Administrator, Washington, D.C., 20407.

(f) "Wine": (1) Wine as defined in Sections 5381 and 5385 of the Internal Revenue Code of 1954 (26 U.S.C. 5381, 5385), as now in force or hereafter amended, and (2) other alcoholic beverages not so defined, but made in the manner of wine, including sparkling and carbonated wine, wine made from condensed grape must, wine made from other agricultural products than the juice of sound, ripe grapes, imitation wine, compounds sold as wine, vermouth, cider, perry, and sake; in each instance only if containing not less than 7 per centum and not more than 24 per centum of alcohol by volume, and if for nonindustrial use.

### § 101–43.402 Sources of property available for utilization.

Property available for utilization under this § 101–43.402 may result from property which has been abandoned to any Federal agency, in such a manner as to vest title to the property in the United States, and property which has been seized by an authorized agency of the Government and forfeited.

### § 101–43.403 Custody of property.

GSA generally will not take possession of property that is forfeited or abandoned. Holding agencies shall retain custody of and be responsible for the property until it is delivered or shipped to a duly authorized receiving Federal agency, or otherwise disposed of after release by the Regional Administrator.

(a) In the case of forfeiture of any firearms subject to disposal under the Internal Revenue Code of 1954, GSA will take custody of such firearms, or direct the disposition thereof (including retention for official use by the Treasury Department at the written request of the Secretary of the Treasury or his delegate), upon receipt of the report thereon required pursuant to § 101–43.406.

(b) GSA will take possession of forfeited or abandoned property it acquires for redistribution.

### § 101–43.404 Cost of care and handling.

Each holding agency shall be responsible for performing care and handling of abandoned and forfeited personal property pending disposition. If cost of storage, towing, care, handling, or transportation of property has been paid by the Federal agency which has custody thereof, any subsequent transferee agency should be advised as to such costs in advance of transfer; and such transferee agency shall reimburse the holding agency therefor upon appropriate billing, unless, because of the amount involved, the holding agency finds this uneconomical or impractical.

### § 101–43.405 Status of property assigned or transferred.

Any property delivered for official use under this part shall thereupon otherwise lose its identity as abandoned or forfeited property and, when no longer required for official use, shall be reported as excess in accordance with § 101–43.311.

### § 101–43.406 Reporting abandoned and forfeited personal property.

Federal agencies shall report promptly to the Regional Administrator, abandoned and forfeited property that comes into their custody and is not covered by the exceptions and modifications of this § 101–43.406, unless otherwise directed by GSA. Such property shall be reported as directed herein.

(a) Reports shall contain the following information:

(1) Name of the reporting Federal agency;

(2) Whether property was (i) voluntarily abandoned; (ii) forfeited otherwise than by court decree; or (iii) subject of a court proceeding, and, if so, the place and judicial district of court from which decree will be issued;

(3) Present official custodian of property, and address where property is located;

(4) Description and condition of property in sufficient detail to enable a decision to be made regarding its desirability and utility;

(5) Fair-market value of property as appraised by holding agency;

(6) Existence or probability of lien or claim of lien and amount involved;

(7) Charges incurred for hauling, transporting, towing, and storage to date of report and rate of storage charged;

(8) If the property is a motor vehicle: Type, make, model or year, body, color, capacity, speedometer reading, number of wheels, extra equipment, motor number, nature and probable cost of repairs necessary to put in serviceable condition, and condition of tires;

(9) If the property is a vessel or an aircraft: Type, manufacturer or builder, identifying official name or number, age, and description; and

(10) If the property is alcoholic beverages: Qualities and kinds (whether ethyl alcohol or hydrated oxide of ethyl; rye or bourbon or other whiskey and its brand, if any; sparkling or still wine and its color or brand; cordial, brandy, gin, etc.); proof rating and other qualities shown by test, number, and size of containers; condition (whether fit for human consumption, scientific, or mechanical purposes) and basis therefor; and condition for shipping.

(b) The following forfeited and abandoned property need not be reported:

(1) Forfeited arms or munitions of war condemned and handled pursuant to the provisions of section 1 of Title VI of the Act of June 15, 1917, as amended (22 U.S.C. 401);

(2) Forfeited firearms which are transferable by the holding agency to the Secretary of Defense;

(3) Abandoned, condemned, or forfeited tobacco, snuff, cigars, or cigarettes which the holding agency estimates will not, if offered for sale by competitive bid, bring a price equal to the internal revenue tax due and payable thereon; and which is subject to destruction, or delivery without payment of any tax, to any hospital maintained by the United States for the use of present or former members of the military or naval forces of the United States;

(4) Scrap;

(5) Salvage;

(6) Animals;

(7) Any item or group of similar items, other than distilled spirits, wine, or malt beverages, or forfeited firearms, when such items are at any one location, and have a value of less than $100;

(8) Money and valuable securities;

(9) Perishable commodities and items prohibited by law from sale to the public, including, but not limited to, indecent or obscene articles;

(10) Property dangerous to public health or safety;

(11) Property not the subject of a court proceeding desired to be retained by the holding agency for official use;

(12) Property determined by competent authority to be classified for reasons of national security and otherwise handled in accordance with applicable provisions of law;

(13) Forfeited distilled spirits (including alcohol), wine, and malt beverages not fit for human consumption, or scientific or mechanical purposes. Domestic distilled spirits (other than alcohol), wine, and malt beverages not produced at a registered distillery, winery, or brewery will be regarded as not fit for human consumption.

(14) Odd lots of distilled spirits consisting of any one seizure of less than five wine gallons, except that distilled spirits (other than alcohol) of any one kind and brand in excess of one wine gallon shall be reported;

(15) Effects of deserters from the Coast Guard or the military services, or of deceased persons of the Coast Guard or military services, or of deceased inmates of naval or soldiers' home of Government hospitals;

(16) Seeds, plants, or misbranded packages seized by the Department of Agriculture pursuant to authorities provided by law;

(17) Game and equipment (other than vessels, including cargo) seized by the Department of the Interior pursuant to authorities provided by law;

(18) Files of papers, dead letters, unclaimed printed matter, and nonmailable matter in the custody of the Postmaster General;

(19) Infringing articles in the custody of the Patent Office, Department of Commerce; and

(20) Motor vehicles which qualify for replacement under replacement standards provided in Part 101–38.

(c) The general rule for reporting abandoned and forfeited property is modified, hereby, with respect to the following:

(1) Narcotics, regardless of quantity, condition, or acquisition cost, shall be reported to the Bureau of Narcotics, Department of the Treasury, Washington, D.C., 20220.

(2) Vessels of 1,500 gross tons or more shall be reported to the Secretary of Commerce.

(3) Property, seized by one Federal agency, but adopted by another for prosecution under laws enforced by the adopting Federal agency shall be reported by the adopting agency to the extent and in the manner required by this section.

### § 101–43.407 Information of availability.

Property reported under § 101–43.406 and not required for assignment to the seizing agency will be made available by GSA to other Federal agencies by dissemination of information with respect to such property, in the following manner:

(a) Copies of reports submitted pursuant to § 101–43.406 will be made available for examination by authorized representatives of Federal agencies in the offices of the Regional Administrator.

(b) Notification by personal contact with Federal agencies believed to have an official use for the property.

(c) By circularization of lists of items believed to have special value or significance, to appropriate Federal agencies.

### § 101–43.408 Transfer of abandoned and forfeited personal property.

Except as to forfeited firearms subject to disposal under the Internal Revenue Code of 1954, the transfer of forfeited and abandoned personal property shall be accomplished by the submission of purchase orders to the Regional Administrator, for approval. Transfers of such forfeited firearms shall be accomplished as set forth in § 101–43.408–2.

### § 101–43.408–1 Transfer for official use to seizing agency.

The request for retention of property subject to court proceeding by a seizing agency for official use may be made by endorsing on the report at the time of submission or by subsequent memorandum to the Regional Administrator. Transfer of the property will be accomplished by the issuance by GSA of a suitable document authorizing the acquiring agency to take title on behalf of the Government.

### § 101–43.408–2 Transfers to other Federal agencies.

(a) Except for property which is subject to court action, purchase orders shall be submitted in an original and three copies, indicating the agency having the custody of the property as supplier, and showing, where such information is available, the report or case number on which the property is listed, the property required, location of the property, and the fair unit price and total amount. Purchase orders generally will be approved on a "first come, first served" basis, but other factors such as, but not limited to, urgency of need and transportation costs will be taken into consideration. When the purchase order is approved by GSA, a transfer document will be issued authorizing the agency to take title to the property for the Government.

(b) Property subject to court action may be obtained by the submission, to the Regional Administrator, of a memorandum setting forth the need for the property by the agency. If proceedings are being, or have been, commenced for the forfeiture of the property by court decree, application will be made by GSA to the court prior to entry of a decree for an order requiring delivery of the property to an appropriate recipient.

(c) Transfers of forfeited distilled spirits, wine, and malt beverages shall be limited to those for medicinal, scientific, or mechanical purposes, or for any other official purposes for which appropriated funds may be expended by a Government agency. Purchase orders for transfers shall be signed by the head of the requesting agency, or by officials designated by him to sign. Where these officials are designated to sign, the Regional Administrator, shall be advised of designees by letter over the signature of the head of the agency concerned. No purchase order will be acted upon unless signed as provided herein.

(d) Requests for the transfer of forfeited firearms subject to disposal under the Internal Revenue Code of 1954 shall be submitted in memorandum form addressed to the Regional Administrator, GSA. Such memorandum shall set forth the need for the property by the requesting agency.

### § 101–43.408–3 Transfers - reimbursement.

Except in the case of forfeited firearms subject to disposal under the Internal Revenue Code of 1954, reimbursement for transfers of forfeited property to other Federal agencies shall be in accordance with § 101–43.315. Reimbursement shall be required in connection with transfers of abandoned property. Transfers of forfeited firearms subject to disposal under the Internal Revenue Code of 1954 shall be without reimbursement.

### § 101–43.409 Proceeds.

### § 101–43.409–1 Billing.

Each holding agency shall be responsible for billing and collecting the fair value of property transferred to other agencies when reimbursement is required. See § 101–43.404 relating to the cost of care and handling.

### § 101–43.409–2 Disposition of proceeds.

(a) Reimbursement from the transfer of forfeited property shall be deposited by the transferor agency in the Treasury of the United States as miscellaneous receipts.

(b) Reimbursement from the transfer of abandoned property shall be deposited in a special fund for a period of at least three years. A former owner may be reimbursed from the special fund, based upon a proper claim filed within three years from the date of vesting of title in the United States as determined by the head of the transferor agency. Such reimbursement shall not exceed fair value at the time title was vested in the United States, less the costs incident to the care and handling of such property as determined by the head of the agency concerned.

## Subparts 101–43.5—101–43.48 [Reserved]

## Subpart 101–43.49—Illustrations

### § 101–43.4900 Scope of subpart.

This subpart prescribes lists and forms applicable in connection with the utilization of personal property.

NOTE: The forms in §§ 101–43.4902, 101–43.4902–1, 101–43.4902–2, 101–43.4904, 101–43.4904–1, 101–43.4906, 101–43.4906–1, 101–43.4907, and 101–43.4909 filed as part of the original document. Copies may be obtained from Central Office, GSA.

### § 101–43.4901 Excess personal property reporting requirements.

| FSC commodity | | | Not reportable to GSA | Reportable to GSA | Reportable requirements | |
|---|---|---|---|---|---|---|
| Code | Group classification title | Classes | | | Acquisition cost minimum line item value | Report in condition codes or better |
| 10 | Weapons | All | x | | | |
| 11 | Atomic ordnance | All | x | | | |
| 12 | Fire control equipment | All | x | | | |
| 13 | Ammunition and explosives. | All | x | | | |
| 14 | Guided missiles | All | x | | | |
| 15 | Aircraft and airframe structural components. | All except | x | | | |
| | | 1510 fixed wing | | x | $500 | N4, E4, O4, R4. |
| | | 1520 rotary wing, including helicopters. | | x | 500 | N4, E4, O4, R4. |
| 16 | Aircraft components and accessories. | All except | x | | | |
| | | 1670 parachutes | | x | 500 | N4, E4, O4, R4, X. |
| 17 | Aircraft launching, landing, and ground handling equipment. | All | x | | | |
| 19 | Ships, small craft, pontoons, and floating docks. | All except | | x | 500 | N3, E3, O3, R2. |
| | | Combat vessels and vessels over 1500 tons. | x | | | |
| | | 1945 pontoons and floating docks. | x | | | |
| | | 1950 floating drydocks | x | | | |
| 20 | Ship and marine equipment. | All | x | | | |
| 22 | Railway equipment | All except | | x | 500 | N3, E3, O3, R2. |
| | | 2240 locomotive and rail car accessories and components. | x | | | |
| 23 | Motor vehicles, trailers, and cycles. | All except | | x | 500 | N4, E4, O4, R4. |
| | | Armored and amphibious in class 2320. | x | | | |
| | | 2340 motorcycles, motor scooters, and bicycles. | | x | 500 | N3, E3, O3, R2. |
| | | 2350 tanks and self-propelled weapons. | x | | | |
| 24 | Tractors | All except | | x | 500 | N4, E4, O4, R4. |
| | | Cab, body and frame structural components and springs in classes 2410 and 2420. | x | | | |
| | | 2430 tractors, track laying, high speed. | x | | | |
| 25 | Vehicular equipment components. | All | x | | | |
| 26 | Tires and tubes | All except | x | | | |
| | | 2610 tires and tubes, pneumatic, except aircraft. | | x | 300 | N2. |
| 28 | Engines, turbines, and components. | All except | x | | | |
| | | 2805 gasoline reciprocating engines, except aircraft and components. | | x | 300 | N3, E2, O2. |
| | | 2815 diesel engines and components. | | x | 300 | N3, E2, O2. |
| 29 | Engine accessories | All | x | | | |
| 30 | Mechanical power transmission equipment. | All | x | | | |
| 31 | Bearings | All | x | | | |
| 32 | Woodworking machinery and equipment. | All | | x | 300 | N3, E3, O3 R2. |
| 34 | Metalworking machinery | All | | x | 500 | N3, E3, O3, R2. |
| 35 | Service and trade equipment. | All | | x | 300 | N3, E3, O3, R2. |
| 36 | Special industry machinery. | All except | | x | 300 | N3, E3, O3, R2. |

Development Loan Fund.
Export-Import Bank of Washington.
Federal Public Housing Authority (or Public Housing Adm.) and including public housing projects financed from appropriated funds and operations thereof.
Federal Savings and Loan Insurance Corp.
Federal Housing Adm.
Saint Lawrence Seaway Development Corp.
Panama Canal Co.
Tennessee Valley Authority.

MIXED-OWNERSHIP GOVERNMENT CORPORATIONS

Central Bank for Cooperatives and the Regional Banks for Cooperatives.
Federal Land Banks.
Federal Intermediate Credit Banks.
Federal Home Loan Banks.
Federal Deposit Insurance Corp.

§ 101–43.4906 Standard Form 122, Transfer Order Excess Personal Property.

§ 101–43.4906–1 Instructions for preparing Standard Form 122.

§ 101–43.4907 Standard Form 121, Quarterly Report Utilization and Disposal of Excess and Surplus Personal Property.

§ 101–43.4908 Exchange/sale category list.

In the acquisition, exchange, or sale of property in the categories below, both the item to be acquired and the item to be replaced must fall within a single numbered category.

1. Agriculture products, processed foods and forage.
2. Air-conditioning units, office and residential.
3. Air-conditioning units, industrial.
4. Ambulances, all sizes.
5. Ammunition and ammunition components.
6. Animals and animal products.
7. Asphalt distributors.
8. Asphalt pavers, portable or road mix.
9. Batteries, storage.
10. Bicycles; tricycles.
11. Binoculars; field glasses; telescopes.
12. Boilers, steam.
13. Buses, all sizes.
14. Cards, tabulating.
15. Compressors, air, portable.
16. Compressors, air, stationary.
17. Crawler, wheel mounted, and railroad cranes (including shovels and drag lines).
18. Crane trucks, industrial warehouse, electric and gasoline powered.
19. Ditching machines.
20. Dozer blades.
21. Drill presses.
22. Earth augers.
23. Fans, electric.
24. Graders, self-powered and towed.
25. Lathes.
26. Machines, adding; machines, calculating.
27. Machines, addressing and mailing.
28. Machines, dictating and transcribing.
29. Machines, duplicating.
30. Machines, punched card, bookkeeping, tabulating and accounting.
31. Milling machines.
32. Mixers, concrete, portable or truck mounted.
33. Motor scooters.
34. Motorcycles with or without side car.
35. Mowers, lawn, power.
36. Pile drivers.
37. Polishers, floor, powered.
38. Pontoon, assemblies.
39. Power shovels.
40. Railroad cars, freight.
41. Railroad cars, passenger.
42. Railroad cars, service.
43. Railroad locomotives.
44. Refrigeration equipment.
45. Refrigerators.
46. Road rollers, wheeled and sheepsfoot.
47. Saws, bench.
48. Scrapers, earth moving (self-powered).
49. Scrapers, earth moving, towed.
50. Sedans; station wagons, coupes; limousines.
51. Snow plows, motorized.
52. Spreaders, aggregate and lime.
53. Tractor, warehouse.
54. Tractors, wheeled or crawler, with or without special attachments, up to 65 h.p.
55. Tractors, wheeled or crawler, with or without special attachments, 65 h.p. and up.
56. Trailers, general purpose, multiple axle.
57. Trailers, general purpose, single axle.
58. Trailers, industrial.
59. Trailers, special purpose (including fire pumper and Bean type sprayer and crash trailer).
60. Trailers, tank mounted.
61. Trucks, electronic.
62. Trucks, fire.
63. Trucks, forklift.
64. Trucks, general purpose, cargo and construction, 12,500 GVW through 28,000 GVW (including truck tractors, dump, multiple drive, etc.).
65. Trucks, general purpose and utility up to 12,500 GVW (including suburbans, carryalls and sedan deliveries).
66. Trucks, straddle.
67. Trucks, tank (special purpose trailer of which the tank is an integral part of the construction).
68. Trucks, warehouse, platform, electric and gasoline powered.
69. Typewriters, manual and electric.

§ 101–43.4909 Specimen description of reported excess EDP equipment.

## PART 101–44—DONATION OF PERSONAL PROPERTY

Sec.
101–44.000 Scope of part.

Subpart 101–44.1—General Provisions

101–44.101 Needs of Federal agencies paramount.
101–44.102 Care and handling pending disposal.
101–44.103 Assistance in major disaster relief.

Subpart 101–44.2—Definition of Terms

101–44.201 Definitions.
101–44.201–1 Agricultural commodity.
101–44.201–2 Distilled spirits.
101–44.201–3 Donable property.
101–44.201–4 Donee.
101–44.201–5 Educational institution.
101–44.201–6 Eleemosynary institution.
101–44.201–7 Forfeited.
101–44.201–8 Holding agency.
101–44.201–9 Local government.
101–44.201–10 Malt beverage.
101–44.201–11 Motor vehicle.
101–44.201–12 Narcotics.
101–44.201–13 No commercial value.
101–44.201–14 Public body.
101–44.201–15 Public health institution.
101–44.201–16 Service educational activity.
101–44.201–17 State agency for surplus property.
101–44.201–18 Surplus personal property.
101–44.201–19 Wine.

Subpart 101–44.3—Donation for Educational, Public Health, and Civil Defense, Including Research or Public Airport Purposes

101–44.300 Scope.
101–44.301 Authority and responsibility.
101–44.302 Agency responsibility.
101–44.303 Costs incurred incident to donation.
101–44.304 Donation screening period.
101–44.305 Cooperation of holding agencies.
101–44.306 Application for donation.
101–44.307 Preparation and processing of applications.
101–44.308 Approval of applications.
101–44.309 Disapproval of applications.
101–44.310 Rejection of property approved for donation.
101–44.311 Pickup or shipment.
101–44.312 Overages.
101–44.313 Agency compliance.
101–44.314 Screening by the Secretary of Health, Education, and Welfare.
101–44.315 Printing and binding equipment.
101–44.316 Use of surplus property for State agencies for surplus property.
101–44.317 Donations to service educational activities.
101–44.317–1 Screening by Secretary of Defense.
101–44.317–2 Donations by Secretary of Defense.

Subpart 101–44.4—Donations to the American National Red Cross

101–44.400 General.
101–44.401 Donation approval.
101–44.402 Cooperation of holding agencies.
101–44.403 Action by the Red Cross.
101–44.404 Transfer by holding agency.
101–44.405 Donable property determined unusable by the Red Cross.

Subpart 101–44.5—Donation of Property to Public Bodies

101–44.500 Scope.
101–44.501 Findings justifying donation to public bodies.
101–44.501–1 General.
101–44.501–2 Reviewing authority.
101–44.502 Donations to public bodies.
101–44.502–1 Authority to donate.
101–44.502–2 Disposal costs.

Subpart 101–44.6—Donation of Abandoned and Forfeited Personal Property

101–44.600 Scope.
101–44.601 Donation of forfeited distilled spirits, wine, and malt beverages.
101–44.601–1 General.
101–44.601–2 Establishment of eligibility.
101–44.601–3 Requests by institutions.
101–44.601–4 Filling requests.
101–44.601–5 Donation of lots not required to be reported.
101–44.601–6 Packing and shipping costs.

Subpart 101–44.7—Donation of Surplus Narcotics

101–44.701 State agencies.

Subpart 101–44.8—Reports

101–44.801 Performance report of donations.

Subpart 101–44.9—101–44.48 [Reserved]

Subpart 101–44.49—Illustrations

101–44.4901 Standard Form 123, Application for Donation of Surplus Personal Property.
101–44.4902 Standard Form 123A, Application for Donation of Surplus Personal Property—Continuation Sheet.
101–44.4903 Standard Form 123, Instructions for Preparation and Processing.
101–44.4904 GSA Form 18, Statement on Behalf of Eleemosynary Institutions.

AUTHORITY: The provisions of this Part 101–44 issued under sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).

§ 101–44.000 Scope of part.

This part prescribes policies and methods governing the donation of surplus personal property located within the United States, the Commonwealth of Puerto Rico, and the Virgin Islands.

## Subpart 101–44.1—General Provisions

**§ 101–44.101 Needs of Federal agencies paramount.**

Any need for personal property expressed by any Federal agency (including the Senate, the House of Representatives, the Architect of the Capitol and any activities under his direction, the District of Columbia, and mixed-ownership corporations as defined in the Government Corporation Control Act) shall be paramount to any disposal, if such need is made known to the holding agency prior to shipment or delivery in the case of donation.

**§ 101–44.102 Care and handling pending disposal.**

Pending disposal, each holding agency shall be responsible for performing, and bear the cost of, care and handling of its property.

**§ 101–44.103 Assistance in major disaster relief.**

Surplus equipment and supplies shall be donated to State governments to provide assistance in alleviating suffering and damage resulting from major disasters, in accordance with the directions of the Office of Emergency Planning, Executive Office of the President, pursuant to the Act of September 30, 1950 (Pub. Law 875, 81st Cong.; 42 U.S.C. 1855 et seq.); Executive Order No. 10427 of January 16, 1953 (3 CFR), as amended; Executive Order No. 10737 of October 29, 1957 (3 CFR), as amended; and section 405 of Executive Order No. 11051 of September 27, 1962 (3 CFR).

## Subpart 101–44.2—Definition of Terms

**§ 101–44.201 Definitions.**

As used throughout this Part 101–44, the terms which follow have the meanings set forth in this § 101–44.201.

**§ 101–44.201–1 Agricultural commodity.**

A product resulting from the cultivation of the soil or husbandry on farms and in the form customarily marketed by farmers.

**§ 101–44.201–2 Distilled spirits.**

Ethyl alcohol, hydrated oxide of ethyl, spirits of wine, whiskey, rum, brandy, gin, and other distilled spirits, including all dilutions and mixtures thereof.

**§ 101—44.201–3 Donable property.**

Surplus equipment, materials, books, or other supplies under the control of any executive agency (including surplus property in working capital funds established pursuant to 10 U.S.C. 2208, or in similar management-type funds) except:

(a) Such property as may be specified from time to time by the Administrator of General Services.

(b) Surplus agricultural commodities, food, and cotton or woolen goods determined from time to time by the Secretary of Agriculture to be commodities requiring special handling in order to assist him in carrying out his responsibilities with respect to price support or stabilization.

(c) Property in trust funds.

**§ 101–44.201–4 Donee.**

A service educational activity; a State, political subdivision, municipality, or tax-supported institution acting on behalf of a public airport; an eligible educational, public health, or civil defense institution or organization, acting by and through a State agency for surplus property; the American National Red Cross; a public body; or an eleemosynary institution.

**§ 101–44.201–5 Educational institution.**

Any tax-supported school system, school, college, university, school for the mentally retarded, school for the physically handicapped, and radio or television station licensed by the Federal Communications Commission as an educational radio or educational television station, and any nonprofit school, college, university, school for the mentally retarded, school for the physically handicapped, and radio or television station licensed by the Federal Communications Commission as an educational radio or educational television station which are exempt from taxation under section 501(c)(3) of the Internal Revenue Code of 1954, and any public library which serves free all residents of a community, district, State, or region, and receives its financial support in whole or in part from public funds.

**§ 101–44.201–6 Eleemosynary institution.**

Any nonprofit institution organized and operated for charitable purposes, whose net income does not inure in whole or in part to the benefit of shareholders or individuals, which shall have filed with the Regional Administrator, GSA Region 3, a satisfactory statement establishing such status.

**§ 101–44.201–7 Forfeited.**

Forfeitures, whether by summary process or by order of a court of competent jurisdiction pursuant to any law of the United States.

**§ 101–44.201–8 Holding agency.**

The executive agency which has accountability for the property involved.

**§ 101–44.201–9 Local government.**

A government, or administration of a locality, within a State or possession of the United States.

**§ 101–44.201–10 Malt beverage.**

A beverage made by the alcoholic fermentation of an infusion or decoction, or combination of both, in potable brewing water, of malted barley with hops, or their parts, or their products, and with or without other malted cereals, and with or without addition of unmalted or prepared cereals, other carbohydrates or products prepared therefrom, and with or without the addition of carbon dioxide, and with or without other wholesome products suitable for human food consumption.

**§ 101–44.201–11 Motor vehicle.**

Any vehicle, self-propelled or drawn by mechanical power, designed to be principally operated on the highways in the transportation of property or passengers.

**§ 101–44.201–12 Narcotics.**

The following drugs or preparations thereof:

(a) Opium, coca leaves, cocaine, or any salt, derivative, or preparation of opium, coca leaves, or cocaine;

(b) Isonipecaine (demarol);

(c) Any drug found by the Secretary of the Treasury and proclaimed by the President to have addiction-forming or addiction-sustaining liability similar to morphine or cocaine, such as methadon (delephine, adanon) and nisentil; and

(d) Marihuana (Cannabis Sativa L.).

**§ 101–44.201–13 No commercial value.**

Personal property which is not usable and cannot economically be rehabilitated by anyone for use for the purposes for which it was originally intended, and can reasonably be expected to have no market value for use as an entity for any other purpose.

**§ 101–44.201–14 Public body.**

Any State, Territory, or possession of the United States, any political subdivision thereof, the District of Columbia, any agency or instrumentality of any of the foregoing, or any agency of the Federal Government.

**§ 101–44.201–15 Public health institution.**

Any tax-supported medical institution, hospital, clinic, and health center, any other nonprofit medical institution, hospital, clinic, and health center which has been held exempt from taxation under section 501(c)(3) of the Internal Revenue Code of 1954, and any State department of health or other State agency designated by State law to receive property for and distribute it to such tax-supported and nonprofit medical institutions, hospitals, clinics, and health centers within the State.

**§ 101–44.201–16 Service educational activity.**

Any educational activity designated by the Secretary of Defense as being of special interest to the armed services, such as maritime academies or military, naval, Air Force, or Coast Guard preparatory schools.

**§ 101–44.201–17 State agency for surplus property.**

The agency designated by State law to receive surplus personal property for distribution to eligible educational, public health, and civil defense institutions or organizations.

**§ 101–44.201–18 Surplus personal property**

Any excess personal property not required for the needs and the discharge of the responsibilities of all Federal agencies, as determined by the Administrator of General Services.

**§ 101–44.201–19 Wine.**

(a) Wine as defined in sections 5381 and 5385 of the Internal Revenue Code of 1954 (26 U.S.C. 5381, 5385) as now in force or hereafter amended, and

(b) Other alcoholic beverages not so defined, but made in the manner of wine, including sparkling and carbonated wine, wine made from condensed grape must, wine made from other agricultural products than the juice of sound, ripe grapes, imitation wine, compounds sold as wine, vermouth, cider, perry, and sake; in each instance only if containing not less than 7 per centum and not more than 24 per centum of alcohol by volume, and if for nonindustrial use.

## Subpart 101–44.3—Donation for Educational, Public Health, and Civil Defense, Including Research or Public Airport Purposes

**§ 101–44.300 Scope.**

This subpart prescribes the authorities, responsibilities, policies, and methods governing the donation of surplus personal property to educational activities which are of special interest to the armed services; for use in any State for purposes of education, public health, or civil defense, or for research for any such purpose; and, to any State, political subdivision, municipality, or tax-supported institution for use in the development, improvement, operation, or maintenance of a public airport.

**§ 101–44.301 Authority and responsibility.**

(a) The Administrator of General Services is authorized to make donations in his discretion for purposes of education, public health, or civil defense, or for research for any such purpose; and for public airport purposes. In exercising his discretion, the Administrator of General Services may elect not to approve donations whenever he believes such action to be in the public interest.

(b) The Administrator of General Services is basically responsible for the care and handling of surplus property in the custody of State agencies for surplus property pending its disposition. The Department of Health, Education, and Welfare, however, will supervise the care and handling of such property while it is in the custody of a State agency for surplus property, pending its disposition to eligible donees. In order to insure that the basic responsibility of the Administrator of General Services in this regard is affirmatively carried out, regional GSA officials will periodically visit State warehouses. Such visits will be coordinated with regional representatives of the Department of Health, Education, and Welfare.

(c) Pursuant to the provisions of section 203(k)(2) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 484), the Administrator of General Services will be provided an opportunity to disapprove, within thirty days after notice, any of the following actions proposed to be taken by the Secretary of Health, Education, and Welfare with respect to personal property donated for educational or public health purposes, or the Secretary of Defense with respect to personal property donated for civil defense purposes, which had a unit acquisition cost of $2,500 or more, and on which the terms, conditions, reservations, or restrictions, as stipulated in the transfer instrument by which the property was acquired, have not expired;

(1) Enforcement of compliance with the terms and conditions under which property was transferred for donation;

(2) The correction or amendment of instruments by which transfers were made; and

(3) The granting of releases from terms and conditions contained in such instruments and the release of any interest reserved to the United States by such instruments.

**§ 101–44.302 Agency responsibility.**

(a) *Department of Defense.* (1) In the case of surplus property under the control of the Department of Defense, the Secretary of Defense is responsible for determining whether such property is usable and necessary for service educational activities. He also determines whether surplus property of all executive agencies is usable and necessary for civil defense purposes, including research.

(2) The Secretary is responsible for allocating surplus property on the basis of need and utilization for transfer by the Administrator of General Services to service educational activities.

(3) The Secretary may impose reasonable terms, conditions, reservations, and restrictions upon the use of any single item of surplus property donated for civil defense purposes which had an acquisition cost of $2,500 or more. The Secretary also is responsible, with regard to surplus property transferred for civil defense purposes, for enforcement of compliance with the terms and conditions of transfer; the correction or amendment of the transfer instrument; and the granting of releases from any terms and conditions, and the release of any interest reserved to the Government, contained in the transfer instrument.

(b) *Department of Health, Education, and Welfare.* (1) The Secretary of

Health, Education, and Welfare determines whether surplus property is usable and necessary for purposes of education or public health, or for research for any such purpose.

(2) The Secretary is responsible for allocating surplus property on the basis of need and utilization for transfer by the Administrator of General Services to State agencies for surplus property for distribution to eligible educational and public health institutions and by delegation from the Secretary of the Army to civil defense organizations. He will determine that State agencies for surplus property conform to minimum standards of operation which he has prescribed.

(3) The Secretary may impose reasonable terms, conditions, reservations, and restrictions upon the use of any single item of surplus property donated for educational and public health purposes which had an acquisition cost of $2,500 or more. The Secretary also is responsible, in regard to surplus property transferred for educational and public health purposes, for enforcement of compliance with the terms and conditions of transfer; the correction or amendment of the transfer instrument; and the granting of releases from any terms and conditions, and the release of any interest reserved to the Government, contained in the transfer instrument.

(c) *Federal Aviation Agency.* (1) The Administrator of the Federal Aviation Agency determines whether surplus property is essential, suitable, or desirable for the development, improvement, operation, or maintenance of a public airport, or reasonably necessary to fulfill the immediate and foreseeable future requirements for development, improvement, operation, or maintenance of a public airport.

(2) The Administrator of the Federal Aviation Agency also is responsible for determining and enforcing compliance with the terms and conditions under which surplus property is transferred. The agency is also authorized to remove or permit the removal of certain restrictions against the use of such property which prevent or hamper the accomplishment of the purpose contemplated by the transfer.

**§ 101–44.303 Costs incurred incident to donation.**

Direct costs incident to donation shall be borne by the donee. Overhead or administrative costs or charges shall not be included. Only direct costs incurred in the actual packing, preparation for shipment, and loading may be recovered by the holding agency. Where such costs are incurred they shall be reimbursed by the donee upon appropriate billing, unless the holding agency waives the amount involved as being uneconomical or impractical to collect. For example, collections of amounts of less than $100 for any single shipment would appear uneconomical. Payment of all transportation costs shall be borne by the donee.

**§ 101–44.304 Donation screening period.**

A period of 15 calendar days following the automatic release date shall be provided in which to set aside surplus property determined to be usable and necessary for donation purposes. Reportable surplus property will be set aside for donation when an application for donation is submitted for approval within the donation screening period to a GSA regional office, with an informational copy to the holding agency. Nonreportable surplus property will be set aside for donation upon notification to a holding agency, within the donation screening period, by a responsible Federal official or by an authorized donee representative, that the property is usable and necessary for donation purposes. Surplus property will be available for donation on a first-come, first-served basis. However, during the prescribed 15-day screening period service educational activities shall be accorded a priority of issue during the first 5 days for reportable property of the Department of Defense.

**§ 101–44.305 Cooperation of holding agencies.**

Holding agencies shall cooperate with all agencies authorized to participate in the donation program, and their duly accredited representatives, in locating and inspecting donable property. Upon reasonable request, holding agencies shall make available to these agencies or their representatives complete information regarding the quantity, description, condition, and location of donable property in their inventories. Holding agencies, however, need not prepare or mail reports or listings not otherwise required by their procedures.

**§ 101–44.306 Application for donation.**

All donations of surplus personal property for educational, public health, civil defense, service educational activities, and public airports shall be accomplished by use of Standard Form 123, Application for Donation of Surplus Personal Property (illustrated at sec. 101–44.4901), and Standard Form 123A, Application for Donation of Surplus Personal Property—Continuation Sheet (illustrated at § 101–44.4902). The original and three copies of SF 123 will be forwarded to the appropriate GSA regional office for approval, with an informational copy to the holding agency. (Use of Standard Forms 123 and 123A will become effective March 1, 1965. Until then, the present donation forms, and related procedures, shall be used.)

**§ 101–44.307 Preparation and processing of applications.**

Applications for donation shall be prepared and processed in accordance with the instructions illustrated at § 101–44.4903.

**§ 101–44.308 Approval of applications.**

No surplus property will be released by a holding agency for donation until it has received SF 123 bearing the signed approval of the appropriate GSA regional office. In approving donation applications, full effect will be given to the 5-day priority afforded service educational activities for reportable property of the Department of Defense; otherwise, all donation applications received in proper form will be approved on a first-come, first-served basis. Donation applications which are not fully or properly prepared may be returned to the applicant or held in suspense until required information is made available. Upon request of GSA regional offices, donees will submit any additional information required to support and justify a donation application. Donation applications will not be held to the end of the screening period, but will be approved and distributed as expeditiously as possible. Requests for donation received after the end of the donation screening period may be approved if the property is still available and the holding activity has agreed to set the property aside pending receipt of donation approval.

**§ 101–44.309 Disapproval of applications.**

Donation applications will be disapproved, in whole or in part, when it is determined that it is in the public interest to do so, when there is a substantive defect in the application, or when a transfer of the property to a Federal agency is pending. The donee and the holding activity will be advised, in writing, why the application was disapproved. If a donation transfer is disapproved because of a pending Federal transfer and the transfer is not completed subsequently, the donee will be advised to resubmit an application.

**§ 101–44.310 Rejection of property approved for donation.**

If a donee determines prior to pickup or shipment, that property approved for donation cannot be utilized, it will so notify, through appropriate channels, the GSA regional office which approved the donation, and the property will be released by GSA for other disposal. The GSA regional office may advise any other donee agency known to be interested in the property of its possible availability, and may approve a donation request provided the holding agency agrees to retain the property pending such approval.

**§ 101–44.311 Pickup or shipment.**

(a) Surplus property set aside for donation will be retained by the holding agency for a period not to exceed 40 calendar days from the automatic release date, pending receipt of the approved application and firm instructions for pickup or shipment of the property. At the end of this period, the holding agency may proceed with the disposal of the property if the approved application and pickup or shipping instructions have not been received.

(b) Upon receipt of the approved application and instructions for pickup or shipment, the holding agency will promptly notify the donee or his designated agent of the availability of the property. The donee or his agent will remove the property within 15 calendar days from the date of notification of availability by the holding agency.

(c) The donee is responsible for removing the property or for making arrangements with common carriers for its shipment. Property Disposal Officers or other representatives of holding agencies will not act as agent or shipper for donees in this regard.

**§ 101–44.312 Overages.**

(a) Upon receipt, if it is found that surplus property was received which was not listed on an approved SF 123, the donee will prepare and submit, through appropriate channels, to the GSA office for the region in which the holding agency is located, an overage report covering all such property. However, if the estimated acquisition cost of a line item of such property is over $500, it shall be listed on SF 123, and sent through appropriate channels to the GSA regional office for donation approval.

(b) The overage report shall be signed by the responsible representative of the donee and shall provide the following information:

(1) Name and address of the holding agency.

(2) All pertinent control numbers including the holding agency report turn-in document number, the GSA control number if property was reported to GSA, and any donee application or allocation numbers.

(3) A description of each line item of property, the condition code, the quantity and unit of issue, and the estimated unit and total acquisition cost.

**§ 101–44.313 Agency compliance.**

(a) *General.* The Department of Defense, the Department of Health, Education, and Welfare, and the Federal Aviation Agency are responsible for developing and maintaining an effective system for the prevention or detection of situations involving the nonuse, improper use, or the unauthorized disposal or destruction of surplus property donated for educational, public health, civil defense, or public airport purposes. This responsibility will include surveillance for any abuses of donated property; corrective action where such cases are discovered; and the furnishing of compliance reports, as may be required, to GSA.

(b) *Instructions.* The Department of Defense, the Department of Health, Education, and Welfare, and the Federal Aviation Agency will provide GSA with copies of internal instructions which outline the scope of their respective surveillance program, the policies and methods for the enforcement of their compliance responsibilities, and the correction of abuses in the use or disposal of donated property. Copies of instructions to eligible donees concerning the proper use of donated property will also be furnished, and any changes made to these internal or external issuances and explanations thereof, will also be provided GSA.

(c) *Reports.* (1) In order for GSA to accumulate information as a basis for the exercise of his discretionary authority to approve the donation of surplus property, the Department of Defense, the Department of Health, Education, and Welfare, and the Federal Aviation Agency will make such reports on compliance actions as may be required by the Administrator of General Services.

(2) The Department of Health, Education, and Welfare will report to GSA on actions involving nonconformance by a State agency for surplus property with the minimum standards of operation prescribed by the Department.

**§ 101–44.314 Screening by the Secretary of Health, Education, and Welfare.**

In order to locate donable property, the Secretary of Health, Education, and Welfare, and duly accredited representatives of the States, shall be permitted to screen, at appropriate times, in GSA regional offices, reports of excess property submitted by holding agencies under Part 101–43, and holding agencies' excess personal property (and lists and records thereof, when available) not required to be reported to GSA under Part 101–43.

**§ 101–44.315 Printing and binding equipment.**

The Joint Committee on Printing of the Congress has authorized the release of surplus Federal Government printing and binding equipment for donations to health and educational activities as authorized by section 203, Federal Property and Administrative Services Act of 1949 (40 U.S.C. 484). Such donations shall be processed in the same manner as are donations of other surplus personal property.

**§ 101–44.316 Use of surplus property by State agencies for surplus property.**

(a) *General.* Public Law 87–94 amends section 203(n) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 484), so as to authorize the use of surplus property by State distribution agencies. The Secretary of Health, Education, and Welfare and State agencies may enter into cooperative agreements whereby surplus property, which GSA may approve for donation for use in the State for purposes of education, public health, or civil defense, or for research for any such purpose, may be made available to the State agency for use in performing its functions in connection with such program.

(b) *Determination.* The Secretary of Health, Education, and Welfare may determine that use of any surplus property approved for donation by GSA is necessary to, or would facilitate, the State agency's performance of its functions under such program. The Secretary of Health, Education, and Welfare may also determine that it is necessary to, or would facilitate, the effective use of such surplus property for title thereto to be vested in the State agency.

(c) *Approval.* The approval of GSA is required prior to use by any State agency for such purposes of surplus property which GSA has approved for donation, and is also required for vesting in the State agency of title to any motor vehicle or other surplus property the use of which by a State agency is approved by GSA. Items of the types determined by DHEW as necessary for furtherance of the donation program, which were included on approved Standard Forms 123, may be used by State agencies for administrative purposes under cooperative agreements, subject to GSA approval.

(d) *Transfer of title to motor vehicle.* Whenever a motor vehicle is approved for administrative use by a State agency, title to such vehicle shall be transferred from the United States Government to the State agency concerned and the State agency shall cause such vehicle to be registered with appropriate State authority as a State-owned vehicle, before placing the vehicle in such use. Transfer of title to the State agency shall be effected in accordance with the provisions of § 101–38.701. When title is vested in the State agency, the equipment will not be tagged or otherwise marked to identify it as Federal property.

(e) *Use, maintenance, and disposition.* The use, maintenance, and disposition of surplus property which GSA has approved for use by the State agency shall be as prescribed by the Secretary of Health, Education, and Welfare.

(f) *Limitations.* Under no circumstances may any property which GSA approves for use by the State agency pursuant to the provisions of this section be loaned to, used by, or otherwise made available for use by any person, organization, or instrumentality other than the State agency, or used by it for purposes other than the promotion of the efficiency or effectiveness of the State agency's performance of its functions in connection with the program for the donation of surplus property.

(g) *Reimbursement for lost, damaged, or destroyed property.* The State agency shall reimburse the Department of Health, Education, and Welfare for all surplus property lost, damaged, or destroyed as the result of negligence of the State, its officials, or employees. In the event of loss, damage, or destruction by others, the State agency shall initiate and conclude necessary actions to recover damages therefor.

**§ 101–44.317 Donations to service educational activities.**

**§ 101–44.317–1 Screening by Secretary of Defense.**

(a) In reporting excess property of the Department of Defense to GSA, the Secretary of Defense shall designate, by appropriate notation on each report, any items of donable property which he determines, subject to utilization by Federal agencies in accordance with § 101–44.101, to be usable and necessary for service educational activities. Donable property not so designated shall be deemed to have been determined by the Secretary of Defense not to be usable and necessary for service educational activities, and, subject to utilization by Fed-

eral agencies, shall be available for screening by the Secretary of Health, Education, and Welfare in accordance with this Part 101–44.

(b) With respect to excess property of the Department of Defense not required to be reported to GSA, the Secretary of Defense shall determine the items of donable property that are usable and necessary for service educational activities, subject to utilization by Federal agencies, prior to determination as surplus.

**§ 101–44.317–2 Donations by Secretary of Defense.**

Donable property which has been designated and determined by the Secretary of Defense to be usable and necessary for service educational activities shall, unless otherwise directed by the Administrator of General Services, be available for allocation by the Secretary of Defense when determined surplus in accordance with Part 101–43 and may thereafter be donated to eligible applicants.

## Subpart 101–44.4—Donations to the American National Red Cross

**§ 101–44.400 General.**

Pursuant to sec. 203(1) of the Property Act (40 U.S.C. 484), personal property which has been determined to be surplus property and which has been identified as having been processed, produced, or donated by the American National Red Cross shall, unless otherwise directed by the Administrator of General Services, be made available for donation to the Red Cross for charitable purposes.

**§ 101–44.401 Donation approval.**

The donation of surplus property for which the Red Cross is the eligible donee shall not require further GSA approval, unless such property has an estimated value in excess of $500 or, in the case of blood plasma, consists of a quantity in excess of 1,000 units. In those instances where the property to be donated exceeds the amounts stated, the Regional Administrator, GSA, of the regional office for the area in which the property is located, may approve the formal request submitted by the Red Cross.

**§ 101–44.402 Cooperation of holding agencies.**

Holding agencies shall cooperate with the Red Cross by informing the National Headquarters, 17th and D Streets NW., Washington, D.C., 20006, Attention: General Supply Office, of any surplus property in their custody which meets the criteria in § 101–44.400. By memorandum, letter, or other means of communication, the holding agencies shall provide information, regarding suggested shipping facilities, quantity, description, condition, and location of such property in their inventories.

**§ 101–44.403 Action by the Red Cross.**

(a) Upon receipt of information from the holding agency regarding the availability of such surplus property, the Red Cross may inspect the property or request it pursuant to § 101–44.400 without inspection.

(b) The formal request and shipping instructions in duplicate shall be prepared and transmitted by the Red Cross to the holding agency activity having custody of the property, within 20 calendar days from the date of notification of information provided for in § 101–44.402. Such request and shipping instructions shall include a list of all such surplus property to be transferred and include reference to the date when information on which the request is based was received by the Red Cross. One copy of such request and shipping instructions shall be forwarded to the GSA regional office for the area in which the property is located.

(c) Where the property to be donated exceeds the quantities stated in § 101–44.401, the Red Cross shall send three copies of the formal request and shipping instructions to the designated GSA regional office for approval. Upon such approval, the GSA regional office will mail two approved copies directly to the responsible activity of the holding agency.

**§ 101–44.404 Transfer by holding agency.**

The holding agency shall transfer directly to the Red Cross, upon receipt of request and shipping instructions provided for in § 101–44.403, all items of such surplus property so requested. One copy of such request and shipping instructions shall be enclosed with the shipment or attached to shipping documents. The shipments shall be made f.o.b. installation; transportation charges collect.

**§ 101–44.405 Donable property determined unusable by the Red Cross.**

Property eligible for donation to the Red Cross which, because of deterioration or for other reasons, the Red Cross declines, in writing, to request as a donation, or as to which no action is taken by the Red Cross within the 20-day period prescribed in §101–44.403, shall be disposed of as other surplus. When such Red Cross property is offered for disposal, the disposal document shall provide for a certification to the effect that all Red Cross labels or other Red Cross identifications will be obliterated or removed from such property before use by the recipient or transfer by him to other users.

## Subpart 101–44.5—Donation of Property to Public Bodies

**§ 101–44.500 Scope.**

This subpart prescribes the policies and methods governing the disposition by executive agencies of personal property by donation to public bodies of personal property which has no commercial value or of which the estimated cost of continued care and handling would exceed the estimated proceeds from its sale. It does not apply to:

(a) Surplus property donated for educational, public health, civil defense, or public airport purposes; or

(b) Narcotics and reserved materials.

**§ 101–44.501 Findings justifying donation to public bodies.**

**§ 101–44.501–1 General.**

(a) No property shall be donated to public bodies by an executive agency unless it shall have been affirmatively found, in writing, by a duly authorized official of such agency either that:

(1) Such property has no commercial value, or

(2) The estimated cost of its continued care and handling would exceed the estimated proceeds from its sale.

(b) Such findings shall not be made by any official directly accountable for the property covered thereby.

**§ 101–44.501–2 Reviewing authority.**

Whenever a line item of the property to be disposed of under this Subpart 101–44.5 by an executive agency at any one location at any one time had an original cost (estimated if not known) of more than $1,000, findings made under § 101–44.501–1, shall be approved by a reviewing authority before any such disposal.

**§ 101–44.502 Donations to public bodies.**

**§ 101–44.502–1 Authority to donate.**

Any executive agency may donate to public bodies property as to which findings have been made pursuant to § 101–44.501–1.

**§ 101–44.502–2 Disposal costs.**

Any public body receiving property from an executive agency pursuant to this subpart shall pay the disposal costs incident to the donation, such as packing, preparation for shipment, demilitarization, loading, and transportation to the donee.

## Subpart 101–44.6—Donation of Abandoned and Forfeited Personal Property

**§ 101–44.600 Scope.**

This subpart prescribes the policies and methods governing the donation by Federal agencies of abandoned and forfeited property in their custody or control in the United States, Puerto Rico, and the Virgin Islands.

**§ 101–44.601 Donation of forfeited distilled spirits, wine, and malt beverages.**

**§ 101–44.601–1 General.**

Forfeited distilled spirits, wine, and malt beverages for which there is no Federal utilization shall be made available to appropriate eleemosynary institutions prior to other disposition.

**§ 101–44.601–2 Establishment of eligibility.**

Eleemosynary institutions desiring to obtain available distilled spirits shall submit to the Personal Property Division, Region 3, Utilization and Disposal Service, Washington, D.C., 20407, General Services Administration, GSA Form 18, Statement on Behalf of Eleemosynary Institutions (illustrated at § 101–44.4903).

**§ 101–44.601–3 Requests by institutions.**

Lists showing quantities, kinds, and location of available distilled spirits, wine, and malt beverages will be forwarded by GSA from time to time to institutions which qualify by submission of GSA Form 18. Eligible institutions desiring to obtain such liquors shall submit to GSA, at the address shown in § 101–44.601–2, requests therefor, specifying the kind and quantity desired and the place of delivery.

**§ 101–44.601–4 Filling requests.**

The Regional Administrator GSA, shall authorize the seizing agency to fill such requests as he may determine proper to assure equitable distribution among requesting institutions.

**§ 101–44.601–5 Donation of lots not required to be reported.**

Forfeited distilled spirits, wine, and malt beverages not required to be reported under § 101–43.322 may be donated to eleemosynary institutions known to be eligible therefor if determined by the seizing agency to be suitable for human consumption. The holding agency shall promptly report donations by letter to the General Services Administration Region 3, Utilization and Disposal Service, Personal Property Division, Washington, D.C., 20407, and such report shall state the quantity and type so donated, the name and address of the donee institution, and the date of the donation.

**§ 101–44.601–6 Packing and shipping costs.**

The receiving institution shall pay all costs of packing, shipping, and transportation.

### Subpart 101–44.7—Donation of Surplus Narcotics

**§ 101–44.701 State agencies.**

Surplus narcotic drugs shall not be donated except to State agencies for use for civil defense purposes. Donations to State agencies shall be made pursuant to the provisions of Subpart 101–44.3. However, the determinations of usability and need required thereby shall, in every case, be accompanied by:

(a) A detailed listing of the State agencies to which transfer is requested and the type and quantity of each narcotic drug proposed to be transferred to each State agency.

(b) A certificate signed by an authorized State agency official of each State to which transfer is requested. Such certificate shall state that the State agency:

(1) Has available at locations, which must be identified in the certificate, adequate facilities for the storage and handling of the narcotic drugs requested, and

(2) Will use such facilities for the protection thereof, including protection against theft and pilferage.

(c) A statement, signed by the appropriate Narcotics District Supervisor for the area where the narcotics drugs are to be stored and handled, to the effect that the storage facilities proposed by the State to be used for the storage and handling of the narcotic drugs are adequate.

### Subpart 101–44.8—Reports

**§ 101–44.801 Performance report of donations.**

A quarterly performance report of the donation of surplus personal property shall be submitted to GSA on Standard Form 121, Quarterly Report of Utilization and Disposal of Excess and Surplus Personal Property, pursuant to § 101–43.4907.

### Subparts 101–44.9—101–44.48 [Reserved]

### Subpart 101–44.49—Illustrations

NOTE: The forms in §§ 101–44.4901, 101–44.4902, 101–44.4903, and 101–44.4904 filed as part of the original document. Copies may be obtained from Central Office, GSA.

**§ 101–44.4901 Standard Form 123, Application for Donation of Surplus Personal Property.**

**§ 101–44.4902 Standard Form 123A, Application for Donation of Surplus Personal Property—Continuation Sheet.**

**§ 101–44.4903 Instructions for preparation and processing, Standard Form 123.**

**§ 101–44.4904 GSA Form 18, Statement on Behalf of Eleemosynary Institutions.**

No. 233—Pt. II——9

## PART 101–45—SALE, ABANDONMENT, OR DESTRUCTION OF PERSONAL PROPERTY

Sec.
101–45.000 Scope of part.

Subpart 101–45.1—General

101–45.101 Applicability.
101–45.102 Needs of Federal agencies paramount.
101–45.103 Responsibility of holding agency.
101–45.104 Care and handling pending disposal.
101–45.105 Exclusions.
101–45.105–1 Materials required for the national stockpile and for Government use or resale under the Defense Production Act.
101–45.105–2 Disposal of certain vessels.
101–45.106 Property controlled by other law.
101–45.107 Holding agency compliance function.
101–45.107–1 Referral to other Government agencies.
101–45.107–2 Compliance reports.

Subpart 101–45.2—Definition of Terms

101–45.200 Scope of subpart.
101–45.201 Agricultural commodity.
101–45.202 Auction.
101–45.203 Auctioneer.
101–45.204 Combat materiel.
101–45.205 Contractor inventory.
101–45.206 Cotton or woolen goods.
101–45.207 Debarment.
101–45.208 Distilled spirits.
101–45.209 Executive agency.
101–45.210 Federal agency.
101–45.211 Firearms.
101–45.212 Forfeitures.
101–45.213 Holding agency.
101–45.214 Identical bids.
101–45.215 Inactivation.
101–45.216 Intangible personal property.
101–45.217 Local government.
101–45.218 Malt beverages.
101–45.219 Narcotics.
101–45.220 No commercial value.
101–45.221 Personal property.
101–45.222 Public body.
101–45.223 Reinstatement.
101–45.224 Related personal property.
101–45.225 Reviewing authority.
101–45.226 Salvage.
101–45.227 Scrap.
101–45.228 Small business concern.
101–45.229 Surplus personal property.
101–45.230 Wine.

Subpart 101–45.3—Sale of Personal Property

101–45.300 Scope of subpart.
101–45.301 Sale to Government employees.
101–45.302 Sales methods and procedures.
101–45.302–1 Competitive bid sales.
101–45.302–2 Negotiated sales and negotiated sales at fixed prices.
101–45.302–3 Lotting.
101–45.302–4 Inspection by bidders.
101–45.302–5 Reviewing authority.
101–45.302–6 Advertising.
101–45.302–7 Forms prescribed.
101–45.302–8 Credit.
101–45.302–9 Deposits.
101–45.302–10 Deposit bonds.
101–45.302–11 State and local governments.
101–45.303 Exchange or sale of personal property for replacement purposes.
101–45.303–1 Solicitation of bids.
101–45.303–2 Terms and conditions of sale.
101–45.303–3 Availability of proceeds of sale.
101–45.304 Contractor inventory.
101–45.304–1 Retention or disposal by contractors or subcontractors.
101–45.304–2 Limitations.
101–45.304–3 Disposal by executive agencies.
101–45.305 Proceeds from sales.
101–45.305–1 Disposition of proceeds.
101–45.306 Performance reports.
101–45.307 Special classes of property.
101–45.307–1 Agricultural commodities.
101–45.307–2 Dangerous property.
101–45.307–3 Demilitarization and decontamination.
101–45.307–4 Firearms.
101–45.307–5 Garbage.
101–45.307–6 Narcotics.
101–45.307–7 Vehicles.
101–45.308 Antitrust laws.
101–45.309 Assistance in controlling unauthorized transport of property.
101–45.310 Auctioneers.
101–45.310–1 General.
101–45.310–2 Responsibilities.
101–45.310–3 List of Auctioneers Qualified to Sell Government-owned Personal Property.
101–45.310–4 Solicitation of bids for auctioneer services.
101–45.310–5 Inactivation of auctioneers.
101–45.310–6 Debarment of auctioneers.
101–45.310–7 Report on auctioneer services.
101–45.311 Procedures and forms concerning contingent or other fees for soliciting or securing contracts.
101–45.311–1 Purpose.
101–45.311–2 Objectives and methods.
101–45.311–3 Representation and covenant.
101–45.311–4 General principle and standards applicable to the covenant.
101–45.311–5 Standard Form 119

Sec.
101–45.311–6 Use of Standard Form 119.
101–45.311–7 Exceptions.
101–45.311–8 Enforcement.
101–45.311–9 Preservation of records.
101–45.312 Federal excise taxes.
101–45.313 Nondiscrimination clause in contracts.
101–45.314 Report on identical bids.
101–45.314–1 Governing order.
101–45.314–2 Reporting requirement and procedures.
101–45.314–3 Supplemental requests by Attorney General.
101–45.314–4 Antitrust law referrals.

Subpart 101–45.4—Disposal of Abandoned and Forfeited Property

101–45.400 Scope of subpart.
101–45.401 General.
101–45.402 Forfeited distilled spirits, wine, and malt beverages.
101–45.403 Forfeited firearms.
101–45.404 Forfeited property other than forfeited firearms subject to disposal under the Internal Revenue Code of 1954.
101–45.405 Disposition of proceeds.
101–45.405–1 Abandoned property.
101–45.405–2 Forfeited property.

Subpart 101–45.5—Abandonment or Destruction of Surplus Property

101–45.500 Scope of subpart.
101–45.501 Findings justifying abandonment or destruction.
101–45.501–1 General.
101–45.501–2 Reviewing authority.
101–45.502 Authority to abandon or destroy.
101–45.503 Notice of proposed abandonment or destruction.
101–45.504 Abandonment or destruction without notice.
101–45.505 Destruction of surplus narcotics.
101–45.506 Abandonment or destruction of expendable property.

Subpart 101–45.49—Illustrations

101–45.4900 Scope of subpart.
101–45.4901 Standard Form 114, Sale of Government Property.
101–45.4902 Standard Form 114A, Sale of Government Property, Bid and Award.
101–45.4903 Standard Form 114B, Sale of Government Property, Item Bid Page.
101–45.4904 Standard Form 114C, Sale of Government Property, General Sale Terms and Conditions.
101–45.4905 Standard Form 119, Contractors Statement of Contingent or other Fees.
101–45.4906 Standard Form 150, Deposit Bond — Individual Invitation, Sale of Government Personal Property.
101–45.4907 Standard Form 151, Deposit Bond, Annual, Sale of Government Personal Property.
101–45.4908 Standard Form 28, Affidavit of Individual Surety.
101–45.4909 Optional Form 20, Notice to Surety.
101–45.4910 Instructions for the preparation of advance sale notice to the Department of Commerce.
101–45.4911 Exchange/sale category list.
101–45.4912 Sample format—Irrevocable Letter of Credit.
101–45.4913 General instruction for preparation of irrevocable letter of credit.
101–45.4914 Sample format—Draft drawn against irrevocable letter of credit.
101–45.4915 Sample format—transmittal letter to accompany official letterhead.
101–45.4916 Rating code of qualified auctioneers.
101–45.4917 Standard Form 114, Sample assembly for Sale of Government Property.
101–45.4918 Sample assembly for sales of Government property.
101–45.4919 Outline for preparation of explanatory statement relative to negotiated sales.

AUTHORITY: The provisions of this Part 101–45 issued under sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c), §§ 101–45.400 to 101–45.405 also issued under sec. 307, 49 Stat. 880; 40 U.S.C. U.S.C. 304l.

## § 101–45.000 Scope of part.

This part prescribes policies and methods governing the disposal by executive agencies of Government-owned personal property located within the United States, the Commonwealth of Puerto Rico, and the Virgin Islands by sale, abandonment, or destruction.

## Subpart 101–45.1—General

### § 101–45.101 Applicability.

This Part 101–45 applies to all agencies in the executive, legislative, and judicial branches of the Government, except the Senate, the House of Representatives, and the Architect of the Capitol and any activities under his direction, to the extent provided in the Federal Property and Administrative Services Act of 1949 (hereinafter generally referred to in this Part 101–45 as "the Act").

### § 101–45.102 Needs of Federal agencies paramount.

Any need for personal property expressed by any Federal agency (including the Senate, the House of Representatives, and the Architect of the Capitol and any activities under his direction, the District of Columbia, and mixed-ownership corporations as defined in the Government Corporation Control Act) shall be paramount to any disposal, if such need is made known to the holding agency prior to passage of title in the case of sale.

### § 101–45.103 Responsibility of holding agency.

Each holding agency shall, except as otherwise provided by order of the Administrator of General Services, dispose of personal property by sale in accordance with this Part 101–45.

### § 101–45.104 Care and handling pending disposal.

Pending disposal, each holding agency shall be responsible for performing, and bear the cost of, care and handling of its property.

### § 101–45.105 Exclusions.

### § 101–45.105–1 Materials required for the national stockpile and for Government use or resale under the Defense Production Act.

This Part 101–45 does not apply to materials acquired for the national stockpile or to metals, minerals, and other materials acquired for Government use or resale under section 303(a) of the Defense Production Act of 1950, as amended (50 U.S.C. 2093). However, to the extent deemed appropriate the provisions of this Part 101–45 should be followed in the disposal of such materials.

### § 101–45.105–2 Disposal of certain vessels.

The Secretary of Commerce has jurisdiction over the disposal of vessels of 1,500 gross tons or more which the Secretary determines to be merchant vessels or capable of conversion to merchant use. Such vessels, therefore, are excluded from the provisions of this Part 101–45.

### § 101–45.106 Property controlled by other law.

No property shall be disposed of in violation of any other applicable law.

### § 101–45.107 Holding agency compliance function.

Subject to the provisions of § 101–45.107–1 requiring referral of criminal matters to the Department of Justice, each holding agency shall perform investigatory functions as are necessary to insure compliance with the provisions of the Federal Property Act and with the regulations, orders, directives, and policy statements of the Administrator of General Services. Nothing in this § 101–45.107 should be deemed to affect the jurisdiction of any agency over its own personnel or any existing arrangements with the Department of Justice concerning the handling and prosecution of criminal matters.

### § 101–45.107–1 Referral to other Government agencies.

All information indicating violations by any person of Federal criminal statutes, or violations of section 209 of the Federal Property Act, including, but not limited to, fraud against the Government, mail fraud, bribery, attempted bribery, or criminal collusion, shall be referred immediately to the Department of Justice, for further investigation and disposition. Each holding agency shall make available to the Department of Justice, or to such other governmental investigating agency to which the matter may be referred by the Department of Justice, all pertinent information and evidence concerning the indicated violations; shall desist from further investigation of the criminal aspects of such matters except upon the request of the Department of Justice; and shall cooperate fully with the agency assuming final jurisdiction in establishing proof of criminal violations. After making the necessary referral to the Department of Justice, inquiries conducted by the holding agency compliance organizations shall be limited to obtaining information for administrative purposes. Where irregularities reported or discovered involve wrongdoing on the part of individuals holding positions in Government agencies other than the agency initiating the investigation, the case shall be reported immediately to the Administrator of General Services for an examination in the premises.

### § 101–45.107–2 Compliance reports.

A written report shall be prepared on all compliance investigations conducted by each agency compliance organization. Each holding agency shall maintain files of all such reports. Until otherwise directed by the Administrator of General Services, there shall be transmitted promptly to GSA one copy of any such report which contains information indicating criminality on the part of any person or indicating substantial noncompliance with the Act or with the regulations, orders, directives, and policy statements of the Administrator of General Services. In transmitting such reports to the Administrator of General Services, the agency shall set forth the action taken or contemplated by the agency to correct the improper conditions disclosed by the investigation. Where any matter is referred to the Department of Justice, a copy of the letter of referral shall be transmitted to GSA.

## Subpart 101–45.2—Definition of Terms

### § 101–45.200 Scope of subpart.

As used throughout this Part 101–45, the following terms have the meanings set forth in this subpart.

### § 101–45.201 Agricultural commodity.

"Agricultural commodity" means a product resulting from the cultivation of the soil or husbandry on farms and in the form customarily marketed by farmers.

### § 101–45.202 Auction.

"Auction" means a sales offering by public outcry.

### § 101–45.203 Auctioneer.

"Auctioneer" means an individual, partnership, or corporation engaged in selling personal property by the auction method of sale.

### § 101–45.204 Combat materiel.

"Combat materiel" means arms, ammunition, and implements of war listed in the currently effective designations (68 Stat. 848, as amended, 22 U.S.C. 1934).

### § 101–45.205 Contractor inventory.

"Contractor inventory" means any property acquired by and in the possession of a contractor or subcontractor (including Government-furnished property) under a contract pursuant to the terms of which title is vested in the Government, and in excess of the amounts needed to complete full performance under the entire contract; and any property which the Government is obligated or has the option to take over under any type of contract as a result either of any changes in the specifications or plans thereunder or of the termination of such contract (or subcontract thereunder), prior to completion of the work, for the convenience or at the option of the Government.

### § 101–45.206 Cotton or woolen goods.

"Cotton or woolen goods" means any textile, article, or product resulting from the processing or manufacturing, in whole or in major part, of cotton or wool.

### § 101–45.207 Debarment.

"Debarment" means the prohibition of an individual or organization from contracting with the Government longer than a temporary period.

### § 101–45.208 Distilled spirits.

"Distilled spirits" means ethyl alcohol, hydrated oxide of ethyl, spirits of wine, whiskey, rum, brandy, gin, and other distilled spirits, including all dilutions and mixtures thereof.

### § 101–45.209 Executive agency.

"Executive agency" means any executive department or independent establishment in the executive branch of the Government, including any wholly owned Government corporation.

### § 101–45.210 Federal agency.

"Federal agency" means any executive agency or any establishment in the legislative or judicial branch of the Government (except the Senate, the House of Representatives, and the Architect of the Capitol and any activities under his direction).

### § 101–45.211 Firearms.

"Firearms" means any weapon, by whatever name known, which is designed to expel a projectile or projectiles by the action of any explosive, and a muffler or silencer for any such weapon.

### § 101–45.212 Forfeitures.

"Forfeitures" means forfeitures, whether by summary process or by order of a court of competent jurisdiction pursuant to any law of the United States.

### § 101–45.213 Holding agency.

"Holding agency" means the executive agency which has accountability for the property involved.

### § 101–45.214 Identical bids.

(a) "Identical bids" means two or more bids received for the same line item of an invitation for bids issued under formal advertising procedures which:

(1) Appear on the face of the bids to be identical as to unit price or total amount; or

(2) Are found, in the contracting agency's normal process of evaluating bids for award, to be identical as to unit price or total amount.

(b) "Line item" means each item of personal property specified in an invitation for bid which, under the terms of the invitation, is susceptible to a separate contract award.

**§ 101–45.215 Inactivation.**

"Inactivation" means the removal of an auctioneer's name from the List of Auctioneers Qualified to Sell Government-owned Personal Property.

**§ 101–45.216 Intangible personal property.**

"Intangible personal property" includes, but is not limited to, such classes of personal property as patents, patent rights, processes, techniques, inventions, and copyrights, except as, in a given case or class of cases, may be excluded by the Administrator of General Services.

**§ 101–45.217 Local government.**

"Local government" means a government, or administration of a locality, within a State or possession of the United States.

**§ 101–45.218 Malt beverages.**

"Malt beverages" means beverages made by the alcoholic fermentation of an infusion or decoction, or combination of both, in potable brewing water, of malted barley with hops, or their parts, or their products, and with or without other malted cereals, and with or without addition of unmalted or prepared cereals, other carbohydrates or products prepared therefrom, and with or without the addition of carbon dioxide, and with or without other wholesome products suitable for human food consumption.

**§ 101–45.219 Narcotics.**

"Narcotics" means the following drugs or preparations thereof:

(a) Opium, coca leaves, cocaine, or any salt derivative, or preparation of opium, coca leaves, or cocaine;

(b) Isonipecaine (demarol);

(c) Any drug found by the Secretary of the Treasury and proclaimed by the President to have addiction-forming or addiction-sustaining liability similar to morphine or cocaine such as methadon (delphine, adanon) and nisentil; and

(d) Marihuana (cannabis sativa L.).

**§ 101–45.220 No commercial value.**

"No commercial value" means personal property which is not usable and cannot economically be rehabilitated by anyone for use for the purposes for which it was originally intended, and can reasonably be expected to have no market value for use as an entity for any other purpose.

**§ 101–45.221 Personal property.**

"Personal property" means property of any kind or any interest therein, except real property, records of the Federal Government, and naval vessels of the following categories: battleships, cruisers, aircraft carriers, destroyers, and submarines.

**§ 101–45.222 Public body.**

"Public body" means any State, territory, or possession of the United States, any political subdivision thereof, the District of Columbia, any agency or instrumentality of any of the foregoing, or any agency of the Federal Government.

**§ 101–45.223 Reinstatement.**

"Reinstatement" means the restoration to the List of Auctioneers Qualified to Sell Government-owned Personal Property of the name of an auctioneer previously removed from that list.

**§ 101–45.224 Related personal property.**

"Related personal property" means any personal property which is located on, or is an integral part of, real property, or used or useful in connection with such property or the productive capacity thereof, or determined by the Administrator of General Services to be otherwise related to the real property.

**§ 101–45.225 Reviewing authority.**

"Reviewing authority" means a local, regional, or departmental board of review of an executive agency. It may consist of one or more persons.

**§ 101–45.226 Salvage.**

"Salvage" means personal property that has some value in excess of its basic material content but which is in such condition that it has no reasonable prospect for use for any purpose as a unit (either by the holding or any other Federal agency) and its repair or rehabilitation for use as a unit (either by the holding or any other Federal agency) is clearly impracticable. Repairs or rehabilitation estimated to cost in excess of 65 percent of acquisition cost would be considered "clearly impracticable" for purposes of this definition.

**§ 101–45.227 Scrap.**

"Scrap" means material that has no value except for its basic material content.

**§ 101–45.228 Small business concern.**

"Small business concern" means any concern or group of concerns which qualifies as a "small business concern" under governing standards by the Small Business Administration (see 13 CFR Part 121).

**§ 101–45.229 Surplus personal property.**

"Surplus personal property" means any excess personal property not required for the needs and the discharge of the responsibilities of all Federal agencies, as determined by the Administrator of General Services.

**§ 101–45.230 Wine.**

"Wine" means wine as defined in sections 5381 and 5385 of the Internal Revenue Code of 1954 (26 U.S.C. 5381, 5385), as now in force or hereafter amended, and other alcoholic beverages not so defined, but made in the manner of wine, including sparkling and carbonated wine, wine made from condensed grape must, wine made from other agricultural products than the juice of sound, ripe grapes, imitation wine, compounds sold as wine, vermouth, cider, perry, and sake; in each instance only if containing not less than 7 per centum and not more than 24 per centum of alcohol by volume, and if for nonindustrial use.

## Subpart 101–45.3—Sale of Personal Property

**§ 101–45.300 Scope of subpart.**

This subpart prescribes the policies and methods governing the disposal of surplus personal property by sale.

**§ 101–45.301 Sale to Government employees.**

Holding agencies shall not sell personal property to persons known to be officers or employees of the Federal Government, except to the extent determined by the heads of such agencies to be in the best interests of the Government and under procedures and safeguards, prescribed by the heads of such agencies, adequate to preclude collusion and fraud.

**§ 101–45.302 Sales methods and procedures.**

**§ 101–45.302–1 Competitive bid sales.**

Holding agencies shall, except as otherwise provided by this Subpart 101–45.3, sell personal property by competitive bid sale after advertising, in accordance with this section 101–45.302–1. Competitive bid sales include the following:

(a) *Sealed bid sales.* In sealed bid sales, bidders shall be required to submit, to the office designated for receipt and opening of bids, sealed written bids on authorized bid forms for public opening at a time and place designated. Final payment on such sales shall be in the prescribed forms as set forth in § 101–45.302–1(b).

(b) *Spot bid sales.* In spot bid sales, bidders shall be furnished with bid forms in advance of the bidding, a bid form to be used for each lot or unit to be separately sold. Requests for bids on items offered for sale shall be made by the official in charge. In requesting bids, the official in charge shall announce the item, its identification number, and a brief description of the item or lot. The right to reject all such bids for a lot or item shall be reserved in the terms of sale; and when the Invitation for Bids so specifies, lots or items for which all bids have been rejected may be reoffered at the same sale in order to secure an acceptable bid price. After examining all bids, award shall be made or bids rejected immediately following the offering of the item or lot. The bids at spot bid sales shall not be disclosed prior to the announcement of award for any item or lot. Where mailed written or drop bids are permitted, they shall not be disclosed to the public prior to the announcement of award. Bidders may be required to register in advance of the sale. Any special condition of sale shall be set out in the Invitation for Bids in order to assure that all bidders are afforded an opportunity to compete on the same terms and conditions. Except as provided in §§101–45.302–8 and 101–45.302–11, final payment on such sales must be by cash, or certified check, cashier's check, traveler's check, bank draft, Federal Home Loan Bank money order (including Canadian Postal Money Orders designed for payment in the United States, which are acceptable in U.S. dollars at the stated face value), Government check properly endorsed, or any combination thereof, made payable to the Treasurer of the United States or to the Government agency conducting the sale.

(c) *Auction sales.* In auction sales, private auctioneers qualified as prescribed by § 101–45.310, or qualified personnel of holding agencies when authorized by the holding agency, shall be used to cry such sales. When the terms and conditions of sale have been published and distributed to participating buyers, any special or unusual conditions of sale shall be announced by the person conducting the auction, immediately prior to commencement of the sale. Final payment on such sales must be made in the prescribed form as set forth in § 101–45.302–1(b). The only exceptions to such methods for payment are set forth in §§ 101–45.302–8 and 101–45.302–11. Offerings must reserve in the Government, the right to accept or reject any or all bids. Lots for which all offers have been rejected may be reoffered later at the same sale to secure acceptable bids, when the published terms and conditions so provide. GSA will provide advice and assistance to executive agencies on auction methods and use, and on advertising, lotting, and other sales preparations for auctioneers.

**§ 101–45.302–2 Negotiated sales and negotiated sales at fixed prices.**

(a) *Circumstances permitting negotiated sales.* Agencies authorized pursuant to this Part 101–45 to sell surplus personal property may do so by negotiated sales, subject to obtaining such competition as is feasible under the circumstances, where:

(1) It is determined by the disposal agency that a negotiated sale involves property:

(i) That has a reasonable fair-market value not in excess of $1,000; or

(ii) Where public exigency will not admit of the delay incident to advertising; or

(iii) Where bid prices after advertising therefor are not reasonable (either as to all or some part of the property), or bid prices have not been independently arrived at in open competition, and it is determined that readvertising will serve no useful purpose: *Provided*, That all responsible bidders who responded to the previous advertising shall be afforded an opportunity to submit offers for the property.

(iv) That the disposal will be to a State, Territory, possession, political subdivision thereof, or tax-supported agency therein, and that the estimated fair-market value of the property and other satisfactory terms of disposal are obtained by negotiation.

(2) Full and adequate justification therefor has been submitted to the head of the disposal agency or his designee for prior approval, and he has determined:

(i) That the public health, safety, or national security will thereby be promoted; or

(ii) That it is necessary in the public interest during the period of a national emergency declared by the President or the Congress. The authority of this subdivision shall be used only with respect to a particular lot or lots of personal property identified by the Administrator of General Services or a specifically described category or categories of property determined by the Administrator of General Services during any period fixed by the Administrator of General Services, but not in excess of three months. Declaration of a national emergency alone is not justification for use of this authority; there must be other reasons making use of negotiation necessary in the public interest.

(3) Full and adequate justification therefor has been submitted to the Administrator of General Services for his prior approval, and he has determined that the property involved is of a nature and quality which, if disposed of by advertising would cause such an impact on an industry or industries as to adversely effect the national economy: *Provided*, That the estimated fair market value of such property and other satisfactory terms of disposal can be obtained by negotiation.

(4) Negotiation is otherwise authorized by the Act or other law.

(b) *Negotiated sale at fixed prices.* After obtaining prior approval of the Administrator of General Services agencies may sell, either directly or through the use of disposal contractors, specific categories of personal property at the estimated fair-market value of the property. Sales of property so made shall be publicized to the extent consistent with the nature and value of the property involved. Applications for approval of fixed-price sales shall include a narrative statement containing a description of the property, a detailed program of disposal, justification of the proposed sale, the estimated fair-market value and proposed selling prices, and all other pertinent facts involved in the agency's decision to request authority to sell at fixed prices.

(c) *Explanatory statements.* Subject to the exceptions noted in this subparagraph, the agency shall prepare an explanatory statement of the circumstances of each proposed disposal by negotiation of any personal property and shall submit the statement to the Administrator of General Services for review and transmission by the Administrator of General Services to the appropriate committee of the Senate and House of Representatives, as early as practicable in advance of each proposed disposal; and, shall preserve a copy thereof in its files.

(1) No statement need be:

(i) Prepared for disposals of personal property having a fair market value of $1,000 or less;

(ii) Submitted for sales of personal property at fixed prices when previously authorized pursuant to this § 101–45.302–2(b); or

(iii) Submitted for disposals of personal property authorized to be made without advertising by any provision of law other than section 203(e) of the Act.

(2) An outline for the preparation of the explanatory statement is shown in § 101–45.4919.

**§ 101–45.302–3 Lotting.**

To the extent practicable, and consistent with the types of property and usual commercial practice, property offered for sale shall be assembled in reasonably sized lots of like or similar items by make or manufacturer. Unused property shall be lotted separately from used items. Scrap and other property having scrap value only shall be lotted in accordance with established trade practice and shall generally not be included in the same sale with usable items. Determination of the size of lots shall take into consideration the buying capacities of prospective buyers and the requirement that adequate competition be obtained. Large quantities of identical items shall be lotted in such a way as to encourage bidding by small businesses and individuals.

**§ 101–45.302–4 Inspection by bidders.**

Sufficient time prior to the date for submission of bids shall be allowed to permit inspection by potential purchasers.

**§ 101–45.302–5 Reviewing authority.**

Approval by a reviewing authority of the agency effecting the sale shall be required for each proposed award involving the type of sale and acquisition cost (actual or estimated) of property other than scrap as follows:

(a) By negotiated sale—$1,000 or more.

(b) By competitive-bid sale—$100,000 or more.

**§ 101–45.302–6 Advertising.**

Adequate public notice shall be given to each offering for sale of property to be disposed of after advertising. Except where the nature or condition of the property does not permit, advertising shall be made in sufficient time previous to sale to permit full and free competition. The extent of solicitation shall have due regard to the quantity and type of property to be sold, the logical market of disposal, the type of sale contemplated, and the public interest. Three copies of all invitations or other offering literature involving surplus, exchange/sale property or contractor inventory shall be transmitted, at the time of issuance, to the appropriate GSA regional office, except that in the case of invitations or other offering literature processed and distributed by the Defense Logistics Services Center of the Department of Defense, two copies will be submitted to such regional office and one copy to the General Services Administration, Utilization and Disposal Service, Washington, D.C., 20405.

(a) *Advertising media by types of sales*—(1) *Sealed bid sales.* In the case of sealed bid sales, advertising shall be by the distribution of written invitations for bids, including public posting thereof, and may be supplemented by newspaper or trade journal advertising (ordered in accordance with existing law) where advisable.

(2) *Spot bid sales.* Advertising in the case of spot bid sales shall be by written invitation for bids or other appropriate notices, including public posting thereof. Notice of such sales may also be given appropriate newspaper or trade journal advertising (ordered in accordance with existing law) where advisable.

(3) *Auction sales.* In the case of auction sales, newspaper or trade journal advertising ordinarily should be employed (ordered in accordance with existing law) in addition to other written notice deemed appropriate.

(b) *Advance sale notices to Department of Commerce.* In order that the Department of Commerce may make regular publication of a synopsis of principal proposed sales of Government personal property, all disposal agencies shall, when the acquisition cost of the property to be sold at one time at one place is $250,000 or more, cause a notice of each proposed sale to be transmitted to the U.S. Department of Commerce, Room 1300, 433 West Van Buren Street, Chicago, Ill., 60607. Where the acquisition cost is less than this amount, such notice may be transmitted when considered desirable. The notice shall be sent as early as possible in advance of the sale but at least 20 days prior to the date when the bids will be opened, or, in the case of spot bid or auction sale, when the sale will be conducted. Such notice shall be transmitted by fastest mail available and shall be in synopsis form suitable for printing directly from the text as transmitted without editing or condensing. Instructions for the preparation of advance sale notices, including form and content thereof, are set forth in § 101–45.4910. The failure to comply with the advance notice of sale requirements of this § 101–45.302–6(b) shall not, in and of itself, affect the validity of a sales award which is otherwise valid.

**§ 101–45.302–7 Forms prescribed.**

Standard Forms 114, 114A, 114B, and 114C (illustrated at §§ 101–45.4901, 101–45.4902, 101–45.4903, and 101–45.4904) shall be used in all sales of surplus personal property by sealed bid. Typical assemblies for sealed bid sales, which include these standard forms, are shown in §§ 101–45.4917 and 101–45.4918. In auction, spot bid, and negotiated sales, Standard Form 114C shall be used and, if appropriate, Standard Forms 114, 114A, and 114B may be used.

(a) *Description of standard forms*—(1) *Standard Form 114, Invitation Title Page.* This form has space for the invitation number and date; time, date, and place of bid opening; bid deposit requirements; arrangements for inspection; name and address of issuing activity; and location(s) of property.

(2) *Standard Form 114A, Bid and Award Page.* This form provides a block for the bidder to state his total bid, and a block for the Government to accept the bid. Extra space is provided in the acceptance by the Government block for optional agency use. Accounting data, acquisition cost of the property, office identification numbers, etc., may be over printed in this space if deemed necessary by the using agency. Neither instructions to bidders nor special conditions of sale, however, are to be printed in this blank space.

(3) *Standard Form 114B, Item Bid Page.* This form provides for the summary listing of articles for sale, the quantity in number of units, and the unit of measure. It has columns for the bidder to insert the line item price bid per unit and the line item total bid price, as well as space for the bidder's name to facilitate identification.

(4) *Standard Form 114C, General Sale Terms and Conditions.* The sale terms and conditions are provided as a separate page so as to permit, where necessary, the inclusion of special conditions and instructions to bidders on the reverse of Standard Form 114C. (See § 101–45.4917. A continuation sheet, if required, may be used.) However, special conditions of sale and instructions to bidders are to be kept to an absolute minimum, and are to be used only if and when deemed necessary and appropriate for the particular property offered for sale. No special conditions of sale shall be included which are inconsistent with the provisions contained in Standard Forms 114A and 114C unless authority is obtained from the Administrator of General Services.

(5) *Alternate assembly of forms for small sealed bid sales.* To provide the simplest type of documentation for sales involving only a small number of items, an assembly consisting of Standard Form 114 with Standard Form 114A on the reverse thereof; and Standard Form 114B with Standard Form 114C on the reverse is shown as § 101–45.4918. It is to be noted that when an agency determines special conditions of sale and instructions to bidders are necessary, they may be set forth on Standard Form 114B after the description of the items to be sold.

(b) *Description of items for sale.* (1) A short, accurate, and to the extent feasible, commercially clear description shall be prepared for each item offered for sale. This description may be used in the Standard Form 114B whenever a few items are to be sold. In larger sales, a summary list of the items shall be set forth on the Standard Form 114B as shown in § 101–45.4917 and a list of detailed item descriptions shall be prepared in the format shown in § 101–45.4917 and set forth in the same order as in the Standard Form 114B. (Section 101–45.4917 assumes multiple locations of property were indicated in Standard Form 114. There is no intent in § 101–45.4917 to suggest lotting. Examples of items given are intended only to establish format and proper descriptive terminology.) The block is for the convenience of the bidder to record, for his use, the amounts bid and submitted on Standard Form 114B.

(2) When it is determined to be to the Government's advantage, original acquisition costs may be included in the individual item descriptions.

(3) Normally, one copy of this list setting forth the descriptions of property should be sufficient for distribution with whatever number of sets of the Standard Form 114 is furnished each bidder, as the list is not to be returned with the bid.

(4) Extreme care should be exercised in the preparation of the item description list to avoid uncertainty in a prospective buyer's mind by the use of misleading, ambiguous, or unintended descriptions which could possibly lead to disputes and litigation. For example, there is uncertainty when a "lot" of property described as an "item" consists of more than one item and the weight of the "item" is stated. Is the weight shown that of one of the items or is it the total weight for all items?

(5) Also, inasmuch as there can be honest difference of opinion as to condition, such opinions shall not be expressed. Descriptions shall be limited to statements of fact such as "unused" or "used." To these general descriptions, qualifying statements, when known and applicable, shall be added as guide information such as "some surface rust," "broken cartons," "rubber may be deteriorated," and "packed for export." On listing motor vehicles from which tires have been removed, that fact shall be indicated; or, if it has no motor, that fact shall be disclosed.

(c) *Removal of property.* In normal disposals, a minimum of ten days shall be afforded successful buyers to effect complete removal of the property.

**§ 101–45.302–8 Credit.**

Except as authorized in § 101–45.302–11, personal property shall not be offered for sale or sold on credit without the prior approval of the Administrator of General Services. When approved, the terms and conditions of sale shall specifically provide therefor.

**§ 101–45.302–9 Deposits.**

(a) Subject to § 101–45.302–11, deposits shall be required in connection with bids on personal property offered for sale through the formal sealed bid method. Deposits also shall be required in connection with auction sales but may be waived (other than for bids submitted by mail when authorized) whenever the highest acceptable bidders are required to make at least a partial payment, in an amount not less than the normal bid deposit on the day of sale. Deposits may be required on spot bid sales at the discretion of the agency conducting such sales.

(b) The normal deposit for individual type sales shall be 20 percent of the total amount of bid. For sales of property on an "as generated" basis during a stated period of time (referred to as term contracts), the normal deposit shall not be less than an amount to adequately protect the Government's interest. (Example: 33⅓ percent of the total amount bid on a 90-day contract.)

(c) Bid deposits shall be in the form of cash, or certified check, cashier's check, traveler's check, bank draft, Federal Home Loan Bank money order, postal money order, express, telegraphic or other commercial money order (including Canadian Postal Money Orders designed for payment in the United States which are acceptable in U.S. dollars at the stated face value), Government check properly endorsed, or any combination thereof made payable to the Treasurer of the United States or to the Government agency conducting the sale. When agency regulations so provide, deposit bonds (submitted on Standard Forms 150 and 151) may also be used.

(d) Irrevocable commercial letters of credit issued by a bank established in the United States, payable to the Treasurer of the United States or to the Government agency conducting the sale, may be used in lieu of the foregoing forms of deposit. Such letters shall be substantially in the format shown in § 101–45.4912. General instructions relating to the preparations of letters of credit are also contained in § 101–45.4913.

(e) Any draft drawn against such letter of credit shall be substantially in the format shown in § 101–45.4914. Such draft shall be accompanied by a transmittal letter and certifications substantially in the format shown in § 101–45.4915.

(f) Potential buyers shall be notified as to the exact organizational entity to the order of which the prescribed form of deposit is to be made payable. In no event shall a bid be rejected solely on the grounds that the instrument of deposit is made payable to the Treasurer of the United States when the offering specifies that it be made payable to the Government agency conducting the sale, or conversely, as the case may be.

**§ 101–45.302–10 Deposit bonds.**

(a) *Standard forms.* The following standard forms, as applicable, shall be used by executive agencies when a bond, in lieu of cash or other acceptable form of bid deposit, is permitted by the sales invitation.

(1) Standard Form 150, Deposit Bond—Individual Invitation, Sale of Government Personal Property (see § 101–45.4906).

(2) Standard Form 151, Deposit Bond—Annual Sale of Government Personal Property (see § 101–45.4907).

(3) Standard Form 28, Affidavit of Individual Surety (see § 101–45.4908).

(Standard Forms 150 and 151 are applicable only to normal cash sales where payment in full is required prior to release of the property. In the conduct of sales involving term contracts or other unusual contractual arrangements, executive agencies may use such other bond forms as they may determine to be acceptable.)

(b) *Instructions and procedures.* (1) Comprehensive instructions for the execution and use of Standard Form 150, Deposit Bond—Individual Invitation; Standard Form 151, Deposit Bond—Annual; and Standard Form 28, Affidavit of Individual Surety, are provided on the reverse of each form. Implementing instructions by executive agencies shall be consistent therewith.

(2) Standard Form 151, Deposit Bond—Annual, contains the following provision:

> Upon the making of an award to the principal, or within a reasonable period of time thereafter, the Government shall transmit, in writing, the following information to the surety at the address above:
>
> (1) Name and address of the principal(s); (2) number of the invitation for bids; (3) name and address of the department or agency making the award; (4) date of the award; and (5) total purchase price covered by the award.

The phrase, "or within a reasonable period of time thereafter", shall, for practicable purposes, be construed to mean within fifteen days following the making of the award. Optional Form 20, Notice to Surety—Deposit Bond—Annual (§ 101–45.4909) is a form of written notice available for this purpose.

(3) In the event a bidder whose bid deposit is secured by a deposit bond attempts to withdraw his bid in violation of paragraph 3, General Sale Terms and Conditions, Standard Form 114C, and such bid is determined to be the high bid acceptable to the Government, a formal notice of award shall be issued to inform the bidder of his contractual obligations.

(4) In the event of default by a bidder whose bid deposit has been secured by a deposit bond, a notice of such default should be sent to the bidder (principal) and the surety.

**§ 101–45.302–11 State and local governments.**

In the case of sales to State and local governments and instrumentalities thereof, the requirements for bid deposit and payment for property prior to removal shall be waived whenever representation is made in writing by an official of such State or local government or instrumentality that compliance therewith is precluded by law applicable to such governments, including a citation to the applicable law forming the basis for such exemptions; and, may be waived in the case of such sales where otherwise deemed in the best interest of the Federal Government.

**§ 101–45.303 Exchange or sale of personal property for replacement purposes.**

This section prescribes policies and methods governing executive agencies in exercising the authority to sell personal property granted under section 201(c) of the Act. Sale of personal property by executive agencies in connection with the application of the proceeds of sale in the acquisition of similar personal property for replacement purposes shall be made only after compliance with the provisions of subpart 101–43.2 covering the utilization requirements to be met prior to outright sale.

**§ 101–45.303–1 Solicitation of bids.**

In exercising the authority granted herein for disposing of personal property, the objective shall be to obtain the maximum return to the Government from property sold. Executive agencies shall, therefore, solicit in each instance, cash bids, except that cash bids need not be solicited when the items sought to be sold may be disposed of without solicitation of bids under applicable laws and regulations.

### § 101–45.303–2 Terms and conditions of sale.

Executive agencies shall use Standard Forms 114, 114A, 114B, and 114C (see §§ 101–45.4901, 101–45.4902, 101–45.4903, and 101–45.4904) in making sealed bid sales of property pursuant to this § 101–45.303–2 in the same manner as is required in sales of surplus personal property (see § 101–45.302–7). Typical assemblies for sealed bid sales, which include these standard forms, are shown in §§ 101–45.4917 and 101–45.4918. If sale is by auction, spot bid, or negotiated sale, executive agencies shall, except as may be otherwise authorized by the Administrator of General Services, use the General Sale Terms and Conditions of Standard Form 114C, and may use Standard Forms 114, 114A, and 114B as deemed appropriate. Additional special terms, conditions, and instructions, if necessary, may be used if not inconsistent with the provisions contained in Standard Forms 114A and 114C.

### § 101–45.303–3 Availability of proceeds of sale.

Except as otherwise authorized by law, proceeds of sales of personal property disposed of pursuant to this § 101–45.303–3 shall be accounted for in accordance with General Accounting Office, Accounting Systems Memorandum No. 23, Revised, issued June 19, 1953, or any revision thereof. The requirements for a written administrative determination to establish that a bona fide replacement is involved are set forth in § 101–43.302. Procedures for the application of the proceeds of sale for the acquisition of similar items follow:

(a) Sale of property before the purchase of replacement property.

(1) When the sale of the property to be replaced is made before the acquisition of the replacement property, the proceeds of such sales are to be deposited to the agencies' deposit fund account "_____ 6875 Suspense (Department or Establishment)" or to a separate deposit fund account if such account has been approved for the department or establishment.

(2) The proceeds of such sales will be available for obligation for the acquisition of similar replacement items of personal property during the fiscal year in which the sale is made and for one fiscal year thereafter.

(3) When the acquisition of the replacement property is subsequently made and the obligation incurred, an adjustment voucher should be processed to charge the applicable deposit fund account and reimburse the appropriation charged for the replacement. For audit purposes, the adjustment voucher (Standard Form No. 1081, Revised, or other approved forms) must include or be supported by sufficient evidence to show that the reimbursement to the appropriation is applicable to the obligation incurred for the acquisition of similar replacement personal property.

(4) Proceeds of sales related to personal property for which an obligation for replacement has not been incurred during the period of availability following the date of sale, or sales proceeds which for other reasons an agency elects not to apply to replacement costs, shall be deposited to miscellaneous receipts account "3199—Proceeds from Sale of Government Property Not Otherwise Classified."

(5) If it is determined at the time of collection that sales proceeds are not to be applied to replacement acquisitions, the deposit should be made directly to the miscellaneous receipts account.

(b) Sale of property after the purchase of replacement property. When the sale of the replaced property is made after the acquisition of the replacement property, the proceeds of such sale may be deposited as a direct reimbursement credit to the appropriation previously charged for the replacement of similar items of personal property.

### § 101–45.304 Contractor inventory.

### § 101–45.304–1 Retention or disposal by contractors or subcontractors.

After compliance with the applicable requirements of § 101–43.316, the executive agency concerned may authorize the retention or disposal of contractor inventory by a contractor or subcontractor in accordance with orders, directives, procedures, and review prescribed by such agency, subject to the limitations in § 101–45.304–2.

### § 101–45.304–2 Limitations.

(a) Contractor inventory shall not be sold to persons known to be officers or employees of the Federal Government, except as provided in § 101–45.301.

(b) Disposals of contractor inventory, except as executive agencies shall otherwise provide, shall be by competitive bid sales.

(c) Retentions of contractor inventory where such inventory is not offered for competitive sale shall be, subject to the terms of the contract, at prices that are fair and reasonable and not less than the proceeds that could reasonably be expected to be obtained if the property were offered for competitive sale at such time.

(d) Where the original acquisition cost of serviceable material available for sale at any one time at any one location is $25,000, or more, the contractor shall publish a notice of the proposed sale at a reasonable time in advance of such sale in a newspaper of general circulation in the locality in which the property is located.

(e) Retention or disposal of substantial quantities of material by the contractor shall be subject to prior approval by the contracting agency in accordance with criteria established by that agency, or in the absence of such criteria, when the acquisition cost of material available for disposal at any one location is in excess of $50,000.

(f) Whenever a contractor shall begin negotiations for the disposition to private interests of property which cost the Government $3,000,000 or more, or of patents, processes, techniques, or inventions, irrespective of costs, the contracting agency shall comply with the requirement of § 101–45.308.

### § 101–45.304–3 Disposal by executive agencies.

When disposal or retention by a contractor or subcontractor cannot be affected upon terms which are advantageous to the Government, such property may be disposed of by the agency in accordance with the surplus disposal procedures of this Part 101–45.

### § 101–45.305 Proceeds from sales.

### § 101–45.305–1 Disposition of proceeds.

All proceeds from the disposal of surplus property shall be covered into the Treasury as miscellaneous receipts, except in the following circumstances and as otherwise authorized by law enacted subsequent to June 30, 1949:

(a) When the property disposed of was acquired by the use of funds either not appropriated from the general fund of the Treasury or appropriated therefrom but by law reimbursable from assessment, tax, or other revenue or receipts, then the net proceeds of the disposition shall be credited to the reimbursable fund or appropriation or paid to the Federal agency which determines such property to be excess: *Provided*, That the proceeds shall be credited to miscellaneous receipts in any case when the agency which determined the property to be excess shall deem it uneconomical or impractical to ascertain the amount of net proceeds.

(b) Any Federal agency disposing of surplus property under this Subpart 101–45.3 may deposit, in a special account with the Treasurer of the United States, such amount of the proceeds of such dispositions as it deems necessary to permit appropriate refunds to purchasers when any disposition is rescinded or does not become final, or payments for breach of any warranty, and may withdraw therefrom amounts so to be refunded or paid, without regard to the origin of the funds withdrawn.

(c) Where any contract entered into by an executive agency or any subcontract under such contract authorizes the proceeds of any sale of property in the custody of the contractor or subcontractor to be credited to the price or cost of the work covered by such contract or subcontract, the proceeds of any such sale (including amounts as a result of retention by the contractor) shall be credited in accordance with the contract or subcontract.

(d) Any executive agency entitled to receive cash under any contract covering the sale or other disposition of surplus property may in its discretion accept, in lieu of cash, any property determined by the Office of Emergency Planning to be strategic or critical material at the prevailing market price thereof at the time the cash payment or payments became or become due. Executive agencies shall consult with GSA before taking such action.

### § 101–45.306 Performance reports.

A quarterly performance report of the disposition of surplus personal property shall be submitted to GSA on Standard Form 121, Quarterly Report of Utilization and Disposal of Excess and Surplus Personal Property (see § 101–43.4907).

No. 233—Pt. II——10

### § 101–45.307 Special classes of property.

### § 101–45.307–1 Agricultural commodities.

(a) *Disposal by holding agencies.* Surplus agricultural commodities, surplus foods processed from agricultural commodities, and surplus cotton or woolen goods may be disposed of in accordance with this Part 101–45, without reference to the Department of Agriculture, in the following instances:

(1) Where the quantity of such commodity or product in any one location has an acquisition cost not in excess of $5,000.

(2) Where such commodity or product must be disposed of immediately to prevent spoilage.

(3) Where the quantity to be sold during any month has an acquisition cost not in excess of:

(i) Raw cotton, wheat and other grains, flour, leaf tobacco, and cotton or woolen goods—$300,000.

(ii) Meat, poultry and poultry products, peanuts, and other fats and oils—$50,000.

(iii) All other agricultural commodities and foods processed from agricultural commodities—$25,000.

(b) *Required references to the Department of Agriculture.* With respect to quantities of surplus agricultural commodities, surplus foods processed from agricultural commodities, and surplus cotton or woolen goods, in excess of the amounts specified in this § 101–45.307–1, holding agencies shall obtain from the Commodity Stabilization Service, Department of Agriculture:

(1) A determination, with appropriate instructions, that the commodities or products should be transferred to the Department of Agriculture for disposition as provided by section 203(h) of the Act. Holding agencies accordingly may execute transfers without charge to the Department of Agriculture; or

(2) A statement setting forth the conditions and prices which should be used by the holding agency in the disposition of the commodities or products.

### § 101–45.307–2 Dangerous property.

(a) No property shall be disposed of that is dangerous to public health or safety without rendering innocuous such property or providing adequate safeguards therefor.

(b) The following procedure shall apply in any disposal of high explosives used for blasting purposes (including but not limited to dynamite, TNT, and demolition blocks), supplies used for blasting purposes (such as blasting caps, fuse lighters, detonators, detonating cord, primacord, primers, and fuses), and chemicals used in the manufacture of ammunition primers.

(1) All materials of the above classifications offered by a holding agency shall be properly identified in the offering with respect to their hazardous characteristics.

(2) All the materials of the above classifications shall be labeled by the holding agency prior to shipment so that their hazardous character will be immediately evident upon inspection.

(3) Purchasers of materials of the above classification shall be required by the holding agency to execute the following certification:

It is hereby certified that the purchaser will comply with all applicable Federal, State, and local laws, ordinances and regulations with respect to the care, handling, storage and shipment, resale, export, and other use of the materials hereby purchased, and that he is a user of, or dealer in, said materials capable of complying with all applicable Federal, State, and local laws. This certification is made in accordance with and subject to the penalties of Title 18, Section 1001, the United States Code, Crime and Criminal Procedures.

### § 101–45.307–3 Demilitarization and decontamination.

No dangerous material shall be disposed of pursuant to this Part 101–45 without first demilitarizing or decontaminating such property if such action is found by a duly authorized official of the executive agency concerned to be in the interest of public health, safety, or security. This may include rendering such property innocuous, stripping from it any confidential or secret characteristics, or otherwise making it unfit for further use. Demilitarization or decontamination of property to be donated to public bodies shall be accomplished in such manner as to preserve so far as possible any civilian utility or commercial value of the property.

### § 101–45.307–4 Firearms.

Shotguns having a barrel of 18 inches or more in length and hand-operated bolt-action rifles having a barrel or barrels of 16 inches or more in length may be disposed of at public sale. Other types of firearms may be sold under the following circumstances:

(a) After approval by the Administrator of General Services, to a State or local government at the fair-market value; or

(b) For scrap, after total destruction by crushing, cutting, breaking, or deforming to be performed in a manner to assure that the firearms are rendered completely inoperative and to preclude their being made operative.

### § 101–45.307–5 Garbage.

All invitations to bid issued by executive agencies for removal of garbage from property occupied or controlled by the Federal Government, unless specifically requiring destruction by incineration, shall state that all bidders must comply with basic requirements for sterilization prescribed by the Animal Disease Eradication Division, Bureau of Animal Industry, Department of Agriculture. In the interest of uniformity, the following provision shall be included in all invitations to bid where garbage collected may, under any circumstances, be fed to livestock or poultry:

Prior to award the bidder agrees to furnish a certification from an Animal Disease Eradication Division representative of the U.S. Department of Agriculture, that he possesses adequate and approved garbage sterilization equipment. In the event of an acceptance of his bid by the Government, the bidder warrants that all garbage received under the contract will be sterilized not less than 30 minutes at 212° F. before being fed to livestock or poultry. The bidder agrees to permit representatives of the Animal Disease Eradication Division of the U.S. Department of Agriculture to make inspections at any time without prior arrangements to determine that the garbage is heat treated in accordance with the provision.

### § 101–45.307–6 Narcotics.

Surplus narcotic drugs which are not required to be destroyed as provided in § 101–45.505, shall, unless otherwise authorized and directed by the Administrator of General Services, be offered for sale by sealed bid in accordance with the provisions of this Subpart 101–45.3: *Provided*, That the following safeguards and instructions also shall be observed:

(a) Effort shall be made to limit the distribution of any sales offering of narcotic drugs to registered manufacturers of narcotic drugs.

(b) The sales offering shall include the following special conditions of sale:

Any bid for any of the items included in this offering will be rejected unless the bidder signs the following certification on all copies of the bid submitted by him as a condition of any award and sale to him of such items: The undersigned represents and warrants that he is registered under the Federal Narcotics Laws and is authorized by Law and by the Bureau of Narcotics, Department of the Treasury, as a manufacturer of narcotic drugs. No award will be made and no sale will be consummated pursuant to this offering until after this agency has obtained from the Bureau of Narcotics, Department of the Treasury, confirmation in writing of the authority of the bidder to manufacture narcotic drugs, and approval of the award as to type and quantity proposed for sale to one buyer.

(c) As a condition precedent to the making of an award pursuant to a sales offering of narcotic drugs, the holding agency shall submit the following to the Department of the Treasury, Bureau of Narcotics, Washington, D.C., 20226:

(1) The name of the bidder to whom the sale is proposed to be made;

(2) The name of the holding agency and the name and address of the selling activity;

(3) A description of the narcotic drugs and how packaged and the quantity of such drugs proposed to be sold to the bidder referred to in subparagraph (1) of this paragraph;

(4) The acquisition cost of the narcotic drugs proposed to be sold;

(5) Identification of the sale offering by its number; and

(6) A request for advice as to whether the bidder named in subparagraph (1) of this paragraph is authorized by law to manufacture narcotic drugs and whether there are any objections to the proposed sale.

### § 101–45.307–7 Vehicles.

(a) Pursuant to § 101–26.501–7, executive agencies desiring to apply the proceeds from the sale of used vehicles to the purchase of new ones may sell the used vehicles or request GSA to sell them.

(b) Agency requests to GSA to sell used vehicles, which are to be replaced, shall be in memorandum form and directed to the attention of the Utilization and Disposal Service at the GSA regional office for the geographical area in which the used vehicles are located. The following information regarding each vehicle should be furnished with such request: Type, make, year, model, accessories (defroster, heater, etc.), engine number, serial number, license number, mileage, condition, acquisition cost, location, name and telephone number of the custodian, the date when each used vehicle will be available for release, and the date from which storage charges, if any, will be required to be paid by the purchaser and the rate charged for such storage. In addition, the owning agency should identify the accountable officer by name, station, and symbol, and indicate the symbol of the appropriation to be credited with the proceeds of sale.

(c) Copies of invitations for bids for the sale of such used vehicles will be furnished to the owning agency for distribution to local prospective bidders. When the vehicles have been sold, the GSA regional office will furnish the owning agency with pertinent information regarding the sale, including the name and address of the purchaser, and the amount received for each vehicle.

**§ 101–45.308 Antitrust laws.**

Whenever any holding agency shall propose to make an award to any private interest of personal property with an acquisition cost to the Government of $3,000,000 or more, or of a patent, process, technique, or invention, irrespective of cost, the agency shall promptly notify the Attorney General and the Administrator of General Services, simultaneously, of the proposed disposal and the probable terms and conditions thereof. Upon request by the Attorney General, the agency shall furnish or cause to be furnished to the Attorney General such additional information as the agency may possess concerning the proposed disposition. The Attorney General will advise the agency and the Administrator of General Services within a reasonable time, in no event to exceed 60 days after receipt of such notification, whether, so far as he can determine, the proposed disposition would tend to create or maintain a situation inconsistent with the antitrust laws. The holding agency shall not effect disposition until it has received such advice. The holding agency shall include in the notification transmitted to the Attorney General and the Administrator of General Services, the following information:

(a) Location and description of property (specifying the tonnage, if scrap).

(b) Proposed sale price of property (explaining the circumstances, if proposed purchaser was not highest bidder).

(c) Acquisition cost of property to Government.

(d) Manner of sale, indicating whether by:

(1) Sealed bid (specifying numbers of purchasers solicited and bids received);

(2) Auction or spot bid (stating how sale was advertised); or

(3) Negotiation (explaining why property was not offered for sale by competitive bid).

(e) Proposed purchaser's name, address, and trade name (if any) under which it is doing business.

(f) If a corporation, give name of State and date of incorporation, and name and address of:

(1) Each holder of 25 percent or more of the corporate stock;

(2) Each subsidiary; and

(3) Each company under common control with proposed purchaser.

(g) If a partnership, give:

(1) Name and address of each partner;

(2) Other business connections of each partner.

(h) Nature of proposed purchaser's business, indicating whether its scope is local, statewide, regional, or national.

(i) Estimated dollar sales volume of proposed purchaser (as of latest calendar or fiscal year).

(j) Estimated net worth of proposed purchaser.

(k) Proposed purchaser's intended use of property.

**§ 101–45.309 Assistance in controlling unauthorized transport of property.**

In order to help alleviate the problems associated with unauthorized transport of property sold by the Government, and to assist the Interstate Commerce Commission in improving control of transportation for hire, the following information shall be made known to all purchasers and shall be included as a "Special Instruction to Bidders" in all formal invitations requesting bids or offers for the sale of personal property:

**Attention is invited to the fact that the Interstate Commerce Act makes it unlawful for anyone other than those duly authorized pursuant to that Act to transport this property in interstate commerce for hire. Anyone aiding or abetting in such violation is a principal in committing the offense (49 U.S.C. 301–327 and 18 U.S.C. 2).**

**§ 101–45.310 Auctioneers.**

**§ 101–45.310–1 General.**

This section prescribes policy and procedure governing the qualification, inactivation, and debarment of auctioneers in connection with the sale of Government-owned personal property by the auction method of sale. The List of Auctioneers Qualified to Sell Government-owned Personal Property, described in § 101–45.310–3, will be maintained by GSA and shall be used by all executive agencies in the selection of private auctioneers to sell Government-owned personal property, except that an executive agency may elect to use an employee competent to conduct an auction sale.

**§ 101–45.310–2 Responsibilities.**

(a) *General Services Administration.* GSA will perform the following services for executive agencies:

(1) Establish and maintain a List of Auctioneers Qualified to Sell Government-owned Personal Property.

(2) Solicit auctioneer applications for qualifications.

(3) Examine and report upon auctioneer applications.

(4) Provide background and resource data on auctioneers to interested executive agencies.

(b) *Other agencies.* Each executive agency utilizing private auctioneer services shall:

(1) Establish internal procedures and methods for giving effect to this § 101–45.310.

(2) Notify GSA of the name and address of its office(s) where auctioneer information should be sent.

(3) When applicable, formally recommend placement in inactive status of auctioneers on the list to GSA through appropriate channels and in accordance with instructions contained in this section.

(4) As needed, participate with GSA incident to any appropriate appeal by an auctioneer for whom inactivation action was proposed or taken.

(5) As needed, request directly from GSA copies of any notices on any auctioneer inactivation cases.

**(6) Classify and treat all actions incident to potential or actual auctioneer inactivation, except voluntary inactivation, as administratively confidential and for official use only.**

**§ 101–45.310–3 List of Auctioneers Qualified to Sell Government-owned Personal Property.**

GSA maintains a List of Auctioneers Qualified to Sell Government-owned Personal Property (referred to hereafter in this section as the "List") for the use of executive agencies. This List contains the names of auctioneers who are qualified to conduct sales of Government-owned personal property, the date of their most recent qualification, and rating codes which indicate special qualifications as to the size of the sale and the category(ies) of property they may sell, and the geographical areas in which they may conduct auction sales. (The rating codes are described in § 101–45.4916.) Interim notices will be issued by GSA between issuances of the List whenever necessary to keep agencies currently informed as to newly qualified, inactivated, debarred, and reinstated auctioneers. Upon request of an agency, the List and any related interim notices will be sent directly to the activities designated by such agency. Like information also is available normally at all GSA regional offices.

**§ 101–45.310–4 Solicitation of bids for auctioneer services.**

(a) *Bids from auctioneers on List.* An executive agency having need for auctioneering services shall solicit bids from those auctioneers on the List who have qualified to: (1) Conduct the type of sale contemplated, (2) sell property in the category of the property involved, and (3) sell property in the geographical location in which the sale is to be made. Generally, bids shall be solicited through the medium of advertising. In such cases, each qualified bidder on the List shall be afforded an opportunity to submit a bid. A contract for auctioneering services may be negotiated only in particular cases where negotiation is authorized by statute, and in such cases proposals shall be solicited from among those qualified auctioneers on the List.

(b) *Bids from auctioneers not on the List.* When a bid is received from an auctioneer whose name is not on the List, the executive agency (or subdivision thereof) receiving such a bid shall communicate immediately and directly with the General Services Administration, Utilization and Disposal Service, Sales Division, Washington, D.C., 20405, to determine the qualification status (if any) of such bidder. The organization requesting such information shall provide the bidder's name and address, the identification of the sale for which he submitted a bid, and the time of the bid opening. If the bidder qualifies prior to the time specified for opening of bids, GSA will so notify the requesting organization prior to such bid opening. In such case, that organization shall consider the bid of the newly qualified auctioneer. If that organization is not so notified, it shall not consider the auctioneer's bid.

(c) *Standardization in bids.* In soliciting competitive bids to conduct auction services, the conditions incident to such solicitation shall be standardized so as to provide a fair and equal competitive opportunity to all interested bidders. When the auctioneer's compensation is to be by a commission fee based upon the expected gross sales proceeds, all competing auctioneers shall be requested to submit a single, flat percentage figure bid based on such proceeds. All invitations for bids or proposals shall include the following specific information:

(1) That award cannot be made to auctioneers who are not on the List of Auctioneers Qualified to Sell Government-owned Personal Property, or who do not qualify for such List prior to the time of the bid opening.

(2) That application forms to qualify for such List may be obtained from the Central Office or any regional office of GSA.

**§ 101–45.310–5 Inactivation of auctioneers.**

(a) *Action to inactivate.* Action to inactivate an auctioneer may be initiated either by GSA or by an executive agency. Inactivation will be effected by GSA and will be based upon the criteria prescribed in § 101–45.310–5(b). Whenever an auctioneer is recommended formally for inactivation, in the absence of special circumstances, GSA will notify the selling agencies. Agencies, so notified, shall not thereafter entertain bids for auction services from such auctioneer until further notice from GSA.

(b) *Criteria for inactivation.* An auctioneer may be placed in inactive status by GSA whenever:

(1) His local license is revoked for cause and not reinstated;

(2) He fails to maintain adequate financial responsibility;

(3) He fails to conduct his services in accordance with recognized ethical standards;

(4) He performs services in a substandard or ineffective manner;

(5) He acts in a manner seriously prejudicial to the best interest of the Government; or

(6) He has been debarred by a contracting agency as provided for in § 101–45.310–6.

(c) *Periods of inactive status.* (1) An auctioneer recommended for inactive status will be inactivated by GSA for such period, if any, as may be deemed appropriate under the circumstances. The executive agency recommending placement in inactive status shall suggest the length of the period of the proposed inactivation. In the event that inactivation is directed by GSA pending review of the case, the notification directing such action will clearly specify that it was ordered mefely as an incident to the review.

(2) The period of inactive status of an auctioneer will be for a reasonable length of time commensurate with the seriousness of the offense. No auctioneer will be placed in inactive status for a period in excess of two years for a single offense other than that resulting in debarment, in which case the maximum period will not exceed three years: *Provided*, That there will not be a time limitation for inactivation which resulted from revocation for cause of an auctioneer's local license without reinstatement.

(3) Reinstatement will be accomplished by GSA under policies and procedures established by it.

**§ 101–45.310–6 Debarment of auctioneers.**

(a) *General.* Where the auctioneer has engaged in grossly improper conduct, such as would be covered in § 101–45.310–6(b), in addition to being placed in an inactive status, steps may be taken by the interested contracting agency for debarment of such auctioneer in accordance with applicable regulations. In appropriate instances, the Administrator of General Services may recommend to the interested contracting agency that action be initiated to effect debarment.

(b) *Causes.* Any of the following causes is considered justification for initiating a recommendation to debar:

(1) Conviction for commission of a criminal offense as an incident to obtaining a contract or in an attempt to obtain a contract or in the performance thereof.

(2) Conviction under the Federal Antitrust Statute arising out of the submission of bids or proposals.

(3) Violation of contract provisions, as set forth in this subparagraph, of a character which is regarded by the agency involved to be so serious as to justify debarment action:

(i) Willful failure to perform in accordance with the specifications or within the time limit provided in the contract.

(ii) A history of unsatisfactory performance of one or more Government contracts.

(iii) Violation of the contractual provision against contingent fees.

(iv) Acceptance of a contingent fee which is paid in violation of contractual provisions against contingent fees.

(4) Debarment by some other executive agency.

**§ 101–45.310–7 Report on auctioneer services.**

Whenever an executive agency considers the services of an auctioneer to be other than satisfactory or receives information having a bearing on the qualifications of an auctioneer to be continued on the List, such agency shall furnish an administratively confidential report thereon to the Administrator of General Services.

**§ 101–45.311 Procedures and forms concerning contingent or other fees for soliciting or securing contracts.**

**§ 101–45.311–1 Purpose.**

For the purpose of promoting uniformity among executive agencies with respect to the required use of the "covenant against contingent fees" and with respect to the procedure for obtaining information concerning contingent or other fees paid by contractors for soliciting and securing Government contracts, the Department of Defense and GSA have developed cooperatively and agreed upon the required use of the "covenant against contingent fees" and the form, procedure, principles, and standards described in this section.

**§ 101–45.311–2 Objectives and methods.**

(a) *Objectives.* The requirements of section 101–45.311 have as their objective the prevention of improper influence in connection with the obtaining of Government contracts, the elimination of arrangements which encourage the payment of inequitable and exorbitant fees bearing no reasonable relationship to the services actually performed, and prevention of the reduction in return to the Government which inevitably results therefrom. Improper influence means influence, direct or indirect, which induces or intends to induce consideration or action by any employee or officer of the United States with respect to any Government contract on any basis other than the merits of the matter.

(b) *Methods.* The methods used to achieve the above objectives stated in paragraph (a) of this section are the requirement for disclosure of the details of arrangements under which agents represent concerns in obtaining Government contracts, and the prohibiting, by use of the covenant against contingent fees, of certain types of contractor-agent arrangements. The Criminal Code will apply in any case involving actual criminal conduct.

**§ 101–45.311–3 Representation and covenant.**

(a) *Representation.* Except as provided in § 101–45.311–7, each executive agency shall inquire of and secure a written representation from prospective purchasers as to whether they have employed

or retained any company or person (other than a full-time employee working solely for the prospective purchaser) to solicit or secure the contract, and shall secure a written agreement to furnish information relating thereto as required by the contracting officer. The form of such representation shall be that contained in Standard Form 114–A, Sale of Government Property—Bid and Award (illustrated in § 101–45.4902).

(b) *Covenant.* Executive agencies shall include in every negotiated or advertised contract for the sale of Government-owned personal property the "covenant against contingent fees" as contained in the Standard Form 114C, General Sale Terms and Conditions (illustrated in § 101–45.4904).

**§ 101–45.311–4 General principles and standards applicable to the covenant.**

(a) *Use of principles and standards.* The principles and standards set forth in this § 101–45.311–4 are intended to be used as a guide in the negotiation, awarding, administration, or enforcement of Government contracts.

(b) *Contingent character of the fee.* Any fee whether called commission, percentage, brokerage, or contingent fee, or otherwise denominated, is within the purview of the covenant if, in fact, any portion thereof is dependent upon success in obtaining or securing the Government contract or contracts involved. The fact, however, that a fee of a contingent nature is involved does not preclude a relationship which qualifies under the exceptions to the prohibition of the covenant.

(c) *Exceptions to the prohibition.* There are excepted from the prohibition of the covenant "bona fide employees" and "bona fide established commercial or selling agencies maintained by the contractor for the purpose of securing business."

(d) *Bona fide employee.* (1) The term "bona fide employee," for the purpose of the exception to the prohibition of the covenant, means an individual (including a corporate officer) employed by a concern in good faith to devote his full time to such concern and no other concern and over whom the concern has the right to exercise supervision and control as to time, place, and manner of performance of work.

NOTE: It is recognized that a concern, especially a small business concern, may employ an individual who represents other concerns. The factors set forth in § 101–45.311–4(c)(2), except (iv), shall be applied to determine whether such an individual comes within the exception to the prohibition of the covenant.

(2) The hiring must contemplate some continuity and it may not be related only to the obtaining of one or more specific Government contracts.

(3) An employee is not "bona fide" who seeks to obtain any Government contract or contracts for his employer through the use of improper influence or who holds himself out as being able to obtain any Government contract or contracts through improper influence.

(4) A person may be a bona fide employee whether his compensation is on a fixed salary basis, or when customary in the trade, on a percentage, commission, or other contingent basis or a combination of the foregoing.

(e) *Bona fide established commercial or selling agency maintained by the contractor for the purpose of securing business.* (1) An agency or agent is not "bona fide" which seeks to obtain any Government contract or contracts for its principals through the use of improper influence or which holds itself out as being able to obtain any Government contract or contracts through improper influence.

(2) In determining whether an agency is a "bona fide established commercial or selling agency maintained by the contractor for the purpose of securing business," the factors set forth below shall be considered. They are necessarily incapable of exact measurement or precise definition and it is neither possible nor desirable to prescribe the relative weight to be given any single factor as against any other factor or as against all other factors. The conclusions to be reached in a given case will necessarily depend upon a careful evaluation of the agreement and other attendant facts and circumstances.

(i) The fees charged should not be inequitable and exorbitant in relation to the services actually rendered. That is, the compensation should be commensurate with the nature and extent of the services and should not be excessive as compared with the fees customarily allowed in the trade concerned for similar services related to commercial (non-Government) business. In evaluating reasonableness of the fee, there should be considered services of the agent other than actual solicitation, as for example, technical, consultant, or managerial services, and assistance in the procurement of essential personnel, facilities, equipment, materials, or subcontractors for performance of the contract.

(ii) The selling agency should have adequate knowledge of the products and the business of the concern represented, as well as other qualifications necessary to sell the products or services on their merits.

(iii) There should ordinarily be a continuity of relationship between the contractor and the agency. The fact that the agency has represented the contractor over a considerable period of time is a factor for favorable consideration. It is not intended, however, to disqualify newly established contractor-agent relationships where a continuing relationship is contemplated by the parties.

(iv) It should appear that the agency is an established concern. The agency may be either one which has been in business for a considerable period of time or a new agency which is a presently going concern and which is likely to continue in business as a commercial or selling agency in the future. The business of the agency should be conducted in the agency name and characterized by the customary indicia of the conduct of a regular business.

(v) The fact that a selling agency confines its selling activities to the field of Government contracts does not, in and of itself, disqualify it under the covenant. The fact, however, that the selling agency is employed to secure business generally, that is, to represent the concern in connection with sales to the Government as well as regular commercial sales to non-Government activities is a factor entitled to favorable consideration in evaluating the case as one coming within the authorized exception. Arrangements confined, however, to obtaining Government contracts, particularly those involving a selling agency organized immediately prior to or during periods of expanded procurement resulting from conditions of national emergency, must be closely scrutinized.

(f) *Fees for "information."* Contingent fees paid for "information" leading to obtaining a Government contract or contracts are included in the prohibition and, accordingly, are in breach of the covenant unless the agent qualifies under the exception as a bona fide employee or a bona fide established commercial or selling agency maintained by the contractor for the purpose of securing business.

**§ 101–45.311–5 Standard Form 119.**

Pursuant to the Act and in furtherance of the purpose and objectives stated in sections 1 and 3 thereof, Standard Form 119, Contractor's Statement of Contingent or Other Fees for Soliciting or Securing or Resulting From Award of Contract, shall be used in accordance with the provisions of section 101–45.311.

**§ 101–45.311–6 Use of Standard Form 119.**

(a) *Required use.* Except as provided in § 101–45.311–7, Standard Form 119 shall be used, without deviation, by executive agencies whenever either part of the inquiry provided for in § 101–45.311–3(a) with respect to contingent fees is answered in the affirmative. The form shall be used also, without deviation, in any other case where an executive agency desires to obtain such information. When, after use of the form, further information is required, it may be obtained in any appropriate manner. Submission of the form shall be required, normally, only of successful bidders and contractors.

(b) *Statement in lieu of form.* Any bidder who has previously furnished a Standard Form 119 to the office issuing the invitation or negotiating the contract may be permitted to accompany his bid with, or submit in connection with the proposed contract, a signed statement indicating when such completed form was previously furnished, identifying by number the previous invitation or contract in connection with which such form was submitted; and representing that the statements in such previously furnished form are applicable to such subsequent bid or contract. In such case, submission of an additional completed Standard Form 119 need not be required.

**§ 101–45.311–7 Exceptions.**

The inquiry and agreement specified in § 101–45.311–3(a) need not be made and submission of Standard Form 119 need not be requested in connection with any of the following:

(a) Any advertised contract in which the aggregate amount involved does not exceed $25,000.

(b) Any negotiated contract in which the aggregate amount involved does not exceed, in the case of the Department of Defense, $5,000; in all other cases, $1,000.

(c) Contracts to be made in foreign countries.

(d) Any other contracts, individually or by class, of the Department of Defense, designated by the Secretary, Under Secretary, or Assistant Secretary of a military department. (Reports of any such exceptions shall be filed promptly with the Administrator of General Services.)

**§ 101–45.311–8 Enforcement.**

(a) *Failure or refusal to furnish representation and agreement.* Each executive agency shall take the necessary steps to assure that the indicated successful bidder or proposed contractor has furnished a representation (negative or affirmative) and agreement as prescribed in § 101–45.311–3.

(1) If the indicated successful bidder makes such representation in the negative, such representation may be accepted and award made or offer accepted in accordance with established procedure.

(2) If the indicated successful bidder or proposed contractor makes such representation in the affirmative, a completed Standard Form 119 shall be requested from the bidder or proposed contractor. In the case of formal advertising, the making of an award in accordance with established procedure need not be delayed pending receipt of the form. In the case of negotiation, if the proposed contractor makes such representation in the affirmative, he shall be required to file a completed Standard Form 119 prior to acceptance of the offer or execution of the contract unless the head of the executive agency (including, for this purpose, any military department) concerned, or his authorized representative, considers that the interest of the Government will be prejudiced by the suspension of negotiations pending receipt and consideration of an executed Standard Form 119.

(3) If the indicated successful bidder or proposed contractor fails to furnish the representation and agreement, such failure shall be considered a minor informality and, prior to award, such bidder or proposed contractor shall be afforded a further opportunity to furnish such representation and agreement. A refusal or failure to furnish such representation and agreement, after such opportunity has been afforded, shall require rejection of the bid or offer.

(b) *Failure or refusal to furnish Standard Form 119.* If the successful bidder or contractor, upon request, refuses or fails to furnish a completed Standard Form 119, or a statement in lieu thereof as provided in § 101–45.311–6, the executive agency concerned shall take one or more of the following actions, or other action, as may be appropriate:

(1) If an award has not been made or offer accepted, determine whether the bid or offer should be rejected.

(2) If the contract has been awarded or the offer accepted, determine what action shall be taken, such as making an independent investigation or considering the eligibility of the contractor as a future contractor in accordance with established procedure.

(c) *Misrepresentations or violations of the covenant against contingent fees.* In case of misrepresentation, or violation or breach of the covenant against contingent fees, or some other relevant impropriety, the executive agency concerned shall take one or more of the following actions, or other action, as may be appropriate:

(1) If an award has not been made, or offer has not been accepted, determine whether the bid or offer should be rejected.

(2) If an award has been made or offer has been accepted, take action to enforce the covenant in accordance with its terms, that is, as the best interests of the Government may appear, annul the contract without liability or recover the amount of the fee involved.

(3) Consider the future eligibility as a contractor of the bidder or contractor in accordance with established procedure.

(4) Determine whether the case should be referred to the Department of Justice in accordance with established procedure with respect to determining matters of fraud or criminal conduct.

**§ 101–45.311–9 Preservation of records.**

Executive agencies shall preserve, for enforcement or report purposes, at least one executed copy of any representation and completed Standard Form 119, together with a record of any other pertinent data, including data as to action taken.

**§ 101–45.312 Federal excise taxes.**

Federal manufacturers' and retailers' excise taxes are not applicable to the sale or other disposal by the Government of personal property or the disposal of contractor inventory. Federal manufacturers' excise taxes do not apply to subsequent sales, including uses, by purchasers of Government property and contractor inventory. Federal retailers' excise taxes apply to subsequent sales, but not to subsequent uses by the purchasers unless the subsequent sale is made for resale and a certificate of resale is obtained. The foregoing does not apply to gasoline, and holding agencies shall make appropriate arrangements with the Internal Revenue Service with respect to the disposal thereof. Questions relating to the applicability of Federal excise taxes arising from the disposal of property or contractor inventory should be referred to the Internal Revenue Service.

**§ 101–45.313 Nondiscrimination clause in contracts.**

The nondiscrimination clause prescribed by Executive Order No. 10925 of March 6, 1961 (26 F.R. 1977; 3 CFR), as amended by Executive Order No. 11114 of June 22, 1963 (28 F.R. 6485; 3 CFR), shall be included in all contracts providing for the sale of personal property when the contract exceeds $10,000, and an appreciable amount of work by the purchaser is involved (exclusive of normal pickup and delivery of the property as well as related packing and loading). When a sale is planned and the probability exists that the foregoing conditions will be present, the nondiscrimination clause shall be included in the contract provisions of the invitation as a special condition of sale.

**§ 101–45.314 Report on identical bids.**

**§ 101–45.314–1 Governing order.**

Executive Order No. 10936 of April 24, 1961 (26 F.R. 3555; 3 CFR) requires executive agencies to report information on identical bids to the Department of Justice.

**§ 101–45.314–2 Reporting requirements and procedures.**

When an invitation for bids for the sale of personal property results in submission of identical bids under the conditions set forth in this § 101–45.314–2, a copy of the invitation and a copy of the completed abstract of bids, with identical bid prices (other than nominal or token bids) circled, shall be forwarded to the Attorney General, Washington, D.C., Reference AT–IBR, within 20 days following the disposition of all bids received in response to the invitation involved, whether by awarding of contract(s) or other action:

(a) Where bids or offers were solicited through the formal sealed bid method of sale using Standard Form 114 Assembly, Sale of Government Property;

(b) Where the bid value of the line item(s) on which identical bids were received exceeds $2,500 (based on the apparent high bid received for such line item); and

(c) Where the total bid value of all line items covered by the invitation exceeds $10,000 (based on the apparent high bid received for each line item).

**§ 101–45.314–3 Supplemental requests by Attorney General.**

The Attorney General may, from time to time, request such supplemental information as he may deem necessary for effective enforcement of antitrust laws.

**§ 101–45.314–4 Antitrust law referrals.**

The submission of information on identical bids is in addition to and is not to be considered as satisfying the requirements of § 101–45.308, for notifying the Attorney General and the Administrator of General Services regarding proposed disposals which are required to be referred to the Attorney General for antitrust advice.

## Subpart 101–45.4—Disposal of Abandoned and Forfeited Property

### § 101–45.400 Scope of subpart.

This subpart prescribes the policies and methods governing the disposal by Federal agencies of abandoned or forfeited property in their custody or control in the United States, Puerto Rico, and the Virgin Islands.

### § 101–45.401 General.

Property which is not desired by the seizing agency or for which utilization cannot be obtained for any other Federal agency shall be disposed of in accordance with the provisions of this subpart.

### § 101–45.402 Forfeited distilled spirits, wine, and malt beverages.

(a) Forfeited distilled spirits, wine, and malt beverages not required to be reported under § 101–43.322–1(b)(13) shall be destroyed immediately after forfeiture, and those not required to be reported under § 101–43.322–1(b)(14), when not donated as prescribed by Part 101–44, shall also be destroyed immediately.

(b) When reportable forfeited distilled spirits, wine, and malt beverages are not transferred to a Federal agency or disposed of to an eleemosynary institution by GSA, the Regional Administrator, GSA, shall issue clearance to the seizing agency submitting the report prescribed by § 101–43.322, and such spirits shall be destroyed by that agency. A record of the destruction, showing time, place, and quantities destroyed, shall be filed with papers and documents relating to such seizure and forfeiture.

### § 101–45.403 Forfeited firearms.

Forfeited firearms subject to disposal under the Internal Revenue Code of 1954 may not be sold at public sale. Such firearms may be disposed of:

(a) By sale, when so ordered by the Administrator of General Services, to any requesting State or local government at a price to be agreed upon between the holding agency and the buyer; or

(b) For scrap, after total destruction by crushing, cutting, breaking, or deforming (to be performed in a manner to assure that the firearms are rendered completely inoperative and to preclude their being made operative).

### § 101–45.404 Forfeited property other than forfeited firearms.

Subject to disposal under the Internal Revenue Code of 1954.

(a) When an application to the courts for transfer of the property is denied, such property shall be disposed of in accordance with the court decree.

(b) If property has been forfeited other than by court decree and is not ordered by competent authority to be returned to any claimant, and utilization by Federal agencies cannot be effected, the Regional Administrator, GSA, may order it released for sale, except as provided in § 101–45.402.

(c) Abandoned property which, by the provisions of § 101–43.322, is not required to be reported may be sold at any time after three months from the date of abandonment.

(d) Sale shall be by competitive bid as prescribed in Subpart 101–45.3, and the decision as to whether such bidding shall be by sealed bid, spot bid, or auction shall be left to the discretion of the authorized disposal agency.

### § 101–45.405 Disposition of proceeds.

### § 101–45.405–1 Abandoned property.

(a) Proceeds from the sale of abandoned property shall be deposited in a special fund for a period of at least three years. A former owner may be reimbursed from the special fund based upon a proper claim filed within 3 years from the date of vesting of title in the United States as determined by the head of the agency concerned. Such reimbursement shall not exceed the proceeds realized from the disposal of such property less the costs incident to the care and handling of such property, as determined by the head of the agency concerned.

(b) In cases where property has been sold as a part of a lot containing other items and the purchase price for the lot covers items in addition to that for which reimbursement is sought, the proceeds of sale for that portion of the property for which reimbursement is being sought shall be proportionate to the proceeds received for the total lot. In order to assure accuracy in determining proportionate recovery in cases where more than one item has been sold as a lot, all items to be included in a group of items to be sold as one lot shall be listed and appraised in advance of the sale by the disposal official, and his appraisal stated in writing for each item on the list. Such list and appraisal shall be maintained as a part of the permanent file and record of sale until the 3-year period for filing claims has elapsed.

### § 101–45.405–2 Forfeited property.

Proceeds from the sale of property which has been forfeited either summarily or by court decree shall be deposited by the disposal agency in the Treasury of the United States as miscellaneous receipts.

## Subpart 101–45.5—Abandonment or Destruction of Surplus Property

### § 101–45.500 Scope of subpart.

This subpart prescribes the policies and methods governing the disposition by executive agencies of personal property by abandonment or destruction.

### § 101–45.501 Findings justifying abandonment or destruction.

### § 101–45.501–1 General.

Except as to property disposed of under §§ 101–45.504, 101–45.505, and 101–45.506, property shall not be abandoned or destroyed by an executive agency unless it shall have been affirmatively found, in writing, by a duly authorized official of such agency either that (a) such property has no commercial value, or (b) the estimated cost of its continued care and handling would exceed the estimated proceeds from its sale. Such finding shall not be made by any official directly accountable for the property covered thereby.

### § 101–45.501–2 Reviewing authority.

Whenever a line item of the property proposed to be disposed of under this Subpart 101–45.5 at any one location at any one time had an original cost (estimated if not known) of more than $1,000, findings made under § 101–45.501–1 shall be approved by a reviewing authority before any such disposal.

### § 101–45.502 Authority to abandon or destroy.

(a) Property may be abandoned or destroyed by an executive agency in accordance with this Subpart 101–45.5, provided that donation of the property in accordance with Subpart 101–44.5 has been determined, in writing, by a duly authorized official of such agency, not to be feasible.

(b) No abandonment or destruction shall be made in a manner which is detrimental or dangerous to public health or safety, or which will cause infringement of the rights of other persons. If, at any time prior to actual abandonment or destruction, donation of such property pursuant to Subpart 101–44.5 becomes feasible, such donation shall be made.

### § 101–45.503 Notice of proposed abandonment or destruction.

Except as provided in §§ 101–45.504, 101–45.505, and 101–45.506, property shall not be abandoned or destroyed by any executive agency until after public notice of such proposed abandonment or destruction. Such notice shall be given in the area in which the property is located, shall contain a general description of the property to be abandoned or destroyed, and shall include an offering of the property for sale.

### § 101–45.504 Abandonment or destruction without notice.

(a) Property may be abandoned or destroyed by an executive agency without public notice upon a written finding by a duly authorized official thereof, approved by a reviewing authority, that the immediate abandonment or destruction of the property is necessary or desirable in the best public interest because of its nature or because of the expense or difficulty of its care and handling. Such abandonment or destruction would be appropriate whenever:

(1) The value of the property is so little or the cost of its care and handling is so great that its retention for advertising for sale is clearly not economical; or

(2) Abandonment or destruction is required by consideration of health, safety, or security.

(b) Whenever any line item of the property proposed to be abandoned or destroyed at any one location at any one time had an original cost (estimated if not known) of less than $100, it shall be presumed for the purposes of this § 101–45.504 that its immediate abandonment or destruction without notice is justified by reason of the expense or difficulty of its care and handling.

### § 101–45.505 Destruction of surplus narcotics.

(a) Surplus narcotic drugs shall not be abandoned and the following drugs will be destroyed by the holding agency in accordance with the provisions of § 101–45.505 (b) and (c):

(1) Narcotics in a deteriorated condition or otherwise unusable.

(2) Quantities of narcotic drugs determined to be surplus at one time and one place having an acquisition cost of less than $500.

(3) Narcotics which have been offered for sale in accordance with the provisions of § 101–45.307–6, but for which no satisfactory or acceptable bids have been received.

(b) When surplus narcotic drugs are required to be destroyed by the holding agency, they shall be destroyed by an employee of such agency in the following manner:

(1) If soluble, they may be dissolved in water and dissipated through the sewer;

(2) If insoluble, they may be burned;

(3) They may be destroyed in any manner which annihilates the substance as a narcotic drug and precludes the utilization of any portion thereof in any other form of narcotic;

(4) Destruction shall be performed in the presence of two additional employees of the agency as witnesses to such destruction.

(c) When surplus narcotic drugs have been destroyed, the fact, manner, and date of such destruction and the type and quantity so destroyed shall be certified to by the agency employee charged with responsibility for such destruction. The two agency employees who witnessed the destruction shall sign the following statement, which shall appear on the certification below the signature of the certifying employee:

I have witnessed the destruction of the narcotic drugs described in the foregoing certification in the manner and on the date stated herein:

---------- Witness ---------- Date

### § 101–45.506 Abandonment or destruction of expendable property.

Property such as obsolete unclassified navigation charts, electric light bulbs, radio tubes, fuses, resistors, capacitors, air filters, dust cloths, and teletype part replacements, which has been rendered unserviceable, may be abandoned or destroyed without public notice and pursuant to rules, regulations, or instructions prescribed by the executive agency generating the property when accumulation of the property for disposal or rehabilitation is not economical or in the best interest of the Government.

## Subparts 101–45.6—101–45.48 [Reserved]

## Subpart 101–45.49—Illustrations

### § 101–45.4900 Scope of subpart.

This subpart contains illustrations of the forms and formats prescribed in this Part 101–45.

NOTE: The forms in §§ 101–45.4901—101–45.4909, 101–45.4917, and 101–45.4918 filed as part of the original document. Copies may be obtained from Central Office, GSA.

### § 101–45.4901 Standard Form 114, Sale of Government Personal Property.

### § 101–45.4902 Standard Form 114A, Sale of Government Property, Bid and Award.

### § 101–45.4903 Standard Form 114B, Sale of Government Property, Item Bid Page.

### § 101–45.4904 Standard Form 114C, Sale of Government Property, General Terms and Conditions.

### § 101–45.4905 Standard Form 119, Contractors Statement of Contingent or Other Fees.

### § 101–45.4906 Standard Form 150, Deposit Bond—Individual Invitation, Sale of Government Personal Property.

### § 101–45.4907 Standard Form 151, Deposit Bond, Annual, Sale of Government Personal Property.

### § 101–45.4908 Standard Form 28, Affidavit of Individual Surety.

### § 101–45.4909 Optional Form 20, Notice to Surety.

### § 101–45.4910 Instructions for the preparation of advance notice to the Department of Commerce.

1. *Transmittal of notice.* Section 101–45.302–6 provides that when the acquisition cost of personal property to be sold at one time at one place is $250,000 or more, the disposal agency shall cause a notice of each such proposed sale to be transmitted to the U.S. Department of Commerce, Room 1300, 433 West Van Buren Street, Chicago, Ill., 60607.

The notice shall be sent at as early a date as possible in advance of the sale but at least 20 days prior to the date when the bids will be opened, or, in the case of spot bid or auction sale, when the sale will be conducted. Such notice shall be transmitted by fastest mail available and shall be in synopsis form suitable for printing direct from the text so transmitted without editing or condensing.

These notices are for use of the Department of Commerce in making regular publication of a synopsis of principal proposed sales of Government personal property.

2. *Format and content of notice.*

a. *Information to be furnished.* The following information shall be provided in the order listed so as to preserve the format of the Department of Commerce publication: the name of the office which will issue the invitation; the name or title, address, and telephone number of the official from whom copies of the sales offering and other information can be obtained; a description of the property to be sold; when deemed desirable; the total estimated acquisition cost; the number of the invitation or sale; the date of the sale or bid opening, the types of sale, i.e., sealed bid, spot bid, or auction; and the location(s) of the property.

b. *Detailed requirements.* In preparing the notice to the Department of Commerce, the utmost care should be exercised in describing the types of property to be sold in order to assure interest by the maximum number of potential buyers but, at the same time, condense the information so that minimum space in the Department of Commerce publication will be required for printing. While the various kinds of property to be sold should be stated concisely, the names of important items should not be omitted. The following example is provided as a guide, both as to the order in which the information should be given, the extent to which information should be condensed or expanded, depending upon the size of the sale, and the format which, if followed, will facilitate publication without editing. Attention is specially invited to the double spacing, the "hanging" indention, and the length of the line which should be approximately 65, but not to exceed 69, character spaces.

EXAMPLE

GENERAL SERVICES ADMINISTRATION, REGION 8
BUSINESS SERVICES CENTER, BUILDING 41
DENVER FEDERAL CENTER, DENVER, COLORADO

Scrapers, Graders, Street Sweeper, Crawler Tractor, Air compressors, Power Units, Cement Mixer ---------- Total Acquisition Cost $269,850. ---------- Invitation No. 8UPS–62–41. ---------- Bid Opening 11–30–61. ---------- Sealed Bid, Location above.

53. Tractors, warehouse.
54. Tractors, wheeled or crawler, with or without special attachments, up to 65 h.p.
55. Tractors, wheeled or crawler, with or without special attachments, 65 h.p. and up.
56. Trailers, general purpose, multiple axle.
57. Trailers, general purpose single axle.
58. Trailers, industrial.
59. Trailers, special purpose (including fire pumper and Bean type sprayer and crash trailer).
60. Trailers, tank mounted.
61. Trucks, electronic.
62. Trucks, fire.
63. Trucks, fork lift.
64. Trucks, general purpose, cargo and construction 12,500 GVW through 28,000 GVW (including truck tractors, dump, multiple drive, etc).
65. Trucks, general purpose and utility up to 12,500 GVW (including suburbans, carryalls and sedan deliveries).
66. Trucks, straddle.
67. Trucks, tank (special purpose trailer of which the tank is an integral part of the construction).
68. Trucks, warehouse, platform, electric and gasoline powered.
69. Typewriter, manual and electric.

### § 101–45.4912 Sample format-irrevocable letter of credit.

(NAME AND ADDRESS OF BANK ISSUING LETTER OF CREDIT)

(Date)

(Number of Letter of Credit and Reference)

TREASURER OF THE UNITED STATES

Washington, D.C. 20220

Dear Madam:

We hereby establish our irrevocable credit No. -------- in your favor by order and for account of (name of company submitting bid) up to an aggregate amount of $---------- available by demand drafts drawn on us by a representative of (specify agencies to which directed: e.g., Department of the Army, Department of the Air Force, General Services Administration). Drafts must be accompanied by a written statement of the interested agency that the amount drawn under this credit represents (1) the deposit required as a guarantee to support an acceptable bid made by (name of bidder) to purchase material from the Government, or (2) payment in full for the property. Drafts drawn under this credit must be marked "drawn under letter of credit No. -------- of (name and address of issuing bank)."

Unless otherwise expressly stated herein, this credit is subject to the uniform customs and practice for commercial documentary credits fixed by the 13th Congress of the International Chamber of Commerce. We hereby agree with you that the drafts drawn under and in compliance with the terms of this credit shall be duly honored on due presentation to the (name of the bank) is presented on or before ----------

Very truly yours,

(Authorized signature of bank official)

### § 101–45.4913 General instructions for preparation of irrevocable letter of credit.

Use either clause (1) or (2) of § 101–45.4912, as applicable.

Some banks use language which varies from that shown in § 101–45.4912. Variations from the prescribed text may be permitted if the meaning of the letter of credit prepared by the bank is the same. Each of the paragraphs of the prescribed letter of credit is an essential part of the agreement. No paragraphs shall be added and none shall be deleted.

A letter of credit may be addressed to a specific department or agency instead of "Treasurer of the United States." Letters of credit of this type shall be addressed to the head of the agency or department, as the Secretary of the Army, or the Administrator of General Services. Should this be done, the words "Treasurer of the United States for the account of" shall be deleted from the draft drawn under the letter of credit.

Each letter of credit must be clearly irrevocable and is not acceptable if the expiration date stated therein is less than 30 days from the date of the sale at which it is used.

### § 101–45.4914 Sample format—draft drawn against irrevocable letter of credit.

FORM OF DRAFT

$---------- Date----------

At sight pay to the order of Treasurer of the United States for the account of (specify name of department or agency). ---------- dollars and ---------- cents for value received—drawn under letter of credit No. ------ of ----------

---

(Name and address of issuing bank)

To (name and address of bank)

(Name of office—finance or disbursing—and activity of department or agency by which draft is issued.)

By ----------

Title ----------

Date ----------

NOTE: If the letter of credit is addressed to a department or agency rather than the Treasurer, omit the words "Treasurer of the United States for the account of," and in lieu thereof insert the name of the particular department or agency or installation or office thereof.

### § 101–45.4915 Sample format transmittal letter to accompany letter of credit.

OFFICIAL LETTERHEAD

TO: Name of bank (same as on L/C).

Gentlemen:

This is to certify that on ----------, 196--, at a sale held by the (insert the name of the department or agency) at (insert location) the (insert name and address of company) submitted acceptable bids for property at sales price of $----------.

The amount of the accompanying draft, $----------, drawn under letter of credit No. ------ represents (1) the deposit of ------% of the sales price required as a guarantee to support the acceptable bid made by (insert name of company) to purchase material from the Government, or (2) payment in full for the property on which (insert name of company) submitted acceptable bids.

(Name of office—finance or disbursing—and activity of department or agency to which check is to be forwarded.)

By ----------

Title ----------

Date ----------

NOTE: Strike out the clause in the second paragraph which is not applicable.

### § 101–45.4916 Rating code of qualified auctioneers.

1. *General.* Codes appearing in connection with names of auctioneers on the list of Auctioneers Qualified to Sell Government-Owned Personal Property have the meanings set forth in 2., 3., and 4., below.

2. *Experience.* Codes under this heading represent qualifications with respect to general or limited experience in conducting auctions.

| *Code* | *Experience* |
|---|---|
| E | Meets the following minimum auction experience standards: |

a. Has conducted satisfactorily at least five auctions within the past three years in which the gross sales proceeds of the property sold at each sale exceeded $50,000.

b. Has conducted satisfactorily auctions for a period of five years or more in the aggregate as an auctioneer.

c. Has available experienced and qualified manpower resources needed to meet the normal auction service requirements of an executive agency. (Experienced and qualified manpower resources normally would include: One principal and one alternate auction crier with experience contemplated in paragraph a. above; two or more floor demonstrators, each with at least twenty-five man days of experience in each of the past two years in the usual responsibilities for such assistants. The alternate auction crier may qualify and serve as one of the two floor demonstrators minimally required. Such principals and demonstrators normally should have had at least two years' service in auctioning property with the applicant firm or with a firm of reputable auctioneers. Normal auction service for an executive agency in this classification shall be construed to mean all that is implicit to accommodate the conduct of a one-day auction of approximately 300 lots of commercial-type items, the gross sales proceeds of which would exceed $50,000.)

| | |
|---|---|
| L | Meets the following minimum auction experience standards: |

a. Has conducted satisfactorily at least five auctions within the past three years in which the gross sales proceeds of the property sold at each sale exceeded $25,000.

b. Has conducted satisfactorily auctions for a period of three years or more in the aggregate.

c. Has available experienced and qualified manpower resources, actual or reserve, committed to meet normal auction service requirements of an executive agency. (Experienced and qualified manpower resources normally would include: One principal and one alternate auction crier with experience contemplated in paragraph a. above; two or more floor demonstrators, each with at least twenty-five man days of experience in each of the past two years in the usual responsibilities for such assistants. The alternate auction crier may qualify and serve as one of the two floor demonstrators minimally required. Such principals and demonstrators normally should have had at least two years' service in auctioning property with the applicant firm or with a firm of reputable auctioneers. Normal auction service for an executive agency in this classification shall be construed to mean all that is implicit to accommodate the conduct of a one-day auction of approximately 300 lots of commercial-type items, the gross sales proceeds of which would exceed $25,000.)

3. *Property Category.* Codes under this heading represent general and/or special property categories of which an auctioneer has special knowledge or experience.

| *Code* | *Experience* |
|---|---|
| G | Indicating general qualifications to auction commercial-type personal property (e.g. the following Federal Supply Classification Groups normally typify the property in point: 22–26, 32, 37–42, 44–49, 51–56, 61–63, 71–81, 85, 87, 89, and 91). |
| S | Indicating specific qualification to auction one or more specialized categories of personal property of frequent incidence in the total of Federal auctions (property types to be determined and identified parenthetically following the code symbol "S", e.g. S (Textiles); S (machine tools); S (automotive parts). |

4. *Geographical Area.* Codes under this heading represent geographical areas in which an auctioneer may serve.

| *Code (State and territory abbreviations)* | *Geographical area* |
|---|---|
| U.S. | Any State in continental United States |
| I | States in GSA Region 1 |
| II | States in GSA Region 2 |
| III | States in GSA Region 3 |
| IV | States in GSA Region 4 |
| V | States in GSA Region 5 |
| VI | States in GSA Region 6 |
| VII | States in GSA Region 7 |
| VIII | States in GSA Region 8 |
| IX | States in GSA Region 9 |
| X | States in GSA Region 10 |

(For those States and Territories in which auctioneer may serve, other than as coded above.)

### § 101–45.4917 Standard Form 114, sample assembly for sales of government property.

### § 101–45.4918 Standard Form 114A, sample assembly for sales of government property.

§ 101–45.4919 Outline for preparation of explanatory statement relative to negotiated sales.

The following outline shall be used for the preparation of explanatory statements relative to negotiated sales:

EXPLANATORY STATEMENT OF PROPOSED NEGOTIATED DISPOSAL OF SURPLUS PERSONAL PROPERTY SUBMITTED PURSUANT TO THE PROVISIONS OF SECTION 203(e)(6) OF THE FEDERAL PROPERTY AND ADMINISTRATIVE SERVICES ACT OF 1949

*Description of property:* (including quantity and condition).

*Location:*

*Reported excess by:* (name of agency and date).

*Acquisition cost and date:* (If not known, estimate and so indicate).

*Income:* (All income known to the holding agency, if any, received by the Government for use of the property).

*Estimated fair market value:* (Including date of estimate and name of estimator).

*Proposed disposal price:*

*Proposed purchaser:* (name and address).

*Justification:* (a narrative statement containing complete justification for the proposed sale and other pertinent facts involved in the Government's decision to sell by negotiation).

*Effective date.* These regulations are effective December 15, 1964.

Dated: November 17, 1964.

LAWSON B. KNOTT, JR.,
*Acting Administrator of General Services.*

**Announcing a New Statutory Citations Guide**

**HOW TO FIND U.S. STATUTES and U.S. CODE CITATIONS**

This pamphlet contains typical legal reference situations which require further citing. Official published volumes in which the citations may be found are shown alongside each reference—with suggestions as to the logical sequence to follow in using them to make the search. Additional finding aids, some especially useful in citing current material, also have been included. Examples are furnished at pertinent points and a list of reference titles, with descriptions, is carried at the end.

## Title 32—NATIONAL DEFENSE

### Chapter VI—Department of the Navy

SUBCHAPTER C—PERSONNEL

### PART 710—PROCEDURES AND REQUIREMENTS FOR APPOINTMENT AS A MIDSHIPMAN AT THE UNITED STATES NAVAL ACADEMY

*Scope and purpose.* Part 710 is revised to conform with the U.S. Naval Academy Admissions Regulations, 1965, NAVPERS 15010, prescribing the procedures and requirements for admission as midshipman to the U.S. Naval Academy, Annapolis, Md., in 1965. The regulations are subject to change through legislation or to meet the varying requirements of the Navy.

Part 710 is revised to read as follows:

Sec.

Subpart A—General

- 710.11 Life of a career naval officer.
- 710.12 Midshipmen at the U.S. Naval Academy.
- 710.13 Service obligation for enlisted and other candidates appointed as midshipmen.
- 710.14 Engagement to serve.
- 710.15 Entrance date.

Subpart B—Nominations

- 710.21 General.
- 710.22 Types of nominations.
- 710.22-1 Congressional.
- 710.22-2 Vice Presidential.
- 710.22-3 District of Columbia.
- 710.22-4 Governors of Puerto Rico, the Canal Zone, the Virgin Islands, Guam, and American Samoa.
- 710.22-5 Presidential.
- 710.22-6 Regular Navy and Marine Corps.
- 710.22-7 Naval Reserve and Marine Corps Reserve.
- 710.22-8 Sons of deceased veterans.
- 710.22-9 Honor naval and military schools.
- 710.22-10 Naval Reserve Officers Training Corps (contract students only).
- 710.22-11 Sons of Medal of Honor winners.
- 710.23 Qualified alternates and competitors.
- 710.23-1 General.
- 710.24 Foreign students.
- 710.24-1 Republic of the Philippines.
- 710.24-2 American Republics other than the United States.
- 710.25 Nominating methods.
- 710.25-1 Congressional.
- 710.25-2 Other categories.
- 710.25-3 Nominating schedule.
- 710.26 Civil Service Commission examination for Congressional nominations.

Subpart C—Qualifications for Admission

- 710.31 General requirements.
- 710.31-1 Citizenship.
- 710.32-2 Age.
- 710.31-3 Marriage.
- 710.31-4 Moral character.
- 710.32 Scholastic requirements.
- 710.32-1 Submission of scholastic records.
- 710.32-2 Acceptable secondary school certificate.
- 710.32-3 Examination method.
- 710.32-4 College certificate method.
- 710.32-5 Qualified in previous year.
- 710.33 Medical and physical requirements.
- 710.33-1 General.
- 710.33-2 Medical and physical aptitude examinations.
- 710.33-3 Review and waiver procedure.

Subpart D—Appendices

- 710.41 Appendix I—Entrance procedure, equipment, and pay.
- 710.42 Appendix II—Foreign students.
- 710.43 Appendix III—Medical disqualification factors.
- 710.44 Appendix IV—Medical activities administering qualifying medical examinations for the U.S. Naval Academy.
- 710.45 Appendix V—Course of instruction.
- 710.46 Appendix VI—Formats for requesting a nomination.
- 710.46-1 Format for requesting a Congressional nomination.
- 710.46-2 Format for requesting a Presidential nomination.
- 710.46-3 Format for requesting a son-of-deceased-veteran nomination.

AUTHORITY: The provisions of this Part 710 issued under R.S. 161, sec. 5031, 70A Stat. 278, as amended; 5 U.S.C. 22, 10 U.S.C. 5031. Interpret or apply secs. 651, 6951–6974, 70A Stat. 27, 428–436, as amended, sec. 516, 72 Stat. 1439; 10 U.S.C. 516, 651, 6951–6974.

### Subpart A—General

**§ 710.11 Life of a career naval officer.**

(a) The first requisite for appointment as a midshipman at the United States Naval Academy is a desire to be a Naval Officer.

(b) The Naval Officer is a man of intelligence and decision, responsible in every respect for accomplishment of the tasks assigned him and for the human lives and property required to complete them. He has the ability to plan carefully and a decided flair for organization. He is a tactful and diplomatic representative of the United States at home and abroad. As he advances in grade he accepts, even seeks, greater responsibilities as a matter of course. He works long hours with his primary consideration being to get the desired results. The Navy is a powerful instrument of our national security and the Naval Officer is required to adopt and live by one standard—"The Good of the Service."

(c) As the world's leading seapower, the U.S. Navy carries out a global mission involving commitments with over sixty nations. Thus, the Naval Officer is equally at home in the Mediterranean, Europe, Africa, or South America. He knows the Pacific and its islands and the inscrutable countenance of the Far East. He is a "seagoing man" whose job often takes him away from his family for months at a time.

(d) The Naval Officer has few financial worries, but he will never get rich. He and his family learn to adapt themselves to frequent moves. "Navy Juniors", the children of naval personnel, compensate for attendance at many schools by friendships among people of many nations and by a cosmopolitan viewpoint and adaptability which is invaluable in later life. In many localities an officer may be required to live off the base, selecting his home to meet the requirements of his family. On some stations quarters are provided.

(e) Promotion of Naval Officers is governed by law. The law is designed to provide an orderly flow of the most competent officers through the various grades to the top positions in the Navy. The graduate's opportunity for promotion is equal to that of every other officer of his grade, based solely on his record. Graduate work is available to him in various fields of interest to the Navy. As he advances in grade he becomes eligible for operational, staff, and command schools in preparation for higher command duties.

(f) A naval career is an honorable profession. It is a career dedicated to service to our Country and carries with it high social prestige, wide experience, and opportunities for education and advancement. But let us not mince words, it is a career with rewards for the hard workers, the sincere, the man with imagination. It is not a career for those who prefer a soft life. Those officers who dedicate themselves to naval careers will find service life inspiring in its standards, stimulating in its challenge and rewarding in its rich and satisfying feeling of accomplishment.

**§ 710.12 Midshipmen at the U.S. Naval Academy.**

(a) There are several ways of becoming a Naval Officer. The way that has been in existence the longest is by appointment to, and graduation from the United States Naval Academy at Annapolis, Md. This institution was founded in 1845 and has been in continuous existence ever since that date. It is maintained by the Government, under the immediate supervision of the Chief of Naval Personnel of the Navy Department. Graduates are granted the degree of Bachelor of Science and are normally commissioned as ensigns in the line of the Navy.

(b) Students at the Naval Academy are called Midshipmen. Upon acceptance and execution of the required oath of office, they are issued appointments as Midshipmen in the United States Navy which are signed by the Secretary of the Navy by direction of the President of the United States. All of the sources of nomination for appointment are established by law and no person can be appointed unless duly nominated by or from such a source. These sources are described in detail in Subpart B of this part.

(c) At the Naval Academy all midshipmen follow a very demanding academic schedule in an atmosphere of strict discipline. They are required to pass in every subject taken, except that in the case of an additional elective subject,

failure to maintain the prescribed proficiency will result in termination of participation in the additional elective program and reversion of the student to the standard curriculum.

(d) Character development and physical fitness are also very important parts of the program. The life of a midshipman is by no means easy. Anyone who is not prepared to sacrifice a certain amount of personal freedom and put forth his best effort should not seek appointment to the Naval Academy. On the other hand the Naval Academy provides a very busy, happy, and rewarding four years for those who are sincere in their purpose and proud of the opportunity to serve their country.

(e) Mission of the United States Naval Academy: To develop midshipmen morally, mentally, and physically, and to imbue them with the highest ideals of duty, honor, and loyalty in order to provide graduates who are dedicated to a career of naval service and have potential for future development in mind and character to assume the highest responsibilities of command, citizenship, and government.

**§ 710.13 Service obligation for enlisted and other candidates appointed as midshipmen.**

(a) Enlisted members of the Armed Forces who accept appointments as midshipmen at the Naval Academy will not be discharged from their enlistment contracts or from their period of obligated service while they are in the status of midshipmen except for physical disability or because of the acceptance of a commission. (10 U.S.C. 516.)

(b) Midshipmen in this category who are separated from the Naval Academy, except for one of the two reasons given in paragraph (a) of this section, will have their appointments as midshipmen terminated and will immediately resume their enlisted status. Members so reverted will be required to serve out their enlistments or obligated service, unless sooner discharged. In computing the unexpired portion of an enlistment contract or period of obligated service, the time served as a midshipman shall be counted as time served under such contract or period of obligated service.

(c) Candidates entering the Naval Academy from civil life who had not previously acquired a military obligation will automatically do so upon acceptance of appointment as midshipmen at the United States Naval Academy. Under certain of the provisions of the Universal Military Training and Service Act as amended, any person who is enlisted, inducted, or appointed in any of the Armed Services or Reserve Components acquires automatically a six-year military obligation. Section IV.B.3.f of Department of Defense Directive 1200.3 of May 23, 1958, includes appointees to the Service Academies among those who are subject to the six-year obligation. Such candidates will be required to execute the following statement of understanding of this obligation prior to appointment as midshipmen:

I understand that if my appointment as a midshipman is terminated other than for the purpose of accepting a commission, I shall if qualified be transferred to a ready reserve component of the United States Navy or the United States Marine Corps, in a grade deemed appropriate by the Secretary of the Navy. I fully understand the requirement for satisfactory participation in the ready reserve. I also understand that upon completion of a period of satisfactory ready reserve service which, when added to my service as a midshipman, totals five years, I shall if I request be transferred to the standby reserve to complete the total military service obligation of six years acquired under section 4(d)(3) of the Universal Military Training and Service Act as amended (50 U.S.C. App. 454(d)(3), 10 U.S.C. 651).

I understand further that if, after termination of my appointment as a midshipman, I should complete my total 6 year military service obligation without serving the minimum period of active duty required for exemption I may be liable for induction under Selective Service regulations to complete the 2 year active duty obligation prescribed by section 4(b) of the Universal Military Training and Service Act as amended (50 U.S.C. App. 454(b)).

**§ 710.14 Engagement to serve (10 U.S.C. 6959).**

(a) Each midshipman who is a citizen or national of the United States shall sign an agreement that, unless sooner separated, he will:

(1) Complete the course of instruction at the Naval Academy;

(2) Accept an appointment and serve as a commissioned officer of the Regular Navy or the Regular Marine Corps for at least five years immediately after graduation; and

(3) Accept an appointment as a commissioned officer in the reserve component of the Navy or the Marine Corps, and remain therein until the sixth anniversary of his graduation, if an appointment in the regular component of that armed force is not tendered to him, or if he is permitted to resign as a commissioned officer of that component before that sixth anniversary.

(b) If the midshipman is a minor and has parents or a guardian, he may sign the agreement only with the consent of the parents or guardian.

(c) Officers of the Armed Services serve at the pleasure of the President, and no terminal dates are established for their commissions.

**§ 710.15 Entrance date.**

Candidates will be required to enter the Naval Academy on June 30. The fourth class summer program is of nine weeks duration beginning the ninth Tuesday preceding Labor Day. The Academic year begins on the first Wednesday following Labor Day. Each eligible candidate will be notified individually by the Bureau of Naval Personnel of the hour and date he is to report to the Naval Academy for admission.

## Subpart B—Nominations

**§ 710.21 General.**

It is necessary for a young man to obtain a nomination in order to be considered for appointment to the Naval Academy. The sources of nominations are described below and the applicant should study carefully the various sources to determine those through which he is eligible to apply. College Board test results taken for purposes of qualifying for the Naval Academy apply to all nominations a candidate may hold.

**§ 710.22 Types of nominations.**

**§ 710.22–1 Congressional.**

Each Senator, each Representative, and the Resident Commissioner of Puerto Rico individually may have a maximum of five midshipmen attending the Naval Academy at any one time. The applicant should address his request directly to the official concerned. Eligibility for Congressional nominations is restricted by law to the two Senators from an individual's home State and to the Representative of the Congressional district in which he lives. A sample letter of application is included in § 710.46–1.

**§ 710.22–2 Vice Presidential.**

The Vice President may have a maximum of five midshipmen attending the Naval Academy at any one time. He may nominate candidates from the United States at large. A letter requesting nomination should be addressed directly to the Vice President. It should contain the same information required of a Congressional applicant.

**§ 710.22–3 District of Columbia.**

The Commissioners of the District of Columbia may have a maximum of five midshipmen attending the Naval Academy at any one time. Applications should be made directly to the Commissioners of the District. A letter requesting nomination from the Commissioners should contain the same information required of a Congressional applicant.

**§ 710.22–4 Governors of Puerto Rico, the Canal Zone, the Virgin Islands, Guam, and American Samoa.**

The Governors of Puerto Rico and the Canal Zone each may have one midshipman attending the Naval Academy at any one time. The Governors of the Virgin Islands, Guam, and American Samoa may collectively have one midshipman attending the Naval Academy at any one time. Applications to these nominating authorities should contain the same information required of Congressional applicants.

**§ 710.22–5 Presidential.**

The President may appoint seventy-five midshipmen each year. These appointments are limited by law to the sons and adopted sons of officers and enlisted personnel of the Regular Army, Navy, Air Force, Marine Corps, and Coast Guard on active duty, retired, or deceased, but not discharged before retirement or death. Adopted sons to be eligible must have been adopted prior to their fifteenth birthday. The Secretary of the Navy is authorized to approve waivers of this policy where adoption proceedings had been initiated but the adoption had not occurred prior to the fifteenth birthday through circumstances beyond the control of the foster parents. Stepsons are not eligible. Applications should be addressed to the Chief of Naval Personnel, Navy Department, Washington, D.C., 20370. Use application form in § 710.46–2.

**§ 710.22–6 Regular Navy and Marine Corps.**

(a) The Secretary of the Navy may appoint each year eighty-five enlisted men of the Regular Navy and Marine Corps. These men must meet all requirements including the age limitations. In addition they must have enlisted in the Navy or Marine Corps on or before July 1 of the year preceding the desired date of entrance to the Naval Academy. Enlisted men who can fulfill the age and service requirements should make known to their commanding officers early in their enlistment their desire to go to the Naval Academy.

(b) For further information about enlisting in the Navy or Marine Corps, apply to your nearest Navy or Marine Corps Recruiting Station.

**§ 710.22–7 Naval Reserve and Marine Corps Reserve.**

(a) The Secretary of the Navy may appoint each year eighty-five enlisted men of the Naval Reserve and Marine Corps Reserve. These men must be qualified as to age and must have served in the Reserve for at least one year on July 1 of the year of entrance to the Naval Academy. In addition to all other normal requirements for appointment, these men must be on active duty, or must be members of a drilling unit of the Reserve, be recommended by their commanding officers, and have maintained efficiency in drill attendance with their Reserve Units.

(b) Midshipmen USNR of the Regular NROTC Program and members of the Aviation Cadet Program are not eligible for appointment under this quota.

(c) For further information about enlistment in the Naval Reserve or Marine Corps Reserve, apply to your nearest Navy or Marine Corps Recruiting Station.

**§ 710.22–8 Sons of deceased veterans.**

(a) The President may have a maximum of forty midshipmen, who are the sons of deceased veterans, attending the Naval Academy at any one time.

(b) Eligibility for nomination under this quota is confined to sons of members of the Armed Forces of the United States who were killed in action or have died of wounds or injuries received, or disease contracted, or pre-existing injury or disease aggravated, in active service during (1) World War I or World War II (as each is defined by laws providing service-connected compensation or pension benefits for veterans of World War I or World War II and their dependents); or (2) the Korean conflict beginning June 27, 1950, and ending January 31, 1955. The determination in each case of the Veterans' Administration as to the service connection of the cause of death is binding upon the Secretary of the Navy. Use application form in § 710.46–3.

**§ 710.22–9 Honor naval and military schools.**

The Secretary of the Navy may appoint annually ten honor graduates of educational institutions designated as "honor schools" by the Department of the Army, Navy, and Air Force. Candidates under the quota will be nominated each year by the heads of the schools designated as "honor schools." Each such school may nominate three honor graduates to compete for the appointments. Included in the three may be students whose standing is such that it appears they will be honor graduates in June of the year in which the examinations will be held. However, the latter will not be considered for appointment unless they do fulfill the requirements which would entitle them to be honor graduates at the time of their graduation. Eligible students should apply to the heads of their schools for nomination.

**§ 710.22–10 Naval Reserve Officers Training Corps (contract students only).**

The Secretary of the Navy may appoint annually ten midshipmen from among members of the Naval Reserve Officers Training Corps. Three candidates may be nominated each year by the president of each educational institution in which an NROTC unit is established. Each candidate must be a regularly enrolled contract student in the NROTC and must have completed one year of scholastic work in the corps at the time of entrance to the Naval Academy. Students should apply to their Professors of Naval Science to request a nomination.

**§ 710.22–11 Sons of Medal of Honor winners.**

The son of any person who has been awarded the Medal of Honor for acts performed while in the Armed Forces may be appointed provided he is in all respects qualified. No recommendation or endorsement from any source is required. Applications for appointment under this paragraph should be addressed to the Chief of Naval Personnel, Navy Department, Washington, D.C., 20370.

**§ 710.23 Qualified alternates and competitors.**

**§ 710.23–1 General.**

The Secretary of the Navy is authorized, upon recommendation of the Academic Board of the Naval Academy, to appoint 150 qualified Congressional alternates. Additional appointments from qualified alternates and competitors may be made by the Secretary of the Navy to bring the Brigade of Midshipmen to its authorized strength. If additional appointments are possible after the 150 qualified Congressional alternates have been appointed, at least 75 percent of these additional appointments must be selected from Congressional nominees and not more than 25 percent may be made from non-Congressional sources. All qualified alternate and competitive candidates will be considered and no special application by the individual is necessary or desired.

**§ 710.24 Foreign students.**

**§ 710.24–1 Republic of the Philippines.**

The Secretary of the Navy is authorized to permit, for the President of the United States, not exceeding four Filipinos at a time to receive instruction at the United States Naval Academy. Applications for appointment from this source must be addressed through diplomatic channels of the Government of the Republic of the Philippines. The appointments are on a competitive basis.

**§ 710.24–2 American Republics other than the United States.**

(a) The Secretary of the Navy is authorized to permit, upon designation of the President of the United States, not exceeding twenty persons at a time from the American Republics other than the United States to receive instruction at the United States Naval Academy. Not more than three persons from any one of such Republics shall receive instruction at the same time. Applications for these appointments must be addressed through the appropriate diplomatic channels of the applicant's country. The appointments are on a competitive basis.

(b) Instructions to Foreign Students are included in § 710.42.

**§ 710.25 Nominating methods.**

**§ 710.25–1 Congressional.**

A member of Congress may choose between two methods of nomination as follows:

(a) *Principal-alternate method.* He may nominate one principal candidate and five alternate candidates listed in order of his preference. If the principal candidate meets the eligibility criteria and qualifies on the entrance examinations, he will be offered the appointment. If the principal does not meet the minimum requirements, the next designated alternate candidate who qualifies will be chosen.

(b) *Competitive method.* He may nominate six candidates and authorize the Naval Academy to select his best qualified candidate. A selection score will be determined for each qualified candidate. It will include all entrance examination scores, ratings on previous academic achievement and extra-curricular activities, and a rating based primarily upon the recommendations of school principals and teachers. The candidate having the highest score will be offered the appointment.

**§ 710.25–2 Other categories.**

(a) The choice between the principal-alternate and competitive methods is also available to the Governors of Puerto Rico and the Canal Zone. The Governors of the Virgin Islands, Guam, and American Samoa may nominate only on a competitive basis for the one appointment allowed.

(b) Candidates will be selected for appointment on a competitive basis from nominees entered in the several service-connected categories: Presidential, Sons of Deceased Veterans, Regular and Reserve Components, Honor Military and Naval Schools, and NROTC. Factors considered in the competition are all entrance examination scores, previous academic achievement, extracurricular activities and recommendations of school principals and teachers. There is no limit on the number of eligible candidates who may compete in the Presidential, Sons of Deceased Veterans or Regular and Reserve categories. Each honor military and naval school and the pres-

ident of each institution in which an NROTC unit is established may name three candidates.

(c) The son of a Medal of Honor winner will be nominated upon application to the Bureau of Naval Personnel. He will be offered an appointment provided he qualifies on the entrance requirements.

**§ 710.25–3 Nominating schedule.**

(a) A young man who wants to enter the Academy upon graduation from high school must apply for nomination well in advance of admission. If seeking a Congressional nomination, it is particularly important to apply early, preferably during the spring of the junior year in high school. Senators and Representatives may submit the names of their nominees any time between July 1, 1964, and January 31, 1965, for the class entering in June 1965. A majority of them will make their selections for nomination early in this period. A young man who waits until the fall or winter months to apply cannot be considered if the Member of Congress has already selected his quota of nominees.

(b) Other nominating authorities must also submit their nominations between July 1, 1964, and January 31, 1965.

**§ 710.26 Civil Service Commission examinations for Congressional nominations.**

It is the policy of some of the authorized nominators to have the U.S. Civil Service Commission hold special competitive examinations solely for the purpose of assisting them in selecting their candidates. These special competitive examinations do not determine the candidate's scholastic qualifications for admission to the Naval Academy. The Naval Academy requirements must still be met fully. All the details concerning administration of the special competitive examinations are handled by the nominator concerned and the U.S. Civil Service Commission in Washington. Correspondence in regard to these examinations should be addressed to the Member of Congress.

## Subpart C—Qualifications for Admission

NOTE: Summary of changes effective with the class entering in June 1965. Significant changes, all discussed in appropriate portions of this part, are as follows:

1. The development of new Mathematics Achievement Tests by the College Entrance Examination Board.
2. The inclusion of class standing in high school as a qualifying factor.
3. The consideration of previous college records as a qualifying factor.
4. The requirement that all candidates take the College Board Test.
5. The requirement that a candidate qualify in the year in which he is seeking admission.
6. Revised medical examination procedures which permit examination of candidates at Navy, Army or Air Force facilities.

**§ 710.31 General requirements.**

All candidates must meet certain general requirements of citizenship, age, marital status, and moral character.

**§ 710.31–1 Citizenship.**

All candidates must be citizens of the United States except as authorized by law (see § 710.24, also § 710.25).

**§ 710.31–2 Age.**

Candidates must be at least 17 and not have passed their twenty-second birthday on July 1 of the year of admission.

**§ 710.31–3 Marriage.**

Candidates must never have been married. Any midshipman who marries will be discharged from the Academy.

**§ 710.31–4 Moral character.**

They must be of good moral character.

**§ 710.32 Scholastic requirements.**

(a) A candidate's previous academic record and his performance on specified College Entrance Examination Board Tests are the factors which are used to determine scholastic qualification for admission.

(b) There are two methods of qualifying scholastically for admission to the Naval Academy: the Examination Method and the College Certificate Method. These two methods are described in §§ 710.32–3 and 710.32–4.

**§ 710.32–1 Submission of scholastic records.**

(a) Each candidate is responsible for the submission of detailed records of all of his completed high school, preparatory school, and college work and lists of any current or proposed courses. Official forms for this purpose will be provided by the Navy Department following receipt of the nomination from the Member of Congress or other authorized appointment sources. These certificates should be filled out and submitted to the Naval Academy by the school or schools as soon as practicable after receipt. It is important to each candidate that records be supplied promptly and that previous school records include academic marks, class standing or estimated class standing for the first semester of the final year. In the event that class standing for the end of the junior year is the latest available, it will be acceptable. Recommendations from the candidate's high school principal, teachers, extracurricular advisors and coaches should be furnished on the forms provided. These records and recommendations will be considered in conjunction with the test results in order to establish the priority of qualified candidates in the various competitive lists and for the purpose of selection under the qualified alternate law, and must be received not later than March 15.

(b) It must be appreciated that except for Congressional principals and sons of Medal of Honor holders, it is necessary to take those candidates who have succeeded in qualifying scholastically, medically and in physical aptitude and arrange them in an order of precedence. In assigning a selection score for this purpose to such a qualified candidate, his scholastic record, including College Board scores, rank in high school, extracurricular record, and recommendations are taken into account. Once a candidate is assigned an order of selection score, it remains unchanged in order that it may be used to determine his relative position on any competitive list for which he is eligible.

**§ 710.32–2 Acceptable secondary school certificate.**

(a) An acceptable secondary school certificate is one from an accredited secondary school, or its equivalent, presenting at least fifteen units of credit in college preparatory subjects and indicating ability to do college-level work successfully. While not an absolute requirement, standing in the top 40 percent of one's high school class is of importance in determining qualification for admission, and the great majority of midshipmen come from the top 20 percent of their high school classes. Candidates should, insofar as is practicable, include as many as possible of the following studies in their secondary school programs:

(1) At least three years but preferably four years of mathematics, including the elements of advanced algebra, geometry and trigonometry.
(2) Four years of English.
(3) Two years of a foreign language, preferably modern.
(4) One year of chemistry.
(5) One year of physics.

(b) It is expected that the secondary school official will recommend only those candidates who, in his opinion, have the scholastic background needed to pursue successfully a difficult course of college level in which the emphasis is placed on engineering subjects, as well as the humanities, and who have those qualities of character necessary for success in an institution where training for effective military leadership is of paramount importance.

(c) Deficiencies in the secondary school certificate can often be offset by offering acceptable college work in the subject or subjects involved or advanced related branches thereof. Conversely, evidence of inability to do acceptable college work can be cause for disqualification.

**§ 710.32–3 Examination method.**

(a) The basic method of qualifying is by presenting an acceptable secondary school certificate and by scoring acceptably in the scholastic entrance examination consisting of the December 5, 1964, January 9, 1965, or March 6, 1965, administrations of the following tests of the College Entrance Board: The Scholastic Aptitude Test (Verbal and Mathematics sections), the English Composition Test, and either the Level I (Standard) or (*) Level II (Intensive) Mathematics Achievement Test. It is the candidate's responsibility to ensure that he takes these required tests. No substitutes will be considered in qualifying for entrance to the U.S. Naval Academy.

(b) In the past, basic qualifying scores have been 500 for the verbal score and 550 for the mathematics score of the Scholastic Aptitude Test, 500 for the English Achievement Test and 550 for the Mathematics Achievement Test. Variations in basic qualifying scores can be expected each year. These tests must be taken during the school year preceding admission. Candidates are encouraged to choose the mathematics achievement test in which they feel they can attain the higher score. Level I is recommended for candidates without advanced high school mathematics. No additional weight is given to the results of the test in Level II Mathematics over those in Level I Mathematics.

(c) Basic qualifying scores in the College Entrance Examination Board Tests for any class will be determined by the Academic Board of the Naval Academy. No candidate shall be admitted to the Naval Academy unless in the opinion of the Academic Board he shows the requisite scholastic qualifications.

(d) Each candidate is responsible for registering with the College Entrance Examination Board for the tests as promptly as possible after receiving the necessary instructions from the Bureau of Naval Personnel, Navy Department, Washington, D.C. These instructions will include the provision for payment by the Navy for these tests. Although the Navy Department will pay for only one administration of the tests, the Naval Academy will accept scores from the other applicable administrations and will credit a candidate with the highest scores achieved.

(e) General information on the tests, including dates of administration, location of testing center, dates by which candidates must register, method of application, etc., is published in a booklet entitled Bulletin of Information. This booklet, published annually by the College Board, may be obtained without charge by writing to either:

The College Entrance Examination Board,
Post Office Box 592,
Princeton, New Jersey, 08540.

or

The College Entrance Examination Board,
Box 1025,
Berkeley, California, 94701.

(f) In addition to the above-mentioned Bulletin, the College Board publishes two booklets, one entitled "A Description of the College Board Scholastic Aptitude Test" and one titled "A Description of the College Board Achievement Tests." Supplies of these two booklets are provided by the College Board to all high schools. Candidates can obtain the booklets from their high schools or may write to the College Board for individual copies free of charge.

(g) For the majority of candidates, the examining points are in the communities in which they live. It is expected that few, if any, candidates will have to travel more than seventy-five miles.

(h) Duly nominated candidates who have registered for and are unable to take the December, January, or March administrations because of sickness, injury, weather, or other extenuating circumstances should promptly advise the Chief of Naval Personnel.

**§ 710.32–4 College certificate method.**

(a) A candidate who holds a nomination as a Congressional principal or alternate or who is seeking admission as the son of a Medal of Honor winner may fulfill the scholastic requirements for admission by submitting an acceptable secondary school certificate and an acceptable college certificate. He is required to take the College Board tests specified in § 710.32–3 for the information of the Naval Academy.

(b) An acceptable secondary school certificate is as described in § 710.32–2.

(c) An acceptable college certificate is one attesting at least one year's attendance at an accredited junior college, college, university or technical institution of college grade during which the candidate completed courses totalling at least twenty-four semester hours of credit for subjects acceptable to the Naval Academy with grades substantially better than the college minimum passing grade. Six semester hours must be in pure mathematics, such as college algebra, trigonometry, analytical geometry, calculus, etc., and six semester hours must be in English or history or a combination thereof. The remaining credits necessary to complete the certificate may be offered from a wide range of college liberal arts or engineering subjects.

(d) The length of college attendance prescribed is defined as requiring actual full-time attendance for one regular school year during which the candidate pursues courses constituting a normal year's load.

(e) A candidate who contemplates qualifying by the College Certificate Method but who has not completed the required year of college at the time of receipt of his nomination should have his high school record and a preliminary college record submitted showing the courses contemplated or in progress and the amount of credit in semester hours to be assigned for each course. Forms for this purpose will be provided by the Navy Department. An early review of the record of completed work and of courses proposed for completion may reveal defects which can be corrected by slight changes in the final semester schedule. The certificate action reports issued by the Naval Academy indicate steps which the candidate should take. However, if in doubt, a candidate should address a letter to the Dean of Admissions, U.S. Naval Academy, Annapolis, Md.

**§ 710.32–5 Qualifying in previous year.**

Former midshipmen who have completed successfully the first year of the Naval Academy's course need not requalify scholastically for admission. No other former candidates are exempted from requalifying for the class to which they seek admission.

**§ 710.33 Medical and physical requirements.**

**§ 710.33–1 General.**

All candidates are encouraged to undergo thorough medical and dental examinations by a private physician using the Medical Factors set forth in § 710.43 as a guide in determining their medical and dental condition before pursuing nomination and before taking the qualifying medical examination. This will serve to identify obviously disqualified applicants or those who may have remediable defects which must be corrected at the candidates' expense. Official standards of medical fitness are found in Chapter 15 of the Manual of the Medical Department, U.S. Navy. The candidates who are obviously disqualified will benefit themselves and the U.S. Government by not pursuing candidacies further. All candidates are advised to carry sunglasses for use after the eye examination.

**§ 710.33–2 Medical and physical aptitude examinations.**

(a) The Naval Academy Qualifying Medical Examination determines a candidate's medical status for admission to the Academy. Members of Congress may authorize a Naval Academy Medical Examination, at the authorized Medical Examining facilities, for an applicant to determine his medical qualification. This examination will be considered a final Naval Academy Qualifying Medical Examination. Thus, it will not be necessary for a formally nominated candidate to return to a medical examining facility for further medical examination. Candidates who have a Qualifying Medical Examination on file taken since July 1, 1964, will be required to take only the Physical Aptitude Examination. Formally nominated candidates to the Naval Academy are required to satisfactorily complete a Physical Aptitude Examination which is in conjunction with the Qualifying Medical Examination. This examination includes a series of exercises designed to determine coordination, strength and endurance of the body musculature. Included are sit-ups, pull-ups, arm hang, and a squat walk exercise. It also includes a battery of tests which will bring out disqualifying orthopedic defects such as shoulder, knee, or other malfunctions. Failure to pass any part of this examination will be cause for rejection.

(b) When reporting for Medical and Physical Aptitude Examination, candidates are required to have suitable shorts and supporter for use when undergoing the Physical Aptitude Examination.

(c) Candidates who are ordered to report for Medical and Physical Aptitude Examination and who are unable to take the Physical Aptitude Examination will be required to produce sufficient evidence as to preclude them from such at that time. Insufficient evidence will be cause for their disqualification. Formally nominated candidates who are injured or ill for any reason and unable to comply with instructions to report for Medical and Physical Aptitude Examination are required to communicate with the Chief of Naval Personnel and the scheduled examining facilities to explain the circumstances of the injury or illness before further examination or delay in examination will be authorized. Candidates who have undergone major surgery involving knee, ankle, shoulder, elbow, wrist or spine will NOT be scheduled for examination until six months have

(*) Offered only on January 9, 1965, test.

elapsed following surgery. Medical and Physical Aptitude Examinations will terminate on March 15, 1965. Injury and surgical cases will not be considered after this date. Candidates having orthodontic appliances in place will be required to have them removed prior to reporting for Qualifying Medical Examination.

(d) While candidates may be scheduled for Medical and Physical Aptitude Examinations at Army, Navy and Air Force facilities, the major portion of Naval Academy candidates will be scheduled for examination at Naval Medical Examining Facilities. Candidates examined at Naval Medical Examining Facilities will normally be required to spend one day under examination. Candidates are to report prior to 0800 on the day of examination except as otherwise directed in reporting orders. Candidates ordered to Army and Air Force examining centers will be required to spend at least two days to complete examinations.

(e) Candidates are required to pay their own transportation, berthing and necessary expenses in connection with these examinations. Only one medical and physical aptitude examination will be authorized for any candidate. Reexamination will not be authorized except as required by the Chief of Naval Personnel.

§ 710.33–3 Review and waiver procedure.

(a) The results of all medical examinations of candidates for the Naval Academy are subject to review by the Permanent Board of Medical Examiners, U.S. Naval Academy. Medical qualification decisions made by that Board are final. In this respect where the disqualifying defect is subject to medical or dental correction, the candidate may be conditionally rejected subject to later certification by a registered physician or dentist that the defect has been corrected with complete restoration of function. It is mandatory that such certification reach the Permanent Board of Medical Examiners as soon as possible and not later than March 15 in any case. Final reports of applicants certified by that Board will be distributed to Chief of Naval Personnel, Chief, Bureau of Medicine and Surgery, and the Academic Board, U.S. Naval Academy. The *Academic Board may grant waiver* of a very minor defect to a candidate who is outstanding in all other respects.

(b) Since waiver action is predicated upon the overall quality of a candidate's record, it is important that transcripts of secondary school or college work, the report of extracurricular activities, and the required letters of recommendation be submitted as soon as possible. In some instances it will be necessary to delay evaluation of a record until results of the March College Board tests have been received. It is emphasized that review and waiver procedures are automatic for all candidates who were found not medically qualified upon formal qualifying medical examination and that queries regarding the status of waiver action will only delay final determination. Notification of Medical and Physical Aptitude Disqualification will be made to all candidates by the Chief of Naval Personnel. Requests for reexamination of those candidates who fail the medical examination can be approved only by the Chief of Naval Personnel and only under extremely extenuating circumstances.

## Subpart D—Appendixes

§ 710.41 Appendix I—Entrance procedure, equipment, and pay.

(a) *Entrance requirements.* Candidates for whom there are vacancies, who have subscribed the "Engagement to Serve" and who have met the scholastic, moral, and physical requirements will receive appointments as midshipmen and be admitted as such to the Naval Academy.

(1) Each candidate will be required to present an acceptable birth certificate.

(2) In keeping with the policy of the Department of Defense and as directed by the Secretary of the Navy, candidates for appointment as midshipmen are required to execute a loyalty certificate. The purpose of this certificate is to aid in determining whether the candidate's conduct or associations, past or present, have been such as to cast any doubt whatever upon his loyalty to the Government of the United States.

(3) The loyalty certificate includes a list of those agencies, groups, etc., designated by the Attorney General of the United States to be totalitarian, fascist, communist or subversive, or as having adopted a policy of advocating or approving the commission of acts of force or violence to deny persons their rights under the Constitution of the United States by unconstitutional means.

(4) The admission of conduct or association, past or present, within the purview of acts as defined in the certificate, or association with any of the groups or organizations designated by the Attorney General, shall preclude appointment pending investigation and determination of eligibility by the Department of the Navy.

(5) False representation, or failure fully to disclose conduct or associations defined in the certificate shall constitute grounds for trial before a general court-martial with possible consequent conviction and imprisonment, or for separation from the naval service under conditions other than honorable, with or without any preceding court-martial procedure.

(6) Each candidate for midshipman upon entrance will be required to take oath of office as follows:

I, ----------, of the State of ---------- aged ------ years ------ months, having been appointed a midshipman in the United States Navy, do solemnly swear (or affirm) that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I take this obligation freely, without any mental reservation or purpose of evasion; and that I will well and faithfully discharge the duties of the office on which I am about to enter; So Help Me God.

He will also be required to subscribe to the following under oath:

For and in consideration of the privileges, opportunities, and benefits afforded me during the continuance of my service as a midshipman, I agree to and with the Superintendent of the United States Naval Academy, as follows:

First: To enter the service of the Navy of the United States and to the utmost of my power and ability to be in everything conformable and obedient to the several requirements and lawful commands of the officers who may be placed over me.

Second: I oblige myself, during such service, to comply with and be subject to the Uniform Code of Military Justice and such other laws and regulations as are or shall be established by the Congress of the United States or other competent authority.

Third: To submit to treatment for the prevention of smallpox, typhoid (typhoid prophylaxis), and to such other preventive measures as may be considered necessary by naval authorities.

(b) *Curriculum.* The course of instruction at the Naval Academy is of 4 years' duration and is designed for the purpose of educating and training students to become officers in the Navy. The word "officers" as used in the foregoing sentence means officers of the line and does not include officers of the Medical Corps, Dental Corps, etc. The curriculum provides a basic education in naval science; science and engineering; and the humanities and social sciences. In addition, there is opportunity for advanced work through validation of college-level courses successfully completed elsewhere, and through a program of additional elective courses for superior students. No midshipman can be admitted or readmitted to other than the fourth (freshman) class. Readmitted midshipmen who previously completed successfully one or more years of the Naval Academy course may request advancement to a higher class after reentry. There can be no deviation from the statutory age limits.

(c) *Commissioned upon graduation.* Graduates of the Naval Academy who at graduation meet all requirements are commissioned as ensigns in the Navy and from each graduating class a limited number may be commissioned as second lieutenants in the Marine Corps. Their commissions may be revoked at any time during the first 3 years following graduation from the Naval Academy. On successful completion of the probationary period, officers are permanently commissioned. Officers whose commissions are revoked shall be discharged from the service, without advance pay or allowances.

(d) *Pay.* The pay of the midshipman is $1,447.20 a year, commencing at the date of his admission. Its purpose is to permit him to cover his expenses; i.e., distinctive uniforms, books, equipment, laundry, income tax; etc., while at the Naval Academy.

(e) *Entrance outfit.* Midshipmen, immediately upon entrance, will be required to obtain from the midshipmen's storekeeper a regulation entrance outfit. Slide rules and drawing sets are furnished as part of the outfit. Candidates are advised, therefore, not to purchase these items prior to entering the Academy.

(f) *Deposit.* Each candidate accepted for admission will, before being admitted as a midshipman, deposit with the midshipmen's storekeeper the sum of $300, to be used in part payment to cover cost of uniforms, clothing, etc. In cases of extreme hardship this sum may be reduced to $100 in which case money allowances for the individual will be at reduced levels until the individual account reaches prescribed levels. The amount deposited is not refunded, but is expended for entrance outfit, clothing, uniforms, etc., which become the property of the midshipman.

(g) *Costs.* The regulation entrance outfit, plus the additional uniforms, clothing, textbooks, and expenses required the first year, are valued at approximately $1,600. The deposit made at the time of entrance is supplemented by an entrance credit of $600 upon first admission to the Naval Academy. The $600 credit is an interest free loan advanced by the Government to defray the cost of the uniforms and equipment essential during the first year. Repayment of the indebtedness is accomplished by monthly deductions of $20 from the midshipman's pay, beginning in October of the second year at the Naval Academy and continuing until the indebtedness is liquidated. Any midshipman desiring to do so may repay this $600 entrance credit from personal funds immediately after appointment as midshipman. This sum is not required and only that portion of it that is not expended is recoverable should a midshipman subsequently be separated. Midshipmen who are involuntarily separated from the Naval Academy prior to repayment of the entrance credit, are required to turn in all articles of uniform and equipment deemed suitable for reissue, to an amount sufficient to liquidate the indebtedness. If reclaimed articles are insufficient to cover the indebtedness, parents will be given an opportunity to liquidate the remaining debt; failing this, the remainder of the debt is canceled. Midshipmen applying for voluntary separation for their own convenience are required to repay in full the amount of indebtedness prior to such separation.

(h) *Travel and transportation allowances.* After being admitted to the Naval Academy, midshipmen receive travel and transportation allowances as prescribed in Joint Travel Regulations (ordinarily, mileage allowance of 6 cents per mile for authorized travel). This reimbursement will be paid to the midshipman. Reimbursement will be made for the actual cost of passage fares on commercial vessels if sea travel is involved and provided no Government transportation is available. In the event travel originates outside the United States candidates must contact the nearest naval activity for information as to the availability of Government transportation before endeavoring to procure commercial transportation. When Government transportation is not available, a certified statement to this effect must be presented in order for the candidate to be reimbursed after he has become a midshipman.

(i) *Living accommodations.* Candidates are usually sworn in as midshipmen on the day they are accepted for admission, i.e., the date of reporting at the Naval Academy as designated in the authorization to report issued by the Bureau of Naval Personnel. Due to limited living accommodations in the city of Annapolis candidates are urged to time their arrival at Annapolis to coincide as closely as possible with the reporting date, keeping in mind, however, that transportation facilities between Washington and Baltimore and Annapolis are not unlimited. Those arriving in Annapolis a day or two prior to their reporting date may take advantage of berthing and messing facilities usually made available in the Naval Academy at a cost of $1.00 per night. Additionally, candidates may take their meals in the Midshipmen's Mess at a cost equal to the cost of a midshipman's daily ration allowance.

(j) *Birth certificate.* Candidates admitted as midshipmen will be required to submit to the Superintendent, U.S. Naval Academy, for transmission to the Bureau of Naval Personnel upon admission, or as soon as practicable thereafter, evidence of birth. A certified copy of the public record of birth is the best evidence of birth. Supporting evidence will be required if the name on the evidence of birth is not identical with the name being used.

(k) *Social security card.* Every candidate on reporting for appointment must present his Social Security card. If an individual has not obtained a social security number as a result of work experience prior to entering, he should obtain one based on the strength of expected employment as a midshipman.

(l) *Statement of Personal History.* Each midshipman, except foreign nationals, shortly after entrance, will be required to complete a Statement of Personal History. Candidates should be prepared to furnish such information as:

(1) Names and locations of all schools attended.

(2) Family names, dates and places of birth of parents, service data if parents are or were in Armed Forces, naturalization numbers of parents if applicable.

(3) Relatives in foreign countries—relationship and location.

(4) Names and addresses of former employers.

(5) Names and addresses of three credit and five personal references. (Credit references may be those of parents.)

(6) Residences during past fifteen years. (Dates—street addresses—cities required.)

(m) *Correspondence.* Correspondence regarding nominations and examinations should be addressed to the Chief of Naval Personnel, Attn. Pers–B66, Department of the Navy, Washington, D.C., 20370. Correspondence regarding scholastic qualifications should be addressed to the Dean of Admissions, U.S. Naval Academy, Annapolis, Md., 21402.

§ 710.42 Appendix II—Foreign students.

(a) *Application of rules.* Persons receiving instruction under authority of 10 U.S.C. 6957 shall receive the same pay, allowances, and emoluments, to be paid from the same appropriations, and, subject to such exceptions as may be determined by the Secretary of the Navy, shall be subject to the same rules and regulations governing admission, attendance, discipline, resignation, discharge, dismissal, and graduation, as midshipmen at the Naval Academy appointed from the United States; but such persons shall not be entitled to appointment to any office or position in the United States Navy by reason of their graduation from the Naval Academy. The entrance deposit will be required of all foreign students. Applications for appointment under provisions of this law must be addressed through diplomatic channels of the applicant's country. Nominations must reach the State Department in Washington, D.C., by January 1.

(b) *Requirements.* Each candidate must:

(1) Be an unmarried, bona fide male citizen of the nominating country and, unless otherwise approved by the Secretary of the Navy, be not less than 17 years of age nor more than 22 years of age on July 1 of the calendar year in which he enters the Naval Academy.

(2) Possess physical qualifications as specified in this part. All candidates must undergo a physical examination and a physical aptitude examination by a board of medical examiners designated by the Chief of Naval Personnel. Qualifying medical and physical aptitude examination will be conducted by the Permanent Medical Examining Board at the United States Naval Academy at the time of reporting for admission. Such candidates are therefore urged to undergo careful preliminary examination by qualified medical personnel informed of the physical requirements set forth in this part before leaving their homes for the Naval Academy. Those with obviously disqualifying defects may be spared the needless expense of the trip to Annapolis. However, in case of reasonable doubt as to whether defects are disqualifying, it is recommended that telegraphic inquiry be addressed to the Superintendent, U.S. Naval Academy, Annapolis, Md., U.S.A.

(3) Be proficient in reading, writing, and speaking idiomatic English and meet the following scholastic entrance requirements: Candidates may qualify for admission by either of the following two methods:

(i) Certificates from accredited secondary schools and colleges of the United States of America.

(ii) Taking the College Entrance Examination Board Scholastic Aptitude Test and achievement tests in English Composition and Intermediate or Advanced Mathematics. Detailed certificates covering school work will not be required of candidates qualifying by the examination method.

(c) *Language qualifications.* Candidates will be given the same examination in English Composition as other candidates, but due consideration will be accorded these foreign students when evaluating test results. Each candidate shall submit a certificate from his government that he is conversant with the literature of his native country and that he has completed a course in the literature of his native language equivalent in general to 2 years of secondary school work in literature in the United States. In lieu of this certification, a candidate

may produce evidence of having acquired the units of literature from accredited schools of the United States. The Naval attaché or a diplomatic representative of the United States in the candidate's country shall furnish a report as to the candidate's proficiency in the use of idiomatic English.

(d) *Nominations.* Governments should submit the names of candidates as early as possible in order that they may qualify for entrance by the end of March and enter the Naval Academy in late June or early July except in the cases of candidates attending secondary schools and colleges in the United States whose school records for the current year are essential to fulfillment of admission requirements. In this case candidates may be granted until June 25 in order to permit completion of the required certificates. The nomination of the candidate should contain a statement of the method of admission under which he wishes to qualify.

(e) *Oath.* In lieu of the oath of allegiance to the United States, a substitute oath will be required, in substance as follows:

I, ----------, a citizen of ----------, aged ------ years ------ months, having been appointed a midshipman at the United States Naval Academy, do solemnly swear to comply with all regulations for the police and discipline of the Academy, and to give my utmost efforts to accomplish satisfactorily the required curriculum; do swear not to divulge any information of military value which I may obtain directly or indirectly in consequence of my presence at the United States Naval Academy, to any alien government; and do agree that I shall be withdrawn from the United States Naval Academy if deficient in conduct, health, or studies.

(f) *Student's conduct, studies, or health unsatisfactory.* Notification will be given to the Governments that students found by proper authority to be unsatisfactory in conduct, studies, or health will be accorded the same consideration given other midshipmen regarding withdrawal from the Academy, or repetition of a year's work.

### § 710.43 Appendix III—Medical disqualification factors.

(a) *General.* Listed in this section are many of the conditions for which Naval Academy candidates are found medically disqualified. This list is not complete by any means, but will serve as a guide to private physicians and dentists in conducting medical screening examinations. Official standards of medical fitness are found in chapter 15 of the Manual of the Medical Department, U.S. Navy. A candidate who has defects which are remediable, including dental defects, should have them corrected prior to taking the Naval Academy Qualifying Medical Examination. An individual who has defects which are not remediable and would obviously disqualify him should not continue to seek a nomination or appointment to the Academy. See § 710 33–3 concerning the possibility of waivers for candidates with very minor defects.

(b) *Abdominal disqualifications.* Weakness of abdominal wall sufficient to interfere with function. Hernias of any type until corrected or history of operation for hernia within the preceding 60 days. Chronic diseases of abdominal organs. Stomach or small bowel ulcer or history of same. Acute or chronic disease of the gall bladder. History of removal of the spleen for reason other than trauma. Removal of gall bladder with residual abnormalities.

(c) *Blood disqualifications.* Anemia. Abnormal bleeding states. Abnormally low white blood cell count. Enlarged spleen until the cause is remedied. Blood clotting diseases except for acute, nonrecurrent conditions.

(d) *Dental disqualifications.* Carious teeth except minor or questionable carious areas. Less than 8 natural permanent teeth in each arch. Infections or chronic diseases of the soft tissue of the mouth. Lack of satisfactory biting or chewing function. Marked malocclusion resulting in severe dentofacial deformity. Active orthodontic appliances whether attached or removable; however, retainer appliances are permissible. Unreplaced teeth which cause unsightly spaces or significantly reduce masticatory function. Unsatisfactory restorations, bridges, or dentures. Diseases of the jaw such as tumors, cysts, abscessed teeth, which require treatment or may require treatment in the foreseeable future.

(e) *Ears and hearing disqualifications.* Any perforation of the eardrum. Chronic ear diseases. Meniere's syndrome. A defect in auditory acuity in either ear by audiogram in excess of the limits set forth in the following table (or below 15/15 by whispered voice if such test is used).

| Frequency | 500 512 | 1000 1024 | 2000 2048 | 3000 2896 | 4000 4096 | 8000 8192 |
|---|---|---|---|---|---|---|
| Maximum loss in decibels: | | | | | | |
| Better ear | 15 | 15 | 15 | 35 | (*) | (*) |
| Worse ear | 15 | 15 | 15 | 35 | (*) | (*) |

*Record for baseline information only.

(f) *Endocrine and metabolic disqualifications.* Diabetes mellitus or a history of diabetes mellitus in both parents. Persistent sugar in urine, regardless of cause. Gout. Excessive or inadequate function of the parathyroid gland. Hypothyroidism, spontaneous or postoperative (with clinical manifestations and not based solely on low basal metabolic rate). Other endocrine or metabolic disorders which obviously preclude satisfactory performance of duty or which require frequent or prolonged treatment.

(g) *Extremities disqualifications.* Ununited fractures. Old joint fractures with evidence of arthritis. Flat feet with marked eversion and symptoms. Chronic bone or joint disease. History of surgery to a major joint within past six months. History of derangement of knee joint not corrected by surgery or, subsequent to surgery, there is still evidence of instability. Total loss of either thumb. Loss of either large toe. Loss of other fingers and toes sufficient to interfere with function. Substantiated history of recurrent dislocations of major joints. Instability of a major joint which is symptomatic and/or more than insignificantly minimal. Other conditions of the arms, legs, hands and feet that would interfere with successful compliance with military routine.

(h) *Eyes and visual disqualifications.* Both eyes must be free from any disfiguring or incapacitating abnormality and from acute or chronic disease. Unaided visual acuity less than 20/20 in either eye. Myopic refractive error exceeding —.25 diopter in any one meridian or a hyperopic refractive error exceeding +1.75 diopters in any one meridian. Astigmatism greater than ±.75 diopter. A cycloplegic examination is required of all applicants who take the final qualifying examination. Any tropia. Esophoria greater than 5 prism diopters, exophoria greater than 5 prism diopters. Hyperphoria greater than 1 prism diopter. A satisfactory red lens test should be performed. In all cases the actual vision of each eye and the correcting lens, if required, must be reported.

(i) *Color perception disqualifications.* Color blindness is cause for disqualification. Candidates shall be considered qualified if they pass one of the pseudoisochromatic plate tests or the Farnsworth Lantern Test.

(j) *Genitourinary disqualifications.* Varicose veins of the scrotum (varicocele or hydrocele) if large or painful until corrected. Absence of one kidney. Chronic kidney disease. Absence, atrophy or non-descent of both testicles. Repeated attacks of renal stones. Chronic inflammation of testis or epididymis. Bed wetting, persisting into late childhood or early adolescence. Excessive protein in the urine if persistent or recurrent including the so-called orthostatic or functional type albuminuria. Other diseases and defects of the urinary system which obviously preclude satisfactory performance of duty or which would require frequent or prolonged treatment.

(k) *Head and neck disqualifications.* Benign tumors or cysts which are of sufficient size to interfere with the wearing of uniform or military equipment. Adherent or disfiguring scars from disease, injuries or burns. Cervical ribs if symptomatic or so obvious that they are found on routine examination (presence on X-ray only is not disqualifying, per se). Deformities of the skull of any degree associated with evidence of disease of the brain, spinal cord or peripheral nerves or their associated structures.

(l) *Heart and vascular system disqualifications.* All organic valvular diseases of the heart, including those improved by surgery. EKG evidence of certain variations from normal heart beat. Hypertension evidenced by predominant blood pressure readings of 130-mm or more systolic or 84-mm or more diastolic. Varicose veins if severe or symptomatic. Heart rate greater than 100 on repeated examinations. Substantiated history of rheumatic fever within the previous 2 years, recurrent attacks of rheumatic fever or evidence of residual cardiac damage. History of recurring rapid heart beat within the preceding 5 years.

(m) *Height, weight, and body build disqualifications.* Under 64 inches and over 78 inches. The following table sets forth the minimum and maximum weight limits as related to height:

| Height (inches) | 64 | 65 | 66 | 67 | 68 | 69 | 70 | 71 | 72 | 73 | 74 | 75 | 76 | 77 | 78 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Weight (pounds): | | | | | | | | | | | | | | | |
| Minimum | 112 | 116 | 120 | 124 | 128 | 132 | 136 | 140 | 144 | 148 | 152 | 156 | 160 | 164 | 168 |
| Maximum | 160 | 165 | 170 | 175 | 181 | 186 | 192 | 197 | 203 | 209 | 214 | 219 | 225 | 230 | 235 |

Obesity, even though the candidate's weight is within the maximum shown in the above table, shall be considered disqualifying when the weight in relation to the body structure and musculature constitutes obesity of such a degree as to interfere with satisfactory completion of required training. In addition, poor physical development, regardless of actual height and weight ratio; or, congenital malformation of bones and joints where interfering with function, shall be considered disqualifying.

(n) *Lungs and chest wall disqualifications.* Tuberculosis active in past 5 years. History of spontaneous pneumothorax, unless underlying pathology has been corrected by surgery. Removal of more than one lobe of lung. Bronchial asthma or recurrent asthmatic bronchitis since 12th birthday. Chronic bronchitis. Bronchiectasis. Acute fungus disease of the lung. Abnormal elevation of the diaphragm on either side. Extensive pulmonary fibrosis from any cause. Significant pulmonary functional incapacity. Congenital malformations that result in reduced chest capacity with associated diminution of respiratory reserve. Absence of the collar bone, ununited fractures of the collar bone which would interfere with performance of military duties. Asthma if present after age 12 years.

(o) *Mouth, nose, pharynx, trachea, esophagus, and larynx disqualifications.* Any deformities or conditions of the above which interfere with chewing and swallowing of ordinary food, speech, or breathing. Allergic rhinitis. Deviation of the nasal septum resulting in greater than 50 percent obstruction to either airway or obstruction to drainage of any sinus. Sinusitis of any degree. Hay fever, if severe, or having undergone injection therapy during past three years prior to examination. Nasal polyps.

(p) *Neurological disqualifications.* Head injury resulting in prolonged unconsciousness or neurological disease of any kind. Degenerative disorders. Migraine. History of chronic motion sickness (i.e.—air, train, sea, swing or carnival rides). Recurring convulsive disorders, disturbances of consciousness, all forms of psychomotor or temporal lobe epilepsy or history thereof except for seizures associated with toxic states or fever during childhood up to age 12. Tremors or other abnormal movements when more than mild, or indicative of significant disease.

(q) *Psychiatric disqualifications.* Psychosis or authenticated history of psychotic illness other than that of a brief duration associated with a transient, self limited toxic or infectious process. Personality disorders. Character and behavior disorders with evidence by history and objective examination that the degree of immaturity, instability, personality inadequacy, and dependency may interfere with adjustment to military service. Addiction to alcohol or drugs. Abnormal sexual habits. Symptomatic immaturity disorders such as stammering or stuttering, enuresis or history thereof persisting into late childhood or adolescence. Other disorders of emotion, behavior, thought, intelligence, or mood, difficult to define, may be disqualifying.

(r) *Skin disqualifications.* Fungus disease in any form. Chronic skin diseases such as acne or eczema or atopic dermatitis. Pilonidal sinus if evidenced by presence of induration or inflammation. Severe icthyosis. Psoriasis or a verified history thereof. Plantar warts, on weight bearing areas, if symptomatic. Any skin condition, scars or cysts, other than pilonidal, which would interfere with the normal wearing of military equipment, including uniform.

(s) *Spine, Scapulae, Ribs and Sacroiliac Joints Disqualifications.* Arthritis. Significant deviation or curvature of spine from normal alignment. Herniated nucleus pulposus or history of operation for this condition. Abnormal displacement of vertebrae. Healed fractures or dislocation of the spine with significant residuals.

(t) *Systemic Disease and Miscellaneous Disqualifications.* Reiter's disease. Sarcoidosis. Tuberculosis. Dermatomyositis. Localized or diffuse scleroderma. Allergic manifestations such as hay fever, asthma, allergic dermatoses and severe abdominal, cerebral or visceral allergy. Any acute pathological condition, including acute communicable diseases, until recovery has occurred without sequelae. Any deformity which is markedly unsightly. Residuals of cold injury. Abnormal elevation of temperature. Various benign tumors, depending upon location, size and involvement.

(u) *Venereal Disease Disqualifications.* Any active venereal disease or active infectious process resulting therefrom. Complications and permanent residual of venereal disease. Positive spinal fluid test for syphilis.

(v) *Medical History.* In order to assist the medical examiner in conducting the qualifying medical examinations, it is required that each candidate complete a standard Form 89 (Report of Medical History) in his own handwriting. Each candidate shall indicate, to the best of his knowledge, his complete past medical history. Any past disqualifying medical condition that is not divulged will be reason for subsequent discharge from the Naval Academy. In addition, each candidate shall be required to complete the Personal History Booklet which will be provided at the time of examination.

**§ 710.45 Appendix V—Course of instruction.**

(a) The course of instruction at the USNA is of 4 years' duration. The curriculum provides a basic education in naval science; science and engineering; and the humanities and social sciences. Eighty-five percent of the curriculum is devoted to a core program in these broad fields, and fifteen percent is available for concentration in a specified field of concentration. In addition, there is opportunity for advanced work through validation of college-level courses successfully completed elsewhere, and through a program of additional elective courses for superior students.

(b) The courses of the first year are the following:

*First Semester:*
Air-Ocean Environment and Navigation
Calculus I
Chemistry
Engineering Graphics and Statics
Composition and Literature
Physical Education
*Second Semester:*
Introduction to Military Psychology
Calculus II
Chemistry
General Physics I
Composition and Literature
Physical Education

(c) Midshipmen who have taken College Entrance Examination Board Advanced Placement Tests prior to entering the Academy may submit their scores for consideration in validating general education courses at the Naval Academy. Validation entitles midshipmen to substitute elective studies for prescribed courses in which they have demonstrated proficiency. Academic departments will review the advanced placement test scores to determine which midshipmen will be eligible for course exemptions or will be eligible to take the validation examinations conducted by these departments soon after a new class enters the Academy. The advanced placement tests are administered in May of each year at College Board examining centers throughout the country. Registration in advance, including payment of fee, is necessary. Information on registration procedures, fees, testing dates, and examining centers is contained in the bulletin, "Advanced Placement Examinations," available without charge. This bulletin may be obtained by writing to College Board Advanced Placement Examinations at one of the following addresses:

Box 592,
Princeton, New Jersey, 08540,
or
Box 1025,
Berkeley, California, 94701.

**§ 710.46 Appendix VI—Formats for requesting a nomination.**

(a) *Format for requesting a Congressional nomination.*

Date.

Honorable ----------
House of Representatives
Washington, D.C. 20025
Dear Mr----------:
or
Honorable ----------
United States Senate
Washington, D.C. 20025
Dear Senator----------:

It is my desire to attend the United States Naval Academy and to make the United States Navy my career. I respectfully request that I be considered as one of your nominees for the class that enters the Academy in June 1965.

The following personal data are furnished for your information:
Name: (As recorded on birth certificate)
Address: (City, County, State)
Name of Parents:
Date of Birth:
High School Attended:
Date of High School Graduation:
Approximate Grade Average:

My high school transcript of work completed to date is attached.

I have been active in high school extracurricular activities shown on the attached list.

I shall greatly appreciate your consideration of my request for a nomination to the U.S. Naval Academy.

Sincerely yours,

Signature.

(b) *Format for requesting a Presidential nomination.*

Date.

Chief of Naval Personnel,
Department of the Navy,
Washington, D.C., 20370.
Attn: Pers-B66.

Dear Sir: I request a nomination under the Presidential category for the class that enters the Naval Academy in June 1965 and submit the following information:
Name: (Give name as shown on birth certificate. If different from that which you use, attach a copy of court order, if applicable.)
Address: (Give permanent and temporary address.)
Date of Birth: (Spell out month.)
Date of High School Graduation:
If Member of Military: (List grade, serial number, component, branch of service, and organizational address.)
If Previous Candidate: (List year.)
Information on Parent:
Name, Grade, Serial Number, Component and Branch of Service:
Organizational Address:
Retired or Deceased: (Give date and attach copy of retirement orders or casualty report.)
Officer Personnel: (Attach statement of service prepared by Personnel Officer specifying Regular or Reserve status for all periods of service.)
Enlisted Personnel: (Attach statement prepared by Personnel Officer listing date of enlistment, date of expiration of enlistment, component and branch of service.)

Sincerely yours,

Signature.

(c) *Format for requesting a son-of-deceased-veteran nomination.*

Date.

Chief of Naval Personnel,
Department of the Navy,
Washington, D.C., 20370.
Attn: Pers-B66.

Dear Sir: I request a nomination under the Sons of Deceased Veterans category for the class that enters the Naval Academy in June 1965 and submit the following information:
Name: (Give name as shown on birth certificate. If different from that which you use, attach a copy of court order, if applicable.)
Address: (Give permanent and temporary address.)
Date of Birth: (Spell out month.)
Date of High School Graduation:
If Member of Military: (List grade, serial number, component, branch of service, and organizational address.)
If previous Candidate: (List year.)
Information on Parent:
Name, Grade, Serial Number, Regular or Reserve Component and Branch of Service:
Date and Place of Death:
Cause of Death:
Veterans Administration XC Claim Number: (Forwarding a copy of death certificate, preferably the casualty report, will expedite processing of your application.)
Address of VA Office where case is filed:

Sincerely yours,

Signature.

By direction of the Secretary of the Navy.

Dated: November 25, 1964.

[SEAL] WILFRED HEARN,
*Rear Admiral, U.S. Navy, Judge Advocate General of the Navy.*

# Title 12—BANKS AND BANKING

## Chapter II—Federal Reserve System

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Reg. R]

## PART 218—RELATIONS WITH DEALERS IN SECURITIES UNDER SECTION 32, BANKING ACT OF 1933

### Short-Term Negotiable Notes

**§ 218.109 Short-term negotiable notes of banks not securities under section 32, Banking Act of 1933.**

(a) The Board of Governors has been asked whether short-term unsecured negotiable notes of the kinds issued by some of the large banks in this country as a means of obtaining funds are "other similar securities" within the meaning of section 32, Banking Act of 1933 (12 U.S.C. 78) and this part.

(b) Section 32 forbids certain interlocking relationships between banks which are members of the Federal Reserve System and individuals or organizations "primarily engaged in the issue, flotation, underwriting, public sale, or distribution, at wholesale or retail, or through syndicate participation, of stocks, bonds, or other similar securities * * *." Therefore, if such notes are securities similar to stocks or bonds, any dealing therein would be an activity covered in section 32 and would have to be taken into consideration in determining whether the individual or organization involved was "primarily engaged" in such activities.

(c) The Board has concluded that such short-term notes of the kind described above are not "other similar securities" within the meaning of section 32 and this part.

(12 U.S.C. 248(i). Interprets or applies 12 U.S.C. 78)

Dated at Washington, D.C., this 25th day of November 1964.

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM,
[SEAL] MERRITT SHERMAN,
*Secretary.*

# Title 14—AERONAUTICS AND SPACE

## Chapter I—Federal Aviation Agency

[Regulatory Docket No. 5074]

## PART 27—AIRWORTHINESS STANDARDS: NORMAL CATEGORY ROTORCRAFT [NEW]

### *Correction*

In Federal Register Document 64-12026, published at page 15694 in the issue dated Tuesday, November 24, 1964, the effective date, appearing in the fourth from last paragraph preceding signature, should read "effective February 1, 1965".

SUBCHAPTER C—AIRCRAFT

[Docket No. 6022; Amdt. 39-8]

## PART 39—AIRWORTHINESS DIRECTIVES [NEW]

### Sud Aviation Model SE 210 Caravelle VIR Aircraft

A proposal to amend Part 507 of the regulations of the Administrator to include an airworthiness directive requiring inspections and modifications of the main landing gear steel axle beams to prevent fatigue failure on Sud Aviation Model SE 210 Caravelle VIR aircraft was published in 29 F.R. 7692. Since the publication of that proposal, Part 507 has been recodified into Part 39 [New] of the Federal Aviation Regulations, effective November 20, 1964, therefore this amendment is being made to Part 39 [New].

Interested persons have been afforded an opportunity to participate in the making of the amendment. One operator requested that the inspection interval be 430 hours' time in service instead of 400 hours' time in service to coincide with established maintenance checks. On the basis of results from inspections already conducted, this slight increase should have no detrimental effect on safety.

There was also a comment that the AD implied that the fluorescent magnetic particle inspection must be accomplished again after the effective date of the AD even if it had been accomplished previously. Since this was not the Agency's intent, the AD has been clarified by the addition of the words "unless previously accomplished".

The proposed AD provided that the repetitive inspections of all main landing gear steel axle beams for cracks around threaded holes as specified in paragraphs (a) and (b) could be discontinued after the rework of the lower threaded holes on the axle beams required by paragraph (d) within 8,000 hours' time in service had been accomplished. However, this was a typographical error and the directive should have provided that the repetitive inspections specified in paragraph (b) and the inspection specified in paragraph (c) need not be performed after the rework specified in paragraph (d) had been accomplished and for the discontinuance of the repetitive inspections specified in paragraph (a) only upon accomplishment of the rework provided in paragraph (e). As proposed, the inspections specified in paragraph (a) could be discontinued prior to the time that the threaded holes covered by that inspection had been reworked. This, of course, would not be in the interest of safety. Therefore, the AD has been revised to correct this error. This change should not, however, place a substantial burden on any person since the repetitive inspection interval of paragraph (a) was increased at the request of the operator to coincide with his maintenance checks, and the inspection is visual and may be made without disassembly of tubing support components.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (25 F.R. 6489), § 39.13 of Part 39 [New] (14 CFR Part 39 [New]), is hereby amended by adding the following new airworthiness directive:

SUD AVIATION. Applies to Model SE 210 Caravelle VIR aircraft.

Compliance required as indicated.

In order to prevent fatigue failure of the main landing gear steel axle beams accomplish the following:

(a) Within 430 hours' time in service after the effective date of this AD and thereafter at intervals not exceeding 430 hours' time in service from the last inspection, visually inspect all main landing gear steel axle beams, P/N's 269028B and 269029B, for cracks around threaded holes, as specified in Hispano Suiza Aeroservice Bulletin No. 91 Section 1, No. 34 dated January 4, 1963. (Note: This inspection may be made without disassembly of tubing support components.)

(b) Within 860 hours' time in service after the effective date of this AD and thereafter at intervals not exceeding 860 hours' time in service from the last inspection, remove the lower tubing support shield and visually inspect with a magnifying glass the lower threaded holes in the main landing gear steel axle beams for cracks.

(c) Unless previously accomplished remove the lower tubing support shielding and inspect for cracks all lower threaded holes in the main landing gear steel axle beams and surrounding areas using fluorescent magnetic particle inspection or FAA approved equivalent at the following times:

(1) For landing gear with between 4,500 hours' and 5,100 hours' total time in service as of the effective date of this AD accomplish the inspection before the accumulation of 5,530 hours' total time in service.

(2) For landing gear with 5,100 or more hours' total time in service as of the effective date of this AD accomplish the inspection within 430 hours' total time in service after the effective date of this AD.

(d) Within 8,000 hours' total time in service rework all the lower threaded holes on axle beams as specified in Hispano Suiza Aeroservice Bulletin No. 91 Section 1, No. 34 dated January 4, 1963, or an FAA approved equivalent. The repetitive inspections specified in paragraph (b) and the inspection specified in paragraph (c) need not be performed after this rework has been accomplished.

(e) Within 12,000 hours' total time in service rework in accordance with Hispano Suiza Aeroservice Bulletin No. 91 Section 1, No. 34 dated January 4, 1963, or an FAA approved equivalent all holes in the landing gear which have not previously been reworked in accordance with paragraph (d). This AD no longer applies to aircraft on which this rework has been accomplished.

(f) Replace any parts found cracked before further flight.

(g) Upon request of the operator, an FAA maintenance inspector, subject to prior approval of the Chief, Aircraft Certification Division, Paris, France, may adjust the repetitive inspection intervals specified in this AD to permit compliance at an established inspection period of the operator if the request contains substantiating data to justify the increase for such operator.

(Hispano Suiza Aeroservice Bulletin No. 91 Section 1, No. 34 dated January 4, 1963, covers this same subject.)

This amendment shall become effective January 1, 1965.

(Secs. 313(a), 601, 603; 72 Stat. 752, 775, 776; 49 U.S.C. 1354(a), 1421, 1423)

Issued in Washington, D.C., on November 25, 1964.

C. W. WALKER,
*Acting Director,*
*Flight Standards Service.*

[F.R. Doc. 64-12240; Filed, Dec. 1, 1964; 8:45 a.m.]

[Docket No. 6359; Amdt. 39-7]

## PART 39—AIRWORTHINESS DIRECTIVES [NEW]

### Schleicher Models Ka6 and K8 Gliders

Amendment 716, 29 F.R. 5319, AD 64-9-6, requires inspection of the joint fittings and the welds between the bearing bracket for the airbrake flap cross shaft lever and fuselage main frame and replacement or modifications if cracks are found on Schleicher Models Ka6 and K8 gliders. It has been determined that the directive should no longer apply to certain aircraft modified by the manufacturer. Accordingly, the AD is revised to exclude these aircraft.

Since this amendment relaxes a previous requirement and imposes no additional burden on any person, notice and public procedure hereon are unnecessary and the amendment may be made effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (25 F.R. 6489), § 39.13 of Part 39 [New] (14 CFR Part 39 [New]), is amended as follows:

Amendment 716, 29 F.R. 5319, AD 64-9-6, Schleicher Models Ka6 and K8 gliders, is amended by changing paragraph (b) to read:

(b) On Model K8 all serial numbers up to and including Serial Number 8117 except Serial Numbers 8106, 8107, 8108, 8109, 8112, and 8116 which have been modified by the manufacturer, within 25 hours' time in service after the effective date of this amendment, visually inspect with at least a 3-power magnifying glass, the welds between the bearing bracket for the airbrake flap cross shaft lever and fuselage main frame. If faulty welds or cracks in the weld are found, modify the bracket before further flight as provided for in Schleicher Modification No. 10 dated October 25, 1962.

This amendment shall become effective December 2, 1964.

(Secs. 313(a), 601, 603; 72 Stat. 752, 775, 776; 49 U.S.C. 1354(a), 1421, 1423)

Issued in Washington, D.C., on November 25, 1964.

C. W. WALKER,
*Acting Director,*
*Flight Standards Service.*

[F.R. Doc. 64-12241; Filed, Dec. 1, 1964; 8:45 a.m.]

[Airspace Docket No. 63-SO-23]

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Alteration of Transition Area

On August 20, 1964, a notice of proposed rule making was published in the FEDERAL REGISTER (29 F.R. 11927) stating that the Federal Aviation Agency proposed to alter the Tupelo, Miss. transition area.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 [New] of the Federal Aviation Regulations is amended, effective 0001 e.s.t., February 4, 1965, as hereinafter set forth.

In § 71.181 (29 F.R. 1160), the Tupelo, Miss. transition area is amended by deleting "18-mile radius of the Tupelo Municipal Airport." and substituting therefor "18-mile radius of the Tupelo Municipal Airport; and the area bounded on the NE by a line 4 nmi SW of and parallel to the Holly Springs, Miss. VOR 115° radial, on the SE by the Tupelo 18-mile radius area, on the SW by a line 4 nmi SW of and parallel to the Holly Springs VOR 133° radial and on the W by the Memphis, Tenn. transition area."

This amendment is made under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued in Washington, D.C., on November 25, 1964.

DANIEL E. BARROW,
*Chief, Airspace Regulations*
*and Procedures Division.*

[F.R. Doc. 64-12242; Filed, Dec. 1, 1964; 8:45 a.m.]

[Airspace Docket No. 64-WA-74]

## PART 75—ESTABLISHMENT OF JET ROUTES [NEW]

### Alteration of Jet Routes

The purpose of this amendment to Part 75 [New] of the Federal Aviation Regulations is to realign the segment of Jet Routes Nos. 85 and 89 from Miami, Fla., to Lakeland, Fla., via the intersection of the Miami 315° and the Lakeland 154° True radials in lieu of the intersection of the Miami 316° and Lakeland 154° True radials.

This alteration would align a portion of these segments of J-85 and J-89 to overlie the centerline of the segment of Jet Route No. 41 which is designated from Miami direct to St. Petersburg, Fla., via the Miami 315° True radial.

Since this amendment is minor in nature and imposes no additional burden on any person, notice and public procedure hereon are unnecessary and the amendment may be made effective upon publication of this rule in the FEDERAL REGISTER.

In consideration of the foregoing, Part 75 [New] of the Federal Aviation Regulations, is amended, effective upon publication in the FEDERAL REGISTER, as hereinafter set forth.

In § 75.100 (20 F.R. 1287), Jet Routes Nos. 85 and 89 are amended by deleting "via the INT of the Miami 316° and the Lakeland, Fla., 154° radials;" and substituting "via the INT of the Miami 315° and the Lakeland, Fla., 154° radials;" therefor.

This amendment is made under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued in Washington, D.C., on November 24, 1964.

DANIEL E. BARROW,
*Chief, Airspace Regulations*
*and Procedures Division.*

[F.R. Doc. 64-12243; Filed, Dec. 1, 1964; 8:45 a.m.]

[Airspace Docket No. 63-WA-96]

## PART 75—ESTABLISHMENT OF JET ROUTES [NEW]

### Revocation of Jet Route

On October 15, 1964, Airspace Docket No. 63-WA-96 was published in the FEDERAL REGISTER (29 F.R. 14169) as an amendment to the Federal Aviation Regulations which established Jet Route No. 33 from Oakland, Calif., via Ukiah, Calif.; Fortuna, Calif.; North Bend, Oreg.; Newport, Oreg.; Hoquiam, Wash.; to Seattle, Wash.

Subsequent to publication of this rule in the FEDERAL REGISTER it was determined that controlled airspace along certain offshore portions of the jet route is insufficient to meet Agency standards for the designation of jet routes.

In consideration of the foregoing the Agency has determined that Jet Route No. 33 should be revoked. Any future proposal to designate this route would be published as a notice of proposed rule making.

Accordingly, action is taken to amend Part 75 [NEW] as hereinafter set forth.

In § 75.100 (29 F.R. 1287, 14169) Jet Route No. 33 is revoked.

This amendment shall be effective upon publication in the FEDERAL REGISTER.

This amendment is made under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued in Washington, D.C., on November 24, 1964.

DANIEL E. BARROW,
*Chief, Airspace Regulations*
*and Procedures Division.*

[F.R. Doc. 64-12244; Filed, Dec. 1, 1964; 8:45 a.m.]

SUBCHAPTER F—AIR TRAFFIC AND GENERAL OPERATING RULES [NEW]

[Reg. Docket No. 6279; Amdt. 401]

## PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES [NEW]

### Miscellaneous Amendments

The amendments to the standard instrument approach procedures contained herein are adopted to become effective when indicated in order to promote safety. The amended procedures supersede the existing procedures of the same classification now in effect for the airports specified therein. For the convenience of the users, the complete procedure is republished in this amendment indicating the changes to the existing procedures.

As a situation exists which demands immediate action in the interests of safety in air commerce, I find that compliance with the notice and procedure provisions of the Administrative Procedure Act is impracticable and that good cause exists for making this amendment effective within less than 30 days from publication.

In view of the foregoing and pursuant to the authority delegated to me by the Administrator (24 F.R. 5662), Part 97 [New] (14 CFR Part 97 [New]) is amended as follows:

1. By amending the following automatic direction finding procedures prescribed in § 97.11(b) to read:

ADF STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, courses and radials are magnetic. Elevations and altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of the Federal Aviation Agency. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

| Transition | | | | Ceiling and visibility minimums | | | |
|---|---|---|---|---|---|---|---|
| From— | To— | Course and distance | Minimum altitude (feet) | Condition | 2-engine or less | | More than 2-engine, more than 65 knots |
| | | | | | 65 knots or less | More than 65 knots | |
| | | | | T-dn | 300-1 | 300-1 | 200-½ |
| | | | | C-dn | 400-1 | 500-1½ | 400-1½ |
| | | | | S-dn-18 | 400-1 | 400-1 | 400-1 |
| | | | | A-dn | 800-2 | 800-2 | 800-2 |

Procedure turn W side of final approach crs, 004° Outbnd, 184° Inbnd, 2000' within 10 miles.
Minimum altitude over facility on final approach crs, 1800'.
Crs and distance, facility to airport, 184°—4.4 miles.
If visual contact not established upon descent to authorized landing minimums or if landing not accomplished within 4.4 miles after passing APN RBn, make a climbing left turn, proceed direct to APN RBn at 2000'.
CAUTION: Report position, altitude, ETA, and intentions as soon as practicable to tower when operating or to Unicom when tower not operating. Thereafter determine that adequate separation exists from other reported users and report changes in altitude and position. Maintain 1000' above previously reported traffic until advised that aircraft making approach has landed. Consult NOTAMS for hours of operation of tower and dates and time controlled airspace is effective.
NOTES: (1) This procedure is effective from 1300Z-2300Z and at other times when control tower is in operation. (2) Runway lights on N-S runway only. Prior coordination necessary for runway lights. (3) Not authorized for air carrier use. (4) APN RBn operated by Alpena County.
Other change: Deletes note requiring procedure turn.
MSA within 25 miles of facility: 000°-090°—1800'; 090°-180°—2000'; 180°-270°—2300'; 270°-360°—2300'.

City, Alpena; State, Mich.; Airport Name, Phelps Collins; Elev., 689'; Fac. Class., HW; Ident., APN; Procedure No. 1, Amdt. 4; Eff Date., 28 Nov. 64; Sup. Amdt. No. 3; Dated, 8 Feb. 64

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Augusta VOR | Lewiston RBn | 251°—28 miles | 2400 | T-dn | 300-1 | 300-1 | 200-½ |
| Portland LOM | Lewiston RBn | 033°—25 miles | 2400 | C-dn | 900-1 | 900-1 | 900-1½ |
| | | | | A-dn | 1000-2 BCOB | 1000-2 BCOB | 1000-2 BCOB |

Procedure turn S side of crs, 217° Outbnd, 037° Inbnd, 2400' within 10 miles.
Minimum altitude over facility on final approach crs, 1200'.
If visual contact not established upon descent to authorized landing minimums or if landing not accomplished within 0.0 mile of RBn, make a right-climbing turn to 2400', return to LEW RBn. Hold SW, 037° Inbnd, right turns, 1 minute.
NOTES: (1) Facility owned and operated by the cities of Auburn and Lewiston, Maine. (2) Approach from a holding pattern not authorized. Procedure turn required.
MSA within 25 miles of facility: 000°-090°—3200'; 090°-180°—1300'; 180°-270°—2600'; 270°-360°—3400'.

City, Auburn; State, Maine; Airport Name, Auburn-Lewiston Municipal; Elev., 292'; Fac. Class., MHW; Ident., LEW; Procedure No. 1, Amdt. Orig.; Eff. Date, 28 Nov. 64

PROCEDURE CANCELLED, EFFECTIVE NOV. 28, 1964.

City, Cleveland; State, Ohio; Airport Name, Cleveland-Hopkins; Elev., 792'; Fac. Class., LOM; Ident., CL; Procedure No. 1, Amdt. 6; Eff. Date, 29 Feb. 64; Sup. Amdt. No. 5; Dated, 2 May 63

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Cordova VOR | DVN RBn | Direct | 2600 | T-dn | 300-1 | 300-1 | 200-½ |
| Moscow Int | DVN RBn | Direct | 2300 | C-dn | 400-1 | 500-1 | 500-1½ |

2. By amending the following very high frequency omnirange (VOR) procedures prescribed in § 97.11(c) to read:

VOR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, courses and radials are magnetic. Elevations and altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.
If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of the Federal Aviation Agency. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

| Transition | | | | Ceiling and visibility minimums | | | |
|---|---|---|---|---|---|---|---|
| From— | To— | Course and distance | Minimum altitude (feet) | Condition | 2-engine or less | | More than 2-engine, more than 65 knots |
| | | | | | 65 knots or less | More than 65 knots | |
| | | | | T-dn | 300-1 | 300-1 | 200-½ |
| | | | | C-dn | 400-1 | 500-1 | 500-1½ |
| | | | | S-dn-13 | 400-1 | 400-1 | 400-1 |
| | | | | A-dn* | 800-2 | 800-2 | 800-2 |

Procedure turn W side of crs, 309° Outbnd, 129° Inbnd, 3100′ within 10 miles.
Minimum altitude over facility on final approach crs, 2900′.
Crs and distance, facility to airport, 129°—5.1 miles.
If visual contact not established upon descent to authorized landing minimums or if landing not accomplished within 5.1 miles after passing BJI-VOR, make right climbing turn to 3100′ and return to the BJI-VOR.
AIR CARRIER NOTE: Alternate minimums authorized 24 hours daily for air carriers with weather reporting service at the airport.
*Alternate minimums authorized only during hours of control zone operation.
MSA within 25 miles of facility: 000°-090°—2600′; 090°-180°—2800′; 180°-360°—3000′.

City, Bemidji; State, Minn.; Airport Name, Bemidji Municipal; Elev., 1396′; Fac. Class, BVOR; Ident., BJI; Procedure No. 1, Amdt. 2; Eff. Date, 28 Nov. 64; Sup. Amdt. No. 1; Dated, 16 Nov. 63

**3. By amending the following terminal very high frequency omnirange (TerVOR) procedures prescribed in § 97.13 to read:**

TERMINAL VOR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, courses and radials are magnetic. Elevations and altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.
If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of the Federal Aviation Agency. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

| Transition | | | | Ceiling and visibility minimums | | | |
|---|---|---|---|---|---|---|---|
| From— | To— | Course and distance | Minimum altitude (feet) | Condition | 2-engine or less: 65 knots or less | 2-engine or less: More than 65 knots | More than 2-engine, more than 65 knots |
| Plant Int | BMI VOR | Direct | 2400 | T-dn | 300-1 | 300-1 | 200-½ |
| Twin Grove Int | BMI VOR | Direct | 2400 | C-dn | 500-1 | 500-1 | 500-1½ |
| | | | | S-dn-21 | 500-1 | 500-1 | 500-1 |
| | | | | A-dn* | NA | NA | NA |

Procedure turn E side of crs, 040° Outbnd, 220° Inbnd, 2400′ within 10 miles. Nonstandard due to ATC requirements.
Minimum altitude on final approach crs, 1400′.
Crs and distance, breakoff point to Runway 21, 212°—0.30 mile.
If visual contact not established upon descent to authorized landing minimums or if landing not accomplished within 0.0 mile of BMI VOR, make immediate left turn, climbing to 2300′ on R-040 BMI VOR within 10 miles.
CAUTION: Unlighted grain elevator 1000′ 1.5 miles NE of Runway 21.
NOTE: Weather at Bloomington Municipal not available to general public.
*800-2 authorized for air carrier with approved weather service.

City, Bloomington; State, Ill.; Airport Name, Bloomington Municipal; Elev., 875′; Fac. Class., BVOR; Ident., BMI; Procedure No. TerVOR-21, Amdt. 4; Eff. Date, 28 Nov. 64; Sup. Amdt. No. 3; Dated, 18 Jan. 64

Radar vectoring utilizing Los Angeles Radar authorized in accordance with approved patterns.
Procedure turn not authorized.
Minimum altitude over facility on final approach crs, 2000′.
Crs and distance, Bell Int to airport, 261°—5.5 miles; breakoff point to runway, 252°—0.3 mile.
If visual contact not established upon descent to authorized landing minimums or if landing not accomplished at 5.3-mile DME Fix LAX R-081, climb to VOR, then climb via LAX R-170 to 2000′ within 10 miles or, when directed by ATC, climb via 225° bearing from LAX LOM to intercept and climb via LAX R-170 to 2000′ within 10 miles.
NOTE: When authorized by ATC, DME may be used at 16 miles at 4500′ from LAX R-342 cw R-046 and at 2500′ between LAX R-046 and R-170 to position aircraft for a straight-in approach with the elimination of the procedure turn.
MSA within 25 miles of facility: 000°-090°—7200′; 090°-180°—2500′; 180°-270°—2400′; 270°-360°—5200′.

City, Hawthorne; State, Calif.; Airport Name, Hawthorne Municipal; Elev., 64′; Fac. Class., H-BVORTAC; Ident., LAX; Procedure No. 1, Amdt. Orig.; Eff. Date 28 Nov. 64

5. By amending the following instrument landing system procedures prescribed in § 97.17 to read:

ILS STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, courses and radials are magnetic. Elevations and altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of the Federal Aviation Agency. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

| Transition | | | | Ceiling and visibility minimums | | | |
|---|---|---|---|---|---|---|---|
| | | | | | 2-engine or less | | More than 2-engine, more than 65 knots |
| From— | To— | Course and distance | Minimum altitude (feet) | Condition | 65 knots or less | More than 65 knots | |
| CLE RBn | Gilbert RBn | Direct | 3000 | T–dn | 300–1 | 300–1 | 200–½ |
| CLE VOR | Louis Int (final) | Direct | 3000 | C–dn | 400–1 | 500–1 | 500–1½ |
| Sharon Int | Louis Int (final) | Direct | 3000 | S–dn–5R* | 200–½ | 200–½ | 200–½ |
| Louis Int | Gilbert RBn (final) | Direct | 2700 | A–dn | 600–2 | 600–2 | 600–2 |
| Vermilion Int | Gilbert RBn | Via STG VOR R–309 and ILS 5R front crs. | 3000 | | | | |
| Mentor Int | Gilbert RBn | Via CLE VOR R–072 and ILS 5R front crs. | 3000 | | | | |

Radar transitions and vectoring authorized in accordance with approved radar patterns.
Procedure turn SE side of crs, 234° Outbnd, 054° Inbnd, 2700′ within 10 miles of Gilbert RBn.
Crs and distance, Gilbert RBn to airport, 054°—6.8 miles.
Minimum altitude at glide slope interception Inbnd 2700′.
Altitude of glide slope and distance to approach end of runway at OM 1767′—3.5 miles; at MM 909′—0.5 mile.
If visual contact not established upon descent to authorized landing minimums or if landing not accomplished make left-climbing turn to 3000′, intercept Strongsville R–360 Outbnd, intercept and proceed Outbnd on Chardon R–265 to Crib Int, hold E, 1-minute left turns, 265° Inbnd.
CAUTION: Towers 1971′ approximately 6 miles ESE of airport.
*400–¾ required with glide slope inoperative.

City, Cleveland; State, Ohio; Airport Name, Cleveland Hopkins; Elev., 792′; Fac. Class., ILS; Ident., I–CLE; Procedure No. ILS–5R, Amdt. Orig.; Eff. Date, 28 Nov. 64

| | | | | | | | |

6. By amending the following radar procedures prescribed in § 97.19 to read:

RADAR STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses and radials are magnetic. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of the Federal Aviation Agency. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach, except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

| Radar terminal area maneuvering sectors and altitudes | | | | | | | | | | | | | | Ceiling and visibility minimums | | | |

# Title 7—AGRICULTURE

## Chapter VII—Agricultural Stabilization and Conservation Service (Agricultural Adjustment), Department of Agriculture

SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENTS

## PART 724—BURLEY, FLUE-CURED, FIRE-CURED, DARK AIR-CURED, VIRGINIA SUN-CURED, CIGAR-BINDER (TYPES 51 AND 52), CIGAR FILLER AND BINDER (TYPES 42, 43, 44, 53, 54, AND 55), AND MARYLAND TOBACCO

## Subpart—Proclamation of National Marketing Quota for Flue-Cured Tobacco for Three Marketing Years Beginning July 1, 1965, July 1, 1966, and July 1, 1967; and Announcement and Apportionment of National Marketing Quota for Flue-Cured Tobacco for 1965–66 Marketing Year

### § 724.34 Basis and purpose.

(a) Sections 724.34 and 724.34a are issued pursuant to the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1281 et seq.), hereinafter called the Act, (1) to proclaim a national marketing quota for flue-cured tobacco for the three marketing years beginning July 1, 1965, July 1, 1966, and July 1, 1967; (2) to determine the reserve supply level and the total supply of flue-cured tobacco for the marketing year beginning July 1, 1964; (3) to announce the amount of the national marketing quota for flue-cured tobacco for the marketing year beginning July 1, 1965 together with increases under sections 312(b) and 313 (e) of the Act; and (4) to apportion such national marketing quota among the several States. The determinations by the Secretary contained in § 724.34a have been made on the basis of the latest available statistics of the Federal Government, and after due consideration of data, views, and recommendations received from flue-cured tobacco producers and others as provided in a notice (29 F.R. 14234) given in accordance with the Administrative Procedure Act (5 U.S.C. 1003).

(b) Consideration in the light of the latest available statistics of the Federal Government has been given as to whether any of the types of flue-cured tobacco should be treated as a kind of tobacco pursuant to the proviso in section 301(b)(15) of the Act. Recommendations were received to the effect that further reductions in allotments should be by types and be based on the volume of each type placed under price support loans through the Stabilization Corporation. However, tobacco placed with the Stabilization Corporation is not removed from the channels of trade, the greater part of the tobacco so placed in prior years has been purchased by the tobacco trade, and stocks in the hands of the Stabilization Corporation include substantial quantities of all types of flue-cured tobacco. Flue-cured tobacco produced in the United States, regardless of its type, is a substantially homogeneous commodity. Its principal usage both in this country and abroad is in the manufacture of cigarettes. The individual types have a high degree of interchangeability in their actual use and each of these types is readily substitutable for the others. A comparison of non-farm stocks in the United States by quarters from 1957 demonstrates that the relationship between stocks of the various types of flue-cured tobacco have remained relatively constant during this period; and a price comparison between and among flue-cured types since 1947 show a close proximity of prices to each other. Therefore, it is concluded that there is a common demand for flue-cured tobacco and no finding is made that there is a difference in supply and demand conditions as among such types of tobacco which results in a difference in the adjustments needed in the marketings thereof in order to maintain supplies in line with demand. Accordingly, this proclamation is issued on the basis that flue-cured tobacco comprising types 11, 12, 13, and 14 is a "kind of tobacco" for the purposes of the Act for the marketing years 1965–1966, 1966–1967 and 1967–1968.

(c) Some recommendations were received for the retention of acreage allotments and others advocated that quotas be established on a poundage basis. Section 313(g) of the Act which authorizes the conversion of the State quotas and national reserve into acreage allotments was enacted on August 7, 1939. State quotas and the national reserve have been so converted for each crop since 1940. The enforcement provisions of the Act have been strengthened by amendments thereto since the enactment of section 313(g) on the basis of acreage allotments being in effect. After due consideration the provisions of section 313(g) are invoked for the 1965–1966 marketing year.

(d) Since the Act requires the holding of a referendum of flue-cured tobacco producers within 30 days after issuance of a national marketing quota for flue-cured tobacco to determine whether such producers favor such quota, and since flue-cured tobacco farmers need to be notified of the 1965 crop year allotments prior to the referendum and as soon as possible in order to make plans for 1965 flue-cured tobacco production, it is hereby found that compliance with the 30-day effective date provision of the Administrative Procedure Act is impracticable and contrary to the public interest. Therefore, the proclamation, and the announcement and apportionment of the national marketing quota for flue-cured tobacco for the 1965–66 marketing year contained herein shall become effective upon the date of filing with the Director, Office of the Federal Register.

### § 724.34a Proclamation of national marketing quota for flue-cured tobacco for the three marketing years beginning July 1, 1965, July 1, 1966, and July 1, 1967; and determinations with respect to the national marketing quota for flue-cured tobacco for the marketing year beginning July 1, 1965.

(a) *Proclamation.* Since the 1964–65 marketing year is the last of three consecutive years for which marketing quotas previously proclaimed will be in effect for flue-cured tobacco, a national marketing quota for flue-cured tobacco for each of the three marketing years beginning July 1, 1965, July 1, 1966, and July 1, 1967, is hereby proclaimed pursuant to section 312(a) of the Act.

(b) *Reserve supply level.*[1] The reserve supply level for flue-cured tobacco for the marketing year beginning July 1, 1964, is 3,231.2 million pounds, calculated, as provided in the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1281 et seq.), hereinafter referred to as the Act, from a normal year's domestic consumption of 825.0 million pounds and a normal year's exports of 490.0 million pounds.

(c) *Total supply.*[1] The total supply of flue-cured tobacco for the marketing year beginning July 1, 1964, is 3,742.9 million pounds, consisting of carryover of 2,378.7 million pounds and estimated 1964 production of 1,364.2 million pounds.

(d) *Carryover.*[1] The estimated carryover of flue-cured tobacco at the beginning of the marketing year for such tobacco beginning July 1, 1965, is 2,452.0 million pounds, calculated by subtracting the estimated disappearance for the marketing year beginning July 1, 1964, of 1,290.9 million pounds from the total supply of such tobacco.

(e) *National marketing quota.*[1] The amount of flue-cured tobacco which will make available during the marketing year beginning July 1, 1965, a supply of flue-cured tobacco equal to the reserve supply level of such tobacco is 779.2 million pounds, and a national marketing quota of such amount is hereby announced. It is determined, however, that a national marketing quota in the amount of 779.2 million pounds would result in undue restrictions of marketings during the 1965–66 marketing year and such amount is hereby increased by 20 percent to 935.0 million pounds pursuant to section 312(b) of the Act. The national marketing quota as so increased is further increased by 285,940 pounds pursuant to section 313(e) of the Act relating to minimum flue-cured tobacco State marketing quotas. Therefore, the amount of the national marketing quota for flue-cured tobacco in terms of the total quantity of such tobacco which may be marketed during the marketing year beginning July 1, 1965, is 935,285,940 pounds.

(f) *Apportionment of the quota.* The national marketing quota is hereby

[1] Rounded to the nearest tenth of a million pounds, except for increase pursuant to section 313(e) of the Act.

apportioned among the several States pursuant to section 313(a) of the Act and converted into State acreage allotments in accordance with section 313(g) of the Act as follows:

| State | Acreage allotment | Reserve[3] |
|---|---|---|
| Alabama[1] | 500.00 | 0.50 |
| Florida | 10,948.83 | 13.60 |
| Georgia | 52,293.72 | 64.93 |
| North Carolina | 339,115.48 | 421.06 |
| South Carolina | 59,708.85 | 74.13 |
| Virginia | 51,559.95 | 64.03 |
| Reserve[2] | 1,288.59 | |

[1] Increased to 500 acres pursuant to section 313(e) of the Act.
[2] Acreage reserved for establishing allotments for new farms.
[3] The acreage included in the State acreage allotment available pursuant to §724.57 of the regulations governing determination of farm tobacco acreage allotments (27 F.R. 8937; 28 F.R. 9144; 29 F.R. 1315) in each State for use in making corrections, adjustments in old farm allotments that are relatively smaller than those for similar farms, and in determining allotments for overlooked old farms.

(Secs. 301, 312, 313, 375, 52 Stat. 38, 46, 47, 66, as amended; 7 U.S.C. 1301, 1312, 1313, 1375)

Effective date: Date of filing with the Director, Office of the Federal Register.

Signed at Washington, D.C., on November 27, 1964.

ORVILLE L. FREEMAN,
*Secretary.*

[F.R. Doc. 64-12293; Filed, Nov. 27, 1964; 4:33 p.m.]

## Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders; Fruits, Vegetables, Tree Nuts), Department of Agriculture

[Lemon Reg. 139, Amdt. 1]

## PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

### Limitation of Handling

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910; 27 F.R. 8346), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons as hereinafter provided will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this amendment until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 1001-1011) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restriction on the handling of lemons grown in California and Arizona.

(b) *Order, as amended.* The provisions in paragraph (b)(1)(i) and (ii) of § 910.439 (Lemon Regulation 139, 29 F.R. 15640) are hereby amended to read as follows:

(i) District 1: 37,200 cartons;
(ii) District 2: 97,650 cartons.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: November 25, 1964.

PAUL A. NICHOLSON,
*Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.*

[F.R. Doc. 64-12271; Filed, Dec. 1, 1964; 8:47 a.m.]

## PART 929—CRANBERRIES GROWN IN STATES OF MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW JERSEY, WISCONSIN, MICHIGAN, MINNESOTA, OREGON, WASHINGTON, AND LONG ISLAND IN THE STATE OF NEW YORK

### Expenses and Rate of Assessment for 1964-65 Fiscal Period

On November 14, 1964, notice of proposed rule making was published in the FEDERAL REGISTER (29 F.R. 15294) regarding the expenses and the fixing of the rate of assessment for the 1964-65 fiscal period pursuant to the marketing agreement, as amended, and Order No. 929, as amended (7 CFR Part 929; 29 F.R. 6617), regulating the handling of cranberries. This regulatory program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). After consideration of all relevant matters presented, including the proposals which were submitted by the Cranberry Marketing Committee (established pursuant to the amended marketing agreement and order) and set forth in the aforesaid notice, it is hereby found and determined that:

§ 929.205 Expenses and rate of assessment for the 1964-65 fiscal period.

(a) *Expenses.* The reasonable expenses to be incurred by the Cranberry Marketing Committee, established pursuant to the provisions of the amended marketing agreement and order, for its maintenance and functioning during the fiscal period ending July 31, 1965, will amount to $9,873.35.

(b) *Rate of assessment.* The rate of assessment to be paid by each handler who first handles cranberries shall be one cent ($0.01) per barrel of cranberries, or an equivalent quantity of cranberries, handled by him as the first handler thereof during the said fiscal period.

It is hereby found that good cause exists for not postponing the effective time of this action until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 1001-1011) in that (1) the relevant provisions of said amended marketing agreement and this part require that the rate of assessment fixed for a particular fiscal period shall be applicable to all assessable cranberries from the beginning of such year; and (2) the current fiscal period began on August 1, 1964, and the rate of assessment herein fixed will automatically apply to all assessable cranberries beginning with such date.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: November 25, 1964.

PAUL A. NICHOLSON,
*Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.*

[F.R. Doc. 64-12272; Filed, Dec. 1, 1964; 8:47 a.m.]

# Title 21—FOOD AND DRUGS

## Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

## PART 121—FOOD ADDITIVES

### Subpart F—Food Additives Resulting From Contact With Containers or Equipment and Food Additives Otherwise Affecting Food

NYLON RESINS

The Commissioner of Food and Drugs, having evaluated the data in a petition (FAP 1293) submitted jointly by Allied Chemical Corporation, 61 Broadway, New York 6, N.Y.; Foster Grant Company, Inc., 289 North Main Street, Leominster, Mass.; and Spencer Chemical Company, Dwight Building, Kansas City 5, Mo., and other relevant material, has concluded that the food additive regulations (21 CFR 121.2502; 29 F.R. 2781) should be amended to provide for the use of two grades of nylon 6 resins in the production of articles intended for use in contact with food. Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1)), and under the authority delegated to the Commissioner by the Secretary of Health, Education, and Welfare (21 CFR 2.90; 29 F.R. 471), § 121.2502 is amended by adding a new subparagraph (6) to paragraph (a) and by adding two new items to the table in paragraph (b). As amended, the affected portions read as follows:

§ 121.2502 Nylon resins.

* * * * * * *

(a) * * *

(6) Nylon 6 resins are manufactured by the polymerization of *epsilon*-caprolactam.

(b) Specifications:

| Nylon resins | Specific gravity | Melting point | Solubility in boiling 4.2*N* HCl | Maximum extractable fraction in selected solvents (expressed as percent by weight of resin) | | | |
|---|---|---|---|---|---|---|---|
| | | | | Water | 95 percent ethyl alcohol | Ethyl acetate | Benzene |
| * * * | * * * | *Degrees F.* * * * | * * * | *Percent* * * * | *Percent* * * * | *Percent* * * * | *Percent* * * * |
| 6.1 Nylon 6 resins | 1.15±0.015 | 392-446 | Dissolves in 1 hour. | 1.0 | 2.0 | 1.0 | 1.0 |
| 6.2 Nylon 6 resins for use only in food-contact films having an average thickness not to exceed 0.001 inches. | 1.15±0.015 | 392-446 | do | 1.5 | 2.0 | 1.0 | 1.0 |

Any person who will be adversely affected by the foregoing order may at any time within 30 days from the date of its publication in the FEDERAL REGISTER file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington, D.C., 20201, written objections thereto, preferably in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

*Effective date.* This order shall be effective on the date of its publication in the FEDERAL REGISTER.

(Sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1))

Dated: November 20, 1964.

JOHN L. HARVEY,
*Deputy Commissioner of Food and Drugs.*

[F.R. Doc. 64-12178; Filed, Dec. 1, 1964; 8:45 a.m.]

## PART 121—FOOD ADDITIVES

### Subpart B—Exemption of Certain Food Additives From the Requirement of Tolerances

MONO- AND DIGLYCERIDES

There is general recognition of the safety of mono- and diglycerides of edible fats or oils, or edible fat-forming fatty acids, when used in accordance with good manufacturing practice. This is reflected in the records which served as the basis for the establishment of the definitions and standards of identity for frozen desserts, bakery products, and oleomargarine.

Mono- and diglycerides produced from the glycerolysis of edible fats or oils are listed as substances that are generally recognized as safe in § 121.101(d), under (3) in the table; however, mono- and diglycerides produced by the esterification of glycerin and edible fat-forming fatty acids are not so listed.

Based on comments received to the effect that this omission is creating an unfair and inequitable competitive situation, it is concluded that the listing of mono- and diglycerides in § 121.101 should be amended in the interest of clarity, as hereinafter set forth. Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409, 72 Stat. 1785; 21 U.S.C. 348) and under the authority delegated to the Commissioner by the Secretary of Health, Education, and Welfare (21 CFR 2.90; 29 F.R. 471), § 121.101(d) is amended by changing the third, fifth, and sixth items listed under (3) in the table to read as follows:

§ 121.101 Substances that are generally recognized as safe.

* * * * * *

(d) * * *

| Product | Tolerances | Limitations or restrictions |
|---|---|---|
| * * * | * * * | * * * |
| (3) EMULSIFYING AGENTS | | |
| * * * | * * * | * * * |
| Diacetyl tartaric acid esters of mono- and diglycerides of edible fats or oils, or edible fat-forming fatty acids. | | |
| * * * | * * * | * * * |
| Mono- and diglycerides of edible fats or oils, or edible fat-forming fatty acids. | | |
| Monosodium phosphate derivatives of mono- and diglycerides of edible fats or oils, or edible fat-forming fatty acids. | | |
| * * * | * * * | * * * |

* * * * * *

Notice and public procedure and delayed effective date are not necessary prerequisites to the promulgation of this order, and I so find, since the changes clarify an established regulation by redefining certain substances listed as generally recognized as safe.

Any person who will be adversely affected by the foregoing order may at any time within 30 days from the date of its publication in the FEDERAL REGISTER file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington, D.C., 20201, written objections thereto, preferably in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

*Effective date.* This order shall be effective on the date of its publication in the FEDERAL REGISTER.

(Sec. 409, 72 Stat. 1785; 21 U.S.C. 348)

Dated: November 24, 1964.

GEO. P. LARRICK,
*Commissioner of Food and Drugs.*

[F.R. Doc. 64-12291; Filed, Dec. 1, 1964; 8:49 a.m.]

## PART 121—FOOD ADDITIVES

### Subpart F—Food Additives Resulting From Contact With Containers or Equipment and Food Additives Otherwise Affecting Food

MINERAL OIL

The Commissioner of Food and Drugs, having evaluated data submitted in petitions (FAP 302, 323) filed by American Petroleum Institute, 1271 Avenue of the Americas, New York 20, N.Y., and other relevant material, has concluded that the food additive regulations should be amended to prescribe conditions for the safe use of white mineral oil and technical white mineral oil in the production of articles that contact food. Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1)), and under the authority delegated to the Commissioner by the Secretary of Health, Education, and Welfare (21 CFR 2.90; 29 F.R. 471), Subpart F of the food additive regulations is amended in the following respects:

1. By adding the following new section:

§ 121.2589 Mineral oil.

Mineral oil may be safely used as a component of nonfood articles intended for use in contact with food, subject to the provisions of this section:

(a) White mineral oil meeting the specifications prescribed in § 121.1146 may be used as a component of nonfood articles provided such use complies with any applicable limitations in this Part 121. The use of white mineral oil in or on food itself, including the use of white mineral oil as a protective coating or release agent for food, is subject to the provisions of § 121.1146.

(b) Technical white mineral oil identified in subparagraph (1) of this paragraph may be used as provided in subparagraph (2) of this paragraph.

(1) Technical white mineral oil consists either of virgin petroleum distillates that are specially refined, including

treatment with fuming sulfuric acid or sulfur trioxide, or it consists of distillates that are produced synthetically from petroleum gases and that are specially refined, including treatment by hydrogenation. Technical white mineral oil meets the following specifications:

(i) Saybolt color 20 minimum as determined by ASTM Method D–156.

(ii) Ultraviolet absorbance limits as follows:

| Wavelength | Maximum absorbance per centimeter optical pathlength |
|---|---|
| mμ | |
| 280–289 | 4.0 |
| 290–299 | 3.3 |
| 300–329 | 2.3 |
| 330–350 | 0.8 |

Technical white mineral oil containing antioxidants shall meet the specified ultraviolet absorbance limits after correction for any absorbance due to the antioxidants. The ultraviolet absorbance shall be determined by the procedure described for application to mineral oil under "Specification" on page 66 of the Journal of the Association of Official Agricultural Chemists, Volume 45 (February 1962), disregarding the last two sentences of that procedure and substituting therefor the following: Determine the absorbance of the mineral oil extract in a 10-millimeter cell in the range from 260–350 mμ, inclusive, compared to the solvent control. If the absorbance so measured exceeds 2.0 at any point in range 280–350 mμ, inclusive, dilute the extract and the solvent control, respectively, to twice their volume with dimethyl sulfoxide and remeasure the absorbance. Multiply the remeasured absorbance values by 2 to determine the absorbance of the mineral oil extract per centimeter optical pathlength.

(2) Technical white mineral oil may be used wherever mineral oil is permitted for use as a component of nonfood articles complying with §§ 121.2519, 121.2520, 121.2531, 121.2535, 121.2536, 121.2553, 121.2557, and 121.2562.

(3) Technical white mineral oil may contain any antioxidant permitted in food by regulations issued in accordance with section 409 of the act, in an amount not greater than that required to produce its intended effect.

2. Section 121.2511 *Plasticizers in polymeric substances* is amended by inserting alphabetically in the list of substances in paragraph (b) a new item as follows:

**§ 121.2511 Plasticizers in polymeric substances.**

• • • • •

(b) • • •

| | Limitations |
|---|---|
| • • • | • • • |
| Mineral oil, white | |
| • • • | • • • |

• • • • •

3. In paragraph (d)(5)(ii) of § 121.2535 *Textiles and textile fibers*, the item "Mineral oil" in the list of adjuvant substances is amended to read as follows:

**§ 121.2535 Textiles and textile fibers.**

• • • • •

(d) • • •

(5) • • •

| List of substances | Limitations |
|---|---|
| • • • | • • • |
| (ii) • • • | |
| • • • | • • • |
| Mineral oil | For use only at a level not to exceed 0.15 percent by weight of finished fibers. |
| • • • | • • • |

• • • • •

**§ 121.2557 [Amended]**

4. In paragraph (d)(3) of § 121.2557 *Defoaming agents used in coatings* the item "Mineral oil, including paraffin oils" is changed to read "Mineral oil".

5. Section 121.2578 *Hot-melt strippable food coatings* is amended by inserting alphabetically in the list of substances in paragraph (b)(2) a new item as follows:

**§ 121.2578 Hot-melt strippable food coatings.**

• • • • •

(b) • • •

(2) • • •

| List of substances | Limitations |
|---|---|
| • • • | • • • |
| Mineral oil, white | For use only as a component of hot-melt strippable food coatings applied to frozen meats and complying with § 121.1146. |

Any person who will be adversely affected by the foregoing order may at any time within 30 days from the date of its publication in the FEDERAL REGISTER file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington, D.C., 20201, written objections thereto, preferably in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

*Effective date.* This order shall be effective on the date of its publication in the FEDERAL REGISTER.

(Sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1))

Dated: November 24, 1964.

GEO. P. LARRICK,
*Commissioner of Food and Drugs.*

[F.R. Doc. 64–12292; Filed, Dec. 1, 1964; 8:49 a.m.]

# Title 25—INDIANS

## Chapter I—Bureau of Indian Affairs, Department of the Interior

### SUBCHAPTER F—ENROLLMENT

### PART 43d—PREPARATION OF A ROLL TO SERVE AS THE BASIS FOR THE DISTRIBUTION OF THE JUDGMENT FUNDS AWARDED THE SNAKE OR PAIUTE INDIANS OF THE FORMER MALHEUR RESERVATION

The Act of August 20, 1964 (78 Stat. 563), directs the Secretary of the Interior to prepare a roll of persons of Snake or Paiute Indian ancestry to serve as the basis for distributing the funds awarded the Snake or Paiute Indians of the former Malheur Reservation in Oregon by the Indian Claims Commission. The purpose of the regulations in the new Part 43d is to govern the preparation of this roll, and the new part is set forth below.

Since the Act of August 20, 1964, supra, clearly delineates the basis for the new roll, who shall be eligible, the form the distribution shall take, and provides a deadline for the filing of applications, the procedure for general notice of proposed rule making is being dispensed with. These regulations will become effective upon the date of publication in the FEDERAL REGISTER.

STEWART L. UDALL,
*Secretary of the Interior.*

NOVEMBER 25, 1964.

Part 43d, Chapter I, Title 25 of the Code of Federal Regulations reads as follows:

Sec.
- 43d.1 Definitions.
- 43d.2 Purpose.
- 43d.3 Qualifications for enrollment.
- 43d.4 Application forms.
- 43d.5 Filing of applications.
- 43d.6 Burden of proof.
- 43d.7 Review of applications by tribal committee.
- 43d.8 Action by the Director.
- 43d.9 Appeals.
- 43d.10 Decision of the Secretary.
- 43d.11 Preparation of roll.
- 43d.12 Certification and approval of roll.
- 43d.13 Special instructions.

AUTHORITY: The provisions of this Part 43d issued under the Act of August 20, 1964 (78 Stat. 563).

**§ 43d.1 Definitions.**

As used in this Part 43d.

(a) "Secretary" means the Secretary of the Interior or his authorized representative.

(b) "Commissioner" means the Commissioner of Indian Affairs.

(c) "Director" means the Area Director, Portland Area Office, Bureau of Indian Affairs, Box 3785, Portland, Oreg., or his authorized representative.

(d) "Staff Officer" means the enrollment officer or other person authorized to prepare the roll.

(e) "Descendants" means those persons who have issued from an enrollee and includes such enrollee's children, grandchildren, etc. It does not include collateral relatives such as aunts, uncles, cousins, etc.

(f) "Living" means born on or prior to and living on August 20, 1964.

(g) "Sponsor" means a person who has filed an application for enrollment on behalf of another person.

(h) "Basic roll" means any specific roll or listing of individuals which the Director shall determine may be utilized in the preparation of the new roll.

**§ 43d.2 Purpose.**

The regulations in this Part 43d are to govern the compilation of a roll of persons who meet the enrollment requirements specified in section I of the Act of August 20, 1964 (78 Stat. 563), to serve as the basis for the distribution of the judgment funds paid to the Snake or Paiute Indians of the former Malheur Reservation in Oregon in Indian Claims Commission Docket No. 17, together with the interest accrued thereon.

**§ 43d.3 Qualifications for enrollment.**

Persons of Snake or Paiute Indian ancestry born on or prior to and living on August 20, 1964, who were members of or are descendants of members of the bands whose chiefs and headmen Weyou-we-wa (Wewa), Gaha-nee, E-higant (Egan), Po-nee, Chaw-watnanee, Owits (Oits), and Tashe-go, signed the unratified Treaty of December 10, 1868, and elect not to participate as beneficiaries in the awards granted in Docket No. 87 to the Northern Paiute Nation shall be eligible for inclusion on the roll prepared pursuant to this Part 43d.

**§ 43d.4 Application forms.**

(a) Application forms will be furnished by the Director or other designated persons upon written or verbal request. Each person furnishing application forms shall keep a record of the names of the individuals to whom applications are given, as well as the number of forms and the date furnished.

(b) Among other information each application shall contain:

(1) The deadline for filing the application with the Director or other designated persons.

(2) Certification as to whether application is for a natural child or an adopted child.

(3) Instructions for completing and filing application forms shall be furnished with each form.

**§ 43d.5 Filing of applications.**

Any adult person who desires to be enrolled and believes he meets the requirements for enrollment specified in this Part 43d must file or have filed in his behalf a completed application form with the Director on or before May 21, 1965. Written application forms for minors, mentally incompetent persons or other persons in need of assistance, members of the Armed Services or other services of the United States Government and/or any eligible members of their immediate families stationed in Alaska or Hawaii or elsewhere outside the Continental United States, or a person who died after August 20, 1964, may be filed by the parent, recognized guardian, next friend, next of kin, spouse, executor or administrator of estate, the Director, or other person on or before May 21, 1965.[1]

**§ 43d.6 Burden of proof.**

The burden of proof rests upon the applicant to establish his eligibility for enrollment. Documentary evidence such as birth certificates, death certificates, baptismal records, copies of probate finding, or affidavits, may be used to support claim for enrollment. Records of the Bureau of Indian Affairs may be used to establish eligibility.

**§ 43d.7 Review of application by tribal authorities.**

If practicable, the Director shall appoint a committee of tribal authorities whose function shall be to review the applications for the purpose of recommending to the Director approval or rejection of the applications. Such committee shall have no longer than three months from the deadline for filing applications to complete any review and to make pertinent recommendations. A recommendation for the rejection of any application shall be supported by a memorandum setting forth the reasons for the adverse recommendation.

**§ 43d.8 Action by the Director.**

(a) The Director shall consider each application and, when applicable, the tribal recommendation thereon. Upon determination as to the eligibility of an individual, the Director shall notify the applicant or sponsor in writing of his decision. If such determination is favorable, the name of the applicant shall be placed on the roll. If the decision is adverse, the applicant or sponsor shall be notified of such decision by certified mail, to be received by addressee only, return receipt requested, together with a full explanation of the reasons therefor and of his right to appeal to the Secretary. (Registered mail must be used for correspondence sent outside the United States.) If an individual files applications on behalf of more than one person, one notice of eligibility or rejection may be addressed to the person who filed the application. However, said notice must list the name of such person involved.

(b) To avoid hardship or gross injustice, the Director may waive technical deficiencies in applications or other submissions.

**§ 43d.9 Appeals.**

Appeals must be in writing, addressed and mailed to the Director, and received by him within 30 days from the receipt of rejection notice. The appellant may submit with his appeal any supporting evidence not previously furnished. When upon review of the evidence, the Director is satisfied that the right to enrollment has been established, the appellant shall be so notified and the appropriate name entered on the roll. If the Director determines the applicant ineligible, he shall forward the appeal, together with the complete record and his recommendations thereon, to the Commissioner for transmittal to the Secretary.

[1] Criminal penalties are provided by statute for knowingly filing false information in such statements (18 U.S.C. 1001).

**§ 43d.10 Decision of the Secretary on appeals.**

The decision of the Secretary on an appeal shall be final and conclusive and written notice of the decision shall be given the applicant or sponsor. When so directed by the Secretary, the Commissioner shall cause to be entered on the roll the name of any person whose appeal has been sustained.

**§ 43d.11 Preparation of roll.**

The staff officer shall prepare a minimum of five copies of the roll of those persons determined to be eligible for enrollment. The roll shall contain for each person a roll number, name, address, sex, date of birth, and, in the remarks column, when applicable, the basic roll number, date of basic roll, name and relationship of the ancestor on the basic roll through whom eligibility was established and any other basis for determining eligibility.

**§ 43d.12 Certification and approval of roll.**

A certificate shall be attached to the roll by the staff officer certifying that to the best of his knowledge and belief the roll contains only the names of those persons who were determined to meet the requirements for enrollment. The Commissioner shall approve the roll.

**§ 43d.13 Special instructions.**

To facilitate the work of the Director, the Commissioner may issue special instructions not inconsistent with the regulations in this Part 43d.

# Title 26—INTERNAL REVENUE

## Chapter I—Internal Revenue Service, Department of the Treasury

### SUBCHAPTER A—INCOME TAX

[T.D. 6775]

### PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

### Controlled Foreign Corporations

On September 23, 1964, notice of proposed rule making with respect to the amendment of the Income Tax Regulations (26 CFR Part 1) under section 957 (d) of the Internal Revenue Code of 1954 to conform the regulations to changes made by section 12(a) of the Revenue Act of 1962 (76 Stat. 1006) was published in the FEDERAL REGISTER (29 F.R. 13197). After consideration of all such relevant matter as was presented by interested persons regarding the rules proposed, the

amendments of the regulations as proposed are hereby adopted.

[SEAL] BERTRAND M. HARDING,
*Acting Commissioner of Internal Revenue.*

Approved: November 27, 1964.

STANLEY S. SURREY,
*Assistant Secretary of the Treasury.*

In order to conform the Income Tax Regulations (26 CFR Part 1) to section 957(d) of the Internal Revenue Code of 1954, as added by section 12(a) of the Revenue Act of 1962 (76 Stat. 1006), such regulations are amended as follows effective with respect to taxable years of foreign corporations beginning after December 31, 1962, and to taxable years of United States shareholders within which or with which such taxable years of such foreign corporations end:

PARAGRAPH 1. Section 1.957 and the historical note are amended to read as follows:

**§ 1.957 Statutory provisions; controlled foreign corporations; United States persons.**

Sec. 957. *Controlled foreign corporations; United States persons.* • • •

(d) *United States person.* For purposes of this subpart, the term "United States person" has the meaning assigned to it by section 7701(a)(30) except that—

(1) With respect to a corporation organized under the laws of the Commonwealth of Puerto Rico, such term does not include an individual who is a bona fide resident of Puerto Rico, if a dividend received by such individual during the taxable year from such corporation would, for purposes of section 933(1), be treated as income derived from sources within Puerto Rico,

(2) With respect to a corporation organized under the laws of the Virgin Islands, such term does not include an individual who is a bona fide resident of the Virgin Islands and whose income tax obligation under this subtitle for the taxable year is satisfied pursuant to section 28(a) of the Revised Organic Act of the Virgin Islands, approved July 22, 1954 (48 U.S.C. 1642), by paying tax on income derived from all sources both within and outside the Virgin Islands into the treasury of the Virgin Islands, and

(3) With respect to a corporation organized under the laws of any other possession of the United States, such term does not include an individual who is a bona fide resident of any such other possession and whose income derived from sources within possessions of the United States is not, by reason of section 931(a), includible in gross income under this subtitle for the taxable year.

[Sec. 957 as added by sec. 12(a), Rev. Act 1962 (76 Stat. 1006)]

PAR. 2. There is inserted immediately after § 1.957–3 the following new section:

**§ 1.957–4 United States person defined.**

(a) *Basic rule*—(1) *In general.* The term "United States person" has the same meaning for purposes of sections 951 through 964 which it has under section 7701(a)(30) and in the regulations thereunder, except as provided in section 957(d) and paragraphs (b), (c), and (d) of this section which provide, with respect to corporations organized in possessions of the United States, that certain residents of such possessions are not United States persons. The effect of determining that an individual is not a United States person for such purposes is to exclude such individual in determining whether a foreign corporation created or organized in, or under the laws of, Puerto Rico, the Virgin Islands, or any possession of the United States (other than Puerto Rico or the Virgin Islands) is a controlled foreign corporation. See § 1.957–1 for definition of the term "controlled foreign corporation"; § 1.957–2 for a special limitation on the amount of subpart F income of certain controlled foreign corporations deriving income from the insurance of United States risks; and § 1.957–3 for the exclusion of certain corporations organized in United States possessions from the definition of controlled foreign corporation.

(2) *Special provisions applicable to possessions of the United States.* For purposes of section 957(d) and this section—

(i) *Possession of the United States defined.* The term "possession of the United States" has the same meaning which it has under paragraph (b)(2) of § 1.957–3.

(ii) *Determination of residence in a possession.* Whether an individual is a bona fide resident of Puerto Rico, the Virgin Islands, or any other possession of the United States, shall be determined in general by applying to the facts and circumstances in each case the principles of §§ 1.871–2 through 1.871–5, relating to the determination of residence in the United States.

(b) *Puerto Rico corporation and resident.* With respect only to a foreign corporation created or organized in, or under the laws of, Puerto Rico—

(1) If an individual (who, without regard to this paragraph, is a United States person) is a bona fide resident of Puerto Rico during his entire taxable year in which or with which the taxable year of such foreign corporation ends, and

(2) If 50 percent or more of the gross income of such foreign corporation is derived from sources within Puerto Rico, as determined under § 1.863–6, for the 3-year period (or for such part of such 3-year period as such foreign corporation has been in existence) ending with the close of the taxable year of such foreign corporation which—

(i) Ends with or within the taxable year next preceding such taxable year of such individual and at any time, during the period beginning with the beginning of such latter taxable year of such individual and ending not later than one year after the close of such taxable year of such foreign corporation, such individual directly owns stock in such foreign corporation, or

(ii) Ends within such taxable year of such individual and at any time, during the period beginning after the close of such taxable year of such foreign corporation and ending with the close of such taxable year of such individual, such individual directly owns stock in such foreign corporation,

then, such individual shall not be considered a United States person with respect to such corporation for the taxable year of such corporation which ends with or within the taxable year of such person. The application of this paragraph may be illustrated by the following examples:

*Example (1).* Foreign corporation R, incorporated under the laws of Puerto Rico, is wholly owned by D, a United States citizen. D and corporation R use the calendar year as the taxable year. For 1961, 1962, and 1963, 60 percent of the gross income of R Corporation is derived from sources within Puerto Rico and 40 percent of the gross income of R Corporation is derived from sources within Panama, as determined under § 1.863–6. During all of 1964, D is a bona fide resident of Puerto Rico. D is not a United States person with respect to R Corporation for 1964. Accordingly, R Corporation is not a controlled foreign corporation at any time in 1964.

*Example (2).* Foreign corporation R is incorporated on January 1, 1962, under the laws of Puerto Rico. D, a United States citizen, owns all the one class of stock of R Corporation throughout 1962 and 1963. D and corporation R use the calendar year as the taxable year. For 1962, 55 percent of the gross income of R Corporation is derived from sources within Puerto Rico and 45 percent of the gross income of R Corporation is derived from sources within the Netherlands Antilles, as determined under § 1.863–6. For 1963, 40 percent of the gross income of R Corporation is derived from sources within Puerto Rico and 60 percent of the gross income of R Corporation is derived from sources within the Netherlands Antilles, as determined under § 1.863–6. During all of 1963, D is a bona fide resident of Puerto Rico. With respect to R Corporation, D is not a United States person for 1963 because D is a bona fide resident of Puerto Rico for all of 1963; 55 percent of the gross income of R Corporation for 1962 is derived from sources within Puerto Rico; and D owns stock in R Corporation at some time during 1963. Accordingly, R Corporation is not a controlled foreign corporation at any time in 1963. In making this determination, it is immaterial that R Corporation does not satisfy the 50-percent gross income test for 1963, the taxable year during all of which D is a resident of Puerto Rico.

*Example (3).* Foreign corporation R is incorporated on January 1, 1962, under the laws of Puerto Rico. D, a United States citizen, owns all the one class of stock of R Corporation throughout 1962 and 1963. D and corporation R use the calendar year as the taxable year. For 1962, 45 percent of the gross income of R Corporation is derived from sources within Puerto Rico and 55 percent of the gross income of R Corporation is derived from sources within the Netherlands Antilles, as determined under § 1.863–6. For 1963, 60 percent of the gross income of R Corporation is derived from sources within Puerto Rico and 40 percent of the gross income of R Corporation is derived from sources within the Netherlands Antilles, as determined under § 1.863–6. With respect to R Corporation, D is a United States person for 1963, since R Corporation does not satisfy the 50-percent gross income test for 1962. Accordingly, R Corporation is a controlled foreign corporation for all of 1963.

*Example (4).* Foreign corporation S is incorporated on July 1, 1962, under the laws of Puerto Rico. Corporation S uses the fiscal year ending on June 30 as the taxable year. For its fiscal year ending on June 30, 1963, 55 percent of the gross income of S Corporation is derived from sources within Puerto Rico and 45 percent of the gross income of S Corporation is derived from sources within Switzerland, as determined under § 1.863–6. For its fiscal years ending on June 30, 1964, and June 30, 1965, respectively, 40 percent of the gross income of S Corporation is derived from sources within Puerto Rico and 60 percent of the gross income of S Corporation is derived from sources within Switzerland, as determined under § 1.863–6. B, a United States citizen, who uses the calendar year as the taxable year, is a bona fide resident of Puerto Rico for all of 1964. On July 1, 1964, B acquires, and holds throughout the remainder of 1964, all of the one class of stock of S Corporation. With respect to S Corporation for its taxable year ending June 30, 1964, B is a United States person because—

(a) Although B is a bona fide resident of Puerto Rico for his entire year 1964 in which ends S Corporation's taxable year ending June 30, 1964, and S Corporation meets the 50-percent gross income test for the applicable part of the 3-year period ending June 30, 1963, B does not own stock in S Corporation during the period beginning January 1, 1964, and ending June 30, 1964, and

(b) Although B owns stock in S Corporation during the period beginning July 1, 1964, and ending December 31, 1964, S Corporation does not meet the 50-percent gross income test for the applicable part of the 3-year period ending June 30, 1964.

Accordingly, with respect to B, S Corporation is a controlled foreign corporation for its entire taxable year ending June 30, 1964.

*Example (5).* The facts are the same as in example (4), except B buys all of the stock of S Corporation on June 1, 1964, rather than on July 1, 1964. With respect to S Corporation for its taxable year ending June 30, 1964, B is not a United States person because B is a bona fide resident of Puerto Rico for his entire taxable year 1964 in which ends S Corporation's taxable year ending June 30, 1964; S Corporation meets the 50-percent gross income test for the applicable part of the 3-year period ending June 30, 1963; and B owns stock in S Corporation during the period beginning January 1, 1964, and ending June 30, 1964. Accordingly, with respect to B, S Corporation is not a controlled foreign corporation at any time during its taxable year ending June 30, 1964.

(c) *Virgin Islands corporation and resident.* With respect only to a foreign corporation created or organized in, or under the laws of, the Virgin Islands—

(1) If an individual (who, without regard to this paragraph, is a United States person) is a bona fide resident of the Virgin Islands as of the last day of his taxable year in which or with which the taxable year of such foreign corporation ends, and

(2) Such individual's income tax obligations under subtitle A (relating to income taxes) of the Code for his taxable year are satisfied, in accordance with section 28(a) of the Revised Organic Act of the Virgin Islands (48 U.S.C. 1642), by paying the tax on his income derived from all sources, both within and outside the Virgin Islands, into the treasury of the Virgin Islands, then, such individual shall not be considered a United States person with respect to such corporation for the taxable year of such corporation which ends with or within the taxable year of such person. The application of this paragraph may be illustrated by the following examples:

*Example (1).* Foreign corporation S, incorporated under the laws of the Virgin Islands, is wholly owned by D, a United States citizen. Corporation S uses the fiscal year ending on June 30 as the taxable year, and D uses the calendar year as the taxable year. From September 1, 1963, to December 31, 1964, inclusive, D is a bona fide resident of the Virgin Islands. For 1963 and 1964, D satisfies his income tax obligations under section 28(a) of the Revised Organic Act of the Virgin Islands by paying the tax on his income derived from all sources, both within and outside the Virgin Islands, into the treasury of the Virgin Islands. With respect to S Corporation for its taxable years ending June 30, 1963, and 1964, D is not a United States person. Accordingly, S Corporation is not a controlled foreign corporation for such taxable years of such corporation.

*Example (2).* The facts are the same as in example (1), except that from August 15, 1964, to December 31, 1964, inclusive, D is a bona fide resident of the United States. Thus, D does not satisfy his income tax obligations for 1964 under section 28(a) of the Revised Organic Act of the Virgin Islands. The result is the same as in example (1), except that with respect to S Corporation for its taxable year ending June 30, 1964, D is a United States person and, accordingly, S Corporation is a controlled foreign corporation for such taxable year of such corporation.

(d) *Corporation and resident of other United States possessions.* With respect only to a foreign corporation created or organized in, or under the laws of, any possession of the United States (other than Puerto Rico or the Virgin Islands)—

(1) If an individual (who, without regard to this paragraph, is a United States person) is a bona fide resident of such possession during his entire taxable year in which or with which the taxable year of such foreign corporation ends, and

(2) Any part or all of such individual's income (other than amounts includible in his gross income under section 951(a)) for his taxable year derived, in accordance with § 1.863–6, from sources within any possession of the United States (whether or not the possession of which such individual is a resident) is not, as a result of the application of section 931, included in his gross income for his taxable year,

then, such individual shall not be considered a United States person with respect to such corporation for the taxable year of such corporation which ends with or within the taxable year of such person. Subparagraph (2) of this paragraph shall apply only for purposes of determining whether an individual is a United States person; after such determination has been made, section 931 shall be applied to the gross income (including amounts includible in gross income under section 951(a)) of such individual to determine the amount to be excluded from such individual's gross income under section 931. The application of this paragraph may be illustrated by the following examples:

*Example (1).* Foreign corporation R, incorporated under the laws of Guam, is wholly owned by D, a United States citizen. D and corporation R use the calendar year as the taxable year, and the cash receipts and disbursements method of accounting. D is a bona fide resident of Guam for all of 1963 and all of his income of $30,000 (determined without taking into account amounts includible in his gross income under section 951(a)) is derived from sources within Guam. Of such income, $24,000 is received in Guam and $6,000 is received in the United States. D meets the 3-year test of section 931(a) and, but for the application of section 931(b), all of his income of $30,000 would be excluded from gross income for 1963 under section 931. However, in accordance with section 931(b) and paragraph (c) of § 1.931–1, the $6,000 received in the United States is included in gross income. Nevertheless, since part ($24,000) of his income of $30,000 for 1963 derived, in accordance with § 1.863–6, from sources within Guam is not, as a result of the application of section 931, included in his gross income, D is not a United States person with respect to R Corporation for its taxable year 1963. Accordingly, R Corporation is not a controlled foreign corporation for its taxable year 1963.

*Example (2).* The facts are the same as in example (1), except that, instead of receiving the $6,000 in the United States, D receives $10,000 of the $30,000 in Guam for services performed for an agency of the United States. Under § 1.863–6, all of D's income for 1963 is income derived from sources within Guam. However, since D's income of $10,000 from the agency of the United States is deemed under section 931(1) to be derived from sources within the United States for purposes of section 931, at least 80 percent of his gross income for 1963, determined without the application of section 931, is not derived from sources within Guam. Accordingly, since no part of D's gross income of $30,000 for 1963 derived, in accordance with § 1.863–6, from sources within Guam is, as a result of the application of section 931, excluded from gross income for 1963, D is a United States person with respect to R Corporation for R Corporation's taxable year 1963. Accordingly, R Corporation is a controlled foreign corporation for its taxable year 1963.

(Sec. 7805 of the Internal Revenue Code of 1954; 68A Stat. 917, 26 U.S.C. 7805)

[F.R. Doc. 64–12289; Filed, Dec. 1, 1964; 8:48 a.m.]

SUBCHAPTER D—MISCELLANEOUS EXCISE TAXES

[T.D. 6774]

## PART 45—MISCELLANEOUS STAMP TAXES

### Time for Filing Returns

In order to clarify §§ 45.4901–1 and 45.6071–2 of the Miscellaneous Stamp Tax Regulations (26 CFR Part 45), relating to the payment of, and time for filing returns in the case of, special taxes, such sections are amended as follows:

PARAGRAPH 1. Section 45.4901–1 is amended by revising paragraph (a) to read as follows:

**§ 45.4901–1 Payment of Special tax.**

(a) *Condition precedent to carrying on certain business.* No person shall maintain for use or permit the use of, on any place or premises occupied by him, a coin-operated gaming device defined in section 4462(a)(2) (see paragraphs (b) and (c) of § 45.4462–1) until he has filed a return on Form 11–B and paid the special tax imposed by section 4461(a)(2). See § 45.6071–2 for time for filing Form 11–B. A separate tax is payable with respect to each such device so maintained for use or permitted to be used, and such tax must be paid before such device is so maintained or permitted to be used. For registration requirements

relating to special taxes imposed by sections 4461, 4471, 4821, and 4841, see §§ 45.7011 and 45.7011–1.

* * * * *

PAR. 2. Section 45.6071–2 is amended by revising paragraph (a) to read as follows:

**§ 45.6071–2 Special taxes.**

(a) *Coin-operated gaming devices return on Form 11–B.* If a person maintains for use or permits the use of, on any place or premises occupied by him, a coin-operated gaming device as defined in section 4462(a)(2) (see § 45.4901–1), then before such device may be so maintained or permitted to be used a Form 11–B must be filed and the special tax imposed by section 4461(a)(2) must be paid. The first return required to be made on Form 11–B shall be filed to cover the period beginning with the first day of the calendar month in which such person first so maintains or permits the use of such device and ending with the following June 30. Thereafter each return required to be made on Form 11–B with respect to such gaming devices shall be filed on or before July 1 to cover a 1-year period (beginning July 1 and ending June 30 of the following calendar year) during which the tax liability continues. If a Form 11–B has been filed and the special tax imposed by section 4461(a)(2) has been paid with respect to one or more coin-operated gaming devices and if, after the filing of such form and the payment of such special tax and before the following July 1, one or more additional coin-operated gaming devices are to be maintained for use or permitted to be used, then with respect to such additional devices another return or returns on Form 11–B must be filed and the special tax (computed under paragraph (b) of § 45.4901–1) must be paid before such additional devices can be so maintained for use or permitted to be used.

* * * * *

Because this Treasury decision amends the existing regulations merely by clarifying the requirements for filing a return on Form 11–B and for paying the special tax imposed by section 4461(a)(2) with respect to additional coin-operated gaming devices placed in operation during a taxable year, it is found that it is unnecessary to issue this Treasury decision with notice and public procedure thereon under section 4(a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitation of section 4(c) of said Act.

APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 3465]

[Montana 066056]

### MONTANA

PARTLY REVOKING RECLAMATION WITHDRAWAL (SUN RIVER PROJECT)

By virtue of the authority contained in section 3 of the Act of June 17, 1902 (32 Stat. 388; 43 U.S.C. 416), it is ordered as follows:

The Departmental Order of September 20, 1904, which withdrew lands for reclamation purposes, is hereby revoked so far as it affects the following-described lands:

MONTANA PRINCIPAL MERIDIAN

T. 20 N., R. 2 W.,
Sec. 16, N½NE¼ and NW¼.

Containing 240 acres.

The lands are State school lands pursuant to section 10 of the Act of February 22, 1889 (25 Stat. 679).

### NEVADA

### Adding Lands to Grazing Districts

By virtue of the authority contained in section 1 of the Act of June 28, 1934 (48 Stat. 1269; 43 U.S.C. 315), as amended, the areas hereafter described, are hereby added to Nevada Grazing Districts No. 5 and 6 as indicated, and the public lands therein shall hereafter be subject to all laws and regulations applicable to public lands in grazing districts, effective on and after the date of publication of this order in the FEDERAL REGISTER:

MOUNT DIABLO MERIDIAN

GRAZING DISTRICT NO. 5

T. 1 S., R. 54 E.,
Sec. 4, SE¼, SE¼NE¼;
Sec. 8, SE¼SE¼;
Sec. 9, E½, SW¼;
Sec. 16;
Sec. 17, E½, SW¼;
Sec. 20, E½, E½NW¼, NW¼NW¼;
Secs. 21 and 28;
Sec. 29, E½NE¼, NW¼NE¼;
Sec. 33, NE¼, E½SE¼, E½NW¼.
T. 2 S., R. 53 E.,
Sec. 35, SE¼;
Sec. 36, S½, E½NE¼, SW¼NE¼.
T. 2 S., R. 54 E.,
Sec. 4, E½E½;
Sec. 9, E½;
Sec. 16, E½, SW¼, S½NW¼;
Sec. 17, S½, S½NE¼, SE¼NW¼;
Secs. 20, 22, 28, and 29;
Sec. 30, NE¼NE¼, S½NE¼, SE¼, E½SW¼, SW¼SW¼;
Secs. 31, 32, and 33.

The areas described aggregate approximately 10,920 acres of public and nonpublic land.

GRAZING DISTRICT NO. 6

T. 1 S., R. 51 E. (Unsurveyed).
T. 1 S., R. 51½ E. (Unsurveyed).
T. 2 S., R. 51½ E. (Unsurveyed).
T. 1 S., R. 52 E. (Unsurveyed).
T. 2 S., R. 52 E. (Unsurveyed).
T. 1 S., R. 53 E.
T. 2 S., R. 53 E.,
Secs. 1 through 34;
Sec. 35, N½, SW¼;
Sec. 36, NW¼, NW¼NE¼.
T. 1 S., R. 54 E.,
Sec. 4, W½, W½NE¼, NE¼NE¼;
Secs. 5, 6, and 7;
Sec. 8, All except SE¼SE¼;
Sec. 17, NW¼;
Secs. 18 and 19;
Sec. 20, SW¼, SW¼NW¼;
Sec. 29, S½NW¼, SW¼NE¼;
Secs. 30, 31, and 32;
Sec. 33, SW¼, W½SE¼, W½NW¼.
T. 2 S., R. 54 E.,
Sec. 4, W½, W½E½;
Secs. 5, 6, 7, and 8;
Sec. 9, W½;
Sec. 16, N½NW¼;
Sec. 17, N½N½, SW¼NW¼;
Secs. 18 and 19;
Sec. 30, NW¼, NW¼NE¼, NW¼SW¼.

The areas described aggregate approximately 144,725 acres of public and nonpublic lands.

### Adding Lands to Humboldt National Forest

By virtue of the authority contained in the Act of July 9, 1962 (76 Stat. 140; 43 U.S.C. 315g–1), and upon the recommendation of the Secretary of Agriculture, it is ordered as follows:

Subject to valid existing rights, the following-described public lands in Nevada are hereby added to and made part of the Humboldt National Forest and hereafter shall be subject to all laws and regulations applicable to said national forest:

MOUNT DIABLO MERIDIAN

T. 37 N., R. 61 E.,
Secs. 29 and 33.
Containing 1,280 acres.

### Withdrawal for Fruitland Mesa Project

By virtue of the authority contained in the Act of June 17, 1902 (32 Stat. 388; 43 U.S.C. 416), as amended and supplemented, it is ordered as follows:

1. Subject to valid existing rights, the following-described public lands, which are under the jurisdiction of the Secretary of the Interior, are hereby withdrawn from all forms of appropriation under the public land laws, including the mining laws, (Chap. 2, Title 30 U.S.C.), but not from leasing under the mineral leasing laws, and reserved for the Fruitland Mesa Project:

NEW MEXICO PRINCIPAL MERIDIAN

T. 50 N., R. 6 W.,

### Withdrawing Lands for Federal Aviation Agency Facilities

By virtue of the authority contained in section 4 of the Act of May 24, 1928 (45 Stat. 729; 49 U.S.C. 214), it is ordered as follows:

1. Subject to valid existing rights, the following-described lands are hereby withdrawn from all forms of appropriation under the public land laws, including the mining laws, but not from leasing under the mineral leasing laws, and reserved for the maintenance of a Federal Aviation Agency air navigation facility, as a part of ANS withdrawal, Arizona No. 1:

GILA AND SALT RIVER MERIDIAN

T. 16 N., R. 21 W.,
Sec. 14, E½SW¼NE¼SW¼, SE¼NE¼SW¼, SW¼NW¼SE¼, W½SE¼NW¼SE¼, N½NW¼SW¼SE¼, E½SW¼SE¼, S½SW¼SW¼SE¼, N½N½SE¼SW¼, and S½S½SE¼SW¼.

The areas described aggregate approximately 80 acres.

2. The withdrawal made by this order does not alter the applicability of the public land laws governing the use of the lands under lease, license, or permit, or governing the disposal of their mineral and vegetative resources other than under the mining laws. However, leases, licenses or permits will be issued only if the Federal Aviation Agency finds that the proposed use of the lands will not interfere with the proper operation of its facilities on the lands.

### Withdrawal for Proposed Marble Canyon Project

By virtue of the authority contained in the Act of June 17, 1902 (32 Stat. 388; 43 U.S.C. 416), as amended and supplemented, it is ordered as follows:

1. Subject to valid existing rights, the following-described public lands, which are under the jurisdiction of the Secretary of the Interior, are hereby withdrawn from all forms of appropriation under the public land laws, including the mining laws (Chap. 2, Title 30 U.S.C.), but not from leasing under the mineral leasing laws, and reserved for the proposed Marble Canyon Project:

SALT LAKE MERIDIAN

T. 42 S., R. 1 W.,
Sec. 17, W½NE¼, and W½.
T. 43 S., R. 1 W.,
Sec. 13, E½NE¼, SE¼SW¼, and SE¼;
Sec. 24, NW¼NE¼.
T. 43 S., R. 2 W.,
Sec. 8, SE¼NE¼;
Sec. 9, SW¼NW¼, N½SW¼, SE¼SW¼, and SE¼;
Sec. 10, S½SW¼;
Sec. 11, SW¼;
Sec. 14, W½, and W½SE¼;
Sec. 15, E½, N½NW¼, SE¼NW¼, and SW¼;
Sec. 22;
Sec. 23, SW¼NE¼, W½, and W½SE¼;
Sec. 26, NW¼;
Sec. 27, E½, E½W½, and NW¼NW¼;
Sec. 33, SW¼NE¼, SE¼NW¼, SW¼SW¼, E½SW¼, and SE¼;
Sec. 34, NE¼, E½NW¼, and S½.
T. 44 S., R. 2 W.,
Sec. 1, NW¼;
Secs. 2 and 3;
Sec. 4, N½, SW¼, and N½SE¼;
Sec. 5, SE¼SE¼;
Sec. 8, lot 4 and NE¼NE¼;
Sec. 9, lots 1, 2, and N½NW¼;
Sec. 10, lots 3, 4, and N½NE¼;
Sec. 11.

The areas described aggregate approximately 7,605 acres.

2. The use and administration of the lands affected by this order will become subject to the provisions of the reclamation laws, including the use of the lands under lease, license, or permit, at such time as the Marble Canyon Project is authorized by the Congress.

3. Pending authorization of the Marble Canyon Project the withdrawal made by this order does not alter the applicability of the public land laws governing the use of the lands under lease, license, or permit or the disposal of their mineral and vegetative resources, other than the mining laws, subject to the condition that such use or disposition will not be inconsistent with the reclamation laws and the purposes for which the lands are withdrawn.

### Partly Revoking Stock Driveway Withdrawals

By virtue of the authority contained in section 10 of the Act of December 29, 1916 (39 Stat. 865; 43 U.S.C. 300), as amended, it is ordered as follows:

1. The Departmental Orders of October 20, 1917, August 7, 1929, and May 13, 1944, withdrawing lands for stock driveway purposes, are hereby revoked so far as they affect the following-described lands:

SIXTH PRINCIPAL MERIDIAN

a. *Stock Driveway No. 3 (October 29, 1917)*

T. 44 N., R. 76 W.,
Sec. 5, lots 7, 8, 9, 10, 15, 16, 17, and 18;
Sec. 6, lots 8, 9, 10, 11, and 14.
T. 43 N., R. 77 W.,
Sec. 6, lots 8, 9, 10, and 11.
T. 44 N., R. 77 W.,
Sec. 28, E½;
Sec. 33, N½.
T. 43 N., R. 78 W.,
Sec. 12, W½;
Sec. 30, lots 1, 2 NE¼, and E½NW¼.

b. *Stock Driveway No. 201 (August 14, 1929)*

T. 41 N., R. 78 W.,
Sec. 5, SW¼SW¼;
Sec. 6, lots 2, 3, 4, S½NE¼, SE¼NW¼, E½SW¼, and SE¼;
Sec. 7, E½E½ and NW¼NE¼;
Sec. 8, NW¼NW¼, S½NW¼, SW¼, and SW¼SE¼;
Sec. 17, W½E½ and W½;
Sec. 20, W½E½ and W½;
Sec. 29, W½NE¼ and NW¼.

c. *Stock Driveway No. 3 (June 3, 1944)*

T. 49 N., R. 79 W.,
Sec. 8, E½SE¼;
Sec. 9, SW½SW¼;
Sec. 26, N½NW¼, SW¼NW¼, and NW¼SW¼.

The areas described total 4,538.06 acres.

2. Until 10:00 a.m. on May 27, 1965, the State of Wyoming shall have the preferred right of application to select the lands, as provided by R.S. 2276 as amended (43 U.S.C. 852).

3. Beginning at 10:00 a.m. on May 27, 1965, the lands shall be subject to operation of the public land laws, generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10:00 a.m. on May 27, 1965, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

The lands have been open to applications and offers under the mineral leasing laws, and to location under the mining laws, subject to the regulation in 43 CFR 3400.3 (formerly 43 CFR 185.35).

The lands are located in Johnson County, north of Casper, Wyoming. They are primarily valuable for grazing. Soils are variable, ranging from shallow to a deep classification and supporting vegetative associations of sage brush, native forbs and grasses. Elevation varies from 4,700 feet to 4,900 feet above sea level and the yearly precipitation is from 8 to 12 inches.

Inquiries concerning the lands shall be addressed to the Manager, Land Office, Bureau of Land Management, Cheyenne, Wyoming.

JOHN A. CARVER, JR.,
*Assistant Secretary of the Interior.*

NOVEMBER 25, 1964.

## WYOMING

### Partial Revocation of Stock Driveway Withdrawals

By virtue of the authority contained in section 10 of the Act of December 29, 1916 (39 Stat. 865; 43 U.S.C. 300), as amended, it is ordered as follows:

1. The Departmental Order of May 24, 1918, creating Stock Driveway Withdrawal No. 21, Wyoming No. 5, is hereby revoked so far as it affects the following-described lands:

WYOMING 0308866

SIXTH PRINCIPAL MERIDIAN

T. 29 N., R. 101 W.,
Secs. 14, 23, 25, 26.
T. 16 N., R. 114 W.,
In secs. 1 to 6 inclusive, lots 1 to 4 inclusive in each section.
T. 16 N., R. 115 W.,
In secs. 1 to 5 inclusive, lots 1 to 4 inclusive in each section.

The areas described aggregate 3094.82 acres. The lands are located in southwestern Wyoming. Topography consists of mountain foothills with nearly level plateaus, to rough and broken terrain. Cover is mainly big sagebrush-grassland associations.

2. The Departmental Order of August 17, 1921, creating Stock Driveway Withdrawal No. 147, is hereby revoked so far as it affects the following described public lands:

WYOMING 0308867

SIXTH PRINCIPAL MERIDIAN

T. 29 N., R. 101 W.,
Sec. 27, S½SE¼;
Sec. 31, lots 3, 4, E½SW¼, W½SE¼, and SE¼SE¼;
Sec. 32, S½N½, N½S½, and SW¼SW¼;
Sec. 33, SW¼NE¼ and S½NW¼;
Sec. 34, N½NW¼.
T. 29 N., R. 102 W.,
Sec. 29, SW¼NW¼, SW¼, and S½SE¼;
Sec. 30, lots 1, 2, NW¼NE¼, S½NE¼, E½NW¼, and N½SE¼;
Sec. 32, NE¼;
Sec. 33, E½NE¼, NW¼NW¼, and S½NW¼;
Sec. 34, NW¼NE¼, S½NE¼, NW¼, and N½SE¼;
Sec. 35, S½N½, N½SW¼, and SE¼.
T. 29 N., R. 103 W.,
Sec. 6, lots 4, 5, 6, 7, E½SW¼, and S½SE¼;
Sec. 7, NE¼;
Sec. 8, E½NW¼, NW¼NW¼, and S½;
Sec. 9, SW¼ and S½SE¼;
Sec. 14, SW¼SW¼;
Sec. 15, S½NW¼ and S½;
Sec. 22, E½NE¼;
Sec. 23, NW¼NW¼, S½NW¼, and S½;
Sec. 24, SW¼, NW¼SE¼, and SE¼SE¼;
Sec. 25, NE¼ and NE¼NW¼.
T. 30 N., R. 103 W.,
Sec. 31, lot 4.
T. 29 N., R. 104 W.,
Sec. 1, lot 1 and SE¼NE¼.
T. 30 N., R. 104 W.,
Sec. 17, W½SW¼, SE¼SW¼, and S½SE¼;
Sec. 18, lots 3, 4, E½SW¼, and SE¼;
Sec. 19, lots 1, 2, 3, 4, and E½W½;
Sec. 20, NE¼;
Sec. 21, N½;
Sec. 22, NW¼ and S½;
Sec. 26, NW¼NW¼, S½NW¼, and S½;
Sec. 27, NE¼.
T. 30 N., R. 105 W.,
Sec. 22, S½;
Sec. 23, S½;
Sec. 24, S½.

The areas described aggregate 8,706.47 acres.

The lands are located in Fremont and Sublette Counties. Elevations vary from 7,200 feet to 8,000 feet. Vegetative cover is characterized by big sagebrush-grassland associations.

3. The Departmental Order of March 29, 1919, creating Stock Driveway Withdrawal No. 78, Wyoming No. 11, is hereby revoked so far as it affects the following-described lands:

WYOMING 0308865

SIXTH PRINCIPAL MERIDIAN

T. 17 N., R. 117 W.,
Sec. 2, lot 8, SW¼NW¼, and W½SW¼;
Sec. 10, E½E½;
Sec. 22, E½;
Sec. 34, W½W½.
T. 15 N., R. 118 W.,
Sec. 4, lot 1, SE¼NE¼, and S½;
Sec. 18, E½E½;
Sec. 20, W½W½;
Sec. 30, E½E½;
Sec. 32, W½W½.
T. 16 N., R. 118 W.,
Sec. 10, E½E½;
Sec. 22, E½E½;
Sec. 26, W½W½;
Sec. 34.
T. 12 N., R. 119 W.,
Sec. 2, lot 1, SE¼NE¼, and E½SE¼;
Sec. 12, W½W½;
Sec. 14, E½E½;
Sec. 24, lot 4, W½NW¼, and NW¼SW¼.
T. 13 N., R. 119 W.,
Sec. 24, W½W½.
T. 14 N., R. 119 W.,
Sec. 12, W½W½;
Sec. 14, E½E½;
Sec. 24, W½W½;
Sec. 26, E½E½.

The areas described aggregate 4,385.88 acres.

The lands are located in the southwest portion of Uinta County, at elevations running from 7,000 feet to 8,800 feet. Vegetative cover is characterized by big sagebrush-grassland associations, at the lower elevations and aspen-lodgepole associations at the higher levels.

4. Until 10 a.m., May 27, 1965, the State of Wyoming shall have the right of application to select the lands as provided by R.S. 2276, as amended (43 U.S.C. 852). After that date and hour the lands shall become subject to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on May 27, 1965, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

The lands have been open to applications and offers under the mineral leasing laws, and to location under the mining laws, subject to the regulations in 43 CFR 3400.3 (formerly 43 CFR 185.35).

Inquiries concerning the lands shall be addressed to the Manager, Land Office, Bureau of Land Management, Cheyenne, Wyoming.

JOHN A. CARVER, JR.,
*Assistant Secretary of the Interior.*

### Partly Revoking Reclamation Withdrawals (Kendrick Project)

By virtue of the authority contained in section 3 of the Act of June 17, 1902 (32 Stat. 388; 43 U.S.C. 416), it is ordered as follows:

1. The Departmental Orders of October 13, 1933, and September 6, 1934, and any other order withdrawing lands for reclamation purposes as authorized by the Act of June 17, 1902, supra, are hereby revoked so far as they affect the following described lands:

SIXTH PRINCIPAL MERIDIAN

T. 31 N., R. 81 W.,
Sec. 19, lots 2, 3, 4, and NE¼SE¼;
Sec. 30, SE¼SE¼;
Sec. 31, E½NE¼, NW¼NE¼, SE¼SE¼, and NE¼NW¼;
Sec. 32, NW¼.
T. 31 N., R. 82 W.,
Sec. 24, SE¼;
Sec. 25, E½;
Sec. 34, N½SW¼ and SE¼SW¼.

The areas described aggregate 905.35 acres of patented land, and 240 acres of public land.

2. At 10:00 a.m. on May 27, 1965, the following-described lands shall be open to such forms of disposition as may by law be made of lands withdrawn for stock driveways:

T. 31 N., R. 82 W.,
Sec. 24, S½SE¼;
Sec. 25, NE¼.

The areas described aggregate 240 acres.

Inquiries concerning the lands shall be addressed to the Manager, Land Office, Bureau of Land Management, Cheyenne, Wyoming.

JOHN A. CARVER, JR.,
*Assistant Secretary of the Interior.*

### Opening Reclamation Lands to Mineral Location, Entry and Patent (Owyhee Project)

By virtue of the authority contained in the Act of April 23, 1932 (47 Stat. 136; 43 U.S.C. 154), it is ordered as follows:

1. Subject to valid existing rights and the provisions of existing withdrawals, the following-described lands (except as provided in paragraph 2 hereof) shall, at 10:00 a.m. on December 31, 1964, be open to location and entry and patent under the United States mining laws:

BOISE MERIDIAN

T. 8 N., R. 6 E.,
Sec. 3, lots 1 to 8, inclusive, S½NW¼ and S½NE¼.
T. 9 N., R. 6 E.,
Sec. 32, lots 1 to 6, inclusive, 11, 12, and NW¼NW¼;
Sec. 33, lot 2 and SE¼SW¼;
Sec. 34, lots 3 and 4.

The areas described aggregate approximately 618 acres in the Boise National Forest.

2. The NW¼NW¼ of section 32 and a strip of land 200 feet on each side of South Fork Payette River Road No. 24 through lots 1, 2, 3, and 4 are under application for withdrawal from mineral entry by the Forest Service, Department of Agriculture and these lands are temporarily segregated from disposal under the mining laws in accordance with the regulations in 43 CFR 295.11(a).

3. The opening made by this order shall be subject to the stipulations quoted below and which are made a part of this order, to be executed and acknowledged in favor of the United States by the locators for themselves, their heirs, successors, and assigns, and recorded in the county records, and in the United States Land Office at Boise, Idaho before any rights attach by virtue of this order:

a. That no dredging or placer mining operations shall at any time be conducted on these premises, and that no other type of prospecting or mining operations shall be carried on upon the premises, nor anything else be done thereon which would subject downstream irrigation facilities owned or controlled by the United States of America to siltation in the course of normal or extraordinary water runoff.

b. Reserving unto the United States of America the right to cross the land with irrigation facilities including, but not limited to pipelines, ditches, canals, roads, and electrical transmission and distribution lines.

c. Reserving unto the United States of America a flowage easement over the land for any reservoir including the right as of the time of the exercise of the flowage easement to have full supervision and control of the area submerged and of a 300-foot strip parallel to and measured horizontally from the high water line of the reservoir.

d. Reserving unto the United States of America the right to take and remove from the lands construction material for use in the construction, operation or maintenance of irrigation facilities.

e. Reserving unto the United States of America the right to remove all buildings, structures, trees, plants, shrubs and other surface obstructions or materials interfering with or which would interfere with the construction, operation and maintenance of reservoirs or other irrigation facilities.

f. All necessary and feasible steps shall be taken to preserve existing vegetation on the land and any areas from which vegetation is destroyed shall be seeded with perennial grass, preferably crested wheat grass, as soon as mining operations permit.

g. All overburden shall, as soon as mining operations permit, be replaced in the excavated areas and graded to a slope no steeper than 1 to 1.

As the lands are included in the order creating Power Site Classification No. 146, the provisions of the Act of August 11, 1955 (69 Stat. 682; 30 U.S.C. 621) are applicable.

JOHN A. CARVER, JR.,
*Assistant Secretary of the Interior.*

# Title 49—TRANSPORTATION

## Chapter I—Interstate Commerce Commission

### SUBCHAPTER A—GENERAL RULES AND REGULATIONS

### PART 0—THE COMMISSION

### Credentials Required by Special Agents, Accountants, and Examiners

In the matter of credentials of persons appointed as special agents, accountants, and examiners of the Commission.

Present: Abe McGregor Goff, Chairman, to whom the matter which is the subject of this order has been delegated.

It appearing, that the matter of appointing and authorizing certain designated persons having credentials to enter upon, to inspect and examine any and all lands, buildings and equipment of carriers and other persons subject to the Interstate Commerce Act, as amended, and related Acts, and to inspect and copy any and all accounts, books, records, memoranda, correspondence, and other documents of carriers, and other persons subject to the Act needs consideration;

It further appearing, that the Interstate Commerce Commission Order of September 20, 1963, respecting reorganization of the field offices became effective January 1, 1964;

And it further appearing, that the regulations to be effectuated by this Order concern rules relating to agency personnel, and that public rule making procedures as required by section 4(a) of the Administrative Procedure Act (60 Stat. 237, 5 U.S.C. 1003), are unnecessary; and good cause appearing therefor:

*It is ordered*, That paragraphs (c), (d), (e), (f), and (g) of § 0.5 *Credentials required by special agents, accountants, and examiners*, be, and they are hereby amended to read as follows:

**§ 0.5 Credentials required by special agents, accountants, and examiners.**

* * * * *

(c) Definition of special agents, accountants, and examiners. The duties of the following described employees, and such other employees of the Commission as the Chairman shall specify in writing, include those of special agent, accountant or examiner and they are hereby authorized to inspect and copy records and to inspect and examine lands, buildings and equipment in the same manner and to the same extent as special agents, accounts and examiners:

Directors and Assistant Directors, Chiefs and Assistant Chiefs of Sections and Branches of:
Bureau of Accounts.
Bureau of Inquiry and Compliance.
Bureau of Motor Carriers.
Bureau of Safety and Service.
Bureau of Water Carriers and Freight Forwarders; and, Locomotive Inspection.
Attorneys.
District Directors.
Assistant District Directors.
Field Assistants.
District Supervisors.
Safety and Service Agents.
Appraisers.
Motor Carrier Safety Inspectors.
Regional Directors.
Field Safety Specialists.
Assistant Regional Directors.
Regional Supervisors.
Field Supervisors.
Accident Analysts.
Supervisory Inspectors.
Regional Managers.
Auditors.
Inspectors of Locomotives.
Inspectors of Railway Signals and Train Control.
Rate Agents.
Engineers.
Equipment Specialists.
Engineering Technicians.
Transportation Agents.
Transportation Cost Analysts.

(d) Locomotive Inspection. Persons appointed as Director and Assistant Director, Bureau of Safety and Service; Director and Assistant Director of Locomotive Inspection; district supervisors (locomotives); and, inspectors of locomotives; are authorized and empowered to exercise all the powers of inspection and examination conferred by the Locomotive Inspection Act, as amended, including to the extent deemed necessary by them to carry out their duties, authority to inspect and copy records of carriers pertaining to locomotives and to enter and be upon and to inspect property of carriers, other than locomotives.

(e) Inspection of railroad equipment while in operation. The Director and Assistant Director of Locomotive Inspection; district supervisors (locomotives); inspectors of locomotives; Director and Assistant Directors, Bureau of Safety and Service; Chiefs and Assistant Chiefs of Sections and Branches, Bureau of Safety and Service; equipment specialists; engineers and engineering technicians; regional and assistant regional directors; regional supervisors; field supervisors; and, safety and service agents; when engaged in the inspection or examination of equipment with respect to safety of operations or standards of equipment, are authorized to inspect or examine such equipment while in operation, including traveling or riding in or upon such equipment), when, in their opinion, it is necessary to determine the operational characteristics of such equipment with respect to safety of operation or compliance with standards prescribed by law or by regulations of the Commission.

(f) Examination and testing of railway signals and train controls. Persons appointed as supervisory inspectors and inspectors of railway signals and train control are authorized to enter and be upon property of carriers including vehicles in operation and to inspect and test any signal or train control system, device, and appliance uesd by any railroad to determine whether such system, device and appliance is in proper condition to operate and to provide adequate safety protection. These persons are also authorized to inspect and copy any carrier records pertaining to any signal or train control system, device and appliance or which they may deem necessary to investigation of accidents.

(g) Inspection of motor vehicles while in operation. Persons appointed in the Bureau of Motor Carriers as Director and Assistant Director; Chiefs and Assistant Chiefs of Sections and Branches; mechanical engineers; district and assistant district directors; district supervisors; safety inspectors; and, field safety specialists; are authorized to ride on or in any motor vehicle of carriers subject to the safety provisions of the Interstate Commerce Act whenever such action is deemed to be necessary in order to determine the operational characteristics of the vehicle or any equipment thereof with respect to safety or operation or compliance with standards prescribed by law or regulations of the Commission.

* * * * *

(Sec. 12(1), 24 Stat. 383, as amended; 49 U.S.C. 12, sec. 20(5), 24 Stat. 386, as amended; 49 U.S.C. 20, sec. 220(d), 49 Stat. 563, as amended; 49 U.S.C. 320, sec. 313(f), 54 Stat. 944, as amended; 49 U.S.C. 913, sec. 412(d), 56 Stat. 294, as amended; 49 U.S.C. 1012, sec. 25(d), 41 Stat. 496, as amended; 49 U.S.C. 26, sec. 6, 36 Stat. 915, as amended; 45 U.S.C. 29)

*It is ordered*, That this order shall be effective forthwith.

*And it is further ordered*, That notice of this order shall be given to the general public by depositing a copy thereof in the Office of the Secretary of the Interstate Commerce Commission, Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

Dated at Washington, D.C., this 24th day of November A.D. 1964.

By the Commission, Chairman Goff.

[SEAL] HAROLD D. McCOY, *Secretary.*

# Title 50—WILDLIFE AND FISHERIES

## Chapter II—Bureau of Commercial Fisheries, Fish and Wildlife Service, Department of the Interior

SUBCHAPTER F—AID TO FISHERIES

## PART 256—FISHING VESSEL CONSTRUCTION DIFFERENTIAL SUBSIDY PROCEDURES

On page 13902 of the FEDERAL REGISTER of October 8, 1964, there was published a notice and text of a proposed revision of Part 256. The purpose of the revision is to incorporate those changes necessitated by the enactment of the United States Fishing Fleet Improvement Act (P.L. 88-498) which was approved August 30, 1964. Due to the numerous changes being proposed, the procedures will be more readily understood if the entire part is published in revised form.

Interested persons were given 30 days within which to submit written comments, suggestions or objections with respect to the proposed revision. Several comments and suggestions were received and all have been considered. The proposed revision is hereby adopted so as to include applicable suggested changes.

These regulations shall become effective at the beginning of the 20th calendar day following the date of publication in the FEDERAL REGISTER.

Part 256 is revised to read as follows:

Sec.
256.1 Basis and purpose.
256.2 Definitions.
256.3 Eligibility requirements.
256.4 Applications.
256.5 Notice and hearing.
256.6 Subsidy contract.
256.7 Vessel operations.
256.8 Penalties.
256.9 Inspection of vessels.
256.10 Payment of subsidy.

AUTHORITY: The provisions of this Part 256 issued under sec. 10, Public Law 86-516, as amended.

### § 256.1 Basis and purpose.

(a) The Act of June 12, 1960 (Public Law 86-516), as amended and hereinafter referred to as the Act, authorizes the Secretary of the Interior to pay a subsidy for the construction of fishing vessels in shipyards of the United States.

(b) The purpose of this part is to prescribe rules and regulations governing the payment of these subsidies.

### § 256.2 Definitions.

(a) Secretary. The Secretary of the Interior or his authorized representative.

(b) Administrator. The Maritime Administrator in the Department of Commerce or his authorized representative.

(c) Director. The Director, Bureau of Commercial Fisheries, Department of the Interior, or his authorized representative.

(d) Person. Individual, association, partnership or corporation, or any one or all as the context requires.

(e) Fishery. A segment of the commercial fishing industry engaged in the catching of a single species or a group of species of fish and shellfish. Any other species taken must be caught incidentally while fishing for and using gear designed for the capture of the species comprising the fishery.

(f) Expanded areas. Fishing grounds not usually fished by the majority of the vessels operating in the fishery for which the proposed vessel is designed.

(g) Newly developed gear. The most modern gear available that is suitable for use in the fishery for which the proposed vessel is designed.

### § 256.3 Eligibility requirements.

(a) Vessel will be of advance design: In order to be considered to be of advance design, the vessel must be designed to have significant advantages in utility and efficiency over a significant number of vessels engaged in the fishery in which the proposed vessel is designed to operate.

(b) No economic hardship to efficient vessel operators: The determination that operation of a proposed vessel will not cause economic hardship to efficient vessel operators already operating in that fishery shall be made by the Secretary after notice and hearing, taking into consideration the condition of the resource, the efficiency of the vessels and gear being operated in that fishery compared with the proposed vessel, the prospects of the market for the species caught, and the degree and duration of any anticipated economic hardship.

(c) Aid in the development of the United States fisheries: For the vessel to aid in the development of the United States fisheries under conditions that the Secretary considers to be in the public interest, the vessel must be a modern vessel which will upgrade the fleet. Special consideration will be given to vessels which will provide a significant contribution in helping the domestic fishery meet foreign competition.

(d) The applicant possesses the ability, experience, resources and other qualifications necessary to enable him to operate and maintain the proposed new fishing vessel. In making this determination, the Secretary will inquire into the economic feasibility of the fishing venture and will require reasonable assurance that the applicant can operate the vessel profitably.

### § 256.4 Applications.

Applications for a subsidy shall be made on forms prescribed by the Secretary and shall be filed with the Director, Bureau of Commercial Fisheries, Washington, D.C. The applications must be accompanied by three copies of the cross section, deck arrangement, outboard profile, and specifications of the proposed vessel. The Secretary may require such additional complete detailed construction plans as may be necessary after a review of the application and accompanying plans and specifications.

### § 256.5 Notice and hearing.

After receipt of an application eligible on its face for a construction differential subsidy the Director will publish a Notice of Hearing on a Subsidy Application in the FEDERAL REGISTER and hold hearings in accordance therewith. The purpose of the hearing will be to provide any person who feels he will be economically injured by the construction of the proposed vessel to cross-examine witnesses and/or present evidence that the operation of such vessel will cause economic hardship to efficient vessel operators already operating in the fishery for which the vessel is designed. Hearing procedures will be held in accordance with Part 257 of this subchapter.

### § 256.6 Subsidy contract.

(a) A contract for the payment of the subsidy will take effect when all contracts for the construction of such vessel, have been approved by the Administrator and the subsidy contract has been signed by the Secretary and the applicant; and

(b) The contract shall contain a finding of the useful life of the vessel as determined by the Secretary to be used in computing the amount of the total depreciated construction subsidy to be repaid to the Secretary in accordance with section 9 of the Act.

### § 256.7 Vessel operations.

(a) If the owner of a fishing vessel constructed with the aid of a subsidy desires to operate it in a different fishery than the one for which it was designed because of an actual decline in that particular fishery, he shall submit an application to the Secretary for permission to transfer the operations of the vessel to a different fishery. The application shall contain data showing the decline in the fishery for which the vessel was designed, how this decline is making the operation of the vessel uneconomical or less economical, and why the transfer will not cause economic hardship or injury to efficient vessel operators already operating in the fishery to which he wishes to transfer operations.

(b) Upon receipt of such an application the Secretary will publish a Notice of Hearing on an Application to Change Fishery in the FEDERAL REGISTER and hold hearings in accordance therewith. The purpose of the hearings will be to provide any person who feels he will be economically injured by said transfer of fishing operations an opportunity to cross-examine witnesses and/or present evidence that such a transfer of operations will cause economic hardship or injury to efficient vessel operators already operating in the fishery to which the vessel's operations would be transferred. Hearing procedures will be held in accordance with Part 257 of this subchapter.

### § 256.8 Penalties.

In case the Secretary shall find that a vessel has operated contrary to the provisions of the Act or of regulations issued thereunder, he shall immediately notify the owner in writing of the specific acts involved and the amount of the penalty. The vessel owner may appeal such a finding to the Secretary in writing within 30 days of the date of mailing such finding to the last known address of the vessel owner. The amount of penalty assessed in any one year shall be equal to the total subsidy paid multiplied by the ratio that one year bears to the total number of years determined, by the Secretary, as the useful life of the vessel: *Provided, however*, That if the amount is not paid within 60 days after receipt of notice then the amount due shall be the total amount of the subsidy paid depreciated to the beginning of the year in which the vessel operated unlawfully. Any amount due hereunder shall constitute a maritime lien against the vessel effective at the time the Secretary determines that the vessel has operated in violation of the Act or regulations.

### § 256.9 Inspection of vessels.

The Secretary or the Administrator shall have access at all times to all vessels which are being constructed under a contract providing for a construction subsidy provided for by the Act.

### § 256.10 Payment of subsidy.

Subsidy payments will be paid in accordance with the terms of the subsidy contract. No subsidy payments shall be made until the entire amount of the applicant's share of the subsidized construction cost has been paid. If the amount of subsidy exceeds 30 percent of the subsidized construction cost, an amount equal to at least 30 percent of the subsidized construction cost shall be withheld until (a) the Maritime Administrator has certified that the vessel has been completed in accordance with the approved plans and specifications, and (b) all amounts due by the applicant on account of the construction of the vessel, including designing, equipping, and outfitting costs, have been paid. Any interim subsidy payments due pursuant to the subsidy contract shall be paid only after the Secretary has determined that such amount is properly due. If the amount of subsidy does not exceed 30 percent of the subsidized construction cost, none of the subsidy shall be paid until (a) the Maritime Administrator has certified that the vessel has been completed in accordance with the approved plans and specifications, and (b) all amounts due by the applicant on account of the construction of the vessel, including designing, equipping, and outfitting costs, have been paid. Subsidy payments may be made to the applicant or jointly to the applicant and construction contractor or others, as may be appropriate, pursuant to the terms of the construction contract or otherwise.

STEWART L. UDALL, *Secretary of the Interior.*

### NET OPERATING LOSS DEDUCTION

### Notice of Proposed Rule Making

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form in the attached appendix are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury or his delegate. Prior to the final adoption of such regulations, consideration will be given to any comments or suggestions pertaining thereto which are submitted in writing, in duplicate, to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C., 20224, within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. Any person submitting written comments or suggestions who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit his request, in writing, to the Commissioner within the 30-day period. In such case, a public hearing will be held, and notice of the time, place, and date will be published in a subsequent issue of the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

[SEAL] BERTRAND M. HARDING,
*Acting Commissioner of Internal Revenue.*

In order to conform the Income Tax Regulations (26 CFR Part 1) under sections 172, 6164, and 6411 of the Internal Revenue Code of 1954 in part to the Act of September 27, 1962 (Public Law 87-710, 76 Stat. 648), to section 7(f) of the Self-Employed Individuals Tax Retirement Act of 1962 (76 Stat. 829), to section 317 of the Trade Expansion Act of 1962 (76 Stat. 889), and to section 234(b)(5) of the Revenue Act of 1964 (78 Stat. 115), and to make certain clarifying changes, such regulations are amended as follows:

PARAGRAPH 1. Section 1.172-3(a)(3) is amended by redesignating subdivision (iv) as subdivision (v) and by adding a new subdivision (iv). The redesignated and added provisions read as follows:

**§ 1.172-3 Net operating loss in case of a taxpayer other than a corporation.**

(a) *Modification of deductions.* * * *

(3) *Nonbusiness deductions.* * * *

(iv) *Self-employed retirement plans.* Any deduction allowed under section 404, relating to contributions of an employer to an employees' trust or annuity plan, or under section 405(c), relating to contributions to a bond purchase plan, to the extent attributable to contributions made on behalf of an individual while he is an employee within the meaning of section 401(c)(1), shall not be treated, for purposes of section 172(d)(4), as attributable to, or derived from, the taxpayer's trade or business, but shall be treated as a nonbusiness deduction.

(v) *Limitation.* The provisions of this subparagraph shall not be construed to permit the deduction of items disallowed by subparagraph (1) of this paragraph.

* * * * *

PAR. 2. Section 1.172-4 is amended by revising subdivisions (iii) and (iv) of paragraph (a)(1), by redesignating subparagraphs (4) and (5) of paragraph (b) as subparagraphs (5) and (6), and by adding a new subparagraph (4) to paragraph (b). The revised, added, and redesignated provisions (exclusive of examples) read as follows:

**§ 1.172-4 Net operating loss carrybacks and net operating loss carryovers.**

(a) *General provisions*—(1) *Years to which loss may be carried.* * * *

(iii) *Loss for taxable years for which certifications have been issued under the Trade Expansion Act of 1962.* A net operating loss sustained in a taxable year ending on or after December 31, 1962, for which a certification has been issued under section 317(a) of the Trade Expansion Act of 1962 (76 Stat. 889) shall, subject to the provisions of section 172(b)(3)(A) and (B) and § 1.172-9, be carried back to the five preceding taxable years and, except as provided in subdivision (iv) of this subparagraph, shall be carried over to the five succeeding taxable years.

(iv) *Loss of a regulated transportation corporation.* Except as provided in subdivision (v) of this subparagraph, a net operating loss sustained in a taxable year ending after December 31, 1955, by a taxpayer which is a regulated transportation corporation (as defined in section 172(j)(1)) shall, subject to the provisions of section 172(j) and § 1.172-10, be carried back to the taxable years specified in subdivision (ii), (iii), or (vi) of this subparagraph, whichever is applicable, and shall be carried over to the seven succeeding taxable years.

* * * * *

(b) *Portion of net operating loss which is a carryback or a carryover to the taxable year in issue.* * * *

(4) *Regulated transportation corporations.* For the portion of a net operating loss sustained by a regulated transportation corporation in a taxable year beginning in 1955 and ending in 1956 which may be carried over to the sixth and seventh taxable years succeeding such taxable year, see paragraph (d) of § 1.172-10.

(5) *Excess profits tax.* For the portion of a net operating loss which may be carried back from a taxable year ending after December 31, 1953, for the purpose of determining the excess profits tax imposed by subchapter D, chapter 1 of the Internal Revenue Code of 1939, see § 1.172-8.

(6) *Illustration of principles.* The application of this paragraph may be illustrated by the following examples:

* * * * *

PAR. 3. Paragraph (a)(3) of § 1.172-5 is amended by revising subdivision (ii) to read as follows:

**§ 1.172-5 Taxable income which is subtracted from net operating loss to determine carryback or carryover.**

(a) *Taxable year subject to the Internal Revenue Code of 1954.* * * *

(3) *Modifications applicable to all taxpayers.* * * *

(ii) *Recomputation of percentage limitations.* Unless otherwise specifically provided in this subchapter, any deduction which is limited in amount to a percentage of the taxpayer's taxable income or adjusted gross income shall be recomputed upon the basis of the taxable income or adjusted gross income, as the case may be, determined with the modifications prescribed in this paragraph. Thus, in the case of an individual, the deduction for medical expenses would be recomputed after making all the modifications prescribed in this paragraph, whereas the deduction for charitable contributions would be determined without regard to any net operating loss carryback but with regard to any other modifications so prescribed.

*Example (1).* For the calendar year 1954 the taxpayer, an individual, files a return showing taxable income of $4,800, computed as follows:

| | |
|---|---|
| Salary | $5,000 |
| Net long-term capital gain | 4,000 |
| Total gross income | 9,000 |
| Less: Deduction allowed by section 1202 in respect of net long-term capital gain | 2,000 |
| Adjusted gross income | 7,000 |
| Less: | |
| Deduction for personal exemption | $600 |
| Deduction for medical expense (410 actually paid but allowable only to extent in excess of 3 percent of adjusted gross income) | 200 |
| Deduction for charitable contributions ($2,000 actually paid but allowable only to extent not in excess of 20 percent of adjusted gross income) | 1,400 |
| | 2,200 |
| Taxable income | 4,800 |

In 1955 the taxpayer undertakes the operation of a trade or business and sustains therein a net operating loss of $3,000. Under section 172(b)(2), it is determined that the entire $3,000 is a carryback to 1954. In 1956 he sustains a net operating loss of $10,000 in the operation of the business. In determining the amount of the carryover of the 1956 loss to 1957, the taxable income for 1954 as computed under this paragraph is $3,970, determined as follows:

| | |
|---|---|
| Salary | $5,000 |
| Net long-term capital gain | 4,000 |
| Total gross income | 9,000 |
| Less: Deduction for carryback of 1955 net operating loss | 3,000 |
| Adjusted gross income | 6,000 |
| Less: | |
| Deduction for medical expense ($410 actually paid but allowable only to extent in excess of 3 percent of adjusted gross income as modified under this paragraph) | $230 |
| Deductions for charitable contributions ($2,000 actually paid but allowable only to extent not in excess of 20 percent of adjusted gross income determined with all the modifications prescribed in this paragraph other than the net operating loss carryback) | 1,800 |
| | 2,030 |
| Taxable income | 3,970 |

*Example (2).* For the calendar year 1959 the taxpayer, an individual, files a return showing taxable income of $5,700, computed as follows:

| | |
|---|---|
| Salary | $5,000 |
| Net long-term capital gain | 4,000 |
| Total gross income | 9,000 |
| Less: Deduction allowed by section 1202 in respect of net long-term capital gain | 2,000 |
| Adjusted gross income | 7,000 |
| Less: | |
| Deduction for personal exemption | $600 |
| Standard deduction allowed by section 141 | 700 |
| | 1,300 |
| Taxable income | 5,700 |

In 1960 the taxpayer undertakes the operation of a trade or business and sustains therein a net operating loss of $4,700. In 1961 he sustains a net operating loss of $10,000 in the operation of the business. Under section 172(b)(2), it is determined that the entire amount of each loss, $4,700 and $10,000, is a carryback to 1959. In determining the amount of the carryover of the 1961 loss to 1962, the taxable income for 1959 as computed under this paragraph is $3,870, determined as follows:

| | |
|---|---|
| Salary | $5,000 |
| Net long-term capital gain | 4,000 |
| Total gross income | 9,000 |
| Less: Deduction for carryback of 1960 net operating loss | 4,700 |
| Adjusted gross income | 4,300 |
| Less: Standard deduction | 430 |
| Taxable income | 3,870 |

PAR. 4. There are inserted immediately after § 1.172-8 the following new sections:

**§ 1.172-9 Net operating loss carrybacks in case of certifications under the Trade Expansion Act of 1962.**

(a) *Eligibility for five-year carryback*—(1) *In general.* Section 317(a) of the Trade Expansion Act of 1962 (76 Stat. 889), hereinafter referred to as the Trade Act, provides that if the Secretary of Commerce determines that an alleged net operating loss of a firm (as defined in section 405(3) of the Trade Act) for any taxable year arose predominantly out of the carrying on of a trade or business which was seriously injured, during such taxable year, by certain increased imports, and that the tax assistance provided under section 172(b)(1)(A)(ii) of the Code will materially contribute to the economic adjustment of the firm, then he shall certify such determinations. Section 172(b)(1)(A)(ii) provides that in the case of a taxpayer with respect to a taxable year ending on or after December 31, 1962, for which a certification has been issued under such section 317(a), a net operating loss for such year shall be a net operating loss carryback to each of the five taxable years preceding the loss year. Section 172(b)(3)(A) provides special notice and consent rules which must be satisfied for the five-year carryback to apply. See paragraphs (c) and (d) of this section. Section 172(b)(3)(B) provides that the application of the five-year carryback in the case of a partnership and its partners, or an electing small business corporation (as defined in section 1371(b)) and its shareholders, shall be determined under regulations prescribed by the Secretary or his delegate. See paragraph (b) of this section.

(2) *Taxpayer must sustain net operating loss.* The existence and amount of any net operating loss shall be determined under section 172(c) and §§ 1.172-1 through 1.172-3. Thus, for example, an individual who operates a firm as a sole proprietorship which is certified for tax assistance for a taxable year must combine the gross income and deductions (subject to the modifications specified in section 172(d) and § 1.172-3) from all of his activities for the taxable year in determining the existence and amount of a net operating loss. For special rules applicable in the case of a partner of a partnership or of a shareholder of an electing small business corporation, see paragraph (b) of this section. For rules applicable in determining the extent to which a net operating loss of a member of an affiliated group of corporations making or required to make a consolidated return may be carried back five years, see paragraphs (a)(4) and (b)(6) of § 1.1502-31.

(3) *Provision elective.* The five-year carryback provisions of section 172(b)(1)(A)(ii) apply to a taxpayer only if all the requirements relating to the application of such section are satisfied. Thus, for example, if a certification is issued under section 317(a) of the Trade Act with respect to a net operating loss of a partnership, one or more partners of of such partnership may apply such five-year carryback provisions while the remaining partners may apply the three-year carryback provisions of section 172(b)(1)(A)(i).

(4) *Effect of determinations by the Secretary of Commerce.* Neither the issuance of a certification under section 317(a) of the Trade Act, nor any determination made by the Secretary of Commerce, is determinative of either the existence or the amount of any net operating loss for purposes of section 172 or any other section of the Code.

(b) *Special rule for partners of a partnership or shareholders of an electing small business corporation*—(1) *In general.* This paragraph provides rules for applying section 172(b)(3)(B), which provides that the application of the five-year carryback in the case of a partnership and its partners, or an electing small business corporation and its shareholders, shall be determined under regulations prescribed by the Secretary or his delegate, and that a net operating loss sustained by a partner or such a shareholder shall be eligible for the five-year carryback only if it arose predominantly from losses in respect of which certifications, issued under section 317(a) of the Trade Act, are filed in accordance with section 172(b)(3)(A)(i).

(2) *Computation of predominant losses.* (i) The net operating loss of a partner or of a shareholder of an electing small business corporation for a taxable year shall be considered to have arisen predominantly from losses in respect of which certifications were filed only if more than 50 percent of his total net operating loss for such taxable year is comprised of losses (or shares of losses) described in subdivision (ii) of this subparagraph.

(ii) For purposes of subdivision (i) of this subparagraph, the losses and shares of losses described in this subdivision are as follows:

(a) The amount of any loss for the year of a proprietorship of which such partner or shareholder is the proprietor, if such loss is certified under section 317(a) of the Trade Act and if the filing requirements of paragraph (c) of this section are satisfied with respect to such loss.

(b) Such partner's or shareholder's share of any loss of a partnership of which he is a member which is taken into account for the year, if such loss is certified under section 317(a) of the Trade Act and if the filing requirements of paragraph (c) of this section are satisfied with respect to such loss.

(c) Such partner's or shareholder's share of any net operating loss of an electing small business corporation of which he is a shareholder which is taken into account for the year, if such loss is certified under section 317(a) of the Trade Act and if the filing requirements of paragraph (c) of this section are satisfied with respect to such loss.

(3) *Entire amount of net operating loss is a carryback.* If the net operating loss of a partner of a partnership, or of a shareholder of an electing small business corporation, for a taxable year is considered to have arisen predominantly from losses in respect of which certifications are filed, and if the other rules provided in this section are satisfied, the five-year carryback period shall apply to the entire net operating loss of the taxpayer.

(4) *Examples.* This paragraph may be illustrated by the following examples:

*Example (1).* Jones is a partner in the ABC partnership, a shareholder in X Corporation, an electing small business corporation, and a sole proprietor. For the calendar year 1965 he has a net operating loss of $10,000 from the partnership, $4,000 from X Corporation, and $2,000 from his sole proprietorship. Each loss is certified under section 317(a) of the Trade Act and the filing requirements of paragraph (c) of this section are satisfied with respect to each loss. Jones has no other income or deductions for 1965. Assuming that more than 50 percent of his total net operating loss for 1965 is comprised of losses described in subdivision (ii) of this subparagraph, his entire net operating loss for 1965 is carried back to the five taxable years preceding 1965.

*Example (2).* Assume the same facts as in example (1), except that Jones has a net operating loss of $10,000 from the partnership, $4,000 from X Corporation, and $2,000 from his sole proprietorship, but only the loss from the partnership is certified under section 317(a) of the Trade Act. Assuming that more than 50 percent of his total net operating loss for 1965 is comprised of losses described in subdivision (ii) of this subparagraph, only $10,000 of his net operating loss for 1965 is carried back to the five taxable years preceding 1965.

(c) *Filing requirements.* (1) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(2) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(3) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(4) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(5) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(6) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(7) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(8) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(9) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(10) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(11) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(12) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(13) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(14) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(15) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(16) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(17) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(18) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(19) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(20) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(21) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(22) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(23) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(24) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(25) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(26) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(27) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(28) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(29) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(30) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(31) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(32) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(33) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(34) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(35) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(36) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(37) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(38) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(39) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(40) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(41) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(42) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(43) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(44) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(45) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(46) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(47) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(48) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(49) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(50) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(51) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(52) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(53) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(54) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(55) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(56) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(57) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(58) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(59) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(60) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(61) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(62) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall be filed within the time prescribed by law (including extensions of time) for filing the return for the loss year.

(63) Any taxpayer who claims a five-year carryback under section 172(b)(1)(A)(ii) shall file with his return for the loss year a statement that he is entitled to the five-year carryback and that he consents to the application of section 172(b)(3)(A). The statement shall set forth the amount of the net operating loss and the taxable years to which it is carried back. The statement shall

*Example* (1). Jones is a partner in the ABC partnership, a shareholder in X Corporation, an electing small business corporation, and the sole proprietor of a business. The corporation makes its return on the basis of a fiscal year ending May 31, and the partnership and Jones make their returns on the basis of a calendar year. The partnership and corporation each have losses in respect of which certifications have been issued under section 317(a) of the Trade Act for their taxable years ending in 1963, and in respect of which the filing requirements of section 172(b)(3)(A) and paragraph (c) of this section have been satisfied. For the calendar year 1963, Jones has a net operating loss, as defined in section 172(c), of $19,000, computed as follows:

| | |
|---|---|
| Jones' portion of the net operating loss of X Corporation, allowed as a deduction under section 1374 | ($5,000) |
| Jones' distributive share of loss of the partnership | (10,000) |
| Jones' distributive share of the partnership's gain from sales or exchanges of property described in section 1231 (relating to property used in the trade or business and involuntary conversions) | 2,000 |
| Excess of deductions over gross income from Jones' individually owned business | (7,000) |
| Excess of nonbusiness gross income over nonbusiness deductions | 1,000 |
| Net operating loss (as defined in section 172(c)) for 1963 | ($19,000) |

Jones' losses in respect of which certifications were filed in accordance with section 172(b)(3)(A)(i) are $13,000, computed as follows:

| | | |
|---|---|---|
| Excess of deductions over gross income: | | |
| Jones' portion of corporation net operating loss | | ($5,000) |
| Jones' distributive share of partnership loss | ($10,000) | |
| Less: Jones' share of partnership gain from sales or exchanges of section 1231 assets | 2,000 | |
| | | (8,000) |
| Losses in respect of which certifications were filed | | (13,000) |

Since Jones' losses in respect of which certifications were filed ($13,000) are greater than 50 percent of his net operating loss ($19,000), Jones' net operating loss is eligible for the five-year carryback. Since the special rule applicable in the case of partners of a partnership, or shareholders of an electing small business corporation, is satisfied, Jones shall carry his entire net operating loss back to his fifth taxable year preceding his taxable year 1963 if he satisfies the consent requirement of section 172(b)(3)(A)(ii) and paragraph (d) of this section.

*Example* (2). Assume the same facts as in example (1), except that no certification was issued under section 317(a) of the Trade Act for X Corporation's net operating loss. In this case, Jones' losses in respect of which certifications were filed is $8,000. Since $9,000 is not greater than 50 percent of Jones' net operating loss ($19,000), Jones may not carry back any part of his net operating loss to the fifth and fourth taxable years preceding his taxable year 1963. The fact that Jones has not satisfied the requirements of section 172(b)(3)(B) and this paragraph has no effect on whether any other partner of the ABC partnership may carry back a net operating loss to each of his five preceding taxable years.

(c) *Filing requirements*—(1) *In general.* Section 172(b)(3)(A)(i) provides that the five-year carryback does not apply with respect to a certified net operating loss unless there has been filed, at such time and in such manner as may be prescribed by the Secretary or his delegate, a notice that a timely application has been filed with the Secretary of Commerce for tax assistance with respect to such loss under section 317(a) of the Trade Act and, after its issuance, a copy of the certification under such section.

(2) *Notice; contents.* The notice shall be filed by the firm applying for tax assistance under section 317(a) of the Trade Act. If the firm applying for tax assistance is not the taxpayer who would take into account the loss with respect to which a certification is sought (for example, a partnership or an electing small business corporation), a separate notice shall also be filed by each taxpayer who would take any part of such loss into account and who desires to make use of the five-year carryback. The notice shall be in the form of a written statement, in duplicate, signed by the firm or taxpayer, or its duly authorized representative. The notice shall contain the following information:

(i) A statement that the firm has applied to the Secretary of Commerce for tax assistance under section 317(a) of the Trade Act and the date the application was filed.

(ii) The amount of the net operating loss designated in the application for tax assistance and the taxable year of the firm in which such loss was sustained.

(iii) In the case of a notice which is filed by the firm, the name, address, and taxpayer account number of the firm, and the internal revenue district in which the firm filed its income tax return for the taxable year of the net operating loss.

(iv) In the case of a separate notice which is filed by a taxpayer who is not the firm, the name, address, and taxpayer account number of both the taxpayer and the firm; the amount of such taxpayer's net operating loss for his taxable year with or within which the taxable year of the firm ends; and the internal revenue district in which his income tax return for such taxable year is filed.

(3) *Notice; time and place for filing.* The notice shall be filed within 90 days after the date on which the firm applies to the Secretary of Commerce for tax assistance under section 317(a) of the Trade Act. The notice of the firm shall be filed in the internal revenue district in which its income tax return was filed for the fifth and fourth taxable years preceding the taxable year of the net operating loss, except that a firm which is a partnership or an electing small business corporation shall file the notice in the internal revenue district in which its income tax return was filed for the taxable year of the loss. The notice of a taxpayer who is not the firm shall be filed in the internal revenue district in which such taxpayer filed his income tax return for the fifth and fourth taxable years preceding his taxable year with or within which the taxable year of the firm ends. If a notice is not filed or, if filed, is not timely filed or does not contain all of the information required by this subparagraph, the district director may extend the period of time within which a timely and proper notice may be filed if he is satisfied that the examination and processing of claims for refund or an application for tentative carryback adjustment for the fifth and fourth preceding taxable years will not be adversely affected.

(4) *Copy of certification.* A copy of the certification issued by the Secretary of Commerce under section 317(a) of the Trade Act shall be attached to all claims for credit or refund of income tax and to all applications for tentative carryback adjustment filed for the fifth and fourth taxable years preceding the taxable year of the net operating loss or, in the case of a taxpayer who is not the firm, for the fifth and fourth taxable years preceding such taxpayer's year with or within which the taxable year of the firm ends.

(d) *Consent requirement.* The five-year carryback provision of section 172(b)(1)(A)(ii) shall not apply with respect to a certified net operating loss unless the taxpayer, in a signed statement, consents to the assessment, within such period as may be determined by the district director, of any deficiency for any year to the extent attributable to the disallowance of a deduction previously allowed with respect to such net operating loss. The consent shall be valid with respect to the assessment of any such deficiency notwithstanding that at the time such consent is filed such assessment would otherwise be prevented by the operation of any law or rule of law.

**§ 1.172–10 Net operating loss carryovers for regulated transportation corporations.**

(a) *In general.* A net operating loss sustained in a taxable year ending after December 31, 1955, shall be a carryover to the seven succeeding taxable years if the taxpayer is a regulated transportation corporation (as defined in paragraph (b) of this section) for the loss year and for the sixth and seventh succeeding taxable years. If, however, the taxpayer is a regulated transportation corporation for the loss year and for the sixth succeeding taxable year but not for the seventh succeeding taxable year, then the loss shall be a carryover to the six succeeding taxable years. If the taxpayer is not a regulated transportation corporation for the sixth succeeding taxable year then this section shall not apply. If the net operating loss was sustained in a taxable year beginning in 1955 and ending in 1956, see paragraph (d) of this section for a limitation on the amount of the loss which may be carried over to the sixth and seventh succeeding taxable years.

(b) *Regulated transportation corporations.* A corporation is a "regulated transportation corporation" for a taxable year if it is included within one or more of the following categories:

(1) Eighty percent or more of the corporation's gross income (computed without regard to dividends and capital gains and losses) for such taxable year is income from transportation sources described in paragraph (c) of this section.

(2) The corporation is a railroad corporation, subject to Part I of the Interstate Commerce Act, which is either a lessor railroad corporation described in section 7701(a)(33)(G) or a common parent railroad corporation described in section 7701(a)(33)(H).

(3) The corporation is a member of a regulated transportation system for the taxable year. For purposes of this section, a member of a regulated transportation system for a taxable year means a member of an affiliated group of corporations making a consolidated return for such year, if 80 percent or more of the sum of the gross incomes of the members of the affiliated group for such year (computed without regard to dividends, capital gains and losses, or eliminations for intercompany transactions) is derived from transportation sources described in paragraph (c) of this section. For purposes of this subparagraph, income derived by a corporation described in subparagraph (2) of this paragraph from leases described in section 7701(a)(33)(G) shall be considered as income from transportation sources described in paragraph (c) of this section.

(c) *Transportation sources.* For purposes of this section, income from "transportation sources" means income received directly in consideration for transportation services, and income from the furnishing or sale of essential facilities, products, and other services which are directly necessary and incidental to the furnishing of transportation services. For purposes of the preceding sentence, the term "transportation services" means—

(1) Transportation by railroad as a common carrier subject to the jurisdiction of the Interstate Commerce Commission;

(2)(i) Transportation, which is not included in subparagraph (1) of this paragraph—

(*a*) On an intrastate, suburban, municipal, or interurban electric railroad,

(*b*) On an intrastate, municipal, or suburban trackless trolley system,

(*c*) On a municipal or suburban bus system, or

(*d*) By motor vehicle not otherwise included in this subparagraph,

if the rates for the furnishing or sale of such transportation are established or approved by a regulatory body described in section 7701(a)(33)(A);

(ii) In the case of a corporation which establishes to the satisfaction of the district director that—

(*a*) Its revenue from regulated rates from transportation services described in subdivision (i) of this subparagraph and its revenue derived from unregulated rates are derived from its operation of a single interconnected and coordinated system or from the operation of more than one such system, and

(*b*) The unregulated rates have been and are substantially as favorable to users and consumers as are the regulated rates,

transportation, which is not included in subparagraph (1) of this paragraph, from which such revenue from unregulated rates is derived.

(3) Transportation by air as a common carrier subject to the jurisdiction of the Civil Aeronautics Board; and

(4) Transportation by water by common carrier subject to the jurisdiction of either the Interstate Commerce Commission under Part III of the Interstate Commerce Act (54 Stat. 929), or the Federal Maritime Board under the Intercoastal Shipping Act, 1933 (52 Stat. 965).

(d) *Taxable years beginning in 1955 and ending in 1956.* In the case of a net operating loss sustained in a taxable year which begins in 1955 and ends in 1956, the amount of such loss which shall be carried over—

(1) To the sixth succeeding taxable year shall be the amount which bears the same ratio to the amount (computed under paragraph (a)(3) of § 1.172–4) of such loss which (but for this paragraph) would be carried over to such sixth succeeding taxable year as the number of days in such loss year after December 31, 1955, bears to the total number of days in such loss year; and

(2) To the seventh succeeding taxable year shall be the excess of the amount of such loss which was carried over to the sixth succeeding taxable year (as determined under subparagraph (1) of this paragraph) over the taxable income (computed as provided in § 1.172–5) for the sixth succeeding taxable year.

(e) *Corporate acquisitions.* This section shall apply to a carryover of a net operating loss sustained by a regulated transportation corporation (as defined in paragraph (b) of this section) to which an acquiring corporation succeeds under section 381(a) only if the acquiring corporation is a regulated transportation corporation (as defined in paragraph (b) of this section)—

(1) For the sixth succeeding taxable year in the case of a carryover to the sixth succeeding taxable year, and

(2) For the sixth and seventh succeeding taxable years in the case of a carryover to the seventh succeeding taxable year.

PAR. 5. Paragraph (b) of § 1.6164–3 is amended to read as follows:

**§ 1.6164–3 Computation of the amount of reduction of the tax previously determined.**

* * * * *

(b) *Reduction attributable to the expected carryback.* The reduction, attributable to the expected carryback or related adjustments, in any tax previously determined is to be ascertained by applying the expected carryback as if it were a determined net operating loss carryback, in accordance with the provisions of section 172 and the regulations thereunder. Items must be taken into account only to the extent that such items were included in the return, or were reflected in amounts assessed (or collected without assessment) as deficiencies, or in amounts abated, credited, refunded, or otherwise repaid, prior to the date of the filing of the statement. Thus, for example, if the taxpayer claims a deduction for depreciation of $10,000 in its return and the Internal Revenue Service asserts that only $4,000 is properly deductible, no change is to be made in the $10,000 depreciation deduction as shown by the taxpayer on his return unless a deficiency has been assessed, or an amount collected without assessment, prior to the date of filing of the statement as a result of a change in the depreciation deduction, or unless such change in the depreciation deduction was reflected in an amount abated, credited, refunded, or otherwise repaid prior to such date.

PAR. 6. Section 1.6411–1 is amended by adding paragraph (d) which reads as follows:

**§ 1.6411–1 Tentative carryback adjustments.**

* * * * *

(d) *Carrybacks attributable to certifications issued under section 317(a) of the Trade Expansion Act of 1962.* An application for a tentative carryback adjustment under the five-year carryback provision of section 172(b)(1)(A)(ii) may be filed in accordance with this section with respect to a net operating loss incurred in a taxable year ending on or after December 31, 1962, for which a certification has been issued under section 317(a) of the Trade Expansion Act of 1962 (76 Stat. 889), if the taxpayer is eligible for the five-year carryback in accordance with the rules provided in § 1.172–9. If an application under this section has been filed in accordance with the three-year carryback provision of section 172(b)(1)(A)(i), then a subsequent application for a tentative carryback adjustment under the five-year carryback provision of section 172(b)(1)(A)(ii) may be filed under this paragraph with respect to the same net operating loss that was carried back under the three-year carryback provision only if the consent to extend the period for assessment of a deficiency required by section 172(b)(3)(A)(ii) and paragraph (d) of § 1.172–9 is attached to such subsequent application. An application for a tentative carryback adjustment under the five-year carryback provision shall be accompanied by a statement indicating whether or not the taxpayer has previously filed an application for a tentative carryback adjustment under the three-year carryback provision with respect to the same net operating loss.

[F.R. Doc. 64–12288; Filed, Dec. 1, 1964; 8:48 a.m.]

# FEDERAL AVIATION AGENCY

## [ 14 CFR Part 71 [New] ]

[Airspace Docket No. 64–CE–34]

## FEDERAL AIRWAY

### Proposed Designation

The Federal Aviation Agency is considering an amendment to Part 71 [New] which would extend VOR Federal airway No. 71 from Kansas City, Mo., via Pawnee City, Nebr., to Raymond, Nebr.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments

as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Central Region, Attention: Chief, Air Traffic Division, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110. All communications received within 45 days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Agency, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, D.C. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

Two scheduled non-stop flights daily are conducted in each direction between Kansas City and Lincoln, Nebr. These flights presently operate via approved off-airway direct routes. The proposed route would reduce airway mileage by approximately 12 miles. Direct segments between Kansas City and Pawnee City, and from Pawnee City to Raymond would create intolerable air traffic control problems. These problems can be resolved and efficient air traffic control service provided if each of the airway segments are established with a slight dogleg.

If the proposed action is adopted, V-71 will be extended from Kansas City via the intersection of the Kansas City 310° and Pawnee City 122° True radials, Pawnee City and the intersection of the Pawnee City 334° and Raymond 146° True radials, to Raymond.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued in Washington, D.C., on November 24, 1964.

DANIEL E. BARROW,
*Chief, Airspace Regulations and Procedures Division.*

# SMALL BUSINESS ADMINISTRATION

## [ 13 CFR Part 107 ]

## SMALL BUSINESS INVESTMENT COMPANIES

### Conflicts of Interest

Notice is hereby given that pursuant to authority given in sections 308 and 312 of the Small Business Investment Act of 1958, Public Law 85-699, 72 Stat. 694, as amended, it is proposed to amend, as set forth below, § 107.716 of Part 107 of Subchapter B, Chapter I of Title 13 of the Code of Federal Regulations, as revised in 27 F.R. 9743-9754, and amended in 28 F.R. 681, 1627, 3021, 10868, 12250 and 29 F.R. 5223, 7144, 10499, 12109 and 14221.

Prior to final adoption of such amendment, consideration will be given to any comments or suggestions pertaining thereto which are submitted in writing, in triplicate, to the Investment Division, Small Business Administration, Washington 25, D.C., within a period of thirty (30) days of the date of this notice in the FEDERAL REGISTER.

*Information.* On August 7, 1964, notice to proposed rule making was published in the FEDERAL REGISTER (29 F.R. 11424) concerning amendment of § 107.716 to accomplish more effective regulation of Conflicts of Interest. After due and careful consideration of the comments received, SBA had determined to republish the proposals under consideration, in revised form, as set forth below.

It is proposed that the prohibition against self-dealing to the prejudice of SBA or the Licensee's shareholders, set forth in paragraph (a) of proposed § 107.716, be expanded to include self-dealing to the prejudice of small business concerns financed by the Licensee.

The proposed revision of paragraph (b), which would require prior SBA approval before a Licensee could provide financing to persons or concerns connected with such Licensee, would apply to (1) its officers, directors, and investment advisors or any person or firm regularly serving as its attorney-at-law; (2) any natural or legal person which owns or controls, directly or indirectly, ten (10) or more percent of such Licensee's stock; (3) any officer, director, partner, or employee of a natural or legal person described in (1) and (2); (4) any natural or legal person which, directly or indirectly, controls, is controlled by, or is under common control with any person or entity described in (1) and (2); (5) close relatives of any person described in (1) and (2), the term "close relative" being defined as ancestor, lineal descendant, brother or sister (by the whole or half blood) and lineal descendants of either, spouse, father-in-law, mother-in-law, brother-in-law, or sister-in-law; and (6) concerns in which any person referred to in (1) through (5) is an officer or director, or in which any natural or legal person covered by (1) through (5) (or a group of two or more such persons acting in concert) owns or controls, directly or indirectly, a ten (10) or more percent equity interest. The "ten (10) or more percent equity interest" in the concern which the Licensee proposes to finance, as mentioned in (6), is exclusive of any interest which is attributable solely to ownership of equity interests in such Licensee. A natural or legal person which has maintained any of the relationships described in (1) through (6) at any time within six (6) months prior to the proposed financing, or which assumes any of such relationships within six (6) months after the date of financing is deemed, for the purposes of paragraph (b), to have such relationships as of the date of financing.

Under the proposed revision of paragraph (c), a Licensee may not, without prior SBA approval, invest more than 25 percent of its paid-in capital and paid-in surplus or total assets, whichever is greater, in small concerns in which a natural or legal person owning five (5) but less than ten (10) percent of such Licensee's stock also owns a ten (10) or more percent equity interest, or in which a natural or legal person owning ten (10) or more percent of such Licensee's stock also owns a five (5) or more but less than ten (10) percent equity interest. The equity interest in the small concern to be financed, referred to in paragraph (c), would be exclusive of any interest attributable solely to ownership of equity interests in the Licensee. Under proposed paragraph (c), any natural or legal person which has been related to both the Licensee and its portfolio concern within six (6) months prior to the date of financing would be deemed, for the purposes of that paragraph, to have been in such relationship on the date of financing if the relationship reoccurs within six (6) months after consummation of the financing.

The proposed revision of paragraph (d) deals with Licensee's financing of small concerns connected with other Licensees, including cross-dealing arrangements. Subparagraph (2) of paragraph (d) would prohibit the Licensee financing any natural or legal person connected with another Licensee in any manner described in paragraph (b), if any person or entity connected (in the manner set forth in paragraph (b)) with the Licensee proposing to furnish such financing has received or is to receive financing from another Licensee pursuant to any cross-dealing, reciprocal or circular arrangement, or other express or implied understanding or agreement. Subparagraph (1) would require a Licensee to obtain prior SBA approval before it could provide financing to any small concern connected with another Licensee (in the manner set forth in paragraph (b)), where any person or entity so connected with the Licensee proposing to furnish such financing receives, is about to receive, or has received from any Licensee any financing or a commitment for financing.

The revised proposal with regard to paragraph (e) would require a Licensee, or any natural or legal person related (in the manner described in paragraph (b)) to such Licensee or the small concern to be financed, to obtain prior SBA approval before either could borrow money from (1) any concern financed by such Licensee or (2) an officer, director, or 10 or more percent equity owner of such concern, or any close relative of such officer, director or equity owner.

Revised paragraph (f), as set forth below, provides that SBA will publish in a periodical bulletin, in summary form, the relevant facts pertaining to approvals granted under amended § 107.716. Paragraph (f) would require Licensees whose application for SBA approval has been granted (or Licensees subject to SEC jurisdiction under the Investment Company Act of 1940, which qualify for the exemption described in paragraph (g)) to publish in a newspaper of general circulation in the locality most directly affected, a notice in the form specified by SBA describing the transaction, and

to furnish SBA a copy thereof within 10 days after publication.

Revised paragraph (g), as set forth below, would exempt from the prior approval requirements of paragraphs (b) and (e) of amended § 107.716, Licensees which are subject to the jurisdiction of the Securities and Exchange Commission as registered investment companies under the Investment Company Act of 1940, and have been granted an exemption by that Commission from applicable provisions of the 1940 Act, and/or its implementing rules, with regard to a transaction otherwise also subject to paragraph (b) or (e) of § 107.716. The exemption from paragraph (b) or (e), under the stipulated circumstances, would not relieve the Licensee, from the publication requirements pertaining thereto under paragraph (f) of § 107.716.

Paragraph (h) carries over the text of proposed paragraph (i), *Protection of investment*, published as part of the original proposal on August 7, 1964. It declares that nothing contained in revised § 107.716 is intended to preclude the Licensee from designating an officer, employee, or representative to serve as an officer, director, or in any other capacity in the management of a small concern financed by it for the purpose of protecting its investment therein.

Paragraph (i), *Standards governing approval of applications*, sets forth various relevant factors that SBA would take into consideration in determining whether a proposed transaction should be approved under revised § 107.716. These criteria include the extent and degree of common ownership and other relationships; degree of independence of Licensee's board of directors; comparability of the terms and conditions of the proposed financing with others, not subject to § 107.716, which have been consummated by Licensee; cost and recency of investments made in the small concern by persons connected with the Licensee; the number and dollar amount of transactions subject to § 107.716, previously entered into by the Licensee; and such other facts and events as SBA finds pertinent under the circumstances in ascertaining whether SBA approval would be consonant with the best interests of the SBIC program, as intended by Congress.

Paragraph (j), *Applicability, Construction and Effect*, provides that revised § 107.716 shall take effect thirty (30) days after publication in final form in the FEDERAL REGISTER. It declares that the amendment shall apply to and govern the legality of transactions consummated after such effective date. A savings clause included in proposed paragraph (j) stipulates that the legality of transactions consummated prior to the effective date of the amendment will be governed by former provisions of § 107.716 in effect at the time that Licensee entered into said transactions. It makes it clear that the amended provisions incorporated into revised § 107.716 are not to be construed as preventing SBA from taking or continuing enforcement action, under the former provisions of § 107.716, as to any transaction consummated prior to the effective date of the amendment in violation of applicable provisions of former § 107.716.

It is proposed to amend the Regulations Governing Small Business Investment Companies by deleting § 107.716 in its entirety and substituting a new § 107.716. As amended, § 107.716 would read as follows:

**§ 107.716 Conflicts of interest.**

(a) *General.* Self-dealing to the prejudice of SBA, small business concerns financed by a Licensee, or shareholders of a Licensee, is prohibited.

(b) *Persons or concerns connected with the Licensee.* Without the prior written approval of SBA, a Licensee shall not, directly or indirectly, provide financing to:

(1) An officer, director, or investment adviser of such Licensee, or any person or firm regularly serving such Licensee in the capacity of attorney-at-law; or

(2) Any person or entity which owns or controls, directly or indirectly, 10 or more percent of the stock of such Licensee; or

(3) Any officer, director, partner, or employee of any person or entity described in subparagraphs (1) and (2) of this paragraph; or

(4) Any person or entity which directly or indirectly controls, or is controlled by, or is under common control with, any person or entity described in subparagraphs (1) and (2) of this paragraph; or

(5) Any close relative (i.e., ancestor; lineal descendant; brother or sister, by the whole or half blood, and lineal descendants of either; spouse; father-in-law, mother-in-law, brother-in-law or sister-in-law) of any person described in subparagraphs (1) and (2) of this paragraph; or

(6) Any concern in which (i) any person described in subparagraphs (1) through (5) of this paragraph is an officer or director or (ii) any person or entity described in said subparagraphs (or group of two or more such persons or entities acting in concert) owns or controls, directly or indirectly, 10 or more percent equity interest (exclusive of any interest attributable solely to ownership of equity interests in the Licensee);

(7) For the purpose of this paragraph, any person or entity which has held any of the positions or relationships described in subparagraphs (1) through (6) of this paragraph within six months prior to the date of financing, or which holds any such positions or relationships within six months after the date of financing shall be deemed to have such position or relationship as of the date of financing.

(c) *Persons or concerns connected with Licensee by reason of 5 to 10 percent stock ownership.* Without prior SBA approval, a Licensee may not invest more than 25 percent of (1) its combined paid-in capital and paid-in surplus (including outstanding commitments and loans under § 107.301) or (2) its total assets, whichever is greater, in concerns in which—

(i) A person or entity which owns or controls, directly or indirectly, 5 or more (but less than 10) percent of the stock of such Licensee, also owns or controls, directly or indirectly, a 10 or more percent equity interest, or

(ii) A person or entity which owns or controls, directly or indirectly, 10 or more percent of the stock of such Licensee, also owns or controls, directly or indirectly, an equity interest of 5 or more (but less than 10) percent: *Provided, however,* That the equity interest, referred to in subdivision (i) of this subparagraph and this subdivision (ii) which a person or entity owns or controls in any such concern shall be exclusive of any interest attributable solely to ownership by such person or entity of equity interests in the Licensee.

For the purposes of this paragraph, any person or entity which has been related to both the Licensee and its portfolio concern at any time within 6 months prior to date of financing, as described in subdivisions (i) and (ii) of this subparagraph, shall be deemed to have been so related to them on the date of financing if such relationships are reacquired within 6 months after date of financing.

(d) *Persons or concerns connected with other Licensees.* (1) Without prior written approval of SBA, a Licensee shall not provide financing, directly or indirectly, to any person or entity connected with another Licensee in the manner described in paragraph (b) of this section, if any person or entity so connected with the Licensee providing such financing receives, or is about to receive, or has received, directly or indirectly, from any Licensee any financing or a commitment for financing.

(2) A Licensee shall not, directly or indirectly, provide financing to any person or entity connected with another Licensee in the manner described in paragraph (b) of this section, if there exists any express or implied understanding, agreement, or cross-dealing, reciprocal or circular arrangement, under which persons or entities connected with the first Licensee in the manner described in paragraph (b) of this section have received or are to receive financing from another Licensee.

(e) *Borrowing.* Without prior written approval of SBA, no Licensee nor any of the persons or entities described in paragraph (b) of this section, shall directly or indirectly borrow money from:

(1) A concern financed by such Licensee; or

(2) An officer, director or owner of 10 or more percent equity interest in such concern, or a close relative (as defined in paragraph (b)(5) of this section) of such officer, director or equity owner.

(f) *Publication.* SBA will publish in a periodical bulletin, in summary form, each approval granted under this section. Within 10 days after the approval of an application filed by a Licensee under this section (or in case the Licensee qualifies for the exemption prescribed under paragraph (g) of this section), it shall publish in a newspaper of general circulation, in the locality most directly affected by the transaction, a notice specified by SBA describing the transaction, and shall furnish a copy of such notice to SBA within 10 days after publication.

(g) *Exception for 1940 Act companies.* Licensees subject to the regulatory jurisdiction of the Securities and Exchange Commission under the Investment Company Act of 1940 which have, pursuant to a rule, regulation, order approving an application for exemption, or other Commission action, been granted an exemption from applicable provisions of said Act and/or implementing rules and regulations, with regard to a transaction which is also subject to paragraph (b) or (e) of this section, shall be exempt from the provisions of said paragraph (b) or (e) of this section, except for the publication requirements pertaining thereto specified under paragraph (f) of this section.

(h) *Protection of investment.* Nothing herein contained is intended to preclude a Licensee from permitting an officer, employee, or representative from serving as an officer, director, or in any other capacity in the management of a small business concern for the purpose of protecting its investment in or loan to such concern.

(i) *Standards governing approval of applications.* In determining whether a proposed transaction shall be approved under this section, SBA will take into consideration the following factors to the extent that may be applicable under the attendant circumstances:

(1) The extent and degree of common ownership and other relationships;

(2) The degree of independence of the board of directors of the Licensee;

(3) The comparability of the terms and conditions of the proposed transaction with those of other financings made by the Licensee, not subject to this section;

(4) The cost and recency of any investment in the small business concern by persons or entities connected with the Licensee in the manner described in the particular paragraph of this section pursuant to which application is made;

(5) The total number and amount of transactions subject to this section, previously entered into by the Licensee; and

(6) Such other facts or events as SBA finds are pertinent under the circumstances in connection with its ascertaining that approval will be consonant with statutory objectives and the best interests of the SBIC program.

(j) *Applicability, construction and effect.* (1) This amendment shall take effect 30 days after publication in final form in the FEDERAL REGISTER. It shall be applicable to and govern the legality of transactions subject to its provisions which are consummated after such effective date.

(2) The legality of transactions of a continuing nature consummated prior to the effective date hereof shall be governed by the former provisions of § 107.716 in effect at the time that Licensee entered into said transactions. Nothing contained herein shall be construed as preventing SBA from taking or continuing appropriate enforcement action thereunder with respect to any transaction which the Licensee consummated prior to the effective date hereof in violation of applicable provisions of former § 107.716.

Dated: November 25, 1964.

## DEPARTMENT OF STATE

[Public Notice 238]

### CERTAIN FOREIGN PASSPORTS

#### Validity

Under the provisions of section 212(a)(26) of the Immigration and Nationality Act, a nonimmigrant alien who makes application for a visa or for admission into the United States is required to be in possession of a passport which is valid for a minimum period of six months from the date of expiration of the initial period of his admission into the United States or his contemplated initial period of stay authorizing him to return to the country from which he came or to proceed to and enter some other country during such period. By reason of the foregoing requirement, certain foreign governments have entered into agreements with the Government of the United States whereby their passports are recognized as valid for the return of the bearer to the country of the foreign issuing authority for a period of six months beyond the expiration date specified in the passport. These agreements have the effect of extending the validity period of the foreign passport an additional six months notwithstanding the expiration date indicated in the passport. Notice is hereby given that the Government of Thailand has recently concluded such an agreement with the Government of the United States. A list of all foreign governments which have entered into such agreements follows:

| | |
|---|---|
| Australia. | Laos. |
| Austria (Reisepass only). | Lebanon. |
| Bahamas (See United Kingdom). | Luxembourg. |
| Belgium. | Malagasy Republic. |
| Bolivia. | Malaya. |
| Brazil. | Mexico. |
| Cambodia. | Monaco. |
| Canada. | The Netherlands. |
| Ceylon. | Nigeria. |
| Chile. | Norway. |
| Colombia. | Pakistan. |
| Cuba. | Peru. |
| Cyprus. | Philippines. |
| Dominican Republic. | Portugal. |
| Ecuador. | Spain. |
| Ethiopia. | Sweden. |
| Finland. | Switzerland. |
| France. | Syrian Arab Republic. |
| Germany (Reisepass and Kinderausweis). | Thailand. |
| Greece. | Togo. |
| Guatemala. | Tunisia. |
| Guinea. | United Arab Republic. |
| Honduras. | United Kingdom of Great Britain and Northern Ireland (including Jersey and Guernsey and its Dependencies) and the Bahamas. |
| Iceland. | Uruguay. |
| India. | Venezuela. |
| Ireland. | |
| Israel. | |
| Ivory Coast. | |
| Jamaica. | |
| Korea. | |

In addition, travel documents issued by the Government of the Trust Territory of the Pacific Islands are considered to be valid for the return of the bearer to the Trust Territory for a period of six months beyond the expiration date specified therein.

This notice supersedes Public Notice 226 of January 18, 1964 (29 F.R. 1661), Public Notice 228 of February 26, 1964 (29 F.R. 3114) and Public Notice 236 of August 4, 1964 (29 F.R. 11934).

Dated: November 17, 1964.

ABBA P. SCHWARTZ,
*Administrator, Bureau of Security and Consular Affairs.*

## DEPARTMENT OF THE TREASURY

### Bureau of Customs

[483.21]

### STANDARD NEWSPRINT PAPER

#### Tariff Classification

NOVEMBER 27, 1964.

The purpose of this notice is to advise interested persons of the proposed standards of specifications descriptive of most standard newsprint papers provided for in Item 252.65, Schedule 2, Subpart B, of the Tariff Schedules of the United States, a preliminary announcement with respect to which was published in the FEDERAL REGISTER of September 14, 1963, Volume 28, Number 180, and in Treasury Decision 56001, dated September 18, 1963. Treasury Decision 56001 also appeared in the FEDERAL REGISTER of September 24, 1963, Volume 28, Number 186.

The test for determining whether a paper is classifiable as standard newsprint paper under Item 252.65 is whether at the time of its importation the paper is of that class or kind chiefly used in the United States in the printing of newspapers.

Chief use is determinable by the use in the United States at, or immediately prior to, the date of importation, in accordance with General Interpretive Rule 10(e)(i) of the General Headnotes and Rules of Interpretation of the Tariff Schedules of the United States, which provides:

10(e) In the absence of special language or context which otherwise requires—

(i) a tariff classification controlled by use (other than actual use) is to be determined in accordance with the use in the United States at, or immediately prior to, the date of importation, of articles of that class or kind to which the imported articles belong, and the controlling use is the chief use, i.e., the use which exceeds all other uses (if any) combined;

The Bureau is presently of the opinion that most papers which conform to the following descriptive specifications:

Weight: 500 Sheets each 24 by 36 inches not less than 30 pounds nor more than 35 pounds.

Size: Rolls not less than 13 inches wide and 28 inches in diameter. Sheets not less than 20 by 30 inches.

Thickness: Not over .0042 inch.

Sizing: Time of transudation of water shall be not more than 10 seconds by the ground glass method.

Ash Content: Not more than 6.5 percent.

Color and Finish: White; or tinted shades of pink, peach or green in rolls; not more than 50 percent gloss when tested with the Ingersoll glarimeter.

are of that class or kind of papers chiefly used in the printing of newspapers in the United States and are, accordingly, classifiable as standard newsprint paper under Item 252.65, Tariff Schedules of the United States, so long as the existing conditions of chief use prevail.

In the event it is established that a type of paper not conforming to the foregoing descriptive specifications is chiefly used in the United States within the meaning of General Interpretative Rule 10(e)(i), quoted above, in the printing of newspapers in the United States, additional descriptive specifications will be announced, of which due notice will be given in the FEDERAL REGISTER and in the weekly Treasury Decisions. Claims of such chief use or of changes in chief use will be passed upon as they are presented to the Bureau by the parties in interest.

Formal adoption of the descriptive specifications set out herein will be postponed for a period of 30 days after the publication of this notice in the FEDERAL REGISTER in order to afford interested parties an opportunity to submit such comments as they consider pertinent.

Consideration will be given to any relevant data, views, or arguments pertaining to the correct tariff classification of this merchandise which are submitted to the Bureau of Customs, Washington, D.C., 20226, in writing. To assure consideration, such communications must be received in the Bureau not later than 30 days from the date of publication of this notice. No hearings will be held.

[SEAL] LESTER D. JOHNSON,
*Acting Commissioner of Customs.*

## DEPARTMENT OF AGRICULTURE

### Agricultural Stabilization and Conservation Service

### FLUE-CURED TOBACCO

#### Notice of Referendum

Notice is hereby given that on December 15, 1964, a referendum will be held of farmers engaged in the production in 1964 of flue-cured tobacco, pursuant to the provisions of the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1281 et seq.). Notice that consideration would be given to establishing a date for holding the referendum was given in 29 F.R. 14234. The purpose

of the referendum is to determine whether the farmers voting favor a national marketing quota for each of the 1965–66, 1966–67, and 1967–68 marketing years for flue-cured tobacco. The referendum will be conducted in accordance with the provisions of the Act and the Regulations Governing the Holding of Referenda on Marketing Quotas (28 F.R. 13249).

In order that arrangements for holding the referendum may be made in an orderly manner and as much advance notice as possible be given to the date of the referendum, it is essential that this notice be made effective as soon as possible. Accordingly, it is hereby determined that compliance with the 30-day effective date requirement of the Administrative Procedure Act is impracticable and contrary to the public interest and this notice shall be effective upon filing of this document with the Director, Office of the Federal Register.

Signed at Washington, D.C. on November 27, 1964.

H. D. GODFREY,
*Administrator, Agricultural Stabilization and Conservation Service.*

# DEPARTMENT OF COMMERCE

## Bureau of International Commerce

[File No. 24–38 etc.]

### JEAN MORVAN

### Order Temporarily Denying Export Privileges

In the matter of Jean Morvan, Box 50 Station H, Montreal, Canada, respondent; File 24–38 et al.

The Director, Investigations Division, Office of Export Control, Bureau of International Commerce, United States Department of Commerce, pursuant to the provisions of § 382.11 of the Export Regulations (Title 15, Chapter III, Subchapter B, Code of Federal Regulations), has applied to the Compliance Commissioner for an order temporarily denying all export privileges to the above named respondent. It was requested that the order remain in effect for a period of sixty days pending continued investigation into the facts and transactions giving rise to the application and the commencement of such proceedings as may be deemed proper under the law against said respondent.

The Compliance Commissioner has reviewed the application and the evidence presented in support thereof and has submitted his report, together with his recommendation that the application be granted and that a temporary denial order be issued for sixty days.

The evidence and recommendation of the Compliance Commissioner have been considered. The above named respondent is a resident of Montreal, Canada, and is engaged in the import-export business. On the evidence presented there is reasonable basis to believe that said respondent has been participating in the procurement and attempted procurement of U.S.-origin agricultural equipment, tractors and other automotive vehicles for reexportation from Canada to ports in Europe with knowledge that the said commodities were to be reexported, diverted, or transshipped from said European ports to unauthorized ultimate destinations in Soviet-bloc countries. There is also reasonable basis to believe that said respondent has knowingly participated in transactions involving U.S.-origin commodities with parties who are subject to orders denying U.S. export privileges. There is also reasonable basis to believe that said respondent will continue such conduct in contravention of the Export Control Act and regulations unless U.S. export privileges are temporarily denied. I find that an order temporarily denying export privileges to the respondent is reasonably necessary for the protection of the public interest and national security.

*Accordingly, it is hereby ordered:*

I. All outstanding validated export licenses in which respondent appears or participates in any manner or capacity are hereby revoked and shall be returned forthwith to the Bureau of International Commerce for cancellation.

II. The respondent, his successors or assigns, partners, representatives, agents, and employees hereby are denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction involving commodities or technical data exported from the United States in whole or in part, or to be exported, or which are otherwise subject to the Export Regulations. Without limitation of the generality of the foregoing, participation prohibited in any such transaction, either in the United States or abroad, shall include participation, directly or indirectly, in any manner or capacity: (a) As a party or as a representative of a party to any validated export license application; (b) in the preparation or filing of any export license application or reexportation authorization, or any document to be submitted therewith; (c) in the obtaining or using of any validated or general export license or other export control document; (d) in the carrying on of negotiations with respect to, or in the receiving, ordering, buying, selling, delivering, storing, using, or disposing of any commodities or technical data in whole or in part exported or to be exported from the United States; and (e) in the financing, forwarding, transporting, or other servicing of such commodities or technical data.

III. Such denial of export privileges shall extend not only to the respondent, but also to his agents and employees and to any successor and to any person, firm, corporation, or business organization with which he now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of trade or services connected therewith.

IV. This order shall take effect forthwith and shall remain in effect for a period of sixty days from the date hereof, unless it is hereafter extended, amended, modified, or vacated in accordance with the provisions of the United States Export Regulations.

V. No person, firm, corporation, partnership or other business organization, whether in the United States or elsewhere, without prior disclosure to and specific authorization from the Bureau of International Commerce, shall do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with the respondent or any related party, or whereby the respondent or related party may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly: (a) Apply for, obtain, transfer, or use any license, shipper's export declaration, bill of lading, or other export control document relating to any exportation, reexportation, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States, by, to, or for any such respondent or related party denied export privileges; or (b) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate in any exportation, reexportation, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States.

VI. A copy of this order shall be served upon the respondent.

VII. In accordance with the provisions of § 382.11(c) of the Export Regulations, the respondent may move at any time to vacate or modify this temporary denial order by filing an appropriate motion therefor, supported by evidence, with the Compliance Commissioner and may request an oral hearing thereon which, if requested, shall be held before the Compliance Commissioner in Washington, D.C., at the earliest convenient date.

This order shall become effective forthwith.

Dated: November 17, 1964.

FORREST D. HOCKERSMITH,
*Director, Office of Export Control.*

## Food and Drug Administration

### MERCK & CO., INC.

### Notice of Filing of Petitions for Food Additive Amprolium

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786; 21 U.S.C. 348(b)(5)), notice is given that petitions (FAP 5D1544, 5D1545) have been filed by Merck & Co., Inc., Rahway, New Jersey, 07065, proposing that the food additive regulations for the safe use of amprolium in animal feed and drinking water be amended as follows:

1. It is proposed that § 121.210(c) be amended by adding a new item 4.1 to table 1 and by changing the text under "Limitations" in table 2. As amended, the affected portions would read as follows:

TABLE 1.—AMPROLIUM IN COMPLETE CHICKEN AND TURKEY FEED

| Principal ingredient | Grams per ton | Combined with— | Grams per ton | Limitations | Indications for use |
|---|---|---|---|---|---|
| • • • | • • • | • • • | • • • | • • • | • • • |
| 4.1 Amprolium | 113.5–454 (0.0125%–0.05%) | | | For laying hens as follows: Feed 0.05 percent for 3–5 days followed by 0.25 percent for 2 weeks in severe outbreaks, or 0.0125 percent for 2 weeks in moderate outbreaks. | Treatment of coccidiosis. |

TABLE 2.—AMPROLIUM IN DRINKING WATER

| Principal ingredient | Quantity | Limitation | Indications for use |
|---|---|---|---|
| Amprolium | 0.006%–0.024% | For growing chickens, turkeys, and laying hens. In drinking water; as sole source of amprolium. | Treatment of coccidiosis. |

2. It is proposed that § 121.1022(c) be amended to increase the tolerance for amprolium in eggs from zero to seven parts per million, as follows:

(c) 7 parts per million (0.0007 percent) in eggs.

Dated: November 23, 1964.

# FEDERAL POWER COMMISSION

[Docket No. RI65–322]

### FRANCO WESTERN OIL CO.

### Order Providing for Hearing on and Suspension of Proposed Change in Rate, and Allowing Rate Change To Become Effective Subject to Refund

NOVEMBER 20, 1964.

Respondent named herein has filed a proposed change in rate and charge of a currently effective rate schedule for the sale of natural gas under Commission jurisdiction, as set forth in Appendix A below.

The proposed changed rate and charge may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon a hearing regarding the lawfulness of the proposed change, and that the supplement herein be suspended and its use be deferred as ordered below.

The Commission orders: (A) Under the Natural Gas Act, particularly sections 4 and 15, the regulations pertaining thereto (18 CFR Ch. I), and the Commission's rules of practice and procedure, a public hearing shall be held concerning the lawfulness of the proposed change.

(B) Pending hearing and decision thereon, the rate supplement herein is suspended and its use deferred until date shown in the "Date Suspended Until" column, and thereafter until made effective as prescribed by the Natural Gas Act: *Provided, however,* That the supplement to the rate schedule filed by Respondent shall become effective subject to refund on the date and in the manner herein prescribed if within 20 days from the date of the issuance of this order Respondent shall execute and file under its above-designated docket number with the Secretary of the Commission its agreement and undertaking to comply with the refunding and reporting procedure required by the Natural Gas Act and § 154.102 of the regulations thereunder, accompanied by a certificate showing service of a copy thereof upon the purchaser under the rate schedule involved. Unless Respondent is advised to the contrary within 15 days after the filing of its agreement and undertaking, such agreement and undertaking shall be deemed to have been accepted.

(C) Until otherwise ordered by the Commission, neither the suspended supplement, nor the rate schedule sought to be altered, shall be changed until disposition of this proceeding or expiration of the suspension period.

(D) Notices of intervention or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 and 1.37(f) on or before January 11, 1965.

By the Commission.

[SEAL] JOSEPH H. GUTRIDE,
*Secretary.*

[1] For resale to El Paso Natural Gas Co. under West Lake Natural Gasoline Co. (Operator), et al.'s FPC Gas Rate Schedule No. 1.
[2] The stated effective date is the effective date requested by respondent.
[3] Date suspension period ends for buyer's corresponding increased rate suspended in Docket No. RI65-29.
[4] The suspension period is limited to one day.
[5] Revenue-sharing rate increase.
[6] Pressure base is 14.65 p.s.i.a.

Franco Western Oil Company's (Franco) proposed revenue-sharing rate increase is for a sale to West Lake Natural Gasoline Company (West Lake), a subsidiary of El Paso Natural Gas Company (El Paso). West Lake gathers and processes the gas and resells it to El Paso, paying its supplier 50 percent of the amount it receives from El Paso. On July 1, 1964, West Lake filed a periodic increase from 17.0 cents to 18.0 cents per Mcf for its sale to El Paso, which was suspended for five months until January 1, 1965, in Docket No. RI65-29, because it exceeds the 11.5 cents per Mcf area ceiling for increased rates. Franco's proposed rate increase is based upon West Lake's suspended 18.0 cents per Mcf rate. Although Franco's proposed revenue-sharing rate increase is below the 11.5 cents per Mcf area ceiling as set forth in the Commission's Statement of General Policy No. 61-1, as amended (18 CFR, ch. I, pt. 2, sec. 2.56) it is suspended until January 2, 1965, because of its relationship to West Lake's increased rate.

[Docket No. CI65-485]

## PURE OIL CO.

### Notice of Application

NOVEMBER 24, 1964.

Take notice that on November 20, 1964, The Pure Oil Company filed in Docket No. CI65-485 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to El Paso Natural Gas Company from the Red Hills Area, Lea County, N. Mex., at a total initial price of 16.0 cents per Mcf at 14.65 psia, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before December 15, 1964.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on the application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter believes that a grant of the certificate is required by the public convenience and necessity. Where a protest or petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

GORDON M. GRANT,
*Acting Secretary.*

[F.R. Doc. 64-12273; Filed, Dec. 1, 1964; 8:47 a.m.]

[Docket No. CP60-57]

## TENNESSEE GAS TRANSMISSION CO.

### Notice of Hearing [1]

NOVEMBER 24, 1964.

Take notice that on March 11, 1960, Tennessee Gas Transmission Co. (Tennessee), Tennessee Building, Houston, Tex., filed in Docket No. CP60-57, an application as amended and supplemented on March 31, July 7, and September 9, 1960, pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities to enable Tennessee to take into its transmission system natural gas, as is more particularly set forth in the application on file with the Commission and open to public inspection.

Tennessee has purchased certain natural gas interests under contracts covering interest underlying portions of Blocks 30, 47, and 54 of Calliou Island Field, all situated off shore from the Louisiana Coast, W. Cameron Block 68 and Lac Blanc. These lateral lines for which authorization is sought herein comprise about 83.7 miles and will be connected to Tennessee's main transmission system at various points from the aforementioned sources in South Louisiana at an estimated cost of $7,994,000.

The facilities for which authorization is sought have been constructed and placed in operation under temporary certificate authorization issued to Tennessee on May 4, 1961, as amended on July 21, 1961.

Petitions for leave to intervene have been filed in this proceeding by the following: New York State Public Service Commission, November 23, 1960, United Gas Improvement Co., November 28, 1960, Consolidated Edison Company of New York, Incorporated, November 28, 1960, Brooklyn Union Gas Co., November 28, 1960, Public Service Electric and Gas Co., November 28, 1960, and Long Island Lighting Co., November 29, 1960.

The related producers have now been permanently certificated by the issuance of the Commission's Opinion No. 436 in Docket Nos. G-13221, et al.

This matter should now be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on these applications provided no further protest is filed within the time required herein.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Tennessee to appear or be represented at the hearing and the matter will be disposed of as provided above in the absence of objection by parties of record on or before December 17, 1964.

GORDON M. GRANT,
*Acting Secretary.*

[F.R. Doc. 64-12276; Filed, Dec. 1, 1964; 8:47 a.m.]

[Docket Nos. RI65-323, etc.]

## JAKE L. HAMON ET AL.

### Order Providing for Hearings on and Suspension of Proposed Changes in Rates [1]

NOVEMBER 20, 1964.

The Respondents named herein have filed proposed increased rates and charges of currently effective rate schedules for sales of natural gas under Commission jurisdiction, as set forth in Appendix A hereof.

The proposed changed rates and charges may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon hearings regarding the lawfulness of the proposed changes, and that the supplements herein be suspended and their use be deferred as ordered below.

The Commission orders: (A) Under the Natural Gas Act, particularly sections 4 and 15, the regulations pertaining thereto (18 CFR Ch. I), and the Commission's rules of practice and procedure, public hearings shall be held concerning the lawfulness of the proposed changes.

(B) Pending hearings and decisions thereon, the rate supplements herein are suspended and their use deferred until date shown in the "Date Suspended Until" column, and thereafter until made effective as prescribed by the Natural Gas Act.

(C) Until otherwise ordered by the Commission, neither the suspended supplements, nor the rate schedules sought to be altered, shall be changed until disposition of these proceedings or expiration of the suspension period.

(D) Notices of intervention or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 and 1.37(f)) on or before January 11, 1965.

By the Commission.

[SEAL] JOSEPH H. GUTRIDE,
*Secretary.*

[1] The present application was previously noticed and set for hearing by publication in the FEDERAL REGISTER on November 16, 1960 (25 F.R. 10898). Notice of Postponement of hearing until further notice was published December 20, 1960 (24 F.R. 12381).

[1] Does not consolidate for hearing or dispose of the several matters herein.

[2] For resale to El Paso Natural Gas Co. under West Lake Natural Gasoline Co. (Operator), et al.'s FPC Gas Rate Schedule No. 1.
[3] The stated effective date is the first day after expiration of the required statutory notice.
[4] End of the suspension period for West Lake's related increased rate in Docket No. RI65-29.
[7] Revenue-sharing rate increase.
[8] Pressure base is 14.65 p.s.i.a.
[9] Rate being collected under temporary certificate issued in Docket No. CI61-256 conditioned to a refund floor of 5.5 cents per Mcf (no Condition (2) involved).
[10] Periodic rate increase.
[11] Subject to deduction of 2.5 cents per Mcf amortization charge for pipeline facilities.
[12] Rate for gas produced from Mertzon Field.
[13] Initial rate.
[14] Covers gas produced in the Brooks Field.
[15] Buyer and seller are affiliated.
[16] For resale to Northern Natural Gas Co. under Mertzon Corp.'s FPC Gas Rate Schedule No. 1.
[17] Subject to deduction of 3.0 cents per Mcf amortization charge for pipeline facilities.
[18] Less a flat monthly fee of $1,500 due Mertzon for use of its plant facilities by Brooks Gas Corp.

Jake L. Hamon (Hamon) requests an effective date of November 1, 1964, for his proposed revenue-sharing increase. Mertzon Corporation (Mertzon) and Brooks Gas Corporation (Brooks Gas) request waiver of notice to make their proposed rate increases effective as of October 26, 1964. Good cause has not been shown for waiving the 30-day notice requirement provided in Section 4(d) of the Natural Gas Act to permit earlier effective dates for the aforementioned producers' rate filings and such requests are denied.

Hamon and the Standard Oil Company of Texas, a Division of California Oil Company (Standard Oil), proposed rate increases are revenue-sharing increases for sales to West Lake Natural Gasoline Company (West Lake), a subsidiary of El Paso Natural Gas Company (El Paso). West Lake gathers and processes the gas and resells it to El Paso, paying its suppliers 50 percent of the amount it receives from El Paso. On July 1, 1964, West Lake filed a periodic increase from 17.0 cents to 18.0 cents per Mcf for its sale to El Paso, which was suspended for five months until January 1, 1965, in Docket No. RI65-29, because it exceeds the 11.5 cents per Mcf area ceiling for increased rates. Hamon and Standard Oil's proposed rate increases are based upon West Lake's suspended 18.0 cents per Mcf rate. Although the proposed revenue-sharing rate increases are below the 11.5 cents per Mcf area ceiling as set forth in the Commission's Statement of General Policy No. 61-1, as amended, they are suspended because of their relationship to West Lake's increased rate. Under the circumstances, the suspension periods for Hamon and Standard Oil's rate filings may be shortened to terminate concurrently with the suspension period (January 1, 1965) of West Lake's resale rate in Docket No. RI65-29.

Mertzon proposes a periodic increased rate from 12.25 cents to 13.25 cents per Mcf for the sale of residue gas to Northern Natural Gas Pipeline Company from the Mertzon Plant, Irion County, Texas. Brooks Gas, who is an affiliate of Mertzon, proposes a similar rate increase for its sale of residue gas to Mertzon from the same plant. Mertzon and Brooks Gas' proposed increased rates exceed the 11.0 cents per Mcf area price level for increased rates in Texas Railroad District No. 7-C as set forth in the Commission's Statement of General Policy No. 61-1, as amended (18 CFR, ch. I, pt. 2, sec. 2.56).

[F.R. Doc. 64-12142; Filed, Dec. 1, 1964; 8:45 a.m.]

[Docket No. CP62-293]

## TRANSWESTERN PIPELINE CO.

### Notice of Application

NOVEMBER 24, 1964.

Take notice that on June 11, 1962, as supplemented on July 9, 1962, Transwestern Pipeline Company (Applicant), First City National Bank Building, Houston 2, Texas, filed in Docket No. CP62-293 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale of natural gas to Pioneer Natural Gas Company (Pioneer) and the construction and operation of minor pipeline facilities incident thereto, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant proposes sales to Pioneer pursuant to an agreement between the parties dated December 18, 1961, and proposes construction and operation of pipeline tap valves incident to the sales. The gas will be delivered to Pioneer at various points on Applicant's existing 24-inch Panhandle lateral in Carson, Potter, Randall, Deaf Smith, Gray, Castro and Palmer Counties, Texas, and will be resold by Pioneer through its gas distribution facilities along said Panhandle lateral to farm customers for domestic and irrigational purposes.

The estimated initial three year period of peak day and annual sales to Pioneer are stated to be:

| | First year | Second year | Third year |
|---|---|---|---|
| Peak day (Mcf) | 824 | 840 | 1,365 |
| Annual (Mcf) | 20,000 | 32,000 | 52,000 |

The cost of the proposed facilities will be defrayed initially by Applicant. However, pursuant to the terms of the service agreement, Pioneer will reimburse Applicant such costs.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that preliminary staff analysis has indicated that there are no problems which would warrant a recommendation that the Commission designate this application for formal hearing before an examiner and that, pursaunt to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing may be held without further notice before the Commission on this application provided no protest or petition to intervene is filed within the time required herein. Where a protest or petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before December 16, 1964.

GORDON M. GRANT,
*Acting Secretary.*

## JOCELYN-VARN OIL CO. ET AL.

### Order Providing for Hearings on and Suspension of Proposed Changes in Rates [1]

NOVEMBER 24, 1964.

The Respondents named herein have filed proposed increased rates and charges of currently effective rate schedules for sales of natural gas under Commission jurisdiction, as set forth in Appendix A below.

The proposed changed rates and charges may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

*The Commisison finds.* It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon hearings regarding the lawfulness of the proposed changes, and that the supplements herein be suspended and their use be deferred as ordered below.

*The Commission orders.*

(A) Under the Natural Gas Act, particularly sections 4 and 15, the regulations pertaining thereto (18 CFR Ch. I), and the Commission's rules of practice and procedure, public hearings shall be held concerning the lawfulness of the proposed changes.

(B) Pending hearings and decisions thereon, the rate supplements herein are suspended and their use deferred until date shown in the "Date Suspended Until" column, and thereafter until made effective as prescribed by the Natural Gas Act.

(C) Until otherwise ordered by the Commission, neither the suspended supplements, nor the rate schedules sought to be altered, shall be changed until disposition of these proceedings or expiration of the suspension period.

(D) Notices of intervention or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 and 1.37(f) on or before January 11, 1965.

By the Commission.

[SEAL] JOSEPH H. GUTRIDE,
*Secretary.*

[7] Initial rate.

All of the proposed increased rates and charges exceed the applicable area price levels for increased rates as set forth in the Commission's Statement of General Policy No. 61-1, as amended (18 CFR, ch. I, pt. 2, § 2.56).

[F.R. Doc. 64-12251; Filed, Dec. 1, 1964; 8:46 a.m.]

[Docket No. RI65-327]

## SUPERIOR OIL CO.

### Order Providing for Hearing on and Suspension of Proposed Change in Rate, and Allowing Rate Change To Become Effective Subject to Refund

NOVEMBER 24, 1964.

Respondent named herein has filed a proposed change in rate and charge of a currently effective rate schedule for the sale of natural gas under Commission jurisdiction, as set forth in Appendix A below.

The proposed changed rate and charge may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

*The Commission finds.* It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon a hearing regarding the lawfulness of the proposed change, and that the supplement herein be suspended and its use be deferred as ordered below.

*The Commission orders.*

(A) Under the Natural Gas Act, particularly sections 4 and 15, the regulations pertaining thereto (18 CFR ch. I), and the Commission's rules of practice and procedure, a public hearing shall be held concerning the lawfulness of the proposed change.

(B) Pending hearing and decision thereon, the rate supplement herein is suspended and its use deferred until date shown in the "Date Suspended Until" column, and thereafter until made effective as prescribed by the Natural Gas Act: *Provided, however,* That the supplement to the rate schedule filed by Respondent shall become effective subject to refund on the date and in the manner herein prescribed if within 20 days from the date of the issuance of this order Respondent shall execute and file under its above-designated docket number with the Secretary of the Commission its agreement and undertaking to comply with the refunding and reporting procedure required by the Natural Gas Act and § 154.102 of the regulations thereunder, accompanied by a certificate showing service of a copy thereof upon the purchaser under the rate schedule involved. Unless Respondent is advised to the contrary within 15 days after the filing of its agreement and undertaking, such agreement and undertaking shall be deemed to have been accepted.

(C) Until otherwise ordered by the Commission, neither the suspended supplement nor the rate schedule sought to be altered, shall be changed until disposition of this proceeding or expiration of the suspension period.

(D) Notices of intervention or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 and 1.37(f)) on or before January 11, 1965.

By the Commission.

[SEAL] JOSEPH H. GUTRIDE,
*Secretary.*

[1] Does not consolidate for hearing or dispose of the several matters herein.

APPENDIX A

| Docket No. | Respondent | Rate schedule No. | Supplement No. | Purchaser and producing area | Amount of annual increase (decrease) | Date filing tendered | Effective date unless suspended | Date suspended until— | Cents per Mcf: Rate in effect | Cents per Mcf: Proposed increased rate | Rate in effect subject to refund in docket Nos. |
|---|---|---|---|---|---|---|---|---|---|---|---|
| RI65-327... | The Superior Oil Co., Post Office Box 1521, Houston, Tex., 77001. | 105 | 1 | Cities Service Gas Co. (Northeast Waynoka Field, Woods County, Okla.). | $1,155 | 10-28-64 | [1] 1-1-65 | [2] 1-2-65 | [4][5] 13.0 | [3][4][5] 14.0 | |

[1] The stated effective date is the effective date requested by Respondent.
[2] The suspension period is limited to one day.
[3] Periodic rate increase.
[4] Pressure base is 14.65 p.s.i.a.
[5] Includes 0.75 cent per Mcf deduction by buyer for dehydration.
[6] Subject to downward B.t.u. adjustment.

The Superior Oil Co.'s (Superior) related contract was executed subsequent to September 28, 1960, the date of issuance of the Commission's Statement of General Policy No. 61-1, as amended, and the proposed rate is above the applicable area ceiling for increased rates but does not exceed the applicable ceiling price for initial rates in the area involved. We believe, in this situation, Superior's rate filing should be suspended for one day from January 1, 1965, the requested effective date.

[F.R. Doc. 64-12252; Filed, Dec. 1, 1964; 8:46 a.m.]

[Docket No. G-20213 [1]]

## AMERICAN PETROFINA COMPANY OF TEXAS ET AL.

### Order Making Successor Co-Respondent, Redesignating Proceeding and Requiring Filing of Undertaking To Assure Refund of Excess Charges

NOVEMBER 24, 1964.

On June 29, 1964, Logue and Patterson filed a motion to be made co-respondent in the proceeding in Docket No. G-20213. In support of its motion, Logue and Patterson state that it has acquired part of the assets, properties and rights covered by the American Petrofina Company of Texas FPC Gas Rate Schedule No. 6, to which the proceeding in Docket No. G-20213 relates.

By Commission letter dated July 24, 1964, Logue and Patterson was granted in Docket No. CI65-19 temporary authorization to continue part of the sales previously made under the American Petrofina Company of Texas FPC Gas Rate Schedule No. 6 and the rate schedule covering Logue and Patterson's sales was designated as Logue and Patterson, et al., FPC Gas Rate Schedule No. 11.

*The Commission finds.* It is necessary and proper in carrying out the provisions of the Natural Gas Act and the Regulations thereunder that Logue and Patterson and American Petrofina Company of Texas be joined as co-respondents in the proceeding in Docket No. G-20213, that such proceeding be redesignated accordingly, and that Logue and Patterson be required to file an appropriate agreement and undertaking in Docket No. G-20213.

*The Commission orders.*

(A) Logue and Patterson are hereby joined as co-respondents with American Petrofina Company of Texas in the proceeding in Docket No. G-20213 and such proceeding is redesignated as "American Petrofina Company of Texas and Logue and Patterson, et al."

(B) Within thirty days from the date of the issuance of this order, Logue and Patterson shall execute and file with the Secretary of the Commission an agreement and undertaking to assure refund of any excess charges which might be determined in Docket No. G-20213 to have accrued with respect to sales made from the properties covered by the Logue and Patterson, et al., FPC Gas Rate Schedule No. 11. American Petrofina shall remain responsible for any refunds that may be required in Docket No. G-20213 in connection with sales made under its Rate Schedule No. 6. Unless notified to the contrary by the Secretary within fifteen days from the date of filing such agreement and undertaking shall be deemed to be satisfactory and to have been accepted for filing.

(C) Logue and Patterson shall comply with the refunding and reporting procedure required by the Natural Gas Act and § 154.102 of the regulations thereunder. Upon acceptance of the agreement and undertaking required to be filed pursuant to paragraph (B) above, Logue and Patterson's agreement and undertaking shall remain in full force and effect until discharged by the Commission.

By the Commission.

[SEAL] JOSEPH H. GUTRIDE,
*Secretary.*

# NATIONAL LABOR RELATIONS BOARD

## DESCRIPTION OF ORGANIZATION [2]

### Public Information Places; Miscellaneous Amendments

Pursuant to the provisions of section 3(a)(1) of the Administrative Procedure Act, 5 U.S.C. 1001, the National Labor Relations Board hereby separately states and concurrently publishes in the notices section of the FEDERAL REGISTER, the fol-

[1] If a corporation.

[2] This amends Description of Organization which appeared at 13 F.R. 3090, with amendments appearing at 13 F.R. 6266, 15 F.R. 973, 16 F.R. 1969, 19 F.R. 1259, 21 F.R. 9914, 22 F.R. 6881, 7216, 24 F.R. 7560, 25 F.R. 2559, 3534, 10520, 26 F.R. 2632, and 29 F.R. 7899 (Sec. 6, 49 Stat. 452, as amended; 29 U.S.C. 156).

lowing amendments to its description of organization in the field in respect to the places at which the public may secure information or make submittals or requests.

The Board has established a Subregional Office at Peoria, Illinois, designated as Subregion 38, effective December 9, 1964. The Peoria subregion will have jurisdiction over cases in the following counties in the State of Illinois, which have been removed from the jurisdiction of Region 13, Chicago, Illinois: Boone, Bureau, Carroll, Cass, Champaign, De Kalb, De Witt, Douglas, Ford, Fulton, Grundy, Hancock, Henderson, Henry, Iroquois, Jo Daviess, Kankakee, Kendall, Knox, La Salle, Lee, Livingston, Logan, Macon, Marshall, Mason, McDonough, McHenry, McLean, Menard, Mercer, Morgan, Moultrie, Ogle, Peoria, Piatt, Putnam, Rock Island, Sangamon, Schuyler, Stark, Stephenson, Tazewell, Vermilion, Warren, Whiteside, Winnebago, and Woodford. The Peoria subregion will also have jurisdiction over cases in the following counties in the State of Iowa, which have been removed from the jurisdiction of Region 18, Minneapolis, Minnesota: Clinton, Des Moines, Dubuque, Jackson, Lee, Louisa, Muscatine, and Scott.

Also effective December 9, 1964, Region 25, Indianapolis, Indiana, will have jurisdiction over cases in the following counties in the State of Indiana, which have been removed from the jurisdiction of Region 13, Chicago, Illinois: Allen, De Kalb, Elkhart, Fulton, Jasper, Kosciusko, Lagrange, La Porte, Marshall, Newton, Noble, Porter, Pulaski, Starke, Steuben, Saint Joseph, and Whitley.

The addresses of Regional and Subregional Offices appearing at 25 F.R. 2559 are amended by adding thereto the following words: "Subregion 38, Citizen's Building, Fourth Floor, 225 Main Street, Peoria, Illinois."

Dated, Washington, D.C., November 25, 1964.

By direction of the Board.

OGDEN W. FIELDS,
*Executive Secretary.*

# SECURITIES AND EXCHANGE COMMISSION

[File No. 54-236]

## AMERICAN ELECTRIC POWER CO., INC.

### Notice of Filing of Plan for Elimination of Common Stock Scrip

NOVEMBER 23, 1964.

Notice is hereby given that American Electric Power Company, Inc. ("American"), 2 Broadway, New York 8, N.Y., a registered holding company, has filed a plan, and amendments thereto, pursuant to section 11(e) of the Public Utility Holding Company Act of 1935 ("Act"), providing for the elimination of American's outstanding common stock scrip. All interested persons are referred to said plan, on file at the office of the Commission, for a statement of the transactions proposed therein which are summarized below.

During the years 1914–1934, American (then American Gas and Electric Company) issued, in connection with the payment of stock dividends, four different kinds of common stock scrip entitling the holders to fractional shares of American's common stock. After giving effect to several splits of American's common stock (the most recent of which was authorized by the Commission on August 31, 1962 (Holding Company Act Release No. 14692)) the scrip still outstanding at September 30, 1964 entitled the 1,076 registered holders thereof to an aggregate of approximately 1,590 full shares of American's common stock. American states that such 1,590 full shares are held by Morgan Guaranty Trust Company of New York, as Scrip Agent and Depository, for issuance upon surrender of scrip; that such shares do not have voting power and are not entitled to dividends; and that the outstanding scrip represents an inequity in voting power and an unnecessary complexity in the capital structure of American which the proposed plan is designed to eliminate.

The plan provides the following:

(1) A letter would be sent to all registered scrip holders under which each would be offered the number of full shares represented by the scrip surrendered plus cash for any fractional interest or, alternatively, cash for both full shares and fractional interests. In either case, the amount of cash would be computed on the basis of the closing market price on the New York Stock Exchange of the underlying stock on the date such scrip is surrendered.

(2) A "redemption date" would be fixed which would be some time after twelve months from the date of the letter referred to in (1) above. After the redemption date, (a) all full shares of American common stock remaining unclaimed by scrip holders will be canceled and restored to the status of authorized but unissued shares, and (b) an amount of cash equal to the closing price on the New York Stock Exchange of the underlying shares on the redemption date will be placed in a segregated account. For a period of five years thereafter holders of scrip will be entitled only to receive their aliquot portion of such cash upon surrender of their scrip. At the expiration of such five-year period, all rights of the holders of scrip will terminate and the remaining cash, if any, will revert to American.

The plan makes provision for interim notices to be given during such five-year period by American to holders of unsurrendered scrip advising them of their rights under the plan; and further provides that the carrying out of the plan be subject to its approval and enforcement by a court of competent jurisdiction as fair and equitable and as appropriate to effectuate the provisions of section 11 of the Act.

It is stated that American's expenses in connection with the plan are estimated not to exceed $1,000 and that no commission, other than this Commission, has jurisdiction over the transactions proposed by the plan.

The Commission being required by the provisions of section 11(e) of the Act before approving any plan thereunder to find, after notice and opportunity for hearing, that the plan, as amended or as further amended, is necessary to effectuate the provisions of section 11(b) of the Act and is fair and equitable to the persons affected thereby; and it appearing appropriate to the Commission that such notice be given to afford all interested persons an opportunity to be heard with respect thereto:

Notice is therefore given that any interested person may, not later than December 30, 1964, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised in the proceeding which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C., 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon American at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed contemporaneously with the request. At any time after said date, the Commission may approve the plan, as amended or as it may be further amended, or may take such other action with respect to the proceeding as it may deem appropriate.

*It is ordered*, That, at least 15 days prior to December 30, 1964, American give notice of the transactions proposed in the plan to all registered holders of its common stock scrip at their last known addresses by mailing a copy of this notice to each such holder; and that, upon request therefor, the company shall promptly furnish a copy of the plan to any such holder of scrip.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

[File No. 70-4241]

## COLUMBIA GAS SYSTEM, INC., ET AL.

### Notice of Proposed Open Account Advances to Subsidiary Companies in Connection with Intrasystem Prepayment of Installment Notes and Proposed Intrasystem Issuance and Acquisition of Installment Notes

NOVEMBER 25, 1964.

In the matter of the Columbia Gas System, Inc., 120 East 41st Street, New York, New York, 10017, United Fuel Gas Company, Atlantic Seaboard Corporation, Columbia Gas of Kentucky, Inc., Virginia Gas Distribution Corporation, Kentucky Gas Transmission Corporation, The Ohio Fuel Gas Company, Columbia Gas of Ohio, Inc., The Ohio Valley Gas Company, The Manufacturers Light and Heat Company, Cumberland and Allegheny Gas Company, Home Gas Company, Columbia Gas of New York, Inc., Columbia Gas of Pennsylvania, Inc., Columbia Gas of Maryland, Inc., Columbia Gulf Transmission Company; File No. 70-4241.

Notice is hereby given that The Columbia Gas System, Inc. ("Columbia"), a registered holding company, and its wholly-owned subsidiary companies listed above have filed a joint application-declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6(a), 6(b), 9, 10, and 12(b) of the Act and Rule 45 promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the joint application-declaration, on file at the office of the Commission, for a statement of the transactions therein proposed which are summarized below.

During the winter heating season, certain of Columbia's operating subsidiary companies, particularly the distribution companies, generate substantial cash in excess of current requirements. Formerly, such excess funds were generally invested by these operating subsidiaries in United States Government Treasury Bills until such time as the cash was required for construction and other corporate purposes. Since the transmission subsidiaries generate smaller amounts of excess cash during such months than the distribution subsidiaries and their construction expenditures are generally larger, Columbia had been advancing such subsidiaries funds under Commission authorization while other subsidiaries had cash considerably in excess of current requirements. For the past two years, however, the Commission has authorized open account advances by Columbia to subsidiary companies and certain related transactions which are designed to alleviate this situation. The present filing requests authorization to continue these transactions during the calendar year 1965, as follows:

It is proposed that the subsidiary companies listed below will, in accordance with the exemptive provisions of Rule 42(b)(2) under the Act, prepay with excess cash, from time to time prior to the end of 1965, a portion of their outstanding installment promissory notes held by Columbia. The notes prepaid will not exceed the following amounts, which represent the maximum excess funds that such companies are expected to accumulate at any one time during the year 1965:

| | |
|---|---|
| Columbia Gas of Pennsylvania, Inc. | $11,000,000 |
| The Manufacturers Light and Heat Co. | 16,000,000 |
| Columbia Gas of New York, Inc. | 2,500,000 |
| Columbia Gas of Maryland, Inc. | 1,200,000 |
| Cumberland and Allegheny Gas Co. | 2,000,000 |
| Home Gas Co. | 1,500,000 |
| Atlantic Seaboard Corp. | 5,000,000 |
| Columbia Gas of Kentucky, Inc. | 6,000,000 |
| United Fuel Gas Co. | 60,000,000 |
| Virginia Gas Distribution Corp. | 3,000,000 |
| The Ohio Fuel Gas Co. | 25,000,000 |
| Columbia Gas of Ohio, Inc. | 30,000,000 |
| The Ohio Valley Gas Co. | 3,000,000 |
| Columbia Gulf Transmission Corp. | 10,000,000 |
| Kentucky Gas Transmission Corp. | 3,000,000 |
| Total | 179,200,000 |

The notes prepaid by the iindvidual companies will be those bearing the highest interest rate or rates outstanding at the time of each prepayment. As any of such companies require funds for construction and other corporate purposes after prepayment, it is proposed that advances be made to them on open account by Columbia, provided that at no time will the amount of such advances to any subsidiary exceed the amount of notes theretofore prepaid by it, less any current maturities applicable to such notes which would have matured subsequent to the date of prepayment.

Open account loans to any subsidiary will bear interest at the same rate or rates as borne by the equivalent principal amounts of notes previously prepaid by it during 1965, but in reverse order to that of the prepayments, i.e., working up from the lowest rate payable on the notes previously prepaid to the highest rate. The proposed advances on open account to individual subsidiaries will be increased or decreased from time to time in accordance with variations in the cash flow of the individual subsidiaries. At such time as the advances to any subsidiary equal the aggregate amount of the notes prepaid by it or, in any event, not later than December 31, 1965, such prepaid notes will be reissued to and acquired by Columbia in repayment of the outstanding open account loans.

No financing of any operating subsidiary which may be presently or subsequently authorized by the Commission in connection with the construction or gas storage programs of any such subsidiary will be consummated until such time as advances have been made equal to the amount of notes prepaid. Any subsidiary not requiring financing during 1965 and which has borrowed on open account from Columbia an amount smaller than the amount of notes theretofore prepaid by it, will, on December 31, 1965, reissue its notes to Columbia in an amount sufficient to discharge its open account indebtedness, and the balance of its prepaid notes will be considered to have been permanently prepaid. Such permanent prepayment would be applied against notes bearing the highest interest rates and would be consummated only with respect to notes bearing interest at a rate equal to or in excess of the rate applicable to notes being acquired by Columbia from subsidiary companies as at December 31, 1965. In the event that a permanent prepayment by any subsidiary would be indicated with respect to notes bearing an interest rate less than said rate at December 31, 1965, such notes will be reissued by the subsidiary at or before the end of 1965, in order to preserve the lower interest rate of the notes scheduled for permanent prepayment.

It is stated that the proposed transactions are designed to utilize effectively aggregate system funds and to achieve the following: (1) Prepayment of inventory loans with commercial banks at an earlier date, (2) deferment of outside financing until aggregate system funds approach a minimum balance, and (3) facilitation of the internal financing of emergency requirements. In addition, operating subsidiaries having excess funds will be able, through the prepayment of installment promissory notes, to decrease their own net corporate interest expense during the period such funds are not required.

The joint application-declaration states that expenses to be incurred by Columbia and its subsidiaries in connection with the proposed transactions are estimated at $100 and $600, respectively, and that $550 of these aggregate expenses are for services, at cost, to be provided by Columbia Gas System Service Corporation.

It is further stated that the State commissions in West Virginia, Kentucky, Virginia, and New York have jurisdiction over various aspects of the proposed transactions; that the requisite orders have been obtained from the Public Service Commission of New York; that appropriate application will be filed with the other State commissions; and that copies of the applications to and the subsequent orders of said State commissions will be filed by amendment to the joint application-declaration.

Notice is further given that any interested person may, not later than December 29, 1964, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the filing which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C., 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicants-declarants at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed contemporaneously with the request. At any time after said date, the joint application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate.

For the Commission (pursuant to delegated authority).

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

[File No. 70-4242]

## PENNSYLVANIA ELECTRIC CO.

### Notice of Proposed Acquisition of Utility Assets

NOVEMBER 25, 1964.

Notice is hereby given that Pennsylvania Electric Company ("Penelec"),

1001 Broad Street, Johnstown, Pennsylvania, an electric utility subsidiary company of General Public Utilities Corporation, a registered holding company, has filed an application with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 9(a) and 10 of the Act as applicable to the proposed transaction. All interested persons are referred to the application, on file at the office of the Commission, for a statement of the transaction therein proposed which is summarized below.

Penelec proposes to acquire from the City of Erie, Pennsylvania ("Erie"), for an aggregate cash purchase price of $1,030,000, a system of underground conduits owned by Erie and known as its "High Tension Conduit System." These facilities are presently rented by Penelec and are used in connection with its underground electric distribution facilities in Erie. Penelec's proposal to purchase the conduit system, which was the only proposal submitted, has been accepted by the City Council of Erie. The company does not know the cost to Erie of the conduit system nor the city's accrued depreciation with respect thereto.

The application states that Erie has indicated that Penelec's rent would be increased substantially if Erie retains ownership of the facilities; that the maintenance of the system has not met Penelec's needs; that the problem would increase with the passage of time; and that duplication of the existing conduit system or resort to overhead distribution facilities in areas where the existing conduit system can be used would not be in the public interest.

The filing states that a copy of the agreement relating to the proposed acquisition has been filed with the Pennsylvania Public Utility Commission in accordance with the State Public Utility Law; that said State commission is not expressly required to authorize the acquisition or approve the agreement; and that no other State commission has jurisdiction over the proposed transaction. It is further stated that if this Commission approves the acquisition by Penelec and the proposed accounting therefor, no other Federal commission will have jurisdiction by reason of section 318 of the Federal Power Act. The fees and expenses to be incurred in connection with the proposed transaction are estimated at $8,000, including legal fees of $7,000.

Notice is further given that any interested person may, not later than December 18, 1964, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C., 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed contemporaneously with the request. At any time after said date, the application, as filed or as it may be amended, may be granted as provided in Rule 23 of the general rules and regulations promulgated under the Act or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate.

For the Commission (pursuant to delegated authority).

[SEAL] ORVAL L. DUBOIS, *Secretary.*

# SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Area 494]

## CALIFORNIA

### Declaration of Disaster Area

Whereas, it has been reported that during the month of November 1964, because of the effects of certain disasters, damage resulted to residences and business property located in a portion of Verdugo Mountain area of the Cities of Burbank and Glendale in the State of California;

Whereas, the Small Business Administration has investigated and has received other reports of investigations of conditions in the area affected;

Whereas, after reading and evaluating reports of such conditions, I find that the conditions in such area constitute a catastrophe within the purview of the Small Business Act, as amended.

Now, therefore, as Executive Administrator of the Small Business Administration, I hereby determine that:

1. Applications for disaster loans under the provisions of section 7(b)(1) of the Small Business Act, as amended, may be received and considered by the Office below indicated from persons or firms whose property, situated in the aforesaid Cities and areas adjacent thereto, suffered damage or destruction resulting from floods and accompanying conditions occurring on or about November 9, 1964.

Office: Small Business Administration Regional Office, 312 West 5th Street, Los Angeles, Calif.

2. Applications for disaster loans under the authority of this Declaration will not be accepted subsequent to May 31, 1965.

Dated: November 19, 1964.

ROSS D. DAVIS, *Executive Administrator.*

# INTERSTATE COMMERCE COMMISSION

[Ex Parte MC-65 (Sub-No. 3)]

## PETITION SEEKING INSTITUTION OF RULEMAKING PROCEEDING

NOVEMBER 27, 1964.

Petitioner: INTERSTATE INVESTORS, INC., a Delaware corporation; William R. Burt, president, 733 Third Avenue, New York 17, N.Y. By petition filed November 6, 1964, petitioner requests that the Commission "establish guide lines, through appropriate promulgation of a policy statement or ruling and/or otherwise provide economic and/or policy guidance to its Examiners in arriving at decisions and/or recommendations in hearing such as those * * * involving expansion of control by or merger into the larger units * * *." Any interested person wishing to make representations in favor of or against this petition may do so by the submission of written data, views, or arguments. An original and 20 copies of such data, views, or arguments shall be filed with the Commission no later than 30 days from date of publication in the FEDERAL REGISTER.

By the Commission.

[SEAL] HAROLD D. MCCOY, *Secretary.*

[F.R. Doc. 64-12279; Filed, Dec. 1, 1964; 8:47 a.m.]

[Notice 706]

## MOTOR CARRIER APPLICATIONS AND CERTAIN OTHER PROCEEDINGS

NOVEMBER 27, 1964.

The following publications are governed by the new Special Rule 1.247 of the Commission's rules of practice, published in the FEDERAL REGISTER, issue of December 3, 1963, which became effective January 1, 1964.

No. MC 110698 (Sub-No. 288) (REPUBLICATION), filed November 4, 1964, published in FEDERAL REGISTER issue of November 25, 1964, and republished this issue.

Applicant: RYDER TANK LINE, INC., Post Office Box 8418, Winston-Salem Road, Greensboro, N.C. Applicant's attorney: Francis W. McInerny, 1000 16th Street, NW., Washington, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals*, in bulk, in tank vehicles, from Cedartown, Ga., to points in Illinois, Indiana, Iowa, Michigan, Minnesota, and Wisconsin, and *empty containers or other such incidental facilities* (not specified), used in transporting the commodities specified on return.

NOTE: Common control may be involved. The purpose of this republication is to indicate hearing information shown below.

*HEARING:* December 10, 1964, at the Offices of the Interstate Commerce Commission, Washington, D.C., before Examiner Warren C. White.

No. MC 125869, filed November 29, 1963. Applicant: VERNIE N. ROLLO, SR., 4801 Greenwood Road, Shreveport, La. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wrecked and disabled motor vehicles, used tractors and trailers, abandoned, surrendered or repossessed, by the tow-away method*, between points in Louisiana, Texas, Oklahoma, Arkansas, and Mississippi.

*HEARING:* February 2, 1965, at the Washington-Youree Hotel, Shreveport, La., before Examiner David Waters.

No. MC 126400 (REPUBLICATION), filed July 6, 1964, published FEDERAL REGISTER, issue of August 12, 1964, and republished this issue. Applicant: LEO H. SEARLES, doing business as L. H. SEARLES, South Worcester, N.Y. Applicant's attorney: Elias H. Jacobs, 11 Railroad Avenue, Stamford, N.Y. By application filed July 6, 1964, applicant seeks a permit authorizing operations in interstate or foreign commerce, as a contract carrier by motor vehicle, over specified regular routes, transporting: *Ice cream, ice cream products, ice confections and ice mix confections*, between Suffield, Conn., and Oneonta, N.Y. The Order of Operating Rights Board No. 1, dated October 28, 1964, and served November 9, 1964, finds operation by applicant, in interstate or foreign commerce, as a contract carrier by motor vehicle over irregular routes transporting ice cream, ice cream products, ice confections, and ice mix confections from Suffield, Conn., to Oneonta, Syracuse, Plattsburgh, and Binghamton, N.Y., and refused or rejected shipments of the same commodities from Syracuse, Plattsburgh, and Binghamton, N.Y., to Oneonta, N.Y., under a continuing contract with Simonson Brothers, Inc., at Oneonta, N.Y., will be consistent with the public interest and the national transportation policy; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder; and that an appropriate permit should be issued and that issuance of the permit be withheld until the lapse of 30 days from date of republication in the FEDERAL REGISTER, during which period any proper party in interest may file a protest to the authority for which we have found a need to exist.

NOTICE OF FILING OF PETITIONS

No. MC 124242 (PETITION FOR MODIFICATION OF PERMIT), filed November 18, 1964. Petitioner: TWIN CITIES NEWSPAPER SERVICE, INC., 1161 Shelby Avenue, St. Paul, Minn. Petitioner holds a permit in MC 124242 to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: Exposed and processed film, microfilm and prints, complimentary replacement film, and incidental dealer handling supplies and advertising material moving therewith, except motion picture film used primarily for commercial theater and television exhibition, between St. Paul, Minn., on the one hand, and, on the other, points in that part of Wisconsin on and west of U.S. Highway 53, limited to a transportation service to be performed under a continuing contract, or contracts, with Mando Photo Company, of St. Paul, Minn. By the instant petition, petitioner requests that its Permit in No. MC 124242 be modified so as to authorize service within the scope thereof for Eastman Kodak Company in addition to service for Mando Photo Company. Any person or persons desiring to participate in this proceeding may file representations, consisting of an original and six copies each, within 30 days from the date of this publication in the FEDERAL REGISTER.

APPLICATIONS FOR CERTIFICATES OR PERMITS WHICH ARE TO BE PROCESSED CONCURRENTLY WITH APPLICATIONS UNDER SECTION 5 GOVERNED BY SPECIAL RULE 1.240 TO THE EXTENT APPLICABLE

No. MC 10872 (Sub-No. 41), filed November 18, 1964. Applicant: BE-MAC TRANSPORT COMPANY, INC., 7400 North Broadway, St. Louis, Mo. Applicant's attorney: R. Garrett Phillips, Post Office Box 1402, Springfield, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, between all points in Illinois.

NOTE: This is a matter directly related to MC-F 8942, published in the FEDERAL REGISTER issue of November 25, 1964.

No. MC 93682 (Sub-No. 11), filed November 23, 1964. Applicant: COLE'S EXPRESS, a corporation, 76 Dutton Street, Bangor, Maine. Applicant's attorney: Frederick T. McGonagle, 85 Exchange Street, Portland, Maine. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), between Bangor-Brewer, Maine, and Woodland, Maine; from Bangor-Brewer, Maine, over U.S. Highway 2 to Lincoln, Maine, thence over Maine Highway 6 to junction U.S. Highway 1, at Topsfield, Maine, thence over U.S. Highway 1 to Woodland (Baileyville), Maine, and return over the same route serving the intermediate points of Lee, Springfield, Carroll, Topsfield, Waite, and Princeton, Maine, and the off-route points of East Winn, and Grand Lake Stream, Maine.

NOTE: This is a matter directly related to MC-F 8946.

No. MC 109672 (Sub-No. 9), filed November 9, 1964. Applicant: BOYCE MOTOR LINES, INC., Lake Shore Drive, Canandaigua, N.Y. Applicant's attorney: Herbert M. Canter, Mezzanine, Warren Parking Center, 345 South Warren Street, Syracuse, N.Y., 13202. Authority sought to operate as a *common carrier*, by motor vehicle, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodies requiring special equipment, and those injurious or contaminating to other lading), (A) Regular routes: (1) *between* Buffalo and Youngstown, N.Y., over New York Highways 18 and 18-F, and return over the same route, serving all intermediate points and the off-route points of Barre Center, Fort Niagara, Lyndonville, Oakfield, and Wilson, N.Y., (2) *between* Buffalo and Youngstown, N.Y., from Buffalo over New York Highway 5 to junction New York Highway 93 and thence over New York Highway 93 to Youngstown, and return over the same route, serving all intermediate points and the off-route points of Barre Center, Fort Niagara, Lyndonville, Oakfield, and Wilson, N.Y., (3) *between* Buffalo and Niagara Falls, N.Y., over New York Highway 384, and return over the same route, serving all intermediate points and the off-route points of Barre Center, Fort Niagara, Lyndonville, Oakfield, and Wilson, N.Y., (4) *between* Buffalo and Brockport, N.Y., from Buffalo over New York Highway 33 to junction New York Highway 78, thence over New York Highway 78 to Lockport, and thence over New York Highway 31 to Brockport, and return over the same route, serving all intermediate points and the off-route points of Barre Center, Fort Niagara, Lyndonville, Oakfield, and Wilson, N.Y., (5) *from* Buffalo over New York Highway 16 to Olean, thence over New York Highway 17 to junction New York Highway 36, thence over New York Highway 36 to Hornell, serving the intermediate points of Bolivar, East Aurora, Franklinville, Olean, and Wellsville, N.Y., and the termini of Hornell, N.Y., for delivery only.

(6) *From* Buffalo over New York Highway 18, to Salamanca, N.Y., serving the intermediate points of Cattaraugus, Gowanda, and Hamburg, N.Y., and the off-route point of Perrysburg, N.Y., and the termini of Salamanca, N.Y., for delivery only; (7) (a) *from* Buffalo over New York Highway 5 to Silver Creek, thence over U.S. Highway 20 to Fredonia, thence over New York Highway 60 to Jamestown, serving the intermediate points of Cassadaga, Evans Center, Farnham, Fredonia, Gerry, Irving, Laona, Sheridan, Silver Creek, Wanakah, and Woodlawn Beach, N.Y., and the off-route point of Sinclairville, N.Y., and the termini of Jamestown, N.Y., for delivery only; (b) *from* Buffalo over New York Highway 5 to Dunkirk, thence over New York Highway 60 to Fredonia, thence over U.S. Highway 20 to Westfield, thence over New York Highways 17 and 17-J to Jamestown, serving the intermediate points of Brocton, Chautauqua, Dunkirk, Lakewood, Lamberton, Mayville, Portland, Westfield, Celoron, and Stow, N.Y. (B) Irregular routes: (1) *between* Avon, Batavia, Buffalo, East Rochester, Geneseo, Mount Morris, Perry, Rochester, and Wayland, N.Y.; (2) *between* Alton, Buffalo, Canandaigua, Fulton, Geneva, Holcomb, Honeoye Falls, LeRoy, Mumford, Ontario Center, Shortsville, and Webster, N.Y., and (3) *from* Jamestown, N.Y., to Buffalo, N.Y.

NOTE. Applicant states all of the aforesaid authorities are to be expressly authorized and permitted to be "tacked", each to the other, at common authorized service points by virtue of the fact that the authorities sought herein represent a "conversion" of a "Certificate of Registration" based upon a Certificate of Public Convenience and Neces-

ality issued by the Public Service Commission of the State of New York, which said State Commission authorizes "tacking" within a single Certificate pursuant to 16 N.Y.C.R.R. 531.1 (formerly N.Y.P.S.C. Case 11024)." This is a matter directly related to MC–F–8935 published November 18, 1964.

APPLICATIONS UNDER SECTIONS 5 AND 210a(b)

The following applications are governed by the Interstate Commerce Commission's Special Rules governing notice of filing of applications by motor carriers of property or passengers under sections 5(a) and 210a(b) of the Interstate Commerce Act and certain other proceedings with respect thereto (49 CFR 1.240).

MOTOR CARRIERS OF PROPERTY

No. MC–F–8944. Authority sought for control and merger by McCRACKEN VAN & STORAGE CO. (to be renamed McCRACKEN BROS. MOTOR FREIGHT, INC.), 2200 West Seventh Place, Eugene, Oreg., of the operating rights and property of J. W. McCRACKEN AND E. E. McCRACKEN, a partnership, doing business as McCRACKEN BROTHERS MOTOR FREIGHT, 2200 West Seventh Place, Eugene, Oreg., and for acquisition by J. W. McCRACKEN, also of Eugene, Oreg., and E. E. McCRACKEN, 7326 Southwest Brier Place, Portland, Oreg., of control of such rights and property through the transaction. Applicants' attorney: William P. Ellis, 1121 Equitable Building, Portland, Oreg., 97204. Operating rights sought to be controlled and merged: *General commodities*, excepting, among others, household goods, but not excepting commodities in bulk, as a *common carrier*, over regular routes, between Eugene, Oreg., and Salem, Oreg., between Eugene, Oreg., and Curvallis, Oreg., serving all intermediate points; and *general commodities*, except those of unusual value, high explosives (other than blasting caps in quantities of more than 1,000), household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, between Portland, Oreg., and Springfield, Oreg., serving the intermediate and off-route points of Junction City and Eugene, Oreg., and those in Lane County, Oreg. McCRACKEN VAN & STORAGE CO., is authorized to operate as a *common carrier* in Oregon and Washington. Application has not been filed for temporary authority under section 210a(b).

No. MC–F–8945. Authority sought for purchase by JOSE HODGES TRANSPORTATION CORPORATION, Post Office Box 2397, Oklahoma City 8, Okla., of a portion of the operating rights of ILLINOIS-CALIFORNIA EXPRESS, INC., Post Office Box 9050, Amarillo, Tex., and for acquisition by GEORGE T. PEW, 231 Chaswold Hill Road, Haverford, Pa., of control of such rights through the purchase. Applicants' attorney: Leroy Hallman, 617 First National Bank Building, Dallas, Tex. Operating rights sought to be transferred: *Class A and B explosives*, and *general commodities*, excepting, among others, household goods and commodities in bulk, as a *common carrier*, over regular routes, between Vernon, Tex., and Lone Wolf, Okla., serving all intermediate points, with service at Vernon restricted against transportation of traffic originating at or destined to Quanah, Tex., between Eldorado, Okla., and Gould, Okla., serving all intermediate points, and the off-route point of Louis, Okla., between Altus, Okla., and Quanah, Tex., between Altus, Okla., and Hollis, Okla., serving all intermediate points; *Class A and B explosives*, and *general commodities*, excepting, among others, household goods and liquids in bulk, between Memphis, Tex., and Hollis, Okla., serving no intermediate points, between Childress, Tex., and junction U.S. Highways 62 and 83 (east of Memphis, Tex.), serving no points except as otherwise authorized; *general commodities*, excepting, among others, household goods and commodities in bulk, serving United States missile launching sites located in Kiowa, Comanche, Tillman, Jackson, Harmon, and Greer Counties, Okla., and Wilbarger County, Tex., as off-route points in connection with carrier's regular route operations, to, from, or through Altus, Okla. RESTRICTION: The authority granted herein to the extent that it authorizes the transportation of Classes A and B explosives, shall be limited, in point of time, to a period expiring five years after August 28, 1961. Vendee is authorized to operate as a *common carrier*, under a certificate of registration, in the state of Oklahoma. Application has not been filed for temporary authority under section 210a(b).

NOTE: Docket No. MC–120634 Sub-6 is a matter directly related.

No. MC–F–8946. Authority sought for purchase by COLE'S EXPRESS, 76 Dutton Street, Bangor, Maine, of the operating rights and property of HERBERT W. GRAHAM, doing business as GRAHAM'S EXPRESS, 25 Lee Street, Lincoln, Maine, and for acquisition by GALEN L. COLE, CHESLEY R. COLE, both of 76 Dutton Street, Bangor, Maine, GERALD A. COLE, 36 Plum Street, Portland, Maine, VAUGHN L. COLE, Winter Street, Presque Isle, Maine, and ESTATE OF A. J. COLE (MERRILL TRUST BANK, TRUSTEE), 2 State Street, Bangor, Maine, of control of such rights and property through the purchase. Applicants' attorney: Frederick T. McGonagle, 85 Exchange Street, Portland, Maine. Operating rights sought to be transferred: Under a certificate of registration, in Docket No. MC–99308 Sub-2, covering the transportation of freight or merchandise, as a common carrier, in intrastate commerce, within the State of Maine. Vendee is authorized to operate as a *common carrier* in Maine. Application has not been filed for temporary authority under section 210a(b).

NOTE: No. MC–93682 Sub-11 is a matter directly related.

No. MC–F–8947. Authority sought for purchase by GREAT WESTERN MOTOR LINES, INC., Post Office Box 607, 111 U.S. Highway 59 East, Richmond, Tex., of a portion of the operating rights of SECURITY TRUCKING COMPANY, 1211 North Peoria (Post Office Box 2497), Tulsa, Okla., and for acquisition by O. C. WOFFORD, also of Richmond, Tex., of control of such rights through the purchase. Applicants' attorney: Rufus H. Lawson, 106 Bixler Building, 2400 Northwest 23d Street, Oklahoma City, Okla. Operating rights sought to be transferred: *Machinery, equipment, materials, and supplies*, used in, or in connection with, the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum, and their products and by-products; and *machinery, materials, equipment, and supplies*, used in, or in connection with, the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, including the stringing and picking up thereof, as a *common carrier*, over irregular routes, between points in Oklahoma, Kansas, Arkansas, and Texas, and points in Lea and Eddy Counties, N. Mex., on the one hand, and, on the other, points in Illinois, and Missouri; *machinery, equipment, materials, and supplies*, used in, or in connection with, the drilling of water wells, between points in Oklahoma, Kansas, Arkansas, and Texas, and points in Lea and Eddy Counties, N. Mex., on the one hand, and, on the other, points in Illinois and Missouri; and *machinery, equipment, materials, and supplies*, used in, or in connection with, the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and byproducts, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights of way, between points in Oklahoma, Kansas, Arkansas, and Texas, and points in Lea and Eddy Counties, N. Mex., on the one hand, and, on the other, points in Illinois and Missouri. Vendee is authorized to operate as a *common carrier* in Missouri, Kansas, Oklahoma, Illinois, Louisiana, Texas, New Mexico, Colorado, Montana, Utah, Wyoming, Nebraska, North Dakota, South Dakota, Indiana, and Kentucky. Application has been filed for temporary authority under section 210a(b).

No. MC–F–8948. Authority sought for purchase by ZERO REFRIGERATED LINES, Box 7249, Station "A", San Antonio, Tex., of the interstate operations conducted by FRIGID FOOD EXPRESS, INC., 2828 South Laredo, San Antonio, Tex., as lessee of Texas intrastate rights held by BEXAR CORPORATION, Three-A Life Building, San Antonio, Tex., and for acquisition by C. K. McCLELLAND, and JOSEPHINE WEST McCLELLAND, both of 815 Merida, San Antonio, Tex., of control of such rights through the purchase. Applicants' attorney: Lester M. Bridgeman, 1027 Woodward Building, Washington, D.C. Operating rights sought to be transferred: In pending Docket No. MC–121441 Sub-1, FRIGID FOOD EXPRESS, INC., and BEXAR CORPORATION, joint applicants, seek a certificate of registration, covering the transportation of property, as a common carrier, in intrastate commerce, within the State of Texas. Vendee is authorized to operate as a *common carrier* in California, Oregon, Washington, Louisiana, Texas, Iowa, Wisconsin, Minnesota, Arizona, New Mexico, Nebraska, Oklahoma, Arkansas, Idaho, Utah, Colorado, South Dakota, Illinois, Michigan, Ohio, Missouri, Indiana, Kansas, Mississippi, New York, Pennsylvania, Tennessee, Virginia, Montana, Nevada, North Dakota, and Wyoming. Application has been filed for temporary authority under section 210a(b).

NOTE: Docket No. MC–110098 Sub-48 is a matter directly related.

No. MC–F–8949. Authority sought for purchase by STRICKLAND TRANSPORTATION CO., INC., Post Office Box 5689, 2917 Gulden Lane, Dallas, Tex., of the operating rights of TRACY TRUCKING CO., 347 West Thornton Street, Akron, Ohio, and for acquisition by L. R. STRICKLAND, Post Office Box 5689, Dallas, Tex., of control of such rights through the purchase. Applicants' attorney: W. T. Brunson, 419 Northwest Sixth Street, Oklahoma City, Okla., 73102. Operating rights sought to be transferred: *General commodities*, excepting, among others, household goods and commodities in bulk, as a *common carrier*, over irregular routes, between points within two miles of Akron, Ohio, including Akron; *general commodities*, except those of unusual value, perishables, livestock, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, between Akron, Ohio, on the one hand, and, on the other, points in Summit County, Ohio. Vendee is authorized to operate as a *common carrier* in Texas, Arkansas, Tennessee, Louisiana, Mississippi, Missouri, Illinois, Oklahoma, Indiana, Michigan, Wisconsin, and Ohio. Application has not been filed for temporary authority under section 210a(b).

NOTE: No. MC–59680 Sub-141 was filed concurrently.

No. MC–F–8950. Authority sought for purchase by QUINN FREIGHT LINES, INC., 1093 North Montello Street, Brockton, Mass., of the operating rights and property of GAY BROS. TRUCKING COMPANY, INC., 25 Esten Avenue, Pawtucket, R.I., and for acquisition by THOMAS J. LYONS, also of Brockton, Mass., of control of such rights and property through the purchase. Applicants' attorney: Mary E. Kelley, 10 Tremont Street, Boston, Mass. Operating rights sought to be transferred: Under a certificate of registration, in Docket No. MC–97016 Sub–1, covering the transportation of general commodities, as a common carrier, in intrastate commerce, within the State of Rhode Island. Vendee is authorized to operate as a *common carrier* in Maryland, New York, Massachusetts, Rhode Island, Connecticut, New Jersey, Pennsylvania, Virginia, Delaware, New Hampshire, Maine, Vermont, West Virginia, and the District of Columbia. Application has been filed for temporary authority under section 210a(b).

NOTE: Docket No. MC–4941 Sub–15 is a matter directly related.

By the Commission.

[SEAL] HAROLD D. McCOY, *Secretary.*

[Notice 707]

## MOTOR CARRIER, BROKER, WATER CARRIER AND FREIGHT FORWARDER APPLICATIONS

NOVEMBER 27, 1964.

The following applications are governed by Special Rule 1.247[1] of the Commission's general rules of practice (49 CFR 1.247), published in the FEDERAL REGISTER, issue of December 3, 1963, effective January 1, 1964. These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after date of notice of filing of the application is published in the FEDERAL REGISTER. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with § 1.40 of the general rules of practice which requires that it set forth specifically the grounds upon which it is made and specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the Rules may be rejected. The original and six (6) copies of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. If the protest includes a request for oral hearing, such request shall meet the requirements of § 1.247(d)(4) of the special rule. Subsequent assignment of these proceedings for oral hearing, if any, will be by Commission order which will be served on each party of record.

No. MC 263 (Sub-No. 158), filed November 6, 1964. Applicant: GARRETT FREIGHTLINES, INC., 2055 Garrett Way, Pocatello, Idaho. Applicant's attorney: Maurice H. Greene, Post Office Box 1554, Boise, Idaho. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Billings, Mont., and Great Falls, Mont.; from Billings, Mont., over Montana Highway 3 to junction U.S. Highway 12, at or near Lavina, Mont., thence over U.S. Highway 12 to junction U.S. Highway 191, at or near Harlowton, Mont., thence over U.S. Highway 191 to junction U.S. Highway 87, at or near Moore, Mont., thence over U.S. Highway 87 to Great Falls, Mont., and return over the same route, serving no intermediate points, as an alternate route for operating convenience only, in connection with applicant's authorized regular-route operations.

NOTE: Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Billings, Mont.

No. MC 3468 (Sub-No. 150), filed November 12, 1964. Applicant: F. J. BOUTELL DRIVEAWAY CO. INC., 705 South Dort Highway, Flint 1, Mich. Applicant's attorney: Harry C. Ames, Jr., Transportation Building, Washington, D.C., 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Trailers and trailer chassis* (except mobile homes) from Rose City, Mich., to points in the United States (except Alaska and Hawaii).

NOTE: If a hearing is deemed necessary, applicant requests it be held at Detroit, Mich.

No. MC 4242 (Sub-No. 6), filed November 10, 1964. Applicant: EUGENE M. GRIMM, doing business as PITTSBURGH-BROWNSVILLE EXPRESS, 1023 Reedsdale Street, Pittsburgh, Pa., 15223. Applicant's attorney: Edward M. Larkin, 2508–9 Grant Building, Pittsburgh, Pa., 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment and those injurious or contaminating to other lading), (1) between Connellsville, Pa., and Ruffs Dale, Pa.; from Connellsville over Pennsylvania Highway 711 to junction Pennsylvania Highway 381 at Normalville, Pa., thence over Pennsylvania Highway 381 to Ohiopyle, Pa. (thence returning over Pennsylvania Highway 381 to junction Pennsylvania Highway 711), thence over Pennsylvania Highway 711 to junction Pennsylvania Highway 31, and thence over Pennsylvania Highway 31 to Ruffs Dale, and return over the same route, serving all intermediate points, and (2) between Republic, Pa., and Masontown, Pa., over Pennsylvania Highway 166, serving all intermediate points.

NOTE: Applicant states he proposes to tack-on the requested authority with the authority presently held in MC 4242 and MC 4242 Sub 5 in the transportation of the commodities sought. If a hearing is deemed necessary, applicant requests it be held at Pittsburgh, Pa.

No. MC 10207 (Sub-No. 10), filed November 20, 1964. Applicant McCLAIN DRAY LINE, INC., 404 Railroad Avenue, Marion, Ind. Applicant's attorney: Ferdinand Born, 1017–1019 Chamber of Commerce Building, Indianapolis 4, Ind. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those

[1] Copies of Special Rule 1.247 can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C., 20423.

injurious or contaminating to other lading), serving the plantsite of the Bethlehem Steel Company's Burns Harbor, Indiana plant, located in Porter County, Ind., as an off-route point in connection with applicant's regular route operations from and to points in Illinois, Indiana, Ohio, and Kentucky.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 11220 (Sub-No. 91), filed November 12, 1964. Applicant: GORDONS TRANSPORTS, INC., 185 West McLemore Avenue, Memphis, Tenn. Applicant's attorney: J. W. Wrape, 2111 Sterick Building, Memphis, Tenn., 38103. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk and those requiring special equipment), between Baton Rouge, La., and Leland, Miss.: from Baton Rouge over Louisiana Highway 19 to the Louisiana-Mississippi State line, thence over Mississippi Highway 33 to junction U.S. Highway 61 near Fayette, Miss., thence over U.S. Highway 61 to Leland and return over the same route, serving the intermediate point of Vicksburg, Miss.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Jackson, Miss.

No. MC 14552 (Sub-No. 20), filed November 23, 1964. Applicant: J. V. McNICHOLAS TRANSFER COMPANY, a corporation, 555 West Federal, Youngstown, Ohio, 44501. Applicant's attorney: Chester A. Zyblut, 1000 Connecticut Avenue NW., Washington, D.C., 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such merchandise* as is dealt in by wholesale, retail, and chain grocery and food business houses, and in connection therewith, *equipment, materials, and supplies* used in the conduct of such business from Youngstown, Ohio, to Brownsville, Connellsville, Cannonsburg, Charleroi, Greensburg, Indiana, Kittanning, Uniontown, and Washington, Pa., and Weirton, W. Va., and *returned, refused, damaged, and defective shipments*, on return.

NOTE: Applicant is also authorized to conduct operations as a contract carrier in Permit No. MC 123991, therefore dual operation may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Cleveland, Ohio.

No. MC 19569 (Sub-No. 20), filed November 13, 1964. Applicant: S. & E. McCORMICK, INC., 1020 Church Street, Wilmington, Del. Applicant's attorney: George S. Maxwell, Suite 948 Leader Building, Cleveland, Ohio, 44114. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cast iron pipe, fittings*, in bags or bundles; *meter boxes; stop cocks* and *valves* from the plantsites of the Buffalo Pipe and Foundry Corporation located at Buffalo and Tonawanda, N.Y., to Boyertown, Macungie, and Quakertown, Pa.; Bridgeton and Williamstown, N.J., and *damaged, rejected*, or *refused shipments* on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Buffalo, N.Y.

No. MC 21170 (Sub-No. 58), filed November 12, 1964. Applicant: BOS LINES, INC., 408 South 12th Avenue, Marshalltown, Iowa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts and articles distributed by packinghouses* as described in Sections A and C, Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles), from Mason City, Iowa, to points in Illinois, Kansas, Indiana, Minnesota, Missouri, Michigan, Nebraska, Ohio, Wisconsin, Kentucky, West Virginia, Virginia, Maryland, Delaware, District of Columbia, New Jersey, Pennsylvania, New York, Connecticut, Massachusetts, Rhode Island, Vermont, New Hampshire, and Maine. If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr. or Des Moines, Iowa.

No. MC 21170 (Sub-No. 59), filed November 13, 1964. Applicant: BOS LINES, INC., 408 South 12th Avenue, Marshalltown, Iowa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts* and *articles distributed by packinghouses*, as described in Sections A and C, Appendix I in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles), from Perry, Iowa, to points in Illinois, Indiana, Michigan, Ohio, and Wisconsin.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 26739 (Sub-No. 42), filed November 12, 1964. Applicant: CROUCH BROS., INC., Transport Building, St. Joseph, Mo. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts, dairy products, and articles distributed by meat packinghouses*, from Perry, Iowa, to points in Illinois, Kansas, Missouri and Nebraska.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Des Moines, Iowa.

No. MC 29566 (Sub-No. 93) (AMENDMENT), filed November 12, 1964, published FEDERAL REGISTER issue of November 25, 1964, and republished as amended this issue. Applicant: SOUTHWEST FREIGHT LINES, INC., 1400 Kansas Avenue, Kansas City, Kans. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products and meat byproducts*, and *articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides, and commodities in bulk, in tank vehicles), (1) from Wichita, Kans., to Addison, Aurora, and Chicago, Ill. (except points in the Indiana portion of the Chicago, Ill., Commercial Zone as defined by the Commission), and (2) from Chicago, Ill. (except points in the Indiana portion of the Chicago, Ill., Commercial Zone as defined by the Commission) to Wichita, Kans.

NOTE: The purpose of this republication is to add (2) above. If a hearing is deemed necessary, applicant requests it be held at Kansas City, Mo.

No. MC 29886 (Sub-No. 197), filed November 13, 1964. Applicant: DALLAS & MAVIS FORWARDING CO., INC., 4000 West Sample Street, South Bend, Ind. Applicant's attorney: Charles M. Pieroni (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Self-propelled vehicles*, with and without attachments (except highway automobiles, trucks, and buses), *cranes*, and *hoisting equipment*, and *attachments*, and *tractor grading, loading and excavating attachments and parts*, from Schofield, Kewaunee, and Milwaukee, Wis., and the proving-ground site of Drott Manufacturing Corporation, located at King, and Harrison (Lincoln County), Wis. to points in Illinois, Indiana, Michigan, Ohio, Tennessee, and Kentucky.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 41406 (Sub-No. 12), filed November 16, 1964. Applicant: J. ARTIM & SONS, INC., 7105 Kennedy Avenue, Hammond, Ind. Applicant's attorney: Ferdinand Born, 1017–19 Chamber of Commerce Building, Indianapolis 4, Ind., 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, and except Classes A and B explosives, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, commodities in bulk, commodities requiring special equipment other than those requiring specialized handling or rigging because of size or weight, and those injurious or contaminating to other lading) between the plantsite of the Bethlehem Steel Company, Burns Harbor, Indiana plant, located in Porter County, Ind., on the one hand, and, on the other, points in Illinois and St. Louis, Mo.

NOTE: No duplicating authority is sought. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 42146 (Sub-No. 9), filed November 18, 1964. Applicant: A. G. BOONE COMPANY, a corporation, 1117 South Clarkson Street, Charlotte, N.C., 28208. Applicant's attorney: Allen Post, Sixth Floor, First National Bank Building, Atlanta, Ga., 30303. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Such merchandise* as is dealt in by wholesale, retail, and chain grocery and food business houses, and in connection therewith, *equipment, materials*, and *supplies* used in the conduct of such business, between points in Fulton County, Ga., on the one hand, and, on the other, points in Lauderdale, Jones, Forrest, Harrison, and Jackson Counties, Miss., restricted to transportation services performed under contract with The Great Atlantic and Pacific Tea Company, Inc.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga.

No. MC 42487 (Sub-No. 609), filed November 16, 1964. Applicant: CONSOLIDATED FREIGHTWAYS CORPORATION OF DELAWARE, 175 Linfield Drive, Menlo Park, Calif. Applicant's attorney: Robert C. Stetson (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Acids and chemicals, plastics, resins, cleaning compounds, lubricating oils* (other than petroleum), in bulk, in tank vehicles, from points in Illinois, Whiting, Ind., and points in Wayne County, Mich., to points in Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

NOTE: Applicant states it holds a portion of the authority sought herein, but does not seek duplicate authority. If a hearing is deemed necessary, applicant requests it be held at Los Angeles, Calif.

No. MC 42963 (Sub-No. 24), filed November 18, 1964. Applicant: DANIEL HAMM DRAYAGE COMPANY, a corporation, Second and Tyler Streets, St. Louis, Mo. Applicant's attorney: Ernest A. Brooks III, 1301–02 Ambassador Building, St. Louis, Mo., 63101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cement*, from the plantsite of River Cement Company, in Jefferson County, Mo., and St. Louis, Mo., to points in Arkansas, Illinois, Indiana, Iowa, Kentucky, and Tennessee.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 50069 (Sub-No. 308), filed November 9, 1964. Applicant: REFINERS TRANSPORT & TERMINAL CORPORATION, 111 West Jackson Boulevard, Chicago, Ill., 60604. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia and nitrogen fertilizer solutions* in bulk from Peru, Ill. to points in Illinois, Indiana, Iowa, Kansas, Kentucky, North Dakota, Ohio, South Dakota, and Wisconsin.

NOTE: Applicant does not specify place of hearing, if one is deemed necessary.

No. MC 61396 (Sub-No. 115) (AMENDMENT), filed October 26, 1964, published FEDERAL REGISTER issue of November 11, 1964, amended November 23, 1964, and republished as amended this issue. Applicant: HERMAN BROS. INC., 2501 North 11th Street, Omaha, Nebr. Applicant's attorney: Donald L. Stern, 924 City National Bank Building, Omaha, Nebr. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, and *potato products*, from Caldwell, Nampa, Burley, Heyburn, Rexburg, Boise, Borah, Weiser, American Falls, Kimberly, Twin Falls and Idaho Falls, Idaho, and Ontario, and Pendleton, Oreg., to points in Nevada, and California.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Boise, Idaho.

No. MC 117574 (Sub-No. 110), filed November 13, 1964. Applicant: DAILY EXPRESS, INC., Post Office Box 39, M.R. No. 3, Carlisle, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Drinking fountains, water coolers, heating equipment, well pumps, plastic pipe* in coils not exceeding pipe six (6) inches in diameter, between points in Chester, Delaware, Montgomery, and Philadelphia Counties, Pa., and Camden County, N.J., on the one hand, and, on the other, points in the United States.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 117574 (Sub-No. 111), filed November 13, 1964. Applicant: DAILY EXPRESS, INC., Post Office Box 39 M.R. No. 3, Carlisle, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wood pallets, logs, sawdust, wood flour, chips and fiber, wood fiber and wood chip products* (except lumber and plywood) between points in Upshur, Webster, and Braxton Counties, W. Va., on the one hand, and, on the other, points in Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Delaware, Pennsylvania, Maryland, West Virginia, Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Kentucky, Tennessee, Ohio, Indiana, Illinois, Arkansas, Iowa, Michigan, Wisconsin, Minnesota, Missouri, Mississippi, Louisiana, and the District of Columbia.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 117823 (Sub-No. 26), filed November 18, 1964. Applicant: RALPH F. DUNKLEY, doing business as DUNKLEY DISTRIBUTING COMPANY, 240 West California Avenue, Salt Lake City 15, Utah. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods, and canned fruits and vegetables*, when moving in the same vehicle at the same time with frozen foods, from Provo, Utah, to points in Arizona, and points in San Diego and Imperial Counties, Calif.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Salt Lake City, Utah.

No. MC 119777 (Sub-No. 30), filed November 16, 1964. Applicant: LIGON SPECIALIZED HAULER, INC., Post Office Box 31, Madisonville, Ky. Applicant's attorney: Robert M. Pearce, 221 St. Clair Street, Frankfort, Ky. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Iron and steel articles*, as described in *Descriptions in Motor Carrier Certificates* 61 M.C.C. 209 and (2) *iron and steel* (except those requiring special equipment), from points in Cabell County, W. Va., to points in Alabama, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, and Virginia, and *rejected shipments*, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Charleston, W. Va.

No. MC 121502 (Sub-No. 2), filed October 8, 1964. Applicant: HOWARD M. MESHARER, doing business as STATE TRANSFER COMPANY, 473 Horton Street, Wilkes-Barre, Pa. Applicant's representative: John W. Frame, Post Office Box 626, 2207 Old Gettysburg Road, Camp Hill, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Machinery and building materials*, (1) from storage in applicant's warehouse in Wilkes-Barre, Pa., for distribution to points in New Jersey, New York, and Pennsylvania; and (2) from points in New Jersey, New York, and Pennsylvania to applicant's warehouse in Wilkes-Barre, Pa., for storage purposes, the transportation of which is incidental to the storage thereof.

NOTE: This application was accompanied by a Motion to Dismiss. If a hearing is deemed necessary, applicant does not specify place of hearing.

No. MC 123263 (Sub-No. 1), filed November 18, 1964. Applicant: BELGIUM TRUCKING CO., INC., Belgium, Wis. Applicant's attorney: John T. Porter, 708 First National Bank Building, Madison, Wis., 53703. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Animal and poultry feed and feed specialties*, in bulk, and in bulk and bags in mixed shipments (except liquid commodities) from the Town of Fond du Lac, Fond du Lac County, Wis., to points in the upper peninsula of Michigan, and *returned shipments* of the above-specified commodities and *empty containers or other such incidental facilities* (not specified) used in transporting the above-specified commodities, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Madison, Wis.

No. MC 123397, filed January 30, 1961. Applicant: HAINES LUMBER COMPANY, INC., Post Office Box 129, Haines, Alaska. Applicant's attorney: N. C. Banfield, Post Office Box 1121, Juneau, Alaska. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except Classes A and B explosives); (1) between points in Washington and points in Alaska, and (2) between points in Alaska.

NOTE: Applicant states it proposes to operate between any point on the route from Tacoma, Wash., to the British Columbia border at Blaine, Wash., and any point in Alaska served by the ferry system to be operated by or for the State of Alaska between the Alaska-British Columbia border in Dixon Entrance and Haines, Alaska, or accessible by highway from Haines, Alaska, via Haines Junction, B.C., and Tetlin, Alaska; and also points in Alaska on said ferry and highway routes. If a hearing is deemed necessary, applicant requests that it be held at Juneau, Alaska.

No. MC 123746 (Sub-No. 3), filed November 17, 1964. Applicant: SECURITY TRANSPORT CO., a corporation, Post Office Box 110, Bozeman, Mont. Applicant's attorney: Wood R. Worsley, 701 Continental Bank Building, Salt Lake City, Utah, 84101. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Gypsum products*, namely: wallboard, lath, sheathing, backer board, and wallboard reinforced systems, from Cody, Wyo., to points in Park, Lewis, and Clark, Missoula, and Gallatin Counties, Mont., and *empty containers or other such incidental facilities* used in transporting the above commodities and *rejected shipments* on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Bozeman, Mont.

No. MC 124067 (Sub-No. 3), filed November 9, 1964. Applicant: CAPITAL CITY EXPRESS, INC., 1947 Gorgas Street, Montgomery, Ala. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Property declared surplus and made available to the Alabama State Agency for surplus property* (except explosives, commodities in bulk, and those requiring special equipment) from points in Pennsylvania, Maryland, New Jersey, and New York to Glencoe, Ala.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Montgomery, Ala.

No. MC 124548 (Sub-No. 1), filed November 2, 1964. Applicant: PARTS DELIVERY SERVICE, INC., 72 Roosevelt Street, Babylon, L.I., N.Y. Applicant's attorney: Arthur J. Piken, 160-16 Jamaica Avenue, Jamaica, N.Y. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Automobile parts, accessories* and *equipment*, and *returned, rejected, damaged* and *traded-in-parts*, and *empty containers or other incidental facilities* (not specified) used in transporting the above described commodities, between the facilities of World-Wide Automobile Corp. and World-Wide Accessory Corp., located at Orangeburg, N.Y., on the one hand, and, on the other, points in New Jersey, New York and Connecticut.

NOTE: Applicant states the proposed operations will be limited to a transportation service to be performed under a continuing contract, or contracts, with the following shippers: World-Wide Automobile Corp. and World-Wide Accessory Corp., of Orangeburg, N.Y. Applicant is presently authorized to transport "Automobile parts, accessories and equipment, between the plant site of World-Wide Automobile Corp. and World-Wide Accessory Corp., at Astoria, N.Y., on the one hand, and, on the other, points in New Jersey, New York and Connecticut, restricted to a transportation service to be performed under a continuing contract, or contracts, with the following shippers: World-Wide Automobile Corp. and World-Wide Accessory Corp., of Astoria, N.Y." The referred shippers are relocating at Orangeburg, N.Y. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 124678, filed August 6, 1962. Applicant: MINNESOTA-TEXAS "35", INC., 1501 Southwest 64th, Oklahoma City, Okla. Applicant's representative: Kenneth F. Dudley, 901 South Madison Avenue, Post Office Box 279, Ottumwa, Iowa. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, and commodities requiring special equipment), between Duluth, Minn. and Laredo, Tex.; from Duluth over Interstate Highway 35 to Laredo, and return over the same route, serving all intermediate points, in interline service.

NOTE: If a hearing is deemed necessary, applicant requests that it be held at Des Moines, Iowa, or Kansas City, Mo.

No. MC 124798, filed September 17, 1962. Applicant: EDWIN CARL JOHNSON, doing business as SOUTHWEST SHORT LINES, 901 Sherman Street, Denver, Colo. Applicant's attorney: Michael T. Corcoran, 1360 Locust Street, Denver 20, Colo. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except commodities in bulk and in tank vehicles, household goods as defined by the Commission, and livestock), between Denver, Colo., and San Diego, Calif. (1) From Denver over Interstate Highway 70 to junction Interstate Highway 15 at or near Cove Fort, Utah, thence over Interstate Highway 15 to San Bernardino, Calif., and thence over U.S. Highway 395 to San Diego, Calif. (2) From Denver over U.S. Highway 6 to Dowd, Colo., thence over combined U.S. Highways 6 and 24 to Grand Junction, Colo., thence over combined U.S. Highways 6 and 50 to Price, Utah, thence over Utah Highway 10 to Salina, Utah, thence over U.S. Highway 89 to Sevier, Utah, thence over Utah Highway 13 to Cove Fort, Utah, thence over U.S. Highway 91 to Barstow, Calif., thence over combined U.S. Highways 91 and 66 to San Bernardino, Calif., and thence over U.S. Highway 395 to San Diego.

(Also from Price, Utah, over combined U.S. Highways 6 and 50 to Provo, Utah, and thence over U.S. Highway 91 to Cove Fort, Utah.) (3) From Denver over U.S. Highway 285 to junction Colorado Highway 112, thence over Colorado Highway 112 to Del Norte, Colo., thence over U.S. Highway 160 to Cortez, Colo. (also from Denver over U.S. Highway 285 to Monte Vista, Colo., and thence over U.S. Highway 160 to Del Norte, Colo.), thence over U.S. Highway 666 to junction Colorado Highway 40, thence over Colorado Highway 40 and its extension across the San Juan River and the corner of New Mexico to junction near Four Corners with Arizona Highway 364, thence over Arizona Highway 364 to junction Navajo Highway Route 1 at or near Teec Nos Pass, Ariz., thence over Navajo Highway Route 1 through Mexican Water, Kayenta, Tonalea and Tuba City, Ariz., to junction U.S. Highway 89 (the highways from junction U.S. Highway 666 and Colorado Highway 40 may be designated Colorado Highway 40 to junction Arizona Primary 8 or Arizona Highway 364, thence over Arizona Primary 8 to junction Arizona Highway 364, thence over Arizona Highway 364 to Kayenta, and thence over Arizona Highway 64 to junction U.S. Highway 89), thence over U.S. Highway 89 to Flagstaff, Ariz., thence over U.S. Highway Alternate 89 from junction at or near Flagstaff to junction with new boulevard about 5 miles from Flagstaff, thence over new boulevard to junction Arizona Highway 79 at or near Montezuma Castle, thence over Arizona Highway 79 to junction Arizona Highway 69, thence over Arizona Highway 69 to Phoenix, Ariz., and thence over U.S. Highway 80 to San Diego, Calif. (4) From Denver over the above described highways to Flagstaff, Ariz., thence over Interstate Highways 17, 10 and 8 to San Diego, Calif., serving all intermediate points, and off-route points within 15 miles of Denver, within 15 miles of San Diego, and within 6 miles of U.S. Highway 395 from San Bernardino to San Diego, Calif.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Denver and Grand Junction, Colo., Phoenix, Ariz., and San Bernardino and San Diego, Calif.

No. MC 125229 (Sub-No. 1), filed November 20, 1964. Applicant: ELMER P. SHIFFER, Rural Delivery No. 2, Moscow, Pa. NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 115116 (Sub-No. 15), filed November 13, 1964. Applicant: SUBURBAN TRANSIT CORP., 750 Somerset Street, New Brunswick, N.J. Applicant's attorney: Michael J. Marzano, 17 Academy Street, Newark, N.J., 07102. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage*, and *newspapers* and *express* in the same vehicle with passengers (1) between Borough of Princeton, N.J., and East Brunswick, N.J., from Borough of Princeton over Mercer County Highway 571 to its junction with New Jersey Highway 33 in Hightstown, thence over New Jersey Highway 33 to access roads to New Jersey Turnpike at Interchange No. 8 near Hightstown, thence over New Jersey Turnpike Interchange No. 8 access roads to the New Jersey Turnpike, thence over the New Jersey Turnpike to Interchange No. 9 at East Brunswick (a point on applicant's presently authorized route), and return over the same route, serving all intermediate points, with the right to join the aforesaid route with the existing route of Suburban Transit Corp. on the New Jersey Turnpike at Interchange No. 9 in East Brunswick, N.J., (2) between East Windsor Township, N.J., and South Brunswick Township, N.J., from junction New Jersey Highway 33 and access roads to New Jersey Turnpike at Interchange No. 8 in East Windsor Township, over New Jersey Highway 33 to its junction with Prospect Plains Road in Monroe Township, thence over Prospect Plains Road, Clarksburg Road, Applegarth Road and Possum Hollow Road to junction with Forsgate Road in Monroe Township, thence over Forsgate Road to its junction with U.S. Highway 130 in South Brunswick Township and return over the same route, serving all intermediate points, and (3) between East Windsor Township, N.J., and North Brunswick Township, N.J., from junction Mercer County Highway 571 and U.S. Highway 130 in East Windsor Township, over U.S. Highway 130 to its junction with U.S. Highway 1 in North Brunswick Township and return over the same route serving all intermediate points.

NOTE: Applicant states it proposes to provide service to and from New York, N.Y., by joining the proposed routes to its existing routes. If a hearing is deemed necessary, applicant requests it be held at Newark, N.J.

No. MC 124677, filed August 6, 1962. Applicant: MINNESOTA-TEXAS "35" INC., 1501 Southwest 64th, Oklahoma City, Okla. Applicant's representative: Kenneth F. Dudley, 901 South Madison Avenue, Post Office Box 279, Ottumwa, Iowa. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage, mail, express and newspapers*, between Duluth, Minn., and Laredo, Tex., over Interstate Highway 35, serving all intermediate points.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Des Moines, Iowa, or Kansas City, Mo.

No. MC 126743, filed November 18, 1964. Applicant: JAMES A. MAHAN AND HELEN P. MAHAN, a partnership, doing business as MAHAN LIVERY SERVICE, 8 Avenue B, Beacon Falls, Conn. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in the same vehicle with passengers, between Waterbury, Naugatuck, and Seymour, Conn., on the one hand, and, on the other, John F. Kennedy and La Guardia Airports, New York, N.Y.

NOTE: If a hearing is deemed necessary applicant requests it be held at Hartford, Conn.

## APPLICATIONS FOR BROKERAGE LICENSES

### MOTOR CARRIERS OF PROPERTY

No. MC 12930, filed May 13, 1964. Applicant: ROBERT L. PETERSON, 445 Lagunitas Road, Ross, Calif. For a license (BMC 4) to engage in operations as a *broker* at Ross, Calif., in arranging for the transportation of *household goods* by motor carriers in interstate or foreign commerce, from points in the San Francisco Bay area, California, and points within a forty (40) mile radius thereof, to points in the United States.

### MOTOR CARRIERS OF PASSENGERS

No. MC 12685 (Sub-No. 1), filed November 18, 1964. Applicant: ELAINE W. BLAKELEY, doing business as ELAINE'S WIDE WORLD TRAVEL SERVICE, 409 North First West, Salt Lake City, Utah. Applicant's attorney: R. William Bradford, Jr., 900 Walker Bank Building, Salt Lake City, Utah. For a license (BMC 5) to engage in operations as a *broker* at Salt Lake City, Utah, in arranging for transportation, in interstate or foreign commerce of *passengers and their baggage*, both as individuals and in groups, in charter operations, in sightseeing and all-expense tours, beginning and ending at points in Arizona, Idaho and Utah (except Salt Lake County), and extending to points in the United States, including Alaska and Hawaii.

No. MC 12931, filed November 12, 1964. Applicant: WARREN JOHN THOMAS, doing business as JACK THOMAS TRAVEL SERVICE, Newhouse Hotel Lobby, Salt Lake City, Utah. Applicant's attorney: Merlin R. Lybbert, 909 Kearns Building, Salt Lake City, Utah. For a license (BMC 5) to engage in operations as a *broker* at Salt Lake City, Utah, in arranging for the transportation in interstate or foreign commerce of *passengers and their baggage*, both as individuals and groups, in charter and special operations, beginning and ending at points in Salt Lake County, Utah, and extending to points in the United States, including Hawaii and Alaska.

## APPLICATIONS FOR FREIGHT FORWARDERS

### MOTOR CARRIERS OF PROPERTY

No. FF-36 (Sub-No. 2) (D. C. ANDREWS & COMPANY OF ILLINOIS, INC.), filed June 27, 1962. Applicant: D. C. ANDREWS & COMPANY OF ILLINOIS, INC., 327 South La Salle Street, Chicago 4, Ill. Applicant's attorney: Harry F. Gillis, 919 18th Street NW., Washington 6, D.C. Authority sought for a permit to institute operations as a freight forwarder in interstate or foreign commerce, through the use of the facilities of common carrier by rail, motor vehicle and water, in the transportation of *general commodities*, from points in California to points in Hawaii.

No. FF-38 (Sub-No. 5) (ABC FORWARDING CORPORATION EXTENSION ALASKA AND HAWAII), filed April 18, 1960. Applicant: ABC FREIGHT FORWARDING CORPORATION, 201 11th Avenue, New York, N.Y. Authority sought under section 410 of the Interstate Commerce Act, to operate in interstate commerce as a freight forwarder of *general commodities*, between points in Alaska and Hawaii, on the one hand, and, on the other, points in Colorado, Delaware, the District of Columbia, Illinois, Indiana, Kentucky, Maryland, Michigan, Minnesota, Missouri, New Jersey, New York, Ohio, Pennsylvania, and Wisconsin.

No. MC FF-119 (Sub-No. 2) (J. E. BERNARD & CO., INC. EXTENSION ALASKA AND HAWAII), filed May 18, 1962. Applicant: J. E. BERNARD & CO., INC., 11 South La Salle Street, Chicago 3, Ill. Applicant's attorney: Paul J. Maguire, 111 West Washington Street, Chicago 2, Ill. Authority sought under section 410 of the Interstate Commerce Act, for a permit authorizing applicant to extend its operations as a freight forwarder in interstate or foreign commerce, subject to Part IV of the Act, through the use of the facilities of common carriers by rail, express, water or motor vehicle in the transportation of *general commodities*, between points in the Chicago Commercial Zone, on the one hand, and, on the other, points in Hawaii and Alaska.

No. FF-125 (Sub-No. 1) (AMERICAN FREIGHT FORWARDING CORPORATION EXTENSION-NATIONWIDE), filed May 11, 1962. Applicant: AMERICAN FREIGHT FORWARDING CORPORATION, 460 12th Avenue, New York, N.Y. Applicant's attorney: Herbert Burstein, 160 Broadway, New York 38, N.Y. Authority sought under section 410 of the Interstate Commerce Act for a permit authorizing applicant to extend operations as freight forwarder in interstate or foreign commerce subject to Part IV of the Act, through the use of the facilities of common carriers in the transportation of *general commodities*, between points in the United States, including Alaska and Hawaii.

No. FF-139 (Sub-No. 2) (MIDLAND FORWARDING CORPORATION EXTENSION ALASKA AND HAWAII). Applicant: MIDLAND FORWARDING CORPORATION, Pier 65, North River, New York, N.Y. Authority sought under section 410 of the Interstate Commerce Act, to operate in interstate commerce as a freight forwarder of *general commodities*, between points in Alaska and Hawaii, on the one hand, and, on the other, points in Arkansas, Colorado, Connecticut, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Massachusetts, Minnesota, Missouri, Oklahoma, Nebraska, New Jersey, New York, North Dakota, South Dakota, Tennessee, Texas, and Wisconsin.

## APPLICATIONS IN WHICH HANDLING WITHOUT ORAL HEARING HAS BEEN REQUESTED

### MOTOR CARRIERS OF PROPERTY

No. MC 22195 (Sub-No. 104), filed November 16, 1964. Applicant: DAN DUGAN TRANSPORT COMPANY, a corporation, 41st and Grange Avenue, Post Office Box 946, Sioux Falls, S. Dak. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Asphalts and road oils*, in bulk, in tank vehicles, from Sioux Falls, S. Dak., and points within ten (10) miles thereof, to points in Iowa, Minnesota, Nebraska, and North Dakota, and *rejected or returned shipments*, on return. Note: Applicant states that no duplicating authority is sought.

No. MC 43269 (Sub-No. 53), filed November 9, 1964. Applicant: WELLS CARGO, INC., 1775 East 4th Street, Reno, Nev. Applicant's attorney: Edward M. Berol, 100 Bush Street, San Francisco, Calif., 94104. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except household goods as defined by the Commission, petroleum products in bulk, new automobiles, new trucks, and new buses) (1) between San Francisco, Calif., and Las Vegas, Nev.; from San Francisco over U.S. Highway 40 to junction U.S. Alternate 95, thence over U.S. Alternate 95 to junction U.S. Highway 95 and thence over U.S. Highway 95 to Las Vegas, and return over the same route, serving all intermediate points, and the off-route points within twenty (20) miles of San Francisco and Mercury, Nev., and the Nevada Test Site of the Atomic Energy Commission at or near Mercury, Nev., and (2) between San Francisco, Calif., and Las Vegas, Nev.; from San Francisco over U.S. Highway 40 to junction U.S. Highway 50, thence over U.S. Highway 50 to junction U.S. Highway 99, thence over U.S. Highway 99 to junction U.S. Highway 466, and thence over U.S. Highway 466 to Las Vegas, and return over the same route, serving all intermediate points and the off-route points within twenty (20) miles of San Francisco. Note: Applicant holds irregular route authority between San Francisco, Calif. and Las Vegas, Nev., which it will cancel if and when the regular-route authority is granted. This application is filed pursuant to MC-C-4366, dated April 21, 1964, served April 28, 1964, which provides the special rules for conversion of irregular-route to regular-route motor carrier operations.

SPECIAL NOTE: Protests to this application may be filed within 45 days instead of 30 days.

No. MC 61231 (Sub-No. 16), filed November 16, 1964. Applicant: ALKIRE TRUCK LINES, INC., Livestock Exchange Building, Kansas City, Mo. Applicant's attorney: Lowell L. Knipmeyer, 28th Floor, Power and Light Building, Kansas City, Mo., 64105. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Penta-treated poles, galvanized sheet metal, lumber*, and *building hardware*, used in the construction of farm buildings, from East St. Louis, Ill., to points in Alabama, Arkansas, Georgia, Indiana, Iowa, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Nebraska, North Carolina, North Dakota, Ohio, Oklahoma, South Carolina, South Dakota, Tennessee, Texas, West Virginia, and Wisconsin.

No. MC 117125 (Sub-No. 3), filed November 17, 1964. Applicant: REMPEL-TRAIL TRANSPORTATION, LTD., 8503 118th Avenue, Edmonton, Alberta, Canada. Applicant's attorney: Ferris A. Albers, Suite 201, National Bank of Commerce Building, Longview, Washington, 98632. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum lubricating oil*, in bulk, from Portland, and Wilbridge, Oreg., to the ports of entry located on the International Boundary line between the United States and Canada located at or near Blaine, and Sumas, Wash.

NOTE: Applicant states that the above proposed operation will be limited to traffic moving under contract between applicant and Valvoline Oil Co., of Canada, Ltd.

No. MC 124069 (Sub-No. 3), filed November 17, 1964. Applicant: CONCRETE DELIVERY CO., INC., 7 North Steelawanna Avenue, Lackawanna, N.Y. Applicant's attorney: William J. Hirsch, 43 Niagara Street, Buffalo, N.Y., 14202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cement*, from South Lansing, N.Y., to points in Warren, McKean, Potter, Tioga, Bradford, Susquehanna, Wayne, Forest, Elk, Cameron, Clinton, Lycoming, Sullivan, Wyoming, Lackawanna, Pike, Clarion, Jefferson, Clearfield, Centre, Union, Montour, Columbia, Luzerne, Monroe, Carbon, Indiana, Cambria, Blair, Huntingdon, Mifflin, Snyder, Juniata, Dauphin, Northumberland, Schuylkill, Somerset, Bedford, Fulton, Franklin, Cumberland, Adams, York, and Perry Counties, Pa., and *empty containers or other incidental facilities* (not specified) used in transporting the above described commodity on return.

NOTE: Applicant is also authorized to conduct contract operations under Permit No. MC 108358, therefore dual operations may be involved.

No. MC 124078 (Sub-No. 126), filed November 13, 1964. Applicant: SCHWERMAN TRUCKING CO., a corporation, 611 South 28th Street, Milwaukee, Wis. Applicant's attorney: James R. Ziperski (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cement*, from Atlanta, Ga. (except from the plant site of Southern Cement Company, Division of Martin-Marietta Corporation), to points in North Carolina.

No. MC 124669 (Sub-No. 8), filed November 19, 1964. Applicant: TRANSPORT, INC. OF SOUTH DAKOTA, 1012 West 41st Street, Post Office Box 502, Sioux Falls, S. Dak. Applicant's attorney: Ronald B. Pitsenbarger, Post Office Box 396, Moorhead, Minn. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Asphalts* and *road oils*, in bulk, from Sioux Falls, S. Dak. and points within 10 miles thereof, to points in North Dakota, Minnesota, Iowa, and Nebraska, except that portion of North Dakota on and east of U.S. Highway 83.

No. MC 125887 (Sub-No. 2), filed November 13, 1964. Applicant: DORSEY CAMPBELL, Route 3, Caldwell, Idaho. Applicant's attorney: John B. Kugler, Pocatello, Idaho. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Inedible meat scraps and green hides*, from points in that part of Idaho on and south of U.S. Highway 12 to points in that part of California on and south of U.S. Highway 40 and California Highway 20.

By the Commission.

[SEAL] HAROLD D. MCCOY, *Secretary*.

## MOTOR CARRIER TRANSFER PROCEEDINGS

NOVEMBER 27, 1964.

Synopses of orders entered pursuant to section 212(b) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 179), appear below:

As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings within 20 days from the date of publication of this notice. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC 66915. By order of November 23, 1964, the Transfer Board approved the transfer to A. E. F. Transportation, Inc., Yardville, N.J., of Certificate in No. MC 21077, issued October 8, 1942, to Algernon E. Fitzpatrick, doing business as A. E. F. Inter-State Transportation Service, Newark, N.J., authorizing the transportation of: General commodities, with the usual exceptions including household goods and tank truck equipment, between Philadelphia, Pa., and New York, N.Y., serving certain specified intermediate and off-route points. Charles H. Trayford, 220 East 42d Street, New York, N.Y., 10017, representing applicants.

No. MC-FC 67284. Corrected Notice.* By order of November 9, 1964, the Transfer Board approved the transfer to J. K. McKeown Co. Inc., Arlington, Mass., of a portion of Certificate No. MC 109453, issued July 23, 1951, to Wood Brothers,

*The notice is corrected to include the following States: North Carolina, South Carolina, Virginia, West Virginia, Georgia, Florida, and the District of Columbia.

Inc., Arlington, Mass., authorizing the transportation of household goods, over irregular routes, between Boston, Mass., and points within 20 miles of Boston, on the one hand, and, on the other, points in Indiana, points in the Lower Peninsula of Michigan, Pennsylvania, Delaware, Maryland, Ohio, Illinois, North Carolina, South Carolina, Virginia, West Virginia, Georgia, Florida, and the District of Columbia. Robert J. Gallagher, 111 State Street, Boston, Mass., 02109, attorney for applicants.

[SEAL] HAROLD D. McCOY,
*Secretary.*

# DEPARTMENT OF LABOR

## Wage and Hour Division

## CERTIFICATES AUTHORIZING EMPLOYMENT OF LEARNERS AT SPECIAL MINIMUM RATES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938 (52 Stat. 1060, as amended, 29 U.S.C. 201 et seq.), and Administrative Order No. 579 (28 F.R. 11524) the firms listed in this notice have been issued special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates otherwise applicable under section 6 of the act. The effective and expiration dates, occupations, wage rates, number or proportion of learners and learning periods, for certificates issued under general learner regulations (29 CFR 522.1 to 522.9), and the principal product manufactured by the employer are as indicated below. Conditions provided in certificates issued under the supplemental industry regulations cited in the captions below are as established in those regulations.

Apparel Industry Learner Regulations (29 CFR 522.1 to 522.9, as amended, and 29 CFR 522.20 to 522.25, as amended).

The following learner certificates were issued authorizing the employment of 10 percent of the total number of factory production workers for normal labor turnover purposes. The effective and expiration dates are indicated.

The Arrow Co., division of Cluett, Peabody & Co., Inc., Shamokin, Pa.; effective 11-4-64 to 11-3-65 (men's sport shirts).

Blue Bell, Inc., Tupelo, Miss.; effective 11-8-64 to 11-7-65 (western scout shirts).

Blue Ridge Manufacturers, Inc., Anniston, Ala.; effective 10-30-64 to 10-29-65 (boys' and men's jeans).

Carthage Shirt Corp., Carthage, Tenn.; effective 11-3-64 to 11-2-65 (men's and boys' sport and dress shirts).

Dover Mills, Inc., Pisgah, Ala.; effective 10-30-64 to 10-29-65 (children's knit shirts).

Elder Manufacturing Co., Webb City, Mo.; effective 10-31-64 to 10-30-65 (boys' juvenile shirts).

Enro Shirt Co., Inc., 4300 Leghorne Drive, Louisville, Ky.; effective 11-10-64 to 11-9-65 (men's dress shirts and ladies' blouses).

Georgia Converters, Inc., Bremen, Ga.; effective 11-1-64 to 10-31-65 (men's and boys' dress slacks).

The H. W. Gossard Co., 105 North Franklin Street, Bicknell, Ind.; effective 11-11-64 to 11-10-65 (girdles and brassieres).

Hicks-Ponder Co., 1795 Maple Avenue, Yuma, Ariz.; effective 11-13-64 to 11-12-65 (men's utility pants and casual slacks).

Knickerbocker Manufacturing Co., West Point, Miss.; effective 11-9-64 to 11-8-65 (men's sleepwear).

Milan Shirt Manufacturing Co., 134 Williamson Street, Milan, Tenn.; effective 11-4-64 to 11-3-65 (cotton work shirts).

Rob Roy Co., Inc., Cambridge, Md.; effective 11-1-64 to 10-31-65 (boys' shirts).

Salant and Salant, Inc., First Street, Lexington, Tenn.; effective 11-9-64 to 11-8-65 (boys' sport shirts).

Salant and Salant, Inc., Washington Street, Paris, Tenn.; effective 11-9-64 to 11-8-65 (men's and boys' sports shirts).

Salant and Salant, Inc., Tennessee Avenue, Parson, Tenn.; effective 11-8-64 to 11-7-65 (men's work pants and boys' cotton pants).

Shane Uniform Co., Inc., 2015 West Maryland Street, Evansville, Ind.; effective 11-6-64 to 11-5-65 (washable service uniforms for men and women).

Levi Strauss & Co., 1808 Cherry Street, Knoxville, Tenn.; effective 11-9-64 to 11-8-65 (denim waist overalls).

Triple A. Trouser Manufacturing Co., Inc., Penn Avenue at Larch Street, Scranton, Pa.; effective 11-1-64 to 10-31-65 (boys' trousers).

Walhalla Garment Co., Inc., Walhalla, S.C.; effective 11-1-64 to 10-31-65 (women's dresses).

Wentworth Manufacturing Co., Blanding Street, Lake City, S.C.; effective 11-9-64 to 11-8-65 (ladies' dresses).

The following learner certificates were issued for normal labor turnover purposes. The effective and expiration dates and the number of learners authorized are indicated.

Bonacci Sportswear Co., 312 Penn Avenue, Scranton, Pa.; effective 10-28-64 to 10-27-65; 5 learners (men's outerwear jackets).

Edison Textile, Inc., Edison, Ga.; effective 10-30-64 to 10-29-65; 10 learners (infants' and girls' cotton panties).

Garan, Inc., Eupora, Miss.; effective 11-4-64 to 11-3-65; 5 learners (men's and boys' knitted polo shirts).

The following learner certificates were issued for plant expansion purposes. The effective and expiration dates and the number of learners are indicated.

Altamont Shirt Corp., Altamont, Tenn.; effective 10-28-64 to 4-27-65; 100 learners (men's and boys' shirts).

The Arrow Co., a division of Cluett, Peabody & Co., Inc., Carbon Hill, Ala.; effective 11-8-64 to 5-7-65; 60 learners (boys' shirts).

H. W. Gossard Co., 105 North Franklin Street, Bicknell, Ind.; effective 11-2-64 to 5-1-65; 15 learners (girdles and brassieres).

Morgan Sportswear Co., Madison, Ga.; effective 11-2-64 to 5-1-65; 20 learners (men's and boys' sport shirts).

Standard Romper Co., Inc., 321 Canco Road; Portland, Oreg.; effective 11-2-64 to 5-1-65; 15 learners (children's outerwear garments).

Glove Industry Learner Regulations (29 CFR 522.1 to 522.9, as amended, and 29 CFR 522.60 to 522.65, as amended).

Cardinal Glove Co., Inc., 158 Summit Street, Newark, N.J.; effective 10-29-64 to 10-28-65; 10 learners for normal labor turnover purposes (cotton work gloves).

D. N. Pariso Industrial Glove Manufacturing Co., 101 South Cleveland Street, Knox, Ind.; effective 11-2-64 to 11-1-65; 10 learners for normal labor turnover purposes (work gloves).

Hosiery Industry Learner Regulations (29 CFR 522.1 to 522.9, as amended, and 29 CFR 522.40 to 522.43, as amended).

Auburn Hosiery Mills, Inc., No. 2, Adairville, Ky.; effective 10-29-64 to 4-28-65; 15 learners for plant expansion purposes (seamless).

Bear Brand Hosiery Co., Henderson, Ky.; effective 11-6-64 to 11-5-65; 5 percent of the total number of factory production workers for normal labor turnover purposes (seamless).

May Hosiery Finishing Co., 616 South Main Street, Burlington, N.C.; effective 11-6-64 to 11-5-65; 5 percent of the total number of factory production workers for normal labor turnover purposes (seamless).

Roane Hosiery, Inc., Harriman, Tenn.; effective 11-5-64 to 11-4-65; 5 percent of the total number of factory production workers for normal labor turnover purposes (seamless).

Royal Hosiery Mills, Inc., Yanceyville, N.C.; effective 10-30-64 to 10-29-65; 5 learners for normal labor turnover purposes (seamless).

Knitted Wear Industry Learner Regulations (29 CFR 522.1 to 522.9, as amended, and 29 CFR 522.30 to 522.35, as amended).

Athens Lingerie Corp., Athens, Ala.; effective 11-2-64 to 11-1-65; 5 percent of the total number of factory production workers for normal labor turnover purposes (ladies' lingerie and sleepwear).

Cullman Lingerie Corp., Cullman, Ala.; effective 10-31-64 to 10-30-65; 5 percent of the total number of factory production workers for normal labor turnover purposes (ladies' lingerie and sleepwear).

Each learner certificate has been issued upon the representations of the employer which, among other things, were that employment of learners at special minimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER pursuant to the provisions of 29 CFR 522.9. The certificates may be annulled or withdrawn, as indicated therein, in the manner provided in 29 CFR, Part 528.

Signed at Washington, D.C., this 20th day of November 1964.

ROBERT G. GRONEWALD,
*Authorized Representative of the Administrator.*

FEDERAL REGISTER
Area Code 202 Phone 963-3261

Published daily, Tuesday through Saturday (no publication on Sundays, Mondays, or on the day after an official Federal holiday), by the Office of the Federal Register, National Archives and Records Service, General Services Administration (mail address National Archives Building, Washington, D.C. 20408), pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U.S.C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15 cents) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended. The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of books and pocket supplements are listed in the first FEDERAL REGISTER issue of each month.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER or the CODE OF FEDERAL REGULATIONS.

## Title 39—POSTAL SERVICE

### Chapter I—Post Office Department

### MISCELLANEOUS AMENDMENTS

The following amendments are made to Chapter I of Title 39:

### PART 16—SECOND CLASS BULK MAILINGS

I. In § 16.3 *Mailing*, make the following changes:

1. In paragraph (d)(3) amend the label form to read as follows:

PHILADELPHIA, PA., 191
Fr. Progress, Boston, Mass., 021

2. In paragraph (d)(4) amend the label form to read as follows:

DENVER, COLO. TERM. ANNEX, 802
KANSAS
Fr. The Star, Fresno, Calif., 937

3. In paragraph (d)(5) amend the example to read as follows:

CHICAGO, ILL. DIS., 606
MIXED STATES
Fr. Fair, Chicago, Ill., 606

4. Amend paragraph (d)(8) to read as follows:

(8) *Unauthorized labels.* Sacks with unauthorized labels, tags, or markings are not acceptable for dispatch.

5. In paragraph (e)(3) amend the label form appearing under the parenthetical instructions to read as follows:

PCC SAN FRANCISCO, CALIF., 962
APO 165
Fr. The Recorder, New York, N.Y., 100

6. In paragraph (e)(4) amend the label form appearing under the parenthetical instructions to read as follows:

PCC NEW YORK, N.Y., 110
APO Mail
Fr. The Recorder, New York, N.Y., 100

NOTE: The corresponding Postal Manual sections are 126.34 and 126.35.

II. In § 16.4 *Newspaper treatment*, make the following changes in paragraph (b):

(1) Amend the label in subparagraph (1) to read as follows:

CINCINNATI, OHIO, 452
Newspapers Via Pitts and St Lou Train, 77
Fr The Register, Columbus, Ohio, 432

1. Amend the label in subparagraph (2) to read as follows:

PITTS & ST LOU TR, 32
Pa. Newspapers
Fr The Register, Columbus, Ohio, 432

NOTE: The corresponding Postal Manual section is 126.42.

(R.S. 161, as amended; 5 U.S.C. 22, 39 U.S.C. 501, 4351–4370, 4421, 4422)

### PART 22—SECOND CLASS

In § 22.2 *Qualifications for second-class privileges*, 29 F.R. 563, amend paragraph (e)(6) to read as follows:

(6) Name of known office of publication, including ZIP code, and street and number when there is letter-carrier service, must be printed in a position or in a style and size of type or with a designation that will make it clearly distinguishable from the names of other offices of the publication. When there is no post office at the place where published, the name of the post office where mailed must be shown as the office of publication. Addresses in mastheads and date lines must be printed so they will clearly show where change of address notices, undeliverable copies, orders for subscriptions, and other mail items are to be sent. See § 16.2(f) of this chapter.

NOTE: The corresponding Postal Manual section is 132.25f.

(R.S. 161, as amended; 5 U.S.C. 22, 39 U.S.C. 501, 4351–4370)

### PART 24—THIRD CLASS

In § 24.4 *Preparation—payment of postage*, make the following changes:

1. Subdivision (i) of paragraph (b)(5) is amended to read as follows:

(i) *Direct package.* When there are 10 or more pieces for any one post office (or station or branch if its name forms part of the address), all addresses must be faced one way except the last which must be reversed to expose its address on the outside of the package. Direct packages should not be labeled except when separations are made to delivery zones within a city. Each package containing mail for a single delivery unit should be labeled to show the name of the post office and should be marked *All for ZIP Code No.* _____. The name of the post office may be omitted from the label of ZIP Code direct packages when the mailer includes all such packages in direct sacks. See subparagraph (6) of this paragraph.

2. In paragraph (b)(6) make the following changes:

a. In subdivision (i) amend the label to read as follows:

PHILADELPHIA, PA., 191
CIRCS.
Fr. Jay Mailing Co., Cincinnati, Ohio, 452

b. In subdivision (ii)(*a*) amend the label to read as follows:

COUNCIL BLUFFS, IOWA TERM, 515
Calif. CIRCS. Direct
Fr. D.C. Mailers, Washington, D.C., 200

c. In subdivision (ii)(*b*) amend the label to read as follows:

OGDEN, UTAH TERM, 843
CALIF. CIRCS.
Fr. D.C. Mailers, Washington, D.C., 200

d. Subdivision (v) is amended to read as follows:

(v) *Unauthorized labels.* Sacks with unauthorized labels, tags, or markings are not acceptable for dispatch.

NOTE: The corresponding Postal Manual sections are 134.425 and 134.426.

(R.S. 161, as amended; 5 U.S.C. 22, 39 U.S.C. 501, 4451–4458)

### PART 61—MONEY ORDERS

In § 61.2 *Issuance of international money orders*, make the following changes:

1. Amend paragraph (b)(2) to read as follows:

(2) Purchasers must complete Form 6083, *Supplemental International Money Order Advice*, written in the foreign language, if possible, when they send money orders payable in Greece, Lebanon, Syria, Yugoslavia, and Japan.

2. In paragraph (h) make the following changes:

a. In the listing of foreign countries add footnote number 2 to Japan, Lebanon, Greece, and Yugoslavia.

b. Strike out the present text of footnote 2, and insert in lieu thereof the following:

[2] Money orders to be accompanied by Form 6083, *Supplemental International Money Order Advice*. See paragraph (d)(2)(iii) of this section.

NOTE: The corresponding Postal Manual sections are 171.222 and 171.28.

(R.S. 161, as amended; 5 U.S.C. 22, 39 U.S.C. 501, 506, 507, 5101–5105)

LOUIS J. DOYLE,
*General Counsel.*

## Title 49—TRANSPORTATION

### Chapter I—Interstate Commerce Commission

SUBCHAPTER B—CARRIER BY MOTOR VEHICLE

[Ex Parte MC–19]

### PART 176—TRANSPORTATION OF HOUSEHOLD GOODS IN INTERSTATE OR FOREIGN COMMERCE

### Motor Common Carriers of Household Goods; Postponement of Effective Date

Upon consideration of the record in the above-entitled proceeding; and good cause appearing therefor:

*It is ordered*, That the effective date of the order of May 6, 1964 (29 F.R. 7390, 9711, and 14173), in said proceeding be, and it is hereby, postponed to December 30, 1964.

Dated at Washington, D.C., this 20th day of November A.D. 1964.

By the Commission.

[SEAL] HAROLD D. MCCOY,
*Secretary.*

[F.R. Doc. 64–12370; Filed, Dec. 2, 1964; 8:49 a.m.]

# Title 41—PUBLIC CONTRACTS AND PROPERTY MANAGEMENT

## Chapter 101—Federal Property Management Regulations

SUBCHAPTER H—UTILIZATION AND DISPOSAL

## PART 101–47—UTILIZATION AND DISPOSAL OF REAL PROPERTY

A new Part 101–47 is added to Chapter 101 of Title 41 of the Code of Federal Regulations, reading as follows:

Sec.
101–47.000 Scope of part.

Subpart 101–47.1—General Provisions

101–47.100 Scope of subpart.
101–47.101 Applicability.
101–47.102 [Reserved.]
101–47.103 Definitions.
101–47.103–1 Act.
101–47.103–2 GSA.
101–47.103–3 Airport.
101–47.103–4 Chapel.
101–47.103–5 Decontamination.
101–47.103–6 Disposal agency.
101–47.103–7 Holding agency.
101–47.103–8 Industrial property.
101–47.103–9 Landing area.
101–47.103–10 Management.
101–47.103–11 Protection.
101–47.103–12 Real property.
101–47.103–13 Related personal property.
101–47.103–14 Other terms defined in the Act.
101–47.103–15 Other terms.

Subpart 101–47.2—Utilization of Excess Real Property

101–47.200 Scope of subpart.
101–47.201 General provisions of subpart.
101–47.201–1 Policy.
101–47.201–2 Policy guidelines.
101–47.201–3 Lands withdrawn or reserved from the public domain.
101–47.201–4 Transfers under other laws.
101–47.202 Reporting of excess real property.
101–47.202–1 Reporting requirements.
101–47.202–2 Report forms.
101–47.202–3 Submission of reports.
101–47.202–4 Exceptions to reporting.
101–47.202–5 Reporting after submissions to the Congress.
101–47.202–6 Reports involving the public domain.
101–47.202–7 Reports involving contaminated property.
101–47.202–8 Notice of receipt.
101–47.202–9 Expense of care and handling.
101–47.202–10 Examination for acceptability.
101–47.203 Utilization.
101–47.203–1 Reassignment of real property by the agencies.
101–47.203–2 Transfer and utilization.
101–47.203–3 Notification of agency requirements.
101–47.203–4 Real property excepted from reporting.
101–47.203–5 Screening of excess real property.
101–47.203–6 Prefabricated movable structures and trailers.
101–47.203–7 Transfers.
101–47.203–8 Temporary utilization.
101–47.203–9 Non-Federal interim use of property.
101–47.203–10 Withdrawals.
101–47.204 Determination of surplus.
101–47.204–1 Reported property.
101–47.204–2 Property excepted from reporting.

Subpart 101–47.3—Surplus Real Property Disposal

101–47.300 Scope of subpart.
101–47.301 General provisions of subpart.
101–47.301–1 Policy.
101–47.301–2 Applicability of antitrust laws.
101–47.301–3 Disposals under other laws.
101–47.301–4 Credit disposals and leases.
101–47.301–5 Records and reports.
101–47.302 Designation of disposal agencies.
101–47.302–1 General.
101–47.302–2 Holding agency.
101–47.302–3 General Services Administration.
101–47.303 Responsibility of disposal agency.
101–47.303–1 Classification.
101–47.303–2 Disposals to public agencies.
101–47.303–3 Studies.
101–47.303–4 Appraisal.
101–47.304 Advertised and negotiated disposals.
101–47.304–1 Publicity.
101–47.304–2 Soliciting cooperation of local groups.
101–47.304–3 Information to interested persons.
101–47.304–4 Invitation for offers.
101–47.304–5 Inspection.
101–47.304–6 Submission of offers.
101–47.304–7 Advertised disposals.
101–47.304–8 Report of identical bids.
101–47.304–9 Negotiated disposals.
101–47.304–10 Disposals by brokers.
101–47.304–11 Documenting determinations to negotiate.
101–47.304–12 Explanatory statements.
101–47.305 Acceptance of offers.
101–47.305–1 General.
101–47.305–2 Equal offers.
101–47.305–3 Notice to unsuccessful bidders.
101–47.306 Absence of acceptable offers.
101–47.306–1 Negotiations.
101–47.306–2 National Industrial Reserve properties.
101–47.307 Conveyances.
101–47.307–1 Form of deed or instrument of conveyance.
101–47.307–2 Conditions in disposal instruments.
101–47.307–3 Distribution of conformed copies of conveyance instruments.
101–47.307–4 Disposition of title papers.
101–47.307–5 Title transfers from Government corporations.
101–47.307–6 Proceeds from disposals.
101–47.308 Special disposal provisions.
101–47.308–1 Power transmission lines.
101–47.308–2 Property for public airports.
101–47.308–3 Property for use as public parks, recreational areas, or historic monument sites.
101–47.308–4 Property for educational and public health purposes.
101–47.308–5 Property for use as shrines, memorials, or for religious purposes.
101–47.309 Disposal of leases, permits, licenses, and similar instruments.
101–47.310 Disposal of structures and improvements on Government-owned land.
101–47.311 Disposal of residual personal property.
101–47.312 Non-Federal interim use of property.
101–47.313 Easements.
101–47.313–1 Disposal of easements to owner of servient estate.
101–47.313–2 Grants of easements in or over Government property.
101–47.314 Compliance.
101–47.314–1 General.
101–47.314–2 Extent of investigations.
101–47.315 Covenant against contingent fees and related procedure.

Subpart 101–47.4—Management of Excess and Surplus Real Property

101–47.400 Scope of subpart.
101–47.401 General provisions of subpart.
101–47.401–1 Policy.
101–47.401–2 Definitions.
101–47.401–3 Taxes and other obligations.
101–47.401–4 Decontamination.
101–47.401–5 Improvements or alterations.
101–47.401–6 Interim use and occupancy.
101–47.402 Care and handling.
101–47.402–1 Responsibility.
101–47.402–2 Expense of care and handling.

Subpart 101–47.5—Abandonment, Destruction, or Donation to Public Bodies

101–47.500 Scope of subpart.
101–47.501 General provisions of subpart.
101–47.501–1 Definitions.
101–47.501–2 Authority for disposal.
101–47.501–3 Dangerous property.
101–47.501–4 Findings.
101–47.502 Donations to public bodies.
101–47.502–1 Cost limitations.
101–47.502–2 Disposal costs.
101–47.503 Abandonment and destruction.
101–47.503–1 General.
101–47.503–2 Notice of proposed abandonment or destruction.
101–47.503–3 Abandonment or destruction without notice.

Subpart 101–47.6—Delegations

101–47.600 Scope of subpart.
101–47.601 Delegation to Department of Defense.
101–47.602 Delegation to the Department of Agriculture.
101–47.603 Delegation to the Department of the Interior.
101–47.604 Delegation to the Department of the Interior and the Department of Health, Education, and Welfare.

Subpart 101–47.7—Conditional Gifts of Real Property to Further the Defense Effort

101–47.700 Scope of subpart.
101–47.701 Offers and acceptance of conditional gifts.
101–47.702 Consultation with agencies.
101–47.703 Advice of disposition.
101–47.704 Acceptance of gifts under other laws.

Subparts 101–47.8—101–47.48 [Reserved]

Subpart 101–47.49—Illustrations

101–47.4900 Scope of subpart.
101–47.4901 [Reserved.]
101–47.4902 Standard Form 118, Report of Excess Real Property.
101–47.4902–1 Standard Form 118a, Buildings, Structures, Utilities, and Miscellaneous Facilities.
101–47.4902–2 Standard Form 118b, Land.
101–47.4902–3 Standard Form 118c, Related Personal Property.
101–47.4902–4 Instructions for the preparation of Standard Form 118, and Attachments, Standard Forms 118a, 118b, and 118c.

Sec.
101–47.4903 GSA Form 1100, Report of Surplus Real Property Disposals and Inventory.
101–47.4903–1 Instructions for preparation of GSA Form 1100, Report of Surplus Real Property Disposals and Inventory.
101–47.4904 GSA Form 1334, Request for Transfer of Excess Real Property and Related Personal Property.
101–47.4904–1 Instructions for preparation of GSA Form 1334, Request for Transfer of Excess Real Property and Related Personal Property.
101–47.4905 Extract of statutes authorizing disposal of surplus real property to public agencies.
101–47.4906 Sample notice to public agencies of surplus determination.
101–47.4906–1 Sample letter for transmission of notice of surplus determination.
101–47.4907 List of Federal real property holding agencies.
101–47.4908 Bureau of the Budget Circular No. A–2.
101–47.4909 Memorandum of the President dated May 21, 1956.
101–47.4910 Field offices of Department of Health, Education, and Welfare to receive notices of availability.
101–47.4911 Outline for explanatory statements for negotiated sales.
101–47.4912 Field offices of Department of the Interior, Bureau of Outdoor Recreation.
101–47.4913 Outline for protection and maintenance of excess and surplus real property.

AUTHORITY: The provisions of this Part 101–47 issued under sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).

### § 101–47.000 Scope of part.

This part prescribes the policies and methods governing the utilization and disposal of excess and surplus real property and related personal property within the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and the Virgin Islands.

## Subpart 101–47.1—General Provisions

### § 101–47.100 Scope of subpart.

This subpart sets forth the applicability of this Part 101–47, and other introductory information.

### § 101–47.101 Applicability.

The provisions of this Part 101–47 apply to all Federal agencies, except as may otherwise be specifically provided under each section or subpart.

### § 101–47.102 [Reserved]

### § 101–47.103 Definitions.

As used throughout this Part 101–47, the following terms shall have the meanings as set forth in this Subpart 101–47.1.

### § 101–47.103–1 Act.

The Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended.

### § 101–47.103–2 GSA.

The General Services Administration, acting by or through the Administrator of General Services, or a designated official to whom functions under this Part 101–47 have been delegated by the Administrator of General Services.

### § 101–47.103–3 Airport.

Any area of land or water which is used, or intended for use, for the landing and takeoff of aircraft, and any appurtenant areas which are used, or intended for use, for airport buildings or other airport facilities or rights-of-way, together with all airport buildings and facilities located thereon.

### § 101–47.103–4 Chapel.

Any Government-owned building and improvements, including surplus fixtures or furnishings therein, related or essential to the religious activities and services for which the building is to be used and maintained, was designed for and used, or was intended to be used.

### § 101–47.103–5 Decontamination.

The complete removal or destruction by flashing of explosive powders; the neutralizing and cleaning-out of acid and corrosive materials; the removal, destruction, or neutralizing of toxic or infectious substances; and the complete removal and destruction by burning or detonation of live ammunition from contaminated areas and buildings.

### § 101–47.103–6 Disposal agency.

The executive agency designated by the Administrator of General Services to dispose of surplus real property.

### § 101–47.103–7 Holding agency.

The Federal agency which has accountability for the property involved.

### § 101–47.103–8 Industrial property.

Any real property and related personal property which has been used or which is suitable to be used for manufacturing, fabricating, or processing of products; mining operations; construction or repair of ships and other waterborne carriers; power transmission facilities; railroad facilities; and pipeline facilities for transporting petroleum or gas.

### § 101–47.103–9 Landing area.

Any land or combination of water and land, together with improvements thereon and necessary operational equipment used in connection therewith, which is used for landing, takeoff, and parking of aircraft. The term includes, but is not limited to, runways, strips, taxiways, and parking aprons.

### § 101–47.103–10 Management.

The safeguarding of the Government's interest in property, in an efficient and economical manner consistent with the best business practices.

### § 101–47.103–11 Protection.

The provisions of adequate measures for prevention and extinguishment of fires, special inspections to determine and eliminate fire and other hazards, and necessary guards to protect property against thievery, vandalism, and unauthorized entry.

### § 101–47.103–12 Real property.

(a) Any interest in land (including improvements of any kind, structures, and fixtures located on the premises), and appurtenances thereto, under the control of any Federal agency, except:

(1) The public domain;

(2) Lands reserved or dedicated for national forest or national park purposes;

(3) Minerals in lands or portions of lands withdrawn or reserved from the public domain which the Secretary of the Interior determines are suitable for disposition under the public land mining and mineral leasing laws;

(4) Lands withdrawn or reserved from the public domain but not including lands or portions of lands so withdrawn or reserved which the Secretary of the Interior, with the concurrence of the Administrator of General Services, determines are not suitable for return to the public domain for disposition under the general public land laws because such lands are substantially changed in character by improvements or otherwise; and

(5) Crops, gravel, sand, stone, and timber when designated by such agency for removal from the land.

(b) Improvements of any kind, structures, and fixtures under the control of any Federal agency when designated by such agency for disposition without the underlying land (including such as may be located on the public domain, or lands withdrawn or reserved from the public domain, or lands reserved or dedicated for national forest or national park purposes, or on lands that are not owned by the United States) excluding, however, prefabricated movable structures, such as Butler-type storage warehouses and quonset huts, and house-trailers (with or without undercarriages).

**§ 101–47.103–13 Related personal property.**

Any personal property:

(a) Which is located on, or is an integral part of, real property, or used or useful in connection with such property or the productive capacity thereof; or

(b) Determined by the Administrator of General Services to be otherwise related to the real property.

**§ 101–47.103–14 Other terms defined in the Act.**

Other terms which are defined in the Act shall have the meanings given them by such Act.

**§ 101–47.103–15 Other terms.**

Other terms not applicable throughout this part are defined in the sections or subparts to which they apply.

## Subpart 101–47.2—Utilization of Excess Real Property

**§ 101–47.200 Scope of subpart.**

This subpart prescribes the policies and methods governing the reporting by executive agencies and utilization by Federal agencies of excess real property, including related personal property, within the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and the Virgin Islands. This subpart does not apply to the abandonment, destruction, or donation to public bodies, under section 202(h) of the Act (covered by Subpart 101–47.5).

**§ 101–47.201 General provisions of subpart.**

**§ 101–47.201–1 Policy.**

It is the policy of the Administrator of General Services:

(a) To stimulate the identification and reporting by executive agencies of excess real property consistent with the objective expressed in the Bureau of the Budget Circular No. A–2 (see § 101–47.4908).

(b) To achieve the maximum utilization by executive agencies, in terms of economy and efficiency, of excess real property in order to minimize expenditures for the purchase of real property.

(c) To provide for the transfer of excess real property among Federal agencies, to mixed-ownership Government corporations, and to the municipal government of the District of Columbia.

**§ 101–47.201–2 Policy guidelines.**

(a) Each executive agency shall:

(1) Continuously survey real property under its control (including property assigned on a permit basis to other Federal agencies, or outleased to States, local governments, other public bodies, or private interests) to determine that which is excess property;

(2) Maintain its inventory of real property at the absolute minimum consistent with economical and efficient conduct of the affairs of the agency; and

(3) Promptly report to GSA real property which it has determined to be excess.

(b) Each executive agency shall, so far as practicable, pursuant to the provisions of this subpart, fulfill its needs for real property by utilization of excess real property.

(c) To preclude the acquisition by purchase of real property, when excess or surplus property of another Federal agency may be available which would meet the need, each executive agency shall notify GSA of its needs and ascertain whether any such property is available.

(d) In every case of a proposed transfer of excess real property, the paramount consideration shall be the validity and appropriateness of the requirement upon which the proposal is based.

(1) A proposed transfer should not establish a new program of an executive agency which has never been reflected in any previous budget submission or congressional action; nor should it substantially increase the level of an agency's existing programs beyond that which has been contemplated in the President's budget or by the Congress.

(2) Before requesting a transfer of excess real property, an executive agency should:

(i) Screen the holdings of the bureaus, or other organizations, within the agency to determine whether any property under the control of the agency, which is not being utilized, in whole or in part, might be available for the proposed need; and

(ii) Review all real property under its accountability which it has assigned on a permit basis to other Federal agencies, or outleased to States, local governments, other public bodies, or private interests and terminate the permit or lease for any property, or portion thereof, that is suitable for the proposed need whenever such termination is not prohibited by the terms of the permit or lease.

(3) Property found to be available under § 101–47.201–2(d)(2) (i) or (ii), should be utilized for the proposed need in lieu of requesting a transfer of excess real property. Reassignments of such property within the agency should be made in appropriate cases.

(4) The appraised fair market value of the excess real property proposed for transfer should not substantially exceed the probable purchase price of other real property which would be suitable for the intended purpose.

(5) The size and quantity of excess real property to be transferred should be limited to the actual requirements. Other portions of an excess installation which can be separated should be withheld from transfer and made available for disposal to other agencies or to the public.

(6) Consideration should be given to the design, layout, geographic location, age, state of repair, and expected maintenance costs of excess real property proposed for transfer. It should be clearly demonstrated that the transfer will prove more economical over a sustained period of time than acquisition of a new facility specifically planned for the purpose.

(7) Excess real property should not be permanently transferred to agencies for programs which appear to be scheduled for substantial curtailment or termination. In such cases, the property may be temporarily transferred on a conditional basis, with an understanding that the property will be released for further Federal utilization or disposal as surplus property, at a time agreed upon when the transfer is arranged (see § 101–47.203–8).

(e) Excess real property of a type which may be used for office, storage, and related purposes normally will be assigned by, or at the direction of, GSA for use to the requesting agency in lieu of being transferred to the agency.

(f) Federal agencies which normally do not require real property, other than for office, storage, and related purposes, or which may not have statutory authority to acquire such property, may obtain the use of excess real property for an approved program when authorized by GSA.

**§ 101–47.201–3 Lands withdrawn or reserved from the public domain.**

(a) Agencies holding lands withdrawn or reserved from the public domain, which they no longer need, shall send to the GSA regional office for the region in which the lands are located an information copy of each notice of intention to relinquish filed with the Department of the Interior (43 CFR 2312.0–1, et seq.).

(b) Section 101–47.202–6 prescribes the procedure for reporting to GSA as excess property, certain lands or portions of lands withdrawn or reserved from the public domain for which such notices have been filed with the Department of the Interior.

**§ 101–47.201–4 Transfers under other laws.**

Pursuant to section 602(c) of the Act, transfers of real property shall not be made under other laws, but shall be made only in strict accordance with the provisions of this subpart unless the Administrator of General Services, upon written application by the disposal agency, shall determine in each case that the provisions of any such other law, pursuant to which a transfer is proposed to be made, are not inconsistent with the authority conferred by this Act. The provisions of this section shall not apply to transfers of real property authorized to be made by section 602(d) of the Act or by any special statute which directs or requires an executive agency named therein to transfer or convey specifically described real property in accordance with the provisions of such statute.

**§ 101–47.202 Reporting of excess real property.**

**§ 101–47.202–1 Reporting requirements.**

Each executive agency shall report to GSA, pursuant to the provisions of this section, all excess real property except as provided in § 101–47.202–4. Reports of excess real property shall be based on the agency's official real property records and accounts.

(a) All excess related personal property shall be reported as a part of the same report covering the excess real property.

(b) Upon request of the Administrator of General Services, executive agencies shall institute specific surveys to determine that portion of real property, including unimproved property, under their control which might be excess and suitable for office, storage, and related facilities, and shall report promptly to the Administrator of General Services as soon as each survey is completed.

**§ 101–47.202–2 Report forms.**

Reports of excess real property and related personal property shall be prepared on Standard Form 118, Report of Excess Real Property (see § 101–47.4902), and accompanying Standard Form 118a, Buildings Structures, Utilities, and Miscellaneous Facilities, Schedule A (§ 101–47.4902–1); Standard Form 118b, Land, Schedule B (see § 101–47.4902–2); and Standard Form 118c, Related Personal Property, Schedule C (see § 101–47.4902–3). Instructions for the preparation of Standard Forms 118, 118a, 118b, and 118c are set forth in § 101–47.4902–4.

(a) Property for which the holding agency is designated as the disposal agency under the provisions of § 101–47.302–2 and which is required to be reported to GSA under the provisions of this section shall be reported on Standard Form 118, without the accompanying Schedules A, B, and C, unless the holding agency requests GSA to act as disposal agency and a statement to that effect is inserted in Block 18, Remarks, of Standard Form 118.

(b) In all cases where Government-owned land is reported, there shall be attached to and made a part of Standard Form 118 (original and copies thereof) a report prepared by a qualified employee of the holding agency on the Government's title to the property based upon his review of the records of the agency. The report shall recite:

(1) The description of the property.

(2) The date title vested in the United States.

(3) All exceptions, reservations, conditions, and restrictions, relating to the title acquired.

(4) Detailed information concerning any action, thing, or circumstance that occurred from the date of the acquisition of the property by the United States to the date of the report which in any way affected or may have affected the right, title, and interest of the United States in and to the real property (together with copies of such legal comments or opinions as may be contained in the file concerning the manner in which and the extent to which such right, title, or interest may have been affected). In the absence of any such action, thing, or circumstance, a statement to that effect shall be made a part of the report.

(5) The status of civil and criminal jurisdiction over the land that is peculiar to the property by reason of it being Government-owned land. In the absence of any special circumstances, a statement to that effect shall be made a part of the report.

(c) There shall be transmitted with Standard Form 118:

(1) A legible, reproducible copy of all instruments in possession of the agency which affect the right, title, or interest of the United States in the property reported or the use and operation of such property (including agreements covering and licenses to use, any patents, processes, techniques, or inventions). In cases where the agency considers it to be impracticable to transmit the abstracts of title and related title evidence, such documents need not be transmitted; however, the name and address of the custodian of such documents shall be stated in the title report referred to in § 101–47.202–2(b) and they shall be furnished if requested by GSA; and

(2) Any appraisal reports in the possession of the holding agency of the fair market value or the fair annual rental of the property reported.

**§ 101–47.202–3 Submission of reports.**

Reports of excess shall be filed with the regional office of GSA for the region in which the excess property is located, as follows:

(a) Government-owned real property and related personal property shall be reported by the holding agencies 90-calendar days in advance of the date such excess property shall become available for transfer to another Federal agency or for disposal. Where the circumstances will not permit excess real property and related personal property to be reported a full 90-calendar days in advance of the date it will be available, the report shall be made as far in advance of such date as possible.

(b) Leasehold interests in real property determined to be excess shall be reported at least 60-calendar days prior to the date on which notice of termination or cancellation is required by the terms of the instrument under which the property is occupied.

(c) All reports submitted by the Department of Defense shall bear the certification "This property has been screened against the known needs of the Department of Defense." All reports submitted by civilian agencies shall bear the certification "This property has been screened against the known needs of the holding agency."

**§ 101–47.202–4 Exceptions to reporting.**

(a) A holding agency shall not report to GSA leased space assigned to the agency by GSA and determined by the agency to be excess.

(b) Also, except for those instances set forth in § 101–47.202–4(c) a holding agency shall not report to GSA property used, occupied, or controlled by the Government under a lease, permit, license, easement, or similar instrument when:

(1) The lease or other instrument is subject to termination by the grantor or owner of the premises within nine months;

(2) The remaining term of the lease or other instrument, including renewal rights, will provide for less than nine months of use and occupancy;

(3) The term of the lease or other instrument would preclude transfer to, or use by, another Federal agency or disposal to a third party; or

(4) The lease or other instrument provides for use and occupancy of space for office, storage, and related facilities, which does not exceed a total of 2,500 sq. feet.

(c) Property, which otherwise would not be reported because it falls within the exceptions set forth in § 101–47.202–4 (b) shall be reported:

(1) If there are Government-owned improvements located on the premises; or

(2) If the continued use, occupancy, or control of the property by the Government is needful for the operation, production, or maintenance of other property owned or controlled by the Government that has been reported excess or is required to be reported to GSA under the provisions of this section.

**§ 101–47.202–5 Reporting after submissions to the Congress.**

Reports of excess covering property of the military departments and of the Office of Emergency Planning prepared after the expiration of 30 days from the date upon which a report of the facts concerning the reporting of such property was submitted to the Committees on Armed Services of the Senate and House of Representatives, 10 U.S.C. 2662 and the Act of August 10, 1956, 70A Stat. 636, as amended (50 U.S.C. App. 2285), shall contain a statement that the requirements of the statute have been met.

**§ 101–47.202–6 Reports involving the public domain.**

(a) Agencies holding land withdrawn or reserved from the public domain which they no longer need, shall report on Standard Form 118, with appropriate Schedules A, B, and C, land or portions of land so withdrawn or reserved and the improvements thereon, if any, to the regional office of GSA for the region in which the lands are located when the agency has:

(1) Filed a notice of intention to relinquish with the Department of the Interior and sent a copy of the notice to the regional office of GSA (§ 101–47.201–3);

(2) Been notified by the Department of the Interior that the Secretary of the Interior, with the concurrence of the Administrator of General Services, has determined the lands are not suitable for return to the public domain for disposition under the general public land laws because the lands are substantially changed in character by improvements or otherwise; and

(3) Obtained from the Department of the Interior a report as to whether any agency (other than the holding agency) claims primary, joint, or secondary jurisdiction over the lands and whether the Department's records show the lands to be encumbered with any existing valid rights or privileges under the public land laws.

(b) Should the Department of the Interior determine that minerals in the lands are not suitable for disposition under the public land mining and mineral leasing laws, the Department will notify the appropriate regional office of GSA of such determination and will authorize the holding agency to include the minerals in its report to GSA.

(c) When reporting the property to GSA, a true copy of the notification (§ 101–47.202–6(a)(2)) and report (§ 101–47.202–6(a)(3)) shall be submitted as a part of the holding agency's report on the Government's legal title which shall accompany Standard Form 118.

**§ 101–47.202–7 Reports involving contaminated property.**

Any report of excess covering property which in its present condition is dangerous or hazardous to health and safety, shall state the extent of such contamination, the plans for decontamination, and the extent to which the property may be used without further decontamination.

**§ 101–47.202–8 Notice of receipt.**

GSA shall promptly notify the holding agency of the date of receipt of each Report of Excess Real Property (Standard Form 118).

**§ 101–47.202–9 Expense of care and handling.**

In each case where the provisions of § 101–47.402–2 relating to the expense of physical care, handling, protection, maintenance, and repairs are applicable to the property reported, the notice provided in § 101–47.202–8 shall also inform the holding agency that the provisions of § 101–47.402–2 became effective as of the date of the receipt of the report.

**§ 101–47.202–10 Examination for acceptability.**

Each report of excess shall be reviewed by GSA to ascertain whether the report was prepared in accordance with the provisions of this section. Within fifteen calendar days after receipt of a report, the holding agency shall be informed by letter of the findings of GSA.

(a) Where it is found that a report is adequate to the extent that GSA can proceed with utilization and disposal actions for the property, the report shall be accepted and the holding agency shall be informed of the date of such acceptance. However, the holding agency shall, upon request, promptly furnish such additional information or documents relating to the property as may be required by GSA to accomplish a transfer or a disposal.

(b) Where it is found that a report is insufficient to the extent that GSA would be unable to proceed with any utilization or disposal actions for the property, the report shall be returned and the holding agency shall be informed of the facts and circumstances that required the return of the report. The holding agency promptly shall take such action as may be appropriate to submit an acceptable report to GSA. Should the holding agency be unable to submit an acceptable report, the property shall be removed from under the provisions of § 101–47.402–2.

**§ 101–47.203 Utilization.**

**§ 101–47.203–1 Reassignment of real property by the agencies.**

Each executive agency shall, as far as practicable and within the policies expressed in this Subpart 101–47.2 and in Bureau of the Budget Circular No. A–2 (see § 101–47.4908), make reassignments of real property and related personal property under its control and jurisdiction among activities within the agency in lieu of acquiring such property from other sources.

**§ 101–47.203–2 Transfer and utilization.**

Each executive agency shall, as far as practicable and within the policies expressed in this Subpart 101–47.2 and in Bureau of the Budget Circular No. A–2, transfer excess real property under its control to other Federal agencies and to the organizations specified in § 101–47.203–7, and fulfill its requirements for real property by obtaining excess real property from other Federal agencies. Transfers of property shall be made in accordance with the provisions of this subpart.

**§ 101–47.203–3 Notification of agency requirements.**

Each executive agency shall notify the proper GSA regional office, in writing, whenever real property is needed for an authorized program of the agency. The notice shall state the land area of the property needed, the preferred location or suitable alternate locations, and describe the type of property needed in sufficient detail to enable GSA to review its records of property that it knows will be reported excess by holding agencies, its inventory of excess property, and its inventory of surplus property, to ascertain whether any such property may be suitable for the needs of the agency. The agency shall be promptly informed by the GSA regional office as to whether or not any such property is available.

**§ 101–47.203–4 Real property excepted from reporting.**

Agencies having transferable excess real property and related personal property in the categories excepted from reporting by § 101–47.202–4 shall, before disposal, satisfy themselves in a manner consistent with the provisions of this section that such property is not needed by other Government agencies.

**§ 101–47.203–5 Screening of excess real property.**

Excess real property and related personal property reported by executive agencies shall, unless such screening is waived, be screened by GSA for utilization by Federal real property holding agencies (listed in § 101–47.4907), which may reasonably be expected to have use for the property as follows:

(a) Notices of availability shall be submitted to each such agency which shall, within 30 days from the date of notice, advise GSA if there is a firm requirement or a tentative requirement for the property.

(1) In the event a tentative requirement exists, the agency shall, within an additional 30 days, advise GSA if there is a firm requirement.

(2) Within 60 days after advice to GSA that a firm requirement exists, the agency shall furnish GSA a request for transfer of the property pursuant to § 101–47.203–7.

(b) Notices of availability for information of the Secretary of Health, Education, and Welfare in connection with the exercise of the authority vested in him under the provisions of section 203(k)(1) of the Act and for information of the Secretary of the Interior in connection with a possible determination under the provisions of section 13(h) of the Surplus Property Act of 1944 (50 U.S.C. App. 1622(h)), shall be sent to the offices designated by the Secretaries to serve the areas in which the properties are located. (See §§ 101–47.4912 and 101–47.4914.) With the prior consent of GSA, on a case-by-case basis, the Department of Health, Education, and Welfare may initiate screening for potential educational or public health applicants for property described in any such notice, or with such consent may develop a known potential educational or public health need, conditioned upon the property being determined surplus to Federal requirements and available for assignment to the Secretary for disposal for educational or public health purposes in the event it is so determined surplus. Also, with the prior approval of GSA, on a case-by-case basis, and subject to the same conditions set for the Department of Health, Education, and Welfare, the Bureau of Outdoor Recreation, Department of the Interior, may apprise eligible local public agencies of excess property peculiarly adaptable for use for public park, public recreation, or historic monument purposes.

**§ 101–47.203–6 Prefabricated movable structures and trailers.**

Prefabricated movable structures such as Butler-type storage warehouses, quonset huts, and housetrailers (with or without undercarriages) reported to GSA with the land on which they are located may, in the discretion of GSA, be designated for disposition as personal property for off-site use.

**§ 101–47.203–7 Transfers.**

(a) The agency requesting transfer of excess real property and related personal property reported to GSA shall prepare and submit to the proper GSA regional office, GSA Form 1334, Request for Transfer of Excess Real Property and Related Personal Property (§ 101–47.4904). Instructions for the preparation of GSA Form 1334 are set forth in § 101–47.4904–1.

(b) Upon determination by GSA, with the concurrence of the Bureau of the Budget when required (see § 101–47.203–7(c)), that a transfer of the property requested is in the best interest of the Government and that the requesting agency is the appropriate agency to hold the property, such transfer may be made among Federal agencies and to mixed-ownership Government corporations, and the municipal government of the District of Columbia.

(c) In the case of transfers involving excess land, which together with any improvements thereon has a total appraised fair market value of $100,000 or more, GSA shall secure the concurrence of the Bureau of the Budget to the transfer.

(d) Transfers of property to executive agencies shall be consistent with the policy of the Administrator of General Services prescribed in § 101–47.201–1 and the policy guidelines prescribed in § 101–47.201–2. In determining whether a proposed transfer should be approved under the policy guidelines, GSA and the Bureau of the Budget may consult informally to obtain all available data concerning actual program needs for the property.

(e) GSA will execute or authorize all approved transfers to the requesting agency of property reported to GSA. Agencies may transfer without reference to GSA excess real property which is not reported to GSA under the provisions of § 101–47.202–4(b) (1), (2), and (4). However, such transfers shall be made in accordance with the principles set forth in this section.

(f) Pursuant to an agreement between the Director, Bureau of the Budget, and the Administrator of General Services, reimbursement for transfers of excess real property is prescribed as follows:

(1) Where the transferor agency has requested the net proceeds of the transfer pursuant to section 204(c) of the Act, or where either the transferor or transferee agency (or organizational unit affected) is subject to the Government Corporation Control Act (31 U.S.C. 841) or is a mixed-ownership Government corporation, or the municipal government of the District of Columbia, reimbursement for the transfer shall be an amount equal to the appraised fair market value of the property requested: *Provided*, That where the transferor agency is a wholly owned Government corporation, the reimbursement shall be either an amount equal to the appraised fair market value of the property requested or the corporation's book value thereof, as may be agreed upon by GSA and the corporation.

(2) Reimbursement in all other transfers of excess real property shall be:

(i) In an amount equal to 50 percent of the appraised fair market value of the property requested, or if the transfer is for the purpose of upgrading facilities (i.e., for the purpose of replacing other property of the transferee agency which because of the location, nature, or condition thereof, is less efficient for use), the reimbursement shall be an amount equal to 50 percent of the difference between the appraised fair market value of the property to be replaced and the appraised fair market value of the property requested; or

(ii) Without reimbursement when the transfer is to be made under any one of the following conditions:

(A) The transferee agency clearly demonstrates that it cannot furnish the required reimbursement without obtaining an additional appropriation for that specific purpose.

(B) The transferee agency demonstrates that reimbursement could be made only by diverting funds which were justified to Congress to be used for some other purpose.

(C) The Congress appropriated funds for the transferee agency's program with the understanding that the transfer would be made without reimbursement.

(D) Congress has specifically authorized the transfer without reimbursement.

(E) The excess real property is to be transferred to the Department of Agriculture, is within the exterior boundaries of, and is suitable for addition to a national forest, and the Administrator of General Services determines that such property is available for that purpose.

(iii) A transfer without reimbursement, based on § 101–47.203–7(f)(2)(ii)(A), (B), or (C), shall be supported by a written certification by the head of the transferee agency or military department, or his designee (not below departmental level), with regard to those matters, and in the case of (A) and (B) documented with appropriate financial statements, and in the case of (C) include appropriate citations to congressional hearings, reports, etc. A transfer based on (D) shall be supported by appropriate statutory citations. A transfer based on (E) shall be supported by appropriate maps and land descriptions concerning the exterior boundaries of the national forest in relationship to the property proposed for transfer and the authority or order establishing the national forest. The above required data and documents shall be attached to GSA Form 1334 by the transferee agency on submission of that form to GSA.

(g) Excess property may be transferred to the Senate, the House of Representatives, and the Architect of the Capitol and any activities under his direction, pursuant to the provisions of section 602(c) of the Act. The amount of reimbursement for such transfer shall

No. 235—2

be the same as would be required for a transfer of excess property to an executive agency under similar circumstances.

**§ 101–47.203–8 Temporary utilization.**

(a) Whenever GSA determines that the temporary assignment or reassignment to a Federal agency of any space in excess real property for office, storage, or related facilities would be more advantageous than the permanent transfer of the property to a Federal agency, it will execute or authorize such assignment or reassignment for such period of time as it shall determine. The agency to which the space is made available shall make appropriate reimbursement for the expense of maintaining such space in the absence of appropriation available to GSA therefor.

(b) GSA may approve the temporary assignment or reassignment to a Federal agency of excess real property other than space for office, storage, or related facilities whenever such action would be in the best interest of the Government. In such cases, the agency to which the property is made available may be required to pay a rental or users charge based upon the fair value of such property, as determined by GSA. Where such property will be required by the agency for a period of more than 1 year, it may be transferred on a conditional basis, with an understanding that the property will be reported excess at a time agreed upon when the transfer is arranged (see § 101–47.201–2(d)(7)).

**§ 101–47.203–9 Non-Federal interim use of property.**

The holding agency may, with the approval of GSA, grant rights for non-Federal interim use of excess property reported to GSA, or portions thereof, when it is determined that such interim use is not required for the needs of any Federal agency.

**§ 101–47.203–10 Withdrawals.**

Subject to the approval of GSA, reports of excess real property and related personal property may be withdrawn in whole or in part by the reporting agency at any time prior to transfer to another Federal agency or prior to the execution of a legally binding agreement for disposal as surplus property. Requests for withdrawals shall be addressed to the GSA regional office where the report of excess real property was filed.

**§ 101–47.204 Determination of surplus.**

**§ 101–47.204–1 Reported property.**

Any real property and related personal property reported excess under this Subpart 101–47.2 which has been screened for needs of Federal agencies or waived from such screening by GSA, and not been designated by GSA for utilization by a Federal agency, shall be subject to determination as surplus property by GSA.

(a) The holding agency, the Secretary of Health, Education, and Welfare, and the Secretary of the Interior shall be notified of the date upon which determination as surplus becomes effective.

(b) The notices to the Secretaries of Health, Education, and Welfare and the Interior shall be sent to the offices designated by them to serve the area in which the property is located. (See §§ 101–47.4910 and 101–47.4912.)

(c) With regard to surplus property which GSA predetermines will not be available for assignment to the Secretary for disposal for an educational or public health purpose under a statute cited in § 101–47.4905, or whenever the holding agency has requested reimbursement of the net proceeds of disposition pursuant to section 204(c) of the Act, the notice shall contain advice of such determination or request for reimbursement. The Department of Health, Education, and Welfare shall not screen for potential educational or public health applicants for any such property. Similarly, the notice to the Department of the Interior shall contain such determination or request whenever GSA predetermines that the property will not be available for transfer for use as a public park, public recreational area, or historic monument, or whenever the holding agency has requested reimbursement.

**§ 101–47.204–2 Property excepted from reporting.**

Any property not reported to GSA due to § 101–47.202–4, and not designated by the holding agency for utilization by other agencies pursuant to the provisions of this Subpart 101–47.2, shall be subject to determination as surplus by the holding agency.

## Subpart 101–47.3—Surplus Real Property Disposal

**§ 101–47.300 Scope of subpart.**

This subpart prescribes the policies and methods governing the disposal of surplus real property and related personal property within the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and the Virgin Islands. This subpart does not apply to the abandonment, destruction, or donation to public bodies, under section 202(h) of the Act (covered by Subpart 101–47.5).

**§ 101–47.301 General provisions of subpart.**

**§ 101–47.301–1 Policy.**

It is the policy of the Administrator of General Services:

(a) That surplus real property shall be disposed of in the most economical manner consistent with the best interests of the Government.

(b) That credit be extended when justified.

**§ 101–47.301–2 Applicability of antitrust laws.**

(a) In any case in which there is contemplated a disposal to any private interest of real and related personal property which cost $1,000,000 or more (aggregate amount of the original acquisition cost to the Government and all capital expenditures made by the Government with respect thereto), or of patents, processes, techniques, or inventions, irrespective of cost, the disposal agency shall transmit promptly to the Attorney General notice of any such proposed disposal and the probable terms or conditions thereof, as required by section 207 of the Act, for his advice as to whether the proposed disposal would tend to create or maintain a situation inconsistent with the antitrust laws, and no such real property shall be disposed of until such advice has been received. If such notice is given by any executive agency other than GSA, a copy of the notice shall be transmitted simultaneously to the office of GSA for the region in which the property is located.

(b) Upon request of the Attorney General, GSA or any other executive agency shall furnish or cause to be furnished such information as it may possess which the Attorney General determines to be appropriate or necessary to enable him to give the requested advice or to determine whether any other disposition or proposed disposition of surplus real property violates or would violate any of the antitrust laws.

**§ 101–47.301–3 Disposals under other laws.**

Pursuant to section 602(c) of the Act, disposals of real property shall not be made under other laws but shall be made only in strict accordance with the provisions of this Subpart 101–47.3 unless the Administrator of General Services, upon written application by the disposal agency, shall determine in each case that the provisions of any such other law, pursuant to which disposal is proposed to be made, are not inconsistent with the authority conferred by this Act. The provisions of this section shall not apply to disposals of real property authorized to be made by section 602(d) of the Act or by any special statute which directs or requires an executive agency named therein to transfer or convey specifically described real property in accordance with the provisions of such statute.

**§ 101–47.301–4 Credit disposals and leases.**

Where credit is extended in connection with any disposal of surplus property by a disposal agency designated under this Subpart 101–47.3, the head of that agency, or his designee, shall administer and manage such credit, lease, or permit and any security therefor and may enforce, adjust, and settle any right of the Government with respect thereto in such manner and upon such terms as that agency deems to be in the best interest of the Government.

**§ 101–47.301–5 Records and reports.**

All agencies designated as disposal agencies in § 101–47.302 (except GSA), shall submit to GSA reports on GSA Form 1100, Report of Surplus Real Property Disposals and Inventory (see § 101–47.4903), covering surplus real property and related personal property disposed of pursuant to the authority contained in § 101–47.302 or otherwise delegated by the Administrator of General Services. Reports shall be based on appropriate agency records which shall be maintained to show full compliance with applicable statutory provisions relating to each disposal action and with the provisions of this Subpart 101–47.3. A disposal action shall be reported when a legally binding agreement is reached on terms and conditions mutually acceptable by an authorized official of the disposal agency and the party to which the disposal is made. Surplus real and related personal properties awaiting disposal as of the end of the reporting period shall be reported as inventory. Instructions for the preparation and submission of GSA Form 1100 are set forth in § 101–47.4903–1.

**§ 101–47.302 Designation of disposal agencies.**

**§ 101–47.302–1 General.**

Surplus real property and related personal property shall be disposed of (or assigned to the Secretary of Health, Education, and Welfare for disposal for educational and public health purposes) by the disposal agencies designated in this section in accordance with applicable provisions of this Subpart 101–47.3.

**§ 101–47.302–2 Holding agency.**

(a) The holding agency is hereby designated as disposal agency for:

(1) Leases, permits, licenses, easements, and similar real estate interests held by the Government in non-Government-owned property (including Government-owned improvements located on the premises), except when the retention of such real estate interests by the Government is needed for the operation, production, or maintenance of other property, owned or controlled by the Government, that has been or is being reported to GSA as excess; and

(2) Fixtures, structures, and improvements of any kind to be disposed of without the underlying land.

(b) GSA may act as the disposal agency for the type of property described in § 101–47.302–2(a) (1) and (2), whenever requested by the holding agency to perform the disposal functions.

**§ 101–47.302–3 General Services Administration.**

GSA is the disposal agency for all real property and related personal property not covered by the above designations or by disposal authority delegated by the Administrator of General Services in specific instances.

**§ 101–47.303 Responsibility of disposal agency.**

**§ 101–47.303–1 Classification.**

Each surplus property, or, if the property is subdivided, each unit of property shall be classified by the disposal agency to determine the methods and conditions applicable to the disposal of the property. Classification shall be according to the estimated highest and best use for the property. The property may be reclassified from time to time by the disposal agency or by GSA whenever such action is deemed appropriate.

**§ 101–47.303–2 Disposals to public agencies.**

The disposal agency shall allow a reasonable period of time for public agencies (non-Federal) to develop a comprehensive and coordinated plan of use and procurement for surplus real property in which they may be interested. Citations of the statutes authorizing the disposal of property to public agencies, the type of property the public agencies may procure under each such statute, and the public agencies eligible to procure such property are given in § 101–47.4905.

(a) Whenever property is determined to be surplus, the disposal agency shall, on the basis of the information given in § 101–47.4905, list the public agencies eligible under the provisions of the statutes referred to above to procure the property or portions thereof, except that such listing need not be made with respect to:

(1) Any such property when the determination of the property as surplus is conditioned upon disposal limitations which would be inconsistent with disposal under the statutes authorizing disposal to eligible public agencies; or

(2) Any such property having an estimated fair market value of less than $1,000 except where the disposal agency has any reason to believe that an eligible public agency may be interested in the property.

(b) Prior to any public advertising, negotiation, or other disposal action with regard to the property, the disposal agency shall give notice to eligible public agencies that the property has been determined surplus. Such notice shall be prepared following the sample shown in § 101–47.4906, and shall be transmitted by a letter prepared following the sample shown in § 101–47.4906–1.

(1) Where the property is located in a State, the notice shall be given to the Governor of the State, to the county clerk or other appropriate official of the county in which the property is located, to the mayor or other appropriate official of the city or town in which the property is located, and to the head of any other eligible local governmental body known to be interested in the property.

(2) Where the property is located in the District of Columbia, the notice shall be given to the President of the Board of Commissioners.

(3) Where the property is located in the Virgin Islands, the notice shall be given to the Governor of the Virgin Islands.

(4) Where the property is located in the Commonwealth of Puerto Rico, the notice shall be given to the Governor of the Commonwealth of Puerto Rico.

(c) The notice prepared pursuant to § 101–47.303–2(b) shall also be posted in the post office which serves the area in which the property is located and in other prominent places such as the State capitol building, county building, courthouse, town hall, or city hall. The notice to be posted in the post office shall be mailed to the postmaster with a request that it be posted. Arrangements for the posting of the notice in other prominent places shall be as provided for in the transmittal letters (see § 101–47.4906–1) to eligible public agencies.

(d) A copy of each transmittal letter and notice given pursuant to § 101–47.303–2(b) shall be furnished to the proper field office of the Bureau of Outdoor Recreation, Department of the Interior; Federal Aviation Agency; Fish and Wildlife Service, Department of the Interior; or Bureau of Public Roads, Department of Commerce, concerned with the disposals of property to public agencies under the statutes stated in the notice.

(e) In the case of property which may be made available for assignment to the Secretary of Health, Education, and Welfare for disposal for educational or public health purposes under a statute cited in the notice:

(1) The disposal agency shall inform the proper regional office of the Department of Health, Education, and Welfare, listed in § 101–47.4910, three working days in advance of the date the notice will be given to public agencies to permit similar notice to be given simultaneously by the Department to nonprofit institutions which have been held exempt from taxation under section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)(3)).

(2) The disposal agency shall furnish the Department with a copy of the postdated transmittal letter addressed to each public agency, twenty-five copies of the postdated notice, and a copy of the holding agency's Report of Excess Real Property (Standard Form 118, with accompanying schedules).

(3) As of the date of the transmittal letter and notice to public agencies, the Department may proceed with its screening functions for any potential educational or public health applicants and thereafter may make its determinations of need and receive applications.

(f) If the disposal agency is not informed within the 20-calendar-day period stated in the notice of the desire of a public agency to develop and submit a comprehensive and coordinated plan of use and procurement for the property, or is not notified by the Department of Health, Education, and Welfare of a potential educational or public health requirement, it shall be assumed that no public agency or nonprofit institution desires to procure the property.

(g) The disposal agency shall promptly review each response of a public agency to the notice given pursuant to § 101–47.303–2(b), and shall determine what constitutes a reasonable period of time to allow the public agency to develop and submit a plan. When making such determination, consideration shall be given to the potential suitability of the property for the use proposed, the length of time the public agency has stated it will require to develop and submit a plan, the protection and maintenance costs to the Government during such length of time, and any other relevant facts and circumstances. Such review and determination shall be coordinated with the

proper regional office of the interested Federal agency listed below:

(1) Bureau of Outdoor Recreation, Department of the Interior.

(2) Department of Health, Education, and Welfare.

(3) Federal Aviation Agency.

(4) Fish and Wildlife Service, Department of the Interior.

(5) Bureau of Public Roads, Department of Commerce.

(h) When a determination has been made as to what constitutes a reasonable period of time to develop and submit a plan, the public agency shall be so notified. The public agency shall be advised of the information required in connection with an application to procure the property and shall be requested to provide such information with its plan.

(i) Upon receipt of the plan of use and procurement for the property, it shall be considered and acted upon in accordance with the provisions of the statute and applicable regulations.

**§ 101–47.303–3 Studies.**

The disposal agency shall compile from the title documents and related papers appropriate information, for use in disposal actions, regarding all real property and related personal property available for disposal.

**§ 101–47.303–4 Appraisal.**

(a) Except as otherwise provided in this Subpart 101–47.3, the disposal agency shall in all cases obtain an appraisal of the fair market value, and in appropriate cases the fair annual rental, of property available for disposal.

(b) No appraisal need be obtained in any one of these situations:

(1) The property is classified and is to be disposed of as airport property.

(2) The property is suitable for historic monument purposes and is to be disposed of with the use limited to such purpose to a State, political subdivision, instrumentality thereof, or municipality.

(3) The estimated fair market value of property to be offered on a competitive sale basis does not exceed $2,500.

(c) The disposal agency shall have the property appraised by experienced and qualified persons familiar with the types of property to be appraised by them. Any person engaged to collect or evaluate information pursuant to this subsection shall certify that he has no interest, direct or indirect, in the property which would conflict in any manner with the preparation and submission of an impartial appraisal report.

**§ 101–47.304 Advertised and negotiated disposals.**

**§ 101–47.304–1 Publicity.**

(a) The disposal agency shall widely publicize all surplus real property and related personal property which becomes available for disposal hereunder, giving information adequate to inform interested persons of the general nature of the property and its possible uses, as well as any reservations, restrictions, and conditions imposed upon its disposal.

(b) A condensed statement of proposed sales of surplus real property by advertising for competitive bids, except where the estimated fair market value of the property is less than $2,500, shall be prepared and submitted, for inclusion in the U.S. Department of Commerce publication "Commerce Business Daily," to: U.S. Department of Commerce (S-Synopsis), Room 1300, 433 West Van Buren Street, Chicago, Illinois, 60604.

**§ 101–47.304–2 Soliciting cooperation of local groups.**

The disposal agency may consult with local groups and organizations and solicit their cooperation in giving wide publicity to the proposed disposal of the property.

**§ 101–47.304–3 Information to interested persons.**

The disposal agency shall, upon request, supply to bona fide potential purchasers and lessees adequate preliminary information, and, with the cooperation of the holding agency where necessary, shall render such assistance to such persons as may enable them, insofar as feasible, to obtain adequate information regarding the property. The disposal agency shall establish procedures so that all persons showing due diligence are given full and complete opportunity to make an offer.

**§ 101–47.304–4 Invitation for offers.**

The disposal agency shall prepare and furnish to all prospective purchasers or lessees written invitations to make an offer, which shall contain or incorporate by reference all the terms and conditions under which the property is offered for disposal, including all provisions required by statute to be inserted in contracts for disposal of Government property. All terms and conditions of the invitation shall be made a part of the offer. The invitation shall further specify the form of the disposal instrument, which specifications shall be in accordance with the appropriate provisions of §§ 101–47.307–1 and 101–47.307–2.

(a) Where the disposal agency has determined that the sale of specific property on credit terms is justified, the invitation shall provide for submission of offers on the following terms, except that offers to purchase of less than $2,500; shall be for cash—

| *Purchase price* | *Terms of payment* |
|---|---|
| $2,500 but less than $10,000 | Downpayment of not less than 25 percent cash, balance 8 years or less, evidenced by purchaser's note, payable in equal quarter-annual installments (together with interest on unpaid balances at an annual rate of 5 percent) secured by purchase money mortgage or deed of trust on the property, whichever the Government determines to be appropriate. |
| $10,000 or more | Downpayment of not less than 20 percent cash, balance 10 years or less, evidenced by purchaser's note, payable in equal quarter-annual installments (together with interest on unpaid balances at an annual rate of 5 percent secured by a purchase money mortgage or deed of trust on the property, whichever the Government determines to be appropriate. |

(b) Where the disposal agency has determined that an offering of the property on more liberal credit terms is necessary to obtain greater competition in the local market, the invitation may provide for submission of offers on such alternate terms of payment as may be recommended by the disposal agency and approved by the Administrator of General Services. The sale in those cases where the downpayment is less than 20 percent shall, unless otherwise authorized by the Administrator of General Services, be under a land contract which shall provide, in effect, for conveyance of title to the purchaser by quitclaim deed or other form of conveyance in accordance with the appropriate provisions of §§ 101–47.307–1 and 101–47.307–2 upon payment of one-third of the total purchase price with accrued interest, or earlier if the Government so elects, and execution and delivery of purchaser's note and purchase money mortgage (or bond and deed of trust) satisfactory to the Government, to secure payment of the unpaid balance of the purchase price.

(c) The disposal agency may increase the cash downpayment requirement or shorten the period of amortization whenever circumstances warrant and in the case of sales of farms, may provide for payment of the unpaid balance on equal semiannual or annual installment basis.

(d) Where a sale is to be made on credit, the invitation shall provide that the purchaser agrees by appropriate provisions to be incorporated in the disposal instruments that he will not lease (unless the property was offered without leasing restrictions by the Government) or sell the property, or any part thereof or interest therein, without prior written authorization of the Government.

(1) In appropriate cases, except as provided in § 101–47.304–4(d)(2), the invitation shall state that the disposal instrument may include provisions specifically authorizing leasing and/or resale and release of portions of the property as desired by the purchaser, provided that such provisions shall, in the judgment of the Government, be adequate to protect its security for the credit extended to the purchaser.

(2) In the case of timber or mineral lands, or lands containing other saleable products, the invitation shall state that the disposal instrument may specifically provide for granting future partial releases to permit the resale of timber, minerals, and other saleable products, or authorize the leasing of mineral rights, upon payment to the Government of such amounts as may be required by the Government but not less than the proceeds of any sale or lease less such amounts as may be determined by the Government to represent the cost of the sale or lease.

(3) All payments for such authorizations and/or releases shall, at the option of the Government, be applied against the unpaid balance of the indebtedness in inverse order of its maturity, or upon any delinquent installments of principal and interest, or used for payments of any delinquent taxes or insurance premiums.

(e) Where property is offered for disposal under a land contract or lease, the terms and conditions contained in the invitation shall provide that the purchaser or lessee will be required to pay to the proper taxing authorities or to the disposal agency, as may be directed, all taxes, payments in lieu of taxes (in the event of the existence or subsequent enactment of legislation authorizing such payments), assessments or similar charges which may be assessed or imposed on the property, or upon the occupier thereof, or upon the use or operation of the property and to assume all costs of operating obligations.

(f) Whenever property is offered for sale on credit terms or for lease, the terms and conditions contained in the invitation shall provide that the purchaser or lessee shall procure and maintain at his expense during the term credit is extended, or the period of the lease, such insurance in such amounts as may be required by the Government; required insurance shall be in companies acceptable to the Government and shall include such terms and provisions as may be required to provide coverage satisfactory to the Government.

**§ 101–47.304–5 Inspection.**

All persons interested in the acquisition of surplus property available for disposal under this Subpart 101–47.3 shall, with the cooperation of the holding agency, where necessary, and with due regard to its program activities, be permitted to make a complete inspection of such property, including any available inventory records, plans, specifications, and engineering reports made in connection therewith, subject to any necessary restrictions in the interest of national security and subject to such rules as may be prescribed by the disposal agency.

**§ 101–47.304–6 Submission of offers.**

All offers to purchase or lease shall be in writing, accompanied by any required earnest money deposit, using the form prescribed by the disposal agency and, in addition to the financial terms upon which the offer is predicated, shall set forth the willingness of the offeror to abide by the terms, conditions, reservations, and restrictions upon which the property is offered, and shall contain such other information as the disposal agency may request.

**§ 101–47.304–7 Advertised disposals.**

(a) All disposals or contracts for disposal of surplus property, except as provided in §§ 101–47.304–9 and 101–47.304–10, shall be made after publicly advertising for bids.

(1) The advertising for bids shall be made at such time previous to the disposal or contract, through such methods, and on such terms and conditions as shall permit that full and free competition which is consistent with the value and nature of the property involved. The advertisement shall designate the place to which the bids are to be delivered or mailed, and shall state the place, date, and time of public opening.

(2) All bids shall be publicly disclosed at the time and place stated in the advertisement.

(3) Award shall be made with reasonable promptness by notice to the responsible bidder whose bid, conforming to the invitation for bids, will be most advantageous to the Government, price and other factors considered: *Provided*, That all bids may be rejected when it is in the public interest to do so.

(b) Disposal and contracts for disposal of surplus property may be made through contract auctioneers when authorized by GSA. The auctioneer retained under contract shall be required to publicly advertise for bids in accordance with the applicable provisions of this § 101–47.304–7.

**§ 101–47.304–8 Report of identical bids.**

(a) Executive Order No. 10936 of April 24, 1961 (26 F.R. 3555; 3 CFR 1959–1963 Comp.), requires executive agencies to report information on identical bids to the Department of Justice. When an invitation for bids for the sale of property results in the submission of identical bids under the conditions set forth in § 101–47.304–8(a) (1), (2), and (3), a copy of the invitation and a copy of the completed abstract of bids, with identical bid prices (other than nominal or token bids) circled, shall be forwarded to the Attorney General (a copy of the report to the Attorney General shall be transmitted simultaneously to the office of GSA for the region in which the property is located) within 20 days following the disposition of all bids received in response to the invitation involved:

(1) Where bids or offers were solicited through the formal sealed bid method of sale;

(2) Where the bid value of the line item(s) on which identical bids were received exceeds $2,500 (based on the apparent high bid received for such line item); and

(3) Where the total bid value of all line items covered by the invitation exceeds $10,000 (based on the apparent high bid received for each line item).

(b) As used in this § 101–47.304–8:

(1) The term "identical bids" means two or more bids received for the same line item of an invitation for bids issued under formal advertising procedures which:

(i) Appear on the face of the bids to be identical as to unit price or total amount; or

(ii) Are found, in the contracting agency's normal process of evaluating bids for award, to be identical as to unit price or total amount.

(2) The term "line item" means each item of property specified in an invitation for bids which, under the terms of the invitation, is susceptible to a separate contract award.

(c) The Attorney General may, from time to time, request such supplemental information as he may deem necessary for effective enforcement of antitrust laws.

(d) The submission of information on identical bids is in addition to and is not to be considered as satisfying the requirements of § 101–47.301–2, for notifying the Attorney General and the Administrator of General Services regarding proposed disposals which might further a situation inconsistent with the antitrust laws.

**§ 101–47.304–9 Negotiated disposals.**

(a) Disposal agencies shall obtain such competition as is feasible under the circumstances in all negotiations of disposals and contracts for disposal of surplus property. They may dispose of surplus property by negotiation only in the following situations:

(1) When the estimated fair market value of the property involved does not exceed $1,000;

(2) When bid prices after advertising therefor are not reasonable (either as to all or some part of the property) or have not been independently arrived at in open competition;

(3) When the character or conditions of the property or unusual circumstances make it impractical to advertise publicly for competitive bids and the fair market value of the property and other satisfactory terms of disposal can be obtained by negotiation;

(4) When the disposals will be to States, Commonwealth of Puerto Rico, possessions, political subdivisions thereof, or tax-supported agencies therein, and the estimated fair market value of the property and other satisfactory terms of disposal are obtained by negotiation; or

(5) When negotiation is otherwise authorized by the Act or other law, such as:

(i) Disposals of power transmission lines for public or cooperative power projects (see § 101–47.308–1).

(ii) Disposals for public airport utilization (see § 101–47.308–2).

(iii) Disposals for public parks, recreational areas, or historic monument sites (see § 101–47.308–3).

(b) Appraisal data required pursuant to the provisions of § 101–47.303–4, when needed for the purpose of conducting negotiations under § 101–47.304–9(a), (3), (4), (5)(i), or (5)(iii), except in the case of historic monument sites, shall be obtained under contractual arrangements with experienced and qualified real estate appraisers familiar with the types of property to be appraised by them: *Provided, however*, That in any case where the cost of obtaining such data from a contract appraiser would be out of proportion with the expected

recoverable value of the property, or if for any other reason employing a contract appraiser would not be in the best interest of the Government, the head of the disposal agency, or his designee, should authorize such other method of obtaining an estimate of the fair market value of the property, or the fair annual rental, as he may deem to be proper.

**§ 101–47.304–10 Disposals by brokers.**

Disposals and contracts for disposal of surplus property through contract realty brokers, where authorized by GSA, shall be made in the manner followed in similar commercial transactions. Realty brokers retained under contracts shall be required to give wide public notice of availability of the property for disposal.

**§ 101–47.304–11 Documenting determinations to negotiate.**

The disposal agency shall document the factors leading to and the determination justifying disposal by negotiation of any surplus property under §§ 101–47.304–9 and 101–47.304–10, and shall retain such documentation in the files of the agency.

**§ 101–47.304–12 Explanatory statements.**

(a) Subject to the exceptions stated in § 101–47.304–12(b), the disposal agency shall prepare an explanatory statement, as required by section 203(e)(6) of the Act, of the circumstances of each proposed disposal by negotiation.

(b) No explanatory statement need be prepared for:

(1) A disposal of property having a fair market value of $1,000 or less; and

(2) A disposal of property authorized to be disposed of without advertising by any provision of law other than section 203(e) of the Act.

(c) An outline for the preparation of the explanatory statement is shown in § 101–47.4911. The explanatory statement shall be mimeograph or similar type process and a copy thereof shall be preserved in the files of the disposal agency.

(d) Each explanatory statement when prepared shall be submitted to the Administrator of General Services for review and transmittal by the Administrator of General Services by letters to the Committees on Government Operations and any other appropriate committees of the Senate and House of Representatives. The submission to the Administrator of General Services shall include such supporting data as may be relevant and necessary for evaluating the proposed action and 20 copies of the duplicated explanatory statement.

(e) Copies of the Administrator of General Services' transmittal letters to the committees of the Congress, § 101–47.304–12(d), will be furnished to the disposal agency.

(f) In the absence of adverse comment by an appropriate committee or subcommittee of the Congress on the proposed negotiated disposal, the disposal agency may consummate the sale on or after 35 days from the date of the Administrator of General Services letters transmitting the explanatory statement to the committees.

**§ 101–47.305 Acceptance of offers.**

**§ 101–47.305–1 General.**

(a) When the head of the disposal agency or his designee determines that bid prices (either as to all or some part of the property) received after advertising therefor or received in response to the action authorized in paragraph (b) of this § 101–47.305–1, are reasonable, i.e., commensurate with the fair market value of the property, and were independently arrived at in open competition, award shall be made with reasonable promptness by notice to the bidder whose bid, conforming to the invitation for bids, will be most advantageous to the Government, price and other factors considered. Any or all offers may be rejected when the head of the disposal agency or his designee determines it is in the public interest to do so.

(b) Where the advertising does not result in the receipt of a bid at a price commensurate with the fair market value of the property, the highest bidder may, at the discretion of the head of the disposal agency or his designee and upon determination of responsiveness and bidder responsibility, be afforded an opportunity to increase his offered price. The bidder shall be given a reasonable period of time, not to exceed five working days, to respond. At the time the bidder is afforded an opportunity to increase his bid, all other bids shall be rejected and bid deposits returned. Any sale at a price so increased may be concluded without regard to the provisions of §§ 101–47.304–9 and 101–47.304–12.

(c) The disposal agency shall allow a reasonable period of time within which the successful bidder shall consummate the transaction and shall notify the successful bidder of the period allowed.

(d) It is within the discretion of the head of the disposal agency or his designee to determine whether the procedure authorized by paragraph (b) of this § 101–47.305–1 is followed or whether the bids shall be rejected and the property reoffered for sale on a publicly advertised competitive bid basis in accordance with the provisions of § 101–47.304–7, or disposed of by negotiation pursuant to § 101–47.306–1, or offered for disposal under other applicable provisions of this Subpart 101–47.3.

**§ 101–47.305–2 Equal offers.**

"Equal offers" means two or more offers that are equal in all respects, taking into consideration the best interests of the Government. If equal acceptable offers are received for the same property, award shall be made by a drawing by lot limited to the equal acceptable offers received.

**§ 101–47.305–3 Notice to unsuccessful bidders.**

When an offer for surplus real property has been accepted, the disposal agency shall notify all other bidders of such acceptance and return their earnest money deposits, if any.

**§ 101–47.306 Absence of acceptable offers.**

**§ 101–47.306–1 Negotiations.**

(a) When the head of the disposal agency or his designee determines that bid prices after advertising therefor (including the action authorized by the provisions of § 101–47.305–1(b)) are not reasonable either as to all or some part of the property or were not independently arrived at in open competition and that a negotiated sale rather than a disposal by readvertising or under other applicable provisions of this subpart would better protect the public interest, the property or such part thereof may be disposed of by negotiated sale after rejection of all bids received: *Provided*, That no negotiated disposal may be made under this § 101–47.306–1 unless:

(1) Notification of the intention to negotiate and reasonable opportunity to negotiate shall have been given by the agency head or his designee to each responsible bidder who submitted a bid pursuant to the advertising;

(2) The negotiated price is higher than the highest rejected bid price offered by any responsible bidder, as determined by the head of the agency or his designee; and

(3) The negotiated price is the highest negotiated price offered by any responsible prospective purchaser.

(b) Any such negotiated disposal shall be subject to the applicable provisions of §§ 101–47.304–9 and 101–47.304–12.

**§ 101–47.306–2 National Industrial Reserve properties.**

In the event that any disposal agency is unable to dispose of any surplus industrial plant because of the application of the conditions and restrictions of the National Security Clause imposed under the National Industrial Reserve Act of 1948 (50 U.S.C. 451), after making every practicable effort to do so, it shall notify the Secretary of Defense, indicating such modifications in the National Security Clause, if any, which in its judgment will make possible the disposal of the plant. Upon agreement by the Secretary of Defense to any and all of such modifications, the plant shall be reoffered for disposal subject to such modifications as may have been so agreed upon; or if such modifications are not agreed to, and upon request of the Secretary of Defense, the plant shall be transferred to the custody of GSA.

**§ 101–47.307 Conveyances.**

**§ 101–47.307–1 Form of deed or instrument of conveyance.**

Disposals of real property shall be by quitclaim deed or deed without warranty in conformity with local law and practice, unless the disposal agency finds that another form of conveyance is necessary to obtain a reasonable price for the property or to render the title marketable, and unless the use of such other form of conveyance is approved by GSA.

**§ 101–47.307–2 Conditions in disposal instruments.**

(a) Where a sale is made upon credit, the purchaser shall agree by appropriate provisions to be incorporated in the disposal instruments, that he will not resell or lease (unless due to its character or type the property was offered without leasing restrictions by the disposal agency) the property, or any part thereof or interest therein, without the prior written authorization of the disposal agency and such disposal instruments in appropriate cases may specifically provide for such authorization and/or future partial releases to be granted on terms which will adequately protect the Government's security for the credit extended to the purchaser.

(b) Any deed, lease, or other instrument executed to dispose of property under this subpart, subject to reservations, restrictions, or conditions as to the future use, maintenance, or transfer of the property shall recite all representations and agreements pertaining thereto.

**§ 101–47.307–3 Distribution of conformed copies of conveyance instruments.**

(a) Two conformed copies of any deed, lease, or other instrument containing reservations, restrictions, or conditions regulating the future use, maintenance, or transfer of the property shall be provided the agency charged with enforcement of such reservations, restrictions, or conditions.

(b) A conformed copy of the deed, lease, or other conveyance instrument shall be provided to the holding agency by the disposal agency.

**§ 101–47.307–4 Disposition of title papers.**

The holding agency shall, upon request, deliver to the disposal agency all title papers in its possession relating to the property reported excess. The disposal agency may transfer to the purchaser of the property, as a part of the disposal transaction, the pertinent records authorized by § 101–11.404–2, to be so transferred. If the purchaser of the property wishes to obtain additional records, copies thereof may be furnished to the purchaser with or without charge, as determined by the agency having custody of the records.

**§ 101–47.307–5 Title transfers from Government corporations.**

In order to facilitate the administration and disposition of real property when record title to such property is not in the name of the United States of America, the holding agency, upon request of the Administrator of General Services, shall deliver to the disposal agency a quitclaim deed, or other instrument of conveyance without warranty, expressed or implied, transferring all of the right, title, and interest of the holding agency in such property to the United States of America.

**§ 101–47.307–6 Proceeds from disposals.**

All proceeds from any sale, lease, or other disposition of surplus real property and related personal property shall be covered into the Treasury as miscellaneous receipts, except as provided in sections 204(b), (c), (d), (e), and (f) of the Act.

**§ 101–47.308 Special disposal provisions.**

**§ 101–47.308–1 Power transmission lines.**

(a) Pursuant and subject to the provisions of section 13(d) of the Surplus Property Act of 1944 (50 U.S.C. App. 1622(d)), which is continued in effect by section 602(a) of the Federal Property and Administrative Services Act of 1949, any State or political subdivision thereof, or any State or Government agency or instrumentality may certify to the disposal agency that a surplus power transmission line and the right-of-way acquired for its construction is needful for or adaptable to the requirements of a public or cooperative power project. Disposal agencies shall notify such State entities and Government agencies of the availability of such property in accordance with § 101–47.303–2.

(b) Notwithstanding any other provisions of this subpart, whenever a State or political subdivision thereof, or a State or Government agency or instrumentality certifies that such property is needful for or adaptable to the requirements of a public or cooperative power project, the property may be sold for such utilization at the fair market value thereof.

(c) In the event a sale cannot be accomplished by reason of the price to be charged or otherwise and the certification is not withdrawn, the disposal agency shall report the facts involved to the Administrator of General Services, for a determination by him as to the further action to be taken to dispose of the property.

(d) Any power transmission line and right-of-way not disposed of pursuant to the provisions of this section shall be disposed of in accordance with other applicable provisions of this subpart, including, if appropriate, reclassification by the disposal agency.

**§ 101–47.308–2 Property for public airports.**

(a) Pursuant and subject to the provisions of section 13(g) of the Surplus Property Act of 1944 (50 U.S.C. App. 1622(g)), which is continued in effect by section 602(a) of the Federal Property and Administrative Services Act of 1949 and amended by the Act of October 1, 1949, 63 Stat. 700, and section 1402(c) of the Federal Aviation Act of 1958, 72 Stat. 807 (50 U.S.C. App. 1622a–1622c), airport property may be conveyed or disposed of to a State, political subdivision, municipality, or tax-supported institution for a public airport. Airport property is any surplus real property including improvements and personal property located thereon as a part of the operating unit (exclusive of property the highest and best use of which is determined by the Administrator of General Services to be industrial and which shall be so classified for disposal without regard to the provisions of this section) which, in the determination of the Administrator of the Federal Aviation Agency is essential, suitable, or desirable for the development, improvement, operation, or maintenance of a public airport, as defined in the Federal Airport Act, as amended (49 U.S.C. 1101), or reasonably necessary to fulfill the immediate and foreseeable future requirements of the grantee for the development, improvement, operation, or maintenance of a public airport, including property needed to develop sources of revenue from nonaviation businesses at a public airport.

(b) The disposal agency shall notify eligible public agencies, in accordance with the provisions of § 101–47.303–2, that property which may be disposed of for use as a public airport under the Act of 1944, as amended, has been determined to be surplus. There shall be transmitted with the copy of each such notice when sent to the proper regional office of the Federal Aviation Agency, § 101–47.303–2(d), a copy of the holding agency's Report of Excess Real Property (Standard Form 118, with accompanying schedules).

(c) As promptly as possible after receipt of the copy of the notice given to eligible public agencies and the copy of Standard Form 118, the Federal Aviation Agency shall inform the disposal agency of the determination of the Administrator of the Federal Aviation Agency required by the provisions of the Act of 1944, as amended. The Federal Aviation Agency, thereafter, shall render such assistance to any eligible public agency known to have a need for the property for a public airport as may be necessary for such need to be considered in the development of a comprehensive and coordinated plan of use and procurement for the property. An application form and instructions for the preparation of an application shall be furnished to the eligible public agency by the disposal agency upon request.

(d) Whenever an eligible public agency has submitted a plan of use and application to acquire property for a public airport, in accordance with the provisions of § 101–47.303–2, the disposal agency shall transmit two copies of the plan and two copies of the application to the proper regional office of the Federal Aviation Agency. The Federal Aviation Agency shall promptly submit to the disposal agency a recommendation for disposal of the property for a public airport or shall inform the disposal agency that no such recommendation will be submitted.

(e) Upon receipt of such recommendation, the disposal agency may, with the approval of the head of the disposal agency or his designee, convey property recommended by the Federal Aviation Agency for disposal for a public airport to the eligible public agency, subject to the provisions of the Surplus Property Act of 1944, as amended.

(f) Any airport property not recommended by the Federal Aviation Agency for disposal pursuant to the provisions of this subsection for use as a public air-

port shall be disposed of in accordance with other applicable provisions of this subpart. However, the holding agency shall first be notified of the inability of the disposal agency to dispose of the property for use as a public airport and shall be allowed 30 days to withdraw the property from surplus or to waive any future interest in the property for public airport use.

(g) The Administrator of the Federal Aviation Agency has the sole responsibility for enforcing compliance with the terms and conditions of disposal, and for the reformation, correction, or amendment of any disposal instrument and the granting of releases and for taking any necessary action for recapturing such property in accordance with the provisions of the Act of October 1, 1949, 63 Stat. 700, and section 1402(c) of the Federal Aviation Act of 1958, 72 Stat. 807 (50 U.S.C. App. 1622a–1622c).

(h) In the event title to any such property is revested in the United States by reason of noncompliance with the terms and conditions of disposal, or other cause, the Administrator of the Federal Aviation Agency shall have accountability for the property and shall report the property to GSA as excess property in accordance with the provisions of § 101–47.202.

**§ 101–47.308–3 Property for use as public parks, recreational areas, or historic monument sites.**

(a) Pursuant and subject to the provisions of section 13(h) of the Surplus Property Act of 1944 (50 U.S.C. App. 1622 (h)), which is continued in effect by section 602(a) of the Federal Property and Administrative Services Act of 1949, land, including improvements and equipment thereon, which is determined by the Secretary of the Interior to be suitable and desirable for use as a public park, public recreational area, or historic monument, for the benefit of the public, may be conveyed or disposed of to a State, political subdivision, instrumentalities thereof, or municipality.

(b) The disposal agency shall notify eligible public agencies, in accordance with the provisions of § 101–47.303–2, that property which may be disposed of for use as a public park, public recreational area, or historic monument under the Act of 1944 has been determined to be surplus. There shall be transmitted with the copy of each such notice when sent to the proper field office of the Bureau of Outdoor Recreation listed in § 101–47.4912, as provided in § 101–47.303–2(d), a copy of the holding agency's Report of Excess Real Property (Standard Form 118, with accompanying schedules).

(c) An application form to acquire property for permanent use as a public park, public recreational area, or historic monument, and instructions for the preparation of the application, shall be furnished by the disposal agency to an eligible public agency upon request.

(d) Whenever an eligible public agency has submitted a plan of use and an application to acquire property for use as a public park, public recreational area, or historic monument, in accordance with the provisions of § 101–47.303–2, the disposal agency shall transmit a copy of the plan and a copy of the application to the Director, Bureau of Outdoor Recreation, Department of the Interior, Washington, D.C., 20240, and shall send a copy of the plan and a copy of the application to the appropriate field office of the Bureau of Outdoor Recreation. The Director shall promptly inform the disposal agency in writing as to the date the determination of the Secretary of the Interior, required by the provisions of the Act of 1944, will be available.

(e) Upon receipt of such determination, the disposal agency may, with the approval of the head of the disposal agency, or his designee, convey property determined by the Secretary of the Interior to be suitable and desirable for use as a public park, public recreational area, or historic monument, for the benefit of the public, to an eligible public agency, subject to the provisions of the Act of 1944.

(f) The Secretary of the Interior has the responsibility for enforcing compliance with the terms and conditions of disposals and for the reformation, correction, or amendment of any disposal instrument, and the granting of releases, and for taking any necessary action for recapturing such property in accordance with the provisions of section 203(k)(2) of the Act. Any such action shall be subject to the disapproval of the head of the disposal agency.

(g) In the event title to any such property is revested in the United States by reason of noncompliance with the terms and conditions of disposal, or other cause, the Secretary of the Interior shall have accountability and shall report the property to GSA as excess property in accordance with the provisions of § 101–47.202.

(h) Notice to the head of the disposal agency by the Secretary of the Interior of any action proposed to be taken under paragraph (f) of this section shall identify the property affected, setting forth in detail the proposed action and reasons therefor.

**§ 101–47.308–4 Property for educational and public health purposes.**

(a) The head of the disposal agency or his designee is authorized, in his discretion, to assign to the Secretary of Health, Education, and Welfare for disposal, under section 203(k)(1) of the Act, such surplus real property, including buildings, fixtures, and equipment situated thereon, as is recommended by the Secretary as being needed for school, classroom, or other educational use or for use in the protection of public health, including research.

(b) With respect to real property and related personal property which may be made available for assignment to the Secretary of Health, Education, and Welfare for disposal under the provisions of the Act of 1949 for educational or public health purposes to nonprofit institutions which have been held exempt from taxation under section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)(3)).

(1) The Department of Health, Education, and Welfare may notify eligible nonprofit institutions, in accordance with the provisions of § 101–47.303–2(e), that such property has been determined surplus.

(2) Any such notice given by the Department to eligible nonprofit institutions shall state that any requirement for educational or public health use of the property should be coordinated with the public agency declaring to the disposal agency an intent to develop and submit a comprehensive and coordinated plan of use and procurement for the property.

(c) With respect to real property and related personal property which may be made available for assignment to the Secretary of Health, Education, and Welfare for disposal under the provisions of the Act for educational or public health purposes to eligible public agencies—

(1) The disposal agency shall notify eligible public agencies, in accordance with the provisions of § 101–47.303–2 (b) and (e), that such property has been determined to be surplus.

(2) Such notice to eligible public agencies shall state that any planning for an educational or public health use, involved in the development of a comprehensive and coordinated plan of use and procurement for the property, must be coordinated with the Department of Health, Education, and Welfare and that an application form for such use of the property and instructions for the preparation and submission of an application may be obtained from that Department.

(d) Whenever the disposal agency has not been informed by a public agency within the 20-day period stated in the notice given pursuant to the provisions of § 101–47.308–4 (b) or (c), that it desires to develop and submit a comprehensive and coordinated plan of use and procurement for the property, but the Department of Health, Education, and Welfare has notified the disposal agency within the said 20-day period of a potential educational or public health requirement for the property, the Department shall submit to the disposal agency within 25 days after the expiration of the 20-day period, a recommendation for assignment of the property to the Secretary of Health, Education, and Welfare, or shall inform the disposal agency, within the 25-day period, that a recommendation will not be made for assignment of the property to the Secretary.

(e) Whenever an eligible public agency has submitted a plan of use and procurement for property for an educational or public health requirement, in accordance with the provisions of § 101–47.303–2, the disposal agency shall transmit two copies of the plan to the regional office of the Department of Health, Education, and Welfare. The Department shall submit to the disposal agency, within 25 days after the date the plan is transmitted to the Department, a recommendation for assignment of the property to the Secretary of Health, Education, and

Welfare or shall inform the disposal agency, within the 25-day period, that a recommendation will not be made for assignment of the property to the Secretary.

(f) Any recommendation submitted by the Department of Health, Education, and Welfare pursuant to § 101–47.308–4 (d) or (e) shall set forth complete information concerning the intended educational or public health use, including (1) identification of the property, (2) the name of the applicant and the size and nature of its program, (3) the specific use planned, (4) the intended public benefit allowance, (5) the estimate of value upon which such proposed allowance is based, and (6) if the acreage or value of the property exceeds the standards established by the Secretary, an explanation therefor. The Department shall furnish to the holding agency a copy of the recommendation, unless the holding agency is also the disposal agency.

(g) Holding agencies shall cooperate to the fullest extent possible with representatives of the Department of Health, Education, and Welfare in their inspection of such property and in furnishing information relating thereto.

(h) In the absence of a recommendation § 101–47.308–4 (d) or (e), the disposal agency shall proceed with appropriate disposal action.

(i) If the recommendation is approved, the disposal agency shall assign the property by letter or other document to the Secretary of Health, Education, and Welfare for disposal and shall inform the Secretary that there will be no objection to the proposed transfer. If the recommendation is disapproved, the disposal agency shall so notify the Secretary. Such assignment or notice shall be given within 30 days after the Department of Health, Education, and Welfare has submitted the recommendation. The disposal agency shall furnish to the holding agency a copy of the assignment or notice, unless the holding agency is also the disposal agency.

(j) The Department of Health, Education, and Welfare shall prepare the transfer document and take all other actions necessary to accomplish the transfer of the property within 90 days after the date of the assignment of the property to the Secretary of Health, Education, and Welfare.

(k) The Secretary of Health, Education, and Welfare has the responsibility for enforcing compliance with the terms and conditions of transfer and for the reformation, correction, or amendment of any transfer instrument and the granting of releases and for the taking of any necessary actions for recapturing such property in accordance with the provisions of section 203(k)(2) of the Act. Any such action shall be subject to the disapproval of the head of the disposal agency. Notice to the head of the disposal agency by the Secretary of any action proposed to be taken shall identify the property affected, set forth in detail the proposed action, and state the reasons therefor.

(l) In each case of repossession under a terminated lease, or reverter of title by reason of noncompliance with the terms and conditions of sale or other cause, the Department of Health, Education, and Welfare shall, at or prior to such repossession or reversion of title, provide GSA with an accurate description of the real and related personal property involved. Standard Form 118, Report of Excess Real Property, and the appropriate schedules shall be used for this purpose. Upon receipt of advice from the Department that such property has been repossessed or title has reverted, GSA will assume accountability therefor.

**§ 101–47.308–5 Property for use as shrines, memorials, or for religious purposes.**

(a) Surplus military chapels shall be segregated from other buildings, and shall be disposed of intact, separate and apart from the land, for use off-site as shrines, memorials, or for religious purposes, except in cases in which the chapel is located on surplus Government-owned land and the disposal agency determines that it may properly be used in place, in which cases a suitable area of land may be set aside for such purposes, and sold with the chapel.

(1) *Application.* Applications for the purchase of surplus chapels for use off-site or for use in-place shall be solicited by public advertising. All applications received in response to advertising shall be submitted to the Chief of Chaplains of the service which had jurisdiction over the property during the period of Government use thereof for military purposes and shall be disposed of in accordance with his recommendation. If no recommendation is received from the Chief of Chaplains within 30 days from the date of such submission, the disposal agency may select the purchaser on the basis of the needs of the applicants and the best interests of the community to be served. If no application is received for transfer of the property for shrine, memorial, or religious uses, the Chief of Chaplains shall be notified accordingly, and disposal of the property shall be held in abeyance for a period not to exceed 60 days thereafter to afford additional time for the filing of applications. If no such application is received during the extended period, the property may be disposed of for uses other than shrine, memorial, or religious purposes pursuant to other applicable provisions of this subpart.

(2) *Sale price.* The sale price of the chapel shall be a price equal to its appraised fair market value in the light of conditions imposed relating to its future use and the estimated cost of removal, where required. The sale price of the land shall be a price equal to the appraised fair market value of the land based upon the highest and best use of the land at the time of the disposal.

(3) *Conditions of transfer.* All chapels disposed of pursuant to the authority of this section shall be transferred subject to the condition that during the useful life thereof they be maintained and used as shrines, memorials, or for religious purposes and not for any commercial, industrial, or other secular use; and that in the event a transferee fails to maintain and use the chapel for such purposes there shall become due and payable to the Government the difference between the appraised fair market value of the chapel, as of the date of the transfer, without restrictions on its use, and the price actually paid. Where the land on which the chapel is located is sold with the chapel, no conditions or restrictions on the use of the land shall be included in the deed.

(4) *Release of restrictions.* The disposal agency may release the conditions of transfer without payment of a monetary consideration upon a determination that the property no longer serves the purpose for which it was transferred or that such release will not prevent accomplishment of the purpose for which the property was transferred. Such determination shall be in writing, shall state the facts and circumstances involved, and shall be preserved in the files of the disposal agency.

(b) Notwithstanding the provisions of this § 101–47.308–5, a chapel and underlying land that is a component unit of a larger parcel of surplus real property recommended by the Secretary of Health, Education, and Welfare as being needed for educational or public health purposes, may be included in an assignment of such property, when so recommended by the Secretary, for disposal subject to the condition that the instrument of conveyance shall require that during the useful life of the chapel it shall be maintained and used by the grantee as a shrine, memorial, or for religious purposes.

**§ 101–47.309 Disposal of leases, permits, licenses, and similar instruments.**

The disposal agency may, subject to such reservations, restrictions, and conditions, if any, as the disposal agency deems necessary properly to protect the interests of the United States against liability under a lease, permit, license, or similar instrument:

(a) Dispose of the lease or other instrument subject to assumption by the transferee of the obligations in the lease or other instrument unless a transfer is prohibited by the terms of the lease or other instrument; or

(b) Terminate the lease or other instrument by notice or negotiated agreement; and

(c) Dispose of any surplus Government-owned improvements located on the premises in the following order by any one or more of the following methods:

(1) By disposition of all or a portion thereof to the transferee of the lease or other instrument (not applicable when the lease or other instrument is terminated);

(2) By disposition to the owner of the premises or grantor of a sublease, as the case may be, (i) in full satisfaction of a contractual obligation of the Govern-

ment to restore the premises, or (ii) in satisfaction of a contractual obligation of the Government to restore the premises plus the payment of a money consideration to the Government by the owner or grantor, as the case may be, that is fair and reasonable under the circumstances, or (iii) in satisfaction of a contractual obligation of the Government to restore the premises plus the payment by the Government to the owner or grantor, as the case may be, of a money consideration that is fair and reasonable under the circumstances; or

(3) By disposition for removal from the premises.

*Provided*, That any negotiated disposals shall be subject to the applicable provisions of §§ 101–47.304–9 and 101–47.304–12, except where the disposition under paragraph (c) (2) of this section is negotiated pursuant to any provision of law other than the Act.

**§ 101–47.310 Disposal of structures and improvements on Government-owned land.**

In the case of Government-owned land, the disposal agency may dispose of structures and improvements with the land or separately from the land: *Provided*, That prefabricated movable structures such as Butler-type storage warehouses, and quonset huts, and housetrailers (with or without under carriages) reported to GSA with the land on which they are located, may, in the discretion of GSA, be designated for disposal as personal property for off-site use.

**§ 101–47.311 Disposal of residual personal property.**

(a) Any related personal property reported to GSA on Standard Form 118 which is not disposed of by GSA as related to the real property, shall be designated by GSA for disposal as personal property.

(b) Any related personal property which is not disposed of by the holding agency, pursuant to the authority contained in § 101–47.302, or authority otherwise delegated by the Administrator of General Services as related to the real property, shall be disposed of under the applicable provisions of Part 101–45.

**§ 101–47.312 Non-Federal interim use of property.**

(a) A lease or permit may be granted by the holding agency with the approval of the disposal agency, for non-Federal interim use of surplus property: *Provided*, That such lease or permit shall be for a period not exceeding 1 year and shall be made revocable on not to exceed 30 days' notice by the disposal agency: *And provided further*, That the use and occupancy will not interfere with, delay, or retard the disposal of the property. In such cases, an immediate right of entry to such property may be granted pending execution of the formal lease or permit. The lease or permit shall be for a money consideration and shall be on such other terms and condtions as are deemed appropriate properly to protect the interests of the United States. Any negotiated lease or permit shall be subject to the applicable provisions of §§ 101–47.304–9 and 101–47.304–12, except that no explanatory statement to the appropriate committees of the Congress need be prepared with respect to a negotiated lease or permit providing for a net rental of $1,000 or less per month, and termination by either party on 30 days' notice.

(b) Any lease of farmlands shall be governed by the policy described in the memorandum of the President dated May 21, 1956 (see § 101–47.4909).

**§ 101–47.313 Easements.**

**§ 101–47.313–1 Disposal of easements to owner of servient estate.**

The disposal agency may dispose of an easement to the owner of the land which is subject to the easement when the continued use, occupancy, or control of the easement is not needed for the operation, production, use, or maintenance of property owned or controlled by the Government. A determination shall be made by the disposal agency as to whether the disposal shall be with or without consideration to the Government on the basis of all the circumstances and factors involved and with due regard to the acquisition cost of the easement to the Government. The extent of such consideration shall be regarded as the appraised fair market value of the easement. The disposal agency shall document the circumstances and factors leading to such determination and retain such documentation in its files.

**§ 101–47.313–2 Grants of easements in or over Government property.**

The disposal agency may grant easements in or over real property on appropriate terms and conditions: *Provided*, That where the disposal agency determines that the granting of such easement decreases the value of the property, the granting of the easement shall be for a consideration not less than the amount by which the fair market value of the property is decreased.

**§ 101–47.314 Compliance.**

**§ 101–47.314–1 General.**

Subject to the provisions of § 101–47.314–2(a), requiring referral of criminal matters to the Department of Justice, each disposal agency shall perform such investigatory functions as are necessary to insure compliance with the provisions of the Act and with the regulations, orders, directives, and policy statements of the Administrator of General Services.

**§ 101–47.314–2 Extent of investigations.**

(a) *Referral to other Government agencies.* All information indicating violations by any person of Federal criminal statutes, or violations of section 209 of the Act, including but not limited to fraud against the Government, mail fraud, bribery, attempted bribery, or criminal collusion, shall be referred immediately to the Department of Justice for further investigation and disposition. Each disposal agency shall make available to the Department of Justice, or to such other governmental investigating agency to which the matter may be referred by the Department of Justice, all pertinent information and evidence concerning the indicated violations; shall desist from further investigation of the criminal aspects of such matters except upon the request of the Department of Justice; and shall cooperate fully with the agency assuming final jurisdiction in establishing proof of criminal violations. After making the necessary referral to the Department of Justice, inquiries conducted by disposal agency compliance organizations shall be limited to obtaining information for administrative purposes. Where irregularities reported or discovered involve wrongdoing on the part of individuals holding positions in Government agencies other than the agency initiating the investigation, the case shall be reported immediately to the Administrator of General Services for an examination in the premises.

(b) *Compliance reports.* A written report shall be made of all compliance investigations conducted by each agency compliance organization. Each disposal agency shall maintain centralized files of all such reports at its respective departmental offices. Until otherwise directed by the Administrator of General Services, there shall be transmitted promptly to the Administrator of General Services one copy of any such report which contains information indicating criminality on the part of any person or indicating noncompliance with the Act or with the regulations, orders, directives, and policy statements of the Administrator of General Services. In transmitting such reports to the Administrator of General Services, the agency shall set forth the action taken or contemplated by the agency to correct the improper conditions established by the investigation. Where any matter is referred to the Department of Justice, a copy of the letter of referral shall be transmitted to the Administrator of General Services.

**§ 101–47.315 Covenant against contingent fees and related procedure.**

The provisions of § 101–45.311 with respect to the covenant against contingent fees and related procedure are hereby made applicable to disposals of real and related personal property.

## *Subpart 101–47.4—Management of Excess and Surplus Real Property*

**§ 101–47.400 Scope of subpart.**

This subpart prescribes the policies and methods governing the physical care, handling, protection, and maintenance of excess real property and surplus real property, including related personal property, within the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and the Virgin Islands.

**§ 101–47.401 General provisions of subpart.**

**§ 101–47.401–1 Policy.**

It is the policy of the Administrator of General Services:

(a) That the management of excess real property and surplus real property, including related personal property, shall provide only those minimum services necessary to preserve the Government's interest therein, realizable value of the property considered,

(b) To place excess real property and surplus real property in productive use through interim utilization: *Provided*, That such temporary use and occupancy will not interfere with, delay, or retard its transfer to a Federal agency or disposal.

(c) That excess and surplus real property which is dangerous to the public health or safety shall be destroyed or rendered innocuous.

**§ 101–47.401–2 Definitions.**

As used in this subpart, the following terms shall have the meanings set forth below:

(a) *Maintenance.* The upkeep of property only to the extent necessary to offset serious deterioration; also such operation of utilities, including water supply and sewerage systems, heating, plumbing, and air-conditioning equipment, as may be necessary for fire protection, the needs of interim tenants, and personnel employed at the site, and the requirements for preserving certain types of equipment.

(b) *Repairs.* Those additions or changes that are necessary for the protection and maintenance of property to deter or prevent excessive or rapid deterioration or obsolescence, and to restore property damaged by storm, flood, fire, accident, or earthquake.

**§ 101–47.401–3 Taxes and other obligations.**

Payment of taxes or payments in lieu of taxes (in the event of the enactment hereafter of legislation by Congress authorizing such payments upon Government-owned property which is not legally assessable), rents, and insurance premiums and other obligations pending transfer or disposal shall be the responsibility of the holding agency.

**§ 101–47.401–4 Decontamination.**

The holding agency shall be responsible for all expense to the Government and for the supervision of decontamination of excess and surplus real property that has been subjected to contamination with hazardous material of any sort. Extreme care must be exercised in the decontamination, and in the management and disposal of contaminated property in order to prevent such properties becoming a hazard to the general public. The disposal agency shall be made cognizant of any and all inherent hazards involved relative to such property in order to protect the general public from hazards and to preclude the Government from any and all liability resulting from indiscriminate disposal or mishandling of contaminated property.

**§ 101–47.401–5 Improvements or alterations.**

Improvements or alterations which involve rehabilitation, reconditioning, conversion, completion, additions, and replacements in structures, utilities, installations, and land betterments, may be considered in those cases where disposal cannot otherwise be made, but no commitment therefor shall be entered into without prior approval of GSA.

**§ 101–47.401–6 Interim use and occupancy.**

When a revocable agreement to place excess real property or surplus real property in productive use has been made, the agency executing the agreement shall be responsible for the servicing thereof.

**§ 101–47.402 Care and handling.**

**§ 101–47.402–1 Responsibility.**

The holding agency shall retain custody and accountability for excess and surplus real property, including related personal property, and shall perform the physical care, handling, protection, maintenance, and repairs of such property pending its transfer to a Federal agency for disposal. Guidelines for protection and maintenance of excess and surplus real property are contained in § 101–47.4913.

**§ 101–47.402–2 Expense of care and handling.**

(a) The holding agency shall be responsible for the expense of physical care, handling, protection, maintenance, and repairs of such property pending transfer or disposal for not more than 12 months, plus the period to the first day of the succeeding quarter of the fiscal year after the date of receipt by GSA of the formal report of excess: *Provided, however*, That where a holding agency requests deferral of disposal on property which it has reported excess, the period for which the agency is responsible for such expense shall be extended by the length of time that disposal is deferred.

(b) In the event the property is not transferred to a Federal agency or disposed of during the period mentioned in § 101–47.402–2(a), the expense of physical care, handling, protection, maintenance, and repairs of such property from and after the expiration date of said period shall be reimbursed to the holding agency by the disposal agency.

## Subpart 101–47.5—Abandonment, Destruction, or Donation to Public Bodies

### § 101–47.500 Scope of subpart.

(a) This subpart prescribes the policies and methods governing the abandonment, destruction, or donation to public bodies by Federal agencies of real property located within the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and the Virgin Islands.

(b) This subpart does not apply to surplus property assigned for disposal to educational or public health institutions pursuant to section 203(k) of the Act.

### § 101–47.501 General provisions of subpart.

### § 101–47.501–1 Definitions.

(a) "No commercial value" means real property, including related personal property, which has no reasonable prospect of being disposed of at a consideration.

(b) "Public body" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, or any political subdivision, agency, or instrumentality of the foregoing.

### § 101–47.501–2 Authority for disposal.

Subject to the restrictions in § 101–47.502 and § 101–47.503, any Federal agency having control of real property which has no commercial value or of which the estimated cost of continued care and handling would exceed the estimated proceeds from its sale, is authorized:

(a) To abandon or destroy Government-owned improvements and related personal property located on privately owned land.

(b) To destroy Government-owned improvements and related personal property located on Government-owned land. Abandonment of such property is not authorized.

(c) To donate to public bodies any real property (land and/or improvements and related personal property), or interests therein, owned by the Government.

### § 101–47.501–3 Dangerous property.

No property which is dangerous to public health or safety shall be abandoned, destroyed, or donated to public bodies pursuant to this subpart without first rendering such property innocuous or providing adequate safeguards therefor.

### § 101–47.501–4 Findings.

(a) No property shall be abandoned, destroyed, or donated by a Federal agency under § 101–47.501–2, unless a duly authorized official of that agency finds, in writing, either that (1) such property has no commercial value, or (2) the estimated cost of its continued care and handling would exceed the estimated proceeds from its sale. Such finding shall not be made by any official directly accountable for the property covered thereby.

(b) Whenever all the property proposed to be disposed of hereunder by a Federal agency at any one location at any one time had an original cost (estimated if not known) of more than $1,000, findings made under § 101–47.501–4(a), shall be approved by a reviewing authority before any such disposal.

### § 101–47.502 Donations to public bodies.

### § 101–47.502–1 Cost limitations.

No improvements on land or related personal property having an original cost (estimated if not known) in excess of $250,000 and no land, regardless of cost, shall be donated to public bodies without the prior concurrence of GSA. The request for such concurrence shall be made to the regional office of GSA for the region in which the property is located.

### § 101–47.502–2 Disposal costs.

Any public body receiving improvements on land or related personal property pursuant to this subpart shall pay the disposal costs incident to the donation, such as dismantling, removal, and the cleaning up of the premises.

### § 101–47.503 Abandonment and destruction.

### § 101–47.503–1 General.

(a) No improvements on land or related personal property shall be abandoned or destroyed by a Federal agency unless a duly authorized official of that agency finds, in writing, that donation of such property in accordance with the provisions of this subpart is not feasible. This finding shall be in addition to the finding prescribed in § 101–47.501–4. If at any time prior to actual abandonment or destruction the donation of the property pursuant to this subpart becomes feasible, such donation will be accomplished.

(b) No abandonment or destruction shall be made in a manner which is detrimental or dangerous to public health or safety or which will cause infringement of the rights of other persons.

(c) The concurrence of GSA shall be obtained prior to the abandonment or destruction of improvements on land or related personal property (1) which had an original cost (estimated if not known) of more than $50,000, or (2) which are of permanent type construction, or (3) where their retention would enhance the value of the underlying land, if it were to be made available for sale or lease.

### § 101–47.503–2 Notice of proposed abandonment or destruction.

Except as provided in § 101–47.503–3, improvements on land or related personal property shall not be abandoned or destroyed by a Federal agency until after public notice of such proposed abandonment or destruction. Such notice shall be given in the area in which the property is located, shall contain a general description of the property to be abandoned or destroyed, and shall include an offering of the property for sale. A copy of such notice shall be given to the regional office of GSA for the region in which the property is located.

### § 101–47.503–3 Abandonment or destruction without notice.

If (a) the property had an original cost (estimated if not known) of not more than $1,000; or (b) its value is so low or the cost of its care and handling so great that its retention in order to post public notice is clearly not economical; or (c) immediate abandonment or destruction is required by considerations of health, safety, or security; or (d) the assigned mission of the agency might be jeopardized by the delay, and a finding with respect to (a), (b), (c), or (d) is made in writing by a duly authorized official of the Federal agency and approved by a reviewing authority, abandonment or destruction may be made without public notice. Such a finding shall be in addition to the findings prescribed in §§ 101–47.501–4 and 101–47.503–1(a).

## Subpart 101–47.6—Delegations

### § 101–47.600 Scope of subpart.

This subpart sets forth the special delegations of authority granted by the Administrator of General Services to other agencies for the utilization and disposal of certain real property pursuant to the Act.

### § 101–47.601 Delegation to Department of Defense.

(a) Authority is delegated to the Secretary of Defense to determine that excess real property and related personal property under the control of the Department of Defense having a total estimated fair market value, including all the component units of the property, of less than $1,000 as determined by the Department of Defense, is not required for the needs and responsibilities of Federal agencies; and thereafter to dispose of said property by means deemed advantageous to the United States.

(b) Prior to such determination and disposal, the Secretary of Defense shall take steps as may be appropriate to determine that the property is not required for the needs of any Federal agency.

(c) The authority conferred in this § 101–47.601 shall be exercised in accordance with the Act and regulations issued pursuant thereto, except any provisions of Subpart 101–47.2 relating to reporting such property to GSA.

(d) The authority delegated in this § 101–47.601 may be redelegated to any officer or employee of the Department of Defense.

### § 101–47.602 Delegation to the Department of Agriculture.

(a) Authority is delegated to the Secretary of Agriculture to determine that excess real property and related personal property under the control of the Department of Agriculture having a total estimated fair market value, including all the component units of the property, of less than $1,000 as determined by the Department of Agriculture, is not required for the needs and responsibilities of Federal agencies; and thereafter to dispose of said property by means deemed advantageous to the United States.

(b) Prior to such determination and disposal, the Secretary of Agriculture shall take steps as may be appropriate to determine that the property is not required for the needs of any Federal agency.

(c) The authority conferred in this § 101–47.602 shall be exercised in accordance with the Act and regulations issued pursuant thereto, except any provisions of Subpart 101–47.2 relating to reporting such property to GSA.

(d) The authority delegated in this § 101–47.602 may be redelegated to any officer or employee of the Department of Agriculture.

### § 101–47.603 Delegation to the Department of the Interior.

(a) Authority is delegated to the Secretary of the Interior to determine that excess real property and related personal property under the control of the Department of the Interior having a total estimated fair market value, including all the component units of the property, of less than $1,000 as determined by the Department of the Interior, is not required for the needs and responsibilities of Federal agencies; and thereafter to dispose of said property by means deemed advantageous to the United States.

(b) Prior to such determination and disposal, the Secretary of the Interior shall take steps as may be appropriate to determine that the property is not required for the needs of any Federal agency.

(c) The authority conferred in this § 101–47.603 shall be exercised in accordance with the Act and regulations issued pursuant thereto, except any provisions of Subpart 101–47.2 relating to reporting such property to GSA.

(d) The authority delegated in this § 101–47.603 may be redelegated to any officer or employee of the Department of the Interior.

### § 101–47.604 Delegation to the Department of the Interior and the Department of Health, Education, and Welfare.

(a) The Secretary of the Interior and the Secretary of Health, Education, and Welfare, are delegated authority to transfer and to retransfer to each other, upon request, any of the property of either agency which is being used and will continue to be used in the administration of any functions relating to the Indians. The term "property," as used in this § 101–47.604, includes real property and such personal property as the Secretary making the transfer or retransfer determines to be related personal property.

(b) This authority shall be exercised only in connection with property which the Secretary transferring or retransferring such property determines:

(1) Comprises a functional unit;

(2) Is located within the United States; and

(3) Has an acquisition cost of $100,000 or less: *Provided, however,* That the transfer or retransfer shall not include property situated in any area which is recognized as an urban area or place for the purpose of the most recent decennial census.

(c) No screening of the property as required by the regulations in this Part 101–47 need be conducted, it having been determined that such screening among Federal agencies would accomplish no useful purpose since the property which is subject to transfer or retransfer hereunder will continue to be used in the administration of any functions relating to the Indians.

(d) Any such transfer or retransfer of a specific property shall be without reimbursement except:

(1) Where funds programed and appropriated for acquisition of the property are available to the Secretary requesting the transfer or retransfer; or

(2) Whenever reimbursement at fair value is required by Subpart 101–47.2.

(e) Where funds were not programed and appropriated for acquisition of the property, the Secretary requesting the transfer or retransfer shall so certify. Any determination necessary to carry out the authority contained in this § 101–47.604 which otherwise would be required under this part to be made by GSA shall be made by the Secretary transferring or retransferring the property.

(f) The authority conferred in this § 101–47.604 shall be exercised in accordance with such other provisions of the regulations of GSA issued pursuant to the Act as may be applicable.

(g) The Secretary of the Interior and the Secretary of Health, Education, and Welfare, are authorized to redelegate any of the authority contained in this § 101–47.604 to any officers or employees of their respective departments.

## Subpart 101–47.7—Conditional Gifts of Real Property to Further the Defense Effort

**§ 101–47.700 Scope of subpart.**

This subpart provides for acceptance or rejection, on behalf of the United States, of any gift of real property offered on condition that it be used for a particular defense purpose and for subsequent disposition of such property (Act of July 27, 1954, 68 Stat. 566, 40 U.S.C. 1151–1156).

**§ 101–47.701 Offers and acceptance of conditional gifts.**

(a) Any agency receiving an offer of a conditional gift of real property for a particular defense purpose within the purview of the Act of July 27, 1954, shall notify the appropriate regional office of GSA and shall submit a recommendation as to acceptance or rejection of the gift.

(b) Prior to such notification, the receiving agency shall acknowledge receipt of the offer and advise the donor of its referral to the GSA regional office, but should not indicate acceptance or rejection of the gift on behalf of the United States. A copy of the acknowledgment shall accompany the notification and recommendation to the regional office.

(c) When the gift is determined to be acceptable and it can be accepted and used in the form in which offered, it will be transferred without reimbursement to an agency designated by GSA for use for the particular purpose for which it was donated.

(d) If the gift is one which GSA determines may and should be converted to money, the funds, after conversion, will be deposited with the Treasury Department for transfer to an appropriate account which will best effectuate the intent of the donor, in accordance with Treasury Department procedures.

**§ 101–47.702 Consultation with agencies.**

Such conditional gifts of real property will be accepted or rejected on behalf of the United States or transferred to an agency by GSA, only after consultation with the interested agencies.

**§ 101–47.703 Advice of disposition.**

GSA will advise the donor and the agencies concerned of the action taken with respect to acceptance or rejection of the conditional gift and of its final disposition.

**§ 101–47.704 Acceptance of gifts under other laws.**

Nothing in this Subpart 101–47.7 shall be construed as applicable to the acceptance of gifts under the provisions of other laws.

## Subparts 101–47.8—101–47.48 [Reserved]

## Subpart 101–47.49—Illustrations

**§ 101–47.4900 Scope of subpart.**

This subpart sets forth certain forms and illustrations referred to previously in this part.

NOTE: The forms in §§ 101–47.4902—101–47.4904–1 filed as part of the original document. Copies may be obtained from Central Office, GSA.

**§ 101–47.4905 Extract of statutes authorizing disposal of surplus real property to public agencies.**

| Statute | Type of property | Eligible public agency |
|---|---|---|
| 50 U.S.C. App. 1622(h). Disposals for public parks, public recreation areas, or historic monuments. | Any surplus real property, including improvements and equipment located thereon, exclusive of (1) minerals having a commercial value separate and apart from the surface; (2) improvements without land; (3) property subject to disposal as a shrine, memorial, or for religious purposes under the provisions of § 101–47.308–5; (4) property suitable for disposal for public airport purposes under the provisions of 50 U.S.C. App. 1622(g); (5) property the highest and best use of which is determined to be industrial and which shall be so classified for disposal; and (6) property which the holding agency has requested reimbursement of the net proceeds of disposition pursuant to section 204(c) of the Act. This statute, as amended, does not authorize the disposal, for historic monument use, of property if its historical significance relates to a period of time within the 50 years immediately preceding the determination of suitability and desirability for such use. | Any State, political subdivision and instrumentalities thereof, or municipality; Commonwealth of Puerto Rico and the Virgin Islands. |
| 40 U.S.C. 484(k)(1)(A). Disposals for school, classroom, or other educational purposes. | Any surplus real property including buildings, fixtures, and equipment situated thereon, exclusive of (1) minerals having a commercial value separate and apart from the surface, and (2) property which the holding agency has requested reimbursement of the net proceeds of disposition pursuant to section 204(c) of the Act. | States and their political subdivisions and instrumentalities, and tax-supported, educational institutions; District of Columbia; Commonwealth of Puerto Rico; and the Virgin Islands. |
| 40 U.S.C. 484(k)(1)(B). Disposals for public health purposes including research. | Any surplus real property, including buildings, fixtures, and equipment situated thereon, exclusive of (1) minerals having a commercial value separate and apart from the surface, and (2) property which the holding agency has requested reimbursement of the net proceeds of disposition pursuant to section 204(c) of the Act. | States and their political subdivisions and instrumentalities, and tax-supported medical institutions; District of Columbia; Commonwealth of Puerto Rico; and the Virgin Islands. |
| 50 U.S.C. App. 1622(g). Disposals for public airport purposes. | Any surplus real or personal property, exclusive of (1) property subject to disposal as a shrine, memorial, or for religious purposes under the provisions of § 101–47.308–5; (2) property subject to disposal as a historic monument site under the provisions of § 101–47.308–3; (3) property the highest and the best use of which is determined by the disposal agency to be industrial and which shall be so classified for disposal, and (4) property which the holding agency has requested reimbursement of the net proceeds of disposition pursuant to section 204(c) of the Act. | Any State, political subdivision, municipality or tax-supported institution; Commonwealth of Puerto Rico; and the Virgin Islands. |
| 16 U.S.C. 667 b-d. Disposals for wildlife conservation purposes. | Any surplus real property (with or without improvements) that can be utilized for wildlife conservation purposes other than migratory birds, exclusive of (1) oil, gas, and mineral rights, and (2) property which the holding agency has requested reimbursement of the net proceeds of disposition pursuant to section 204(c) of the Act. | The agency of the State exercising the administration of the wildlife resources of the State. |
| 2 U.S.C. 107 and 317. Disposals for Federal aid and other highways. | Any real property or interests therein determined by the Secretary of Commerce to be reasonably necessary for the right-of-way of a Federal aid or other highway (including control of access thereto from adjoining lands) or as a source of material for the construction or maintenance of any such highway adjacent to such real property or interest therein exclusive of (1) minerals having a commercial value separate and apart from the surface, and (2) property which the holding agency has requested reimbursement of the net proceeds of disposition pursuant to section 204(c) of the Act. | State wherein the property is situated (or such political subdivision of the State as its law may provide), including the District of Columbia and Commonwealth of Puerto Rico. |
| 40 U.S.C. 345 c. Disposals for authorized widening of public highways, streets, or alleys. | Such interest in surplus real property as the head of the disposal agency determines will not be adverse to the interests of the United States, exclusive of (1) minerals having a commercial value separate and apart from the surface, (2) property subject to disposal for Federal aid and other highways under the provisions of 23 U.S.C. 107 and 317, and (3) property which the holding agency has requested reimbursement of the net proceeds of disposition pursuant to section 204(c) of the Act. | State or political subdivision of a State. |
| 50 U.S.C. App. 1622(d). Disposals of power transmission lines needful for or adaptable to the requirements of a public power project. | Any surplus power transmission line and the right of way acquired for its construction. | Any State or political subdivision thereof or any State agency or instrumentality. |
| 40 U.S.C. 484 (e)(3)(H). Disposals by negotiations. | Any surplus real property including related personal property. | Any State, political subdivision thereof, or tax-supported agency therein; Commonwealth of Puerto Rico; and the Virgin Islands. |
| 40 U.S.C. 122. Transfer of jurisdiction over properties with the District of Columbia for administration and maintenance under conditions to be agreed upon. | Any surplus real property, except property which the holding agency has requested reimbursement of the net proceeds of disposition pursuant to section 204(c) of the Act. | District of Columbia. |

**§ 101–47.4906 Sample notice to public agencies of surplus determination.**

NOTICE OF SURPLUS DETERMINATION—GOVERNMENT PROPERTY

_____
(Date)

_____
(Name of property)

_____
(Location)

Notice is hereby given that the _____, _____, _____, has been determined to be surplus Government property. The property consists of 1,333.65 acres of fee land and a 5.968-acre drainage ditch easement, together with installed landing strips, taxiways, walks, roads, parking area, electrical system, and fencing.

(Name of property) (Location)

This property is surplus property available for disposal pursuant to the provisions of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 471 et seq.) and applicable regulations. The applicable regulations provide that public agencies (non-Federal) shall be allowed a reasonable period of time to develop a comprehensive and coordinated plan of use and procurement for surplus real property in which they may be interested. Disposal of this property, or portions thereof, may be made to public agencies for the public uses stated below whenever the Government has determined that the property is available for such uses and that disposal thereof is authorized by the statutes cited and applicable regulations:[1]

| *Statute* | *Type of disposal* |
|---|---|
| 50 U.S.C. App. 1622(h) | Public park, recreational area, or historic monument. |
| 40 U.S.C. 484(k)(1)(A) | School, classroom, or other educational purposes. |
| 40 U.S.C. 484(k)(1)(B) | Protection of public health, including research. |
| 50 U.S.C. App. 1622(g) | Public airport. |
| 23 U.S.C. 107 and 317 | Federal aid and certain other highways. |
| 40 U.S.C. 484(e)(3)(H) | Negotiated sales to public bodies for use for public purposes generally. |

If any public agency desires to develop a comprehensive and coordinated plan of use and procurement for this property, notice thereof in writing must be filed with _____, _____, before
(Name of disposal agency) (Address)
_____ Standard Time, _____,
(Hour and zone) (Day)
_____.[2] Such notice shall:
(Date)

1. Disclose the contemplated use of the property;

2. Contain a citation of the applicable statute or statutes under which the public agency desires to procure the property;

3. Disclose the nature of the interest if an interest less than fee title to the property is contemplated;

4. State the length of time required to develop and submit a comprehensive and coordinated plan of use and procurement for the property (where a payment to the Government is required under the statute, include a statement as to whether funds are available and, if not, the period required to obtain funds); and

5. Give the reason for the time required to develop and submit a plan.

Any planning for an educational or a public health use of property sought to be acquired subject to a public benefit allowance must be coordinated with the Department of Health, Education, and Welfare _____
(Address of _____. An application form to acquire proper regional office)
property for an educational or public health requirement, and instructions for the preparation and submission of an application, may be obtained from that office. Application forms or instructions to acquire property for all other public use requirements may be obtained from _____, _____.[3]
(Name of disposal agency) (Address)

Upon receipt of such written notice, the public agency will be promptly informed concerning the period of time that will be allowed to develop a comprehensive and coordinated plan of use and procurement for the property. Such a plan of use will be the basis for subsequent determination by the Government as to whether the property is available for the proposed use and disposal thereof is authorized by applicable statutes and regulations.

In the absence of such written notice, or in the event a public use proposal is not approved, the regulations issued pursuant to authority contained in the Federal Property and Administrative Services Act of 1949, provide for offering the property for sale for its highest and best use.

**§ 101–47.4906–1 Sample letter for transmission of notice of surplus determination.**

### § 101–47.4908 Bureau of the Budget Circular No. A–2.

EXECUTIVE OFFICE OF THE PRESIDENT

BUREAU OF THE BUDGET

*Washington 25, D.C.*

October 16, 1955 Circular No. A–2

TO THE HEADS OF EXECUTIVE DEPARTMENTS AND ESTABLISHMENTS

*Subject:* Review of real property holdings (other than public domain)

1. *Purpose.* It is desirable that the Federal Government divest itself of real property holdings which are not needed. The head of each agency is requested personally to ensure that intensified action is taken to identify and declare as excess real properties which are not needed. The purpose of this Circular is to establish general guidelines for the accomplishment of this objective with respect to real properties within the continental United States, exclusive of the public domain.

2. *Policy guidelines.* Real properties or portions thereof generally shall be declared excess when:

a. They are not being used by the owning agency and there are no approved plans for future use.

b. Substantial net savings to the Government would result if properties used for essential purposes were sold at their current market values and other suitable properties of substantially lower current values were substituted for them.

c. The costs of operation and maintenance are substantially higher than for other suitable properties of equal or less value which can be made available by transfer, permit, or purchase.

d. They are being leased to private enterprise but could be sold under provisions of the leases and in accordance with existing laws, if the Government's requirements for goods or services produced on such properties would be met satisfactorily with the properties in private ownership.

e. They are being used by the Government to produce goods or services which are available from private enterprise, except when it is demonstrated clearly in each instance that it is not in the public interest to obtain such requirements from private enterprise.

3. *Financing arrangements.* It is recognized that, in some instances, action cannot be accomplished in accordance with these guidelines without first incurring expenses for which appropriate financing arrangements or legislation must be obtained. There should be no delay, however, in making the necessary studies and in submitting proposals for such financing arrangements or legislation, including estimates of replacement costs and ultimate net savings, as part of the budget submissions.

4. *Implementation.* The head of each agency should ensure that:

a. Instructions and criteria are developed and issued for the application of the guidelines established herein. It is requested that copies of such criteria and instructions be sent to the Bureau of the Budget by November 30, 1955.

b. Thorough reviews of real property holdings are initiated promptly and carried through on an annual basis.

c. Properties or portions of properties are declared excess without delay if continued ownership is not justified.

By direction of the President:

ROWLAND R. HUGHES,
*Director.*

### § 101–47.4909 Memorandum of the President dated May 21, 1956.

THE WHITE HOUSE

*Washington, May 21, 1956*

MEMORANDUM FOR THE HEADS OF ALL EXECUTIVE DEPARTMENTS AND AGENCIES

In order that the leasing of farm lands owned by the Federal Government shall be consistent with the Administration's determined effort to reduce price-depressing surpluses and to bring agricultural production into line with markets, I request that the following-described policies governing the leasing of farm lands by the Federal Government, to the extent that such policies are not inconsistent with law, be placed in effect by all departments and agencies concerned on the effective date of this memorandum:

1. Except as provided in paragraphs 2 and 4 hereof, leases of farm lands made by the Federal Government on or after the effective date of this memorandum shall prohibit the cultivation of price-supported crops in surplus supply.

2. In the case of acquisitions of farm lands by the Federal Government on or after the effective date of this memorandum, if price-supported crops in surplus supply are growing on such lands at the time of acquisition, the harvesting of such crops may be permitted.

3. No lease of farm lands by the Federal Government which is in effect on the effective date hereof shall be terminated under authority of this memorandum, but this memorandum shall not be construed to affect any authority which may otherwise exist for the termination of any such lease.

4. Upon the expiration of leases of farm lands by the Federal Government which do not prohibit the cultivation of price-supported crops in surplus supply (including those in effect on the effective date of this memorandum, and including those made as provided for in this paragraph, but not including any agreement made with respect to harvesting pursuant to paragraph 2 of this memorandum), whether such lands may thereafter be leased for the cultivation of price-supported crops in surplus supply shall be determined equitably. The controlling department or agency, according to its particular circumstances, may make such determinations on an individual lease basis or on an area basis. In arriving at such determinations, consideration shall be given to the interests of individual farmers and the local community, the supply situation of crops that might be grown on the lands, the effect on price-support programs, the objectives of the programs under which such lands were acquired or reserved, and maintenance savings and income to the Federal Government. If it is at any time determined, pursuant to this paragraph, that a lease of farm lands by the Federal Government shall prohibit the cultivation of price-supported crops in surplus supply, any lease of such lands made at any time thereafter by the Federal Government shall prohibit the cultivation of such crops.

5. In determining the acreage in each unit of farm land to be offered for lease by the Federal Government, consideration shall be given to the leasing of such land for family-size farm operations.

6. As used in this memorandum:

(a) The term "lease" shall include permits and licenses.

(b) The term "price-supported crops in surplus supply" shall mean those cultivated crops supported pursuant to the Agricultural Act of 1949, as amended and supplemented, and determined from time to time by the Secretary of Agriculture to be in surplus supply.

7. To insure that the leasing of farm lands by the Federal Government shall be consistent with the Administration's farm program, the Department of Agriculture, until such time as some appropriate interagency group or committee may be designated, shall be available as a focal agency for consultation in such matters.

8. All departments and agencies concerned shall submit to the Bureau of the Budget within sixty days from the date of this memorandum copies of implementing instructions to their operating organizations.

This memorandum shall become effective sixty days after the date hereof.

DWIGHT D. EISENHOWER

### § 101–47.4913 Outline for protection and maintenance of excess and surplus real property.

A. *General.* In protecting and maintaining excess and surplus properties, the adoption of the principle of "calculated risk" is considered to be essential. In taking what is termed a "calculated risk," the expected losses and deteriorations in terms of realizable values are anticipated to be less in the overall than expenditures to minimize the risks. In determining the amount of protection to be supplied under this procedure, a number of factors should be considered; such as, the availability of, and the distance to, local, public, or private protection facilities; the size and value of the facility; general characteristics of structures; physical protection involving fencing, number of gates, etc.; the location and availability of communication facilities; and the amount and type of activity at the facility. Conditions at the various excess and surplus properties are so diverse that it is impracticable to establish a definite or fixed formula for determining the extent of protection and maintenance that should be applied. The standards or criteria set forth in B and C, below, are furnished as a guide in making such determinations.

B. *Protection Standards.* The following standards are furnished as a guide in determining the amount and limits of protection.

1. *Properties not Requiring Protection Personnel.* Fire protection or security personnel are not needed at:

(a) Facilities where there are no structures or related personal property;

(b) Facilities where the realizable or recoverable value of the improvements and related personal property subject to loss is less than the estimated cost of protection for a one-year period;

(c) Facilities of little value located within public fire and police department limits, which can be locked or boarded up;

(d) Facilities where the major buildings are equipped with automatic sprinklers, supervised by American District Telegraph Company or other central station service, which do not contain large quantities of readily removable personal property, and which are in an area patrolled regularly by local police; and

(e) Facilities where agreements can be made with a lessee of a portion of the property to protect the remaining portions at nominal, or without additional cost.

2. *Properties Requiring a Resident Custodian.* A resident custodian or guard only is required at facilities of the following classes:

(a) Facilities containing little removable personal property but having a considerable number of buildings to be sold for off-site use when (a) the buildings are of low realizable value and so spaced that loss of more than a few buildings in a single fire is improbable, or (b) the buildings are so located that water for firefighting purposes is available and municipal or other fire department services will respond promptly;

(b) Small, inactive industrial and commercial facilities which must be kept open for inspection and which are so located that public fire and police protection can be secured by telephone;

(c) Facilities where the highest and best use has been determined to be salvage; and

(d) Facilities of little, or salvage, value but potentially dangerous and attractive to children and curiosity seekers where the posting of signs is not sufficient to protect the public.

3. *Properties Requiring Continuous Guard Service.* One guard on duty at all times (a total of 5 guards required) is required at facilities of high market value which are fenced; require only one open gate which can be locked during patrols; all buildings of which can be locked; and where local police and fire protection can be secured by telephone.

4. *Properties Requiring High Degree of Protection.* More than one firefighter-guard will be required to be on duty at all times at facilities of the classes listed below. The number, and the assignment, of firefighter-guards in such cases should be determined by taking into consideration all pertinent factors.

(a) Facilities of high market value which are distant from public assistance and require an on-the-site firefighting force adequate to hold fires in check until outside assistance can be obtained.

(b) Facilities of high market value which can obtain no outside assistance and require an on-the-site firefighting force adequate to extinguish fires.

(c) Facilities of high market value at which the patrolling of large areas is necessary.

(d) Facilities of high market value not fenced and containing large quantities of personal property of a nature inviting pilferage.

[1] Attach as many copies of the notice as may be anticipated will be required for adequate posting.

(e) Facilities of high market value at which several gates must be kept open for operating purposes.

5. *Standards for All Protected Properties.*

(a) All facilities within the range of municipal or other public protection, but outside the geographic limits of such public body, should be covered by advance arrangements with appropriate authorities for police and fire protection service, at a monthly or other service fee if necessary.

(b) Patrolling of all facilities with large areas to be protected should be accomplished by use of automotive vehicles.

(c) At fenced facilities, a minimum number of gates should be kept open.

6. *Firefighter-Guards.* Firefighters and guards are the normal means for carrying out the fire protection and security programs at excess and surplus real properties where both such programs are required. The duties of firefighters and guards should be combined to the maximum extent possible in the interest of both economy and efficiency. Such personnel would also be available in many cases for other miscellaneous services, such as, removing grass and weeds or other fire hazards, servicing fire extinguishers, and other activities related to general protection of property.

7. *Operating Requirements of Protection Units.* Firefighter-guards or guards, should be required to make periodic rounds of facilities requiring protection. The frequency of these rounds would be based upon a number of factors; such as, location and size of the facility, type of structures and physical barriers, and the amount and type of activity at the facility. There may be instances where some form of central station supervision, such as American District Telegraph Company, will effect reduction in costs by reducing the number of firefighter-guards, or guards, required to adequately protect the premises.

8. *Watchman's Clock.* To insure adequate coverage of the entire property by the guards, or firefighter-guards, an approved watchman's clock should be provided, with key stations strategically located so that, in passing from one to the other, the guards will cover all portions of the property.

9. *Protection Alarm Equipment.* Automatic fire detection devices and allied equipment and services may materially assist in minimizing protection costs. However, use of devices of this type, like guards, are purely secondary fire protection and are primarily a means of obtaining fire and police protection facilities at the property in an emergency. There are various types of devices, each of which can be considered separately or in combination as supplementing guard patrols, which may assist in reduction of costs and, in some instances, it may be possible to eliminate all guards.

C. *Maintenance Standards.* The following standards or criteria are furnished as a guide in connection with the upkeep of excess and surplus real properties:

1. *Temporary Type Buildings and Structures.* Temporary buildings housing personal property which cannot be readily removed to permanent type storage should be maintained only to the extent necessary to protect the personal property. Vacant temporary structures should not be maintained except in unusual circumstances.

2. *Permanent Type Buildings and Structures.*

(a) No interior painting should be done. Where exterior wood or metal surfaces require treatment to prevent serious deterioration, spot painting only should be done when practicable.

(b) Carpentry and glazing should be limited to: work necessary to close openings against weather and pilferage; making necessary repairs to floors, roofs, and sidewalls as a protection against further damage; shoring and bracing of structures to preclude structural failures; and similar operations.

(c) Any necessary roofing and sheet metal repairs should, as a rule, be on a patch basis.

(d) Masonry repairs, including brick, tile, and concrete construction, should be undertaken only to prevent leakage or disintegration, or to protect against imminent structural failure.

(e) No buildings should be heated for maintenance purposes except in unusual circumstances.

3. *Mechanical and Electrical Installations.* These include plumbing, heating, ventilating, air conditioning, sprinkler systems, fire alarm systems, electrical equipment, elevators, and similar items.

(a) At facilities in inactive status, maintenance of mechanical and electrical installations should be limited to that which is necessary to prevent or arrest serious deterioration. In most cases, personnel should not be employed for this work except on a temporary basis at periodic intervals when it is determined by inspections that the work is necessary. Wherever possible electrical systems should be deenergized, water drained from all fixtures, heat turned off, and buildings secured against unauthorized entry. Sprinkler systems should be drained during freezing weather and reactivated when danger of freezing has passed.

(b) At facilities in active status, such as multiple-tenancy operations, equipment should be kept in reasonable operating condition. Operation of equipment to furnish services to private tenants, as well as the procurement of utility services for distribution to tenants, should be carried on only to the extent necessary to comply with lease or permit conditions, or in cases where it is impracticable for tenants to obtain such services directly from utility companies or other sources.

(c) At facilities where elevators and/or high-pressure boilers and related equipment are in operation, arrangements should be made for periodic inspections by qualified and licensed inspectors to insure that injury to personnel, loss of life, or damage to property does not occur.

(d) Individual heaters should be used, when practicable, in lieu of operating heating plants.

4. *Grounds, Roads, Railroads, and Fencing.*

(a) Maintenance of grounds should be confined largely to removal of vegetation where necessary to avoid fire hazards and to control poisonous and noxious plant growth in accordance with local and State laws and regulations; plowing of fire lanes where needed; and removal of snow from roads and other areas only to the extent necessary to provide access for maintenance, fire protection, and similar activities. Wherever practicable, hay crops should be sold to the highest bidders with the purchaser performing all labor in connection with cutting and removal. Also, agricultural and/or grazing leases may be resorted to, if practicable, as other means of reducing the cost of grounds maintenance. Any such leases shall be subject to the provisions of § 101–47.203–9 or § 101–47.312.

(b) Only that portion of the road network necessary for firetruck and other minimum traffic should be maintained. The degree to which such roads are to be maintained should be only that necessary to permit safe passage at a reasonable speed.

(c) Railroads should not be maintained except as might be required for protection and maintenance operations, or as required under the provisions of a lease or permit.

(d) Ditches and other drainage facilities should be kept sufficiently clear to permit surface water to run off.

(e) Fencing, or other physical barrier, should be kept in repair sufficiently to afford protection against unauthorized entry.

5. *Utilities.*

(a) At inactive properties, water systems, sewage disposal systems, electrical distribution systems, etc., should be maintained only to the extent necessary to provide the minimum services required. Buildings or areas not requiring electrical service or water should be deenergized electrically and the water valved off. Utilities not in use, or which are serving dismantled or abandoned structures, should not be maintained.

(b) At active properties, water supply, electrical power, and sewage disposal facilities frequently must be operated at rates much below designed capacities. Engineering studies should determine the structural and operating changes necessary for maximum economy. Where leakage is found in water distribution lines, such lines may be valved off rather than repaired, unless necessary for fire protection or other purposes.

(c) Where utilities are purchased by contract, such contracts should be reviewed to determine if costs can be reduced by revision of the contracts.

6. *Properties to be Disposed of as Salvage.* No funds should be expended for maintenance on properties where the highest and best use has been determined to be salvage.

D. *Repairs.* Repairs should be limited to those additions or changes that are necessary for the preservation and maintenance of the property to deter or prevent excessive, rapid, or dangerous deterioration or obsolescence and to restore property damaged by storm, flood, fire, accident, or earthquake only where it has been determined that restoration is required.

E. *Improvements.* No costs should be incurred to increase the sales value of a property, and no costs should be incurred to make a property disposable without the prior approval of GSA. (See § 101–47.401–5.)

*Effective date.* These regulations are effective December 22, 1964.

Dated: November 20, 1964.

LAWSON B. KNOTT, JR.,
*Acting Administrator of General Services.*

[F.R. Doc. 64–12287; Filed, Dec. 2, 1964; 8:45 a.m.]

# Title 14—AERONAUTICS AND SPACE

## Chapter I—Federal Aviation Agency

[Reg. Docket No. 6084]

## PART 29—AIRWORTHINESS STANDARDS: TRANSPORT CATEGORY ROTORCRAFT [NEW]

This amendment adds Part 29 [New] to the Federal Aviation Regulations to replace Part 7 of the Civil Air Regulations, and is a part of the Agency recodification program announced in Draft Release 61–25, published in the FEDERAL REGISTER on November 15, 1961 (26 F.R. 10698).

Part 29 [New] was published as a notice of proposed rule making in the FEDERAL REGISTER on May 28, 1964 (29 F.R. 7050), and given further distribution as Notice No. 64–30.

During the life of the recodification project, Chapter I of Title 14 may contain more than one part bearing the same number. To differentiate between the two, the recodified parts, such as this one, are labeled "[New]". The label will be dropped at the completion of the project as all of the regulations will be new.

Many of the comments received recommended specific substantive changes to the regulations. Many of these recommendations appear to be meritorious. However, they cannot be adopted as a part of the recodification program, since the purpose of the program is simply to streamline and clarify present regulatory language and delete obsolete or redundant provisions. To attempt substantive changes, other than relaxatory ones that are completely noncontroversial, would delay the project and be contrary to the ground rules specified for it in Draft Release 61–25. However, all comments of this nature will be preserved and considered in any later substantive revision of this part.

Present CAR Part 7 reflects the various writing styles used by those who have worked on it in the past. Consistency in language is vital to consistency in interpretation and fairness in application, especially in technical, complex rules such as this one. The recodification has allowed us to use one style throughout Part 29 [New]. The style changes that have been made do not affect substance.

Part 29 [New] substitutes the word "must" for "shall". This has been done because airworthiness standards are conditions precedent that must be met for the issue of a type certificate. The imperative "shall" would be inappropriate since the failure to meet these standards simply results in a denial of the certificate without further penalty.

The sections in Part 29 [New] have been rearranged and renumbered so that the requirements of this part have the same number as comparable requirements in Parts 23 [New], 25 [New], and 27 [New]. This explains apparent gaps in section numbers in this part, such as that between § 29.79 *Limiting height-speed envelope* and § 29.141 *General.* (This gap, for instance, is assigned to the turbine engine performance requirements of Part 25 [New], and includes the normal "growth" gap between subtopics). Comparative review of specific requirements between airworthiness parts is greatly facilitated by this rearrangement, and has already resulted, for example, in the deletion of §§ 7.202(c), 7.331, 7.433, 7.600, 7.602, 7.610, 7.620, 7.700(a), and 7.744 as surplusage. Further, this rearrangement allows more efficient review of all parts in the light of comments received on any single part. For example, a comment received on Part 23 [New] has resulted in the deletion of all but the last sentence of the requirement that now appears in § 29.607. As industry becomes acquainted with the new format, the effectiveness of comments received should be greatly magnified.

As was stated in the preamble of the notice of proposed rule making of Part 29, those definitions in present Part 7 (and not now in Part 1 or executed in this part) that are necessary will be recodified with the definitions of other airworthiness parts and added to Part 1 [New]. The detailed disposition of § 7.1 in the distribution table should resolve most definition problems that may arise.

The definitions, abbreviations, and rules of construction in Part 1 [New] of the Federal Aviation Regulations apply to Part 29 [New].

The most significant changes to Part 29 since the notice are listed below. The numbers in parentheses refer to the section numbers in the notice and in former Part 7, respectively.

(1) In § 29.143 (29.71) (7.121), paragraph (b), subparagraph (2) has been deleted from the section as it appeared in the notice. This effectuates the second paragraph of the preamble in CAR amendment 6–4, effective October 1, 1959, in which it was intended that 6.121 be revised to replace the requirement for a demonstration of controllability after power failure at only one high speed condition, namely 6.121(c), with a requirement for controllability after power failure over the range of airspeeds and altitudes for which certification is sought, namely 6.121(e). While the amendment modified Part 6, its applicability to Part 7 is desirable and apparent. Insofar as the intended deletion was not made in the rule at that time and both requirements remained outstanding, the deletion of 7.121(c) at this time is relaxatory.

(2) The Aerospace Industries Association, Inc. (AIA) suggested that the word "maximum" between "A" and "wind velocity" in § 27.143 (27.65) (6.121) was ambiguous, since in context it could refer either to a performance maximum or to the "maximum" safe wind for operation near the ground in § 27.1587 (27.789) (6.743). This comment is relevant to Part 29. Since ultimate performance capability need not be shown under § 29.143, the word "maximum" has been deleted.

(3) In § 29.301 (29.121) (7.200), the descriptions of limit and ultimate loads have been put back in. It is felt that their utility will be greater in the basic rule than in Part 1 [New].

(4) As a result of a comment from AIA, § 29.397 (29.165) (7.225) has been revised. The major change is to paragraph (b), which now reflects the original language in Part 7 with only stylistic changes. This was done to assure preservation of existing practices with respect to the application of the factor "0.60". It is recognized that § 7.225(a) is confusing and that substantive review of that paragraph is necessary.

(5) In § 29.601 (29.251) (7.300), the reference to experience as an element in determining which "hazardous or unreliable" features are covered by the rule has been put back in. This change was made at the request of AIA and is clarifying only.

(6) In § 29.611 (29.261) (7.305), paragraph (a), "periodic inspection" has been replaced with "recurring inspection". This avoids any potential conflict between the intent in the subject section to cover all inspections that occur at regular intervals and the more specific use of the term "periodic inspection" in Parts 43 [New] and 91 [New].

(7) AIA suggested that the language in § 29.775 (29.355) (7.352) be revised to make it clear that (1) materials other than glass may be used in the windows and (2) only glass panes need contain nonsplintering safety glass. This has been done.

(8) In § 29.785 (29.361) (7.355), paragraph (f), the phrase "an occupant" has been added between "designed for" and "weight". This was done to make it clear that the weight of the seat itself is not included within the meaning of this paragraph.

(9) In § 29.807 (29.365) (7.357), paragraph (a), the note following 7.357(a) has been added as a flush paragraph. It was inadvertently omitted in the notice.

(10) Aero Flow Dynamics, Inc. suggested that the heading and language in § 29.997 (29.509) (7.435) be conformed to that in other airworthiness Parts. This has been done.

(11) As a result of a comment from AIA, the "two shot" requirements of § 29.1195 (29.639) (7.484) have been modified to make it clear that the two shot capability need only be provided by a single fire extinguishing system.

(12) In § 29.1307 (29.675) (7.605), paragraph (1), a cross reference to § 29.1145 has been provided to make it clear that ganged ignition switches may be used to satisfy the subject paragraph. This was done in response to a comment from AIA.

(13) Section 29.1309 (29.677) (7.625) has been revised to make it clear, as in the original rule, that the general requirement of guarding against hazard in the event of malfunction or failure applies to all equipment, systems, and installations, not only to those whose functioning is necessary to show compliance with any regulation in this subchapter.

(14) At the suggestion of AIA, § 29.1505 (29.823) (7.711), paragraph

(b), has been reworded to clarify the permissive aspect of this section.

Other minor changes of a technical clarifying nature have been made. They are not substantive and do not impose any burden on regulated persons.

In the notice, it was proposed to convert references to "miles" and "miles per hour" to their exact nautical equivalents. Many formulae have been derived under the existing system. The effect of rounding off to the nearest whole number is unclear in certain cases. Although specifically invited, few comments have been received on this problem. Because of this it is felt that wholesale conversion should be made separately at a later date.

Interested persons have been given an opportunity to participate in the making of this regulation and due consideration has been given to all relevant matter presented. The Agency is appreciative of the cooperative spirit in which the public's comments were submitted.

In consideration of the foregoing, Chapter I of Title 14 of the Code of Federal Regulations is amended as follows, effective February 1, 1965.

1. By deleting Part 7.

2. By adding a Part 29 [New] reading as hereinafter set forth.

Issued in Washington, D.C., on October 13, 1964.

N. E. HALABY,
*Administrator.*

Subpart A—General

Sec.
29.1 Applicability.

Subpart B—Flight

General

29.21 Proof of compliance.
29.25 Weight limits.
29.27 Center of gravity limits.
29.29 Empty weight and corresponding center of gravity.
29.31 Removable ballast.
29.33 Main rotor speed and pitch limits.

Performance

29.45 General.
29.51 Takeoff data: general.
29.53 Takeoff: category A.
29.59 Takeoff path: category A.
29.63 Takeoff: category B.
29.65 Category B climb: all engines operating.
29.67 Climb: one engine inoperative.
29.71 Helicopter angle of glide: category B.
29.73 Performance at minimum operating speed.
29.75 Landing.
29.77 Balked landing: category A.
29.79 Limiting height-speed envelope.

Flight Characteristics

29.141 General.
29.143 Controllability and maneuverability.
29.161 Trim control.
29.171 Stability: general.
29.173 Static longitudinal stability.
29.175 Demonstration of static longitudinal stability.

Ground and Water Handling Characteristics

29.231 General.
29.235 Taxiing condition.
29.239 Spray characteristics.
29.241 Ground resonance.

Miscellaneous Flight Requirements

29.251 Vibration.

Subpart C—Strength Requirements

General

29.301 Loads.
29.303 Factor of safety.
29.305 Strength and deformation.
29.307 Proof of structure.
29.309 Design limitations.

Flight Loads

29.321 General.
29.337 Limit maneuvering load factor.
29.339 Resultant limit maneuvering loads.
29.341 Gust loads.
29.351 Yawing conditions.
29.361 Engine torque.

Control Surface and System Loads

Sec.
29.391 General.
29.395 Control system.
29.397 Limit pilot forces.
29.399 Dual control system.
29.401 Auxiliary rotor assemblies.
29.403 Auxiliary rotor attachment structure.
29.411 Ground clearance: tail rotor guard.
29.413 Stabilizing and control surfaces.

Ground Loads

29.471 General.
29.473 Ground loading conditions and assumptions.
29.475 Tires and shock absorbers.
29.477 Landing gear arrangement.
29.479 Level landing conditions.
29.481 Tail-down landing conditions.
29.483 One-wheel landing conditions.
29.485 Lateral drift landing conditions.
29.493 Braked roll conditions.
29.497 Ground loading conditions: landing gear with tail wheels.
29.505 Ski landing conditions.

Water Loads

29.521 Float landing conditions.

Main Component Requirements

29.547 Main rotor structure.
29.549 Fuselage and rotor pylon structures.
29.551 Auxiliary lifting surfaces.

Emergency Landing Conditions

29.561 General.

Subpart D—Design and Construction

General

29.601 Design.
29.603 Materials.
29.605 Fabrication methods.
29.607 Self locking nuts.
29.609 Protection of structure.
29.611 Inspection provisions.
29.613 Material strength properties and design values.
29.619 Special factors.
29.621 Casting factors.
29.623 Bearing factors.
29.625 Fitting factors.
29.629 Flutter.

Main Rotor

29.653 Pressure venting and drainage of main rotor blades.
29.659 Mass balance.
29.661 Rotor blade clearance.

Control Systems

29.671 General.
29.675 Stops.
29.679 Control system locks.
29.681 Limit load static tests.

Sec.
29.683 Operation tests.
29.685 Control system details.
29.687 Spring devices.
29.691 Autorotation control mechanism.
29.695 Power boost and power-operated control system.

Landing Gear

29.723 Shock absorption tests.
29.725 Limit drop test.
29.727 Reserve energy absorption drop test.
29.729 Retracting mechanism.
29.731 Wheels.
29.733 Tires.
29.735 Brakes.
29.737 Skis.

Floats and Hulls

29.751 Main float buoyancy.
29.753 Main float design.
29.755 Hulls.

Personnel and Cargo Accommodations

29.771 Pilot compartment.
29.773 Pilot compartment view.
29.775 Windshield and windows.
29.777 Cockpit controls.
29.783 Doors.
29.785 Seats, safety belts, and harnesses.
29.787 Cargo and baggage compartments.
29.803 Emergency evacuation.
29.805 Flight crew emergency exits.
29.807 Passenger emergency exits.
29.809 Emergency exit arrangement.
29.811 Emergency exit marking.
29.813 Emergency exit access.
29.815 Main aisle width.
29.831 Ventilation.
29.833 Heaters.

Fire Protection

29.851 Fire extinguishers.
29.853 Compartment interiors.
29.855 Cargo and baggage compartments.
29.859 Combustion heater fire protection.
29.861 Fire protection of structure, controls, and other parts.
29.863 Flammable fluid fire protection.

Miscellaneous

29.871 Leveling marks.
29.873 Ballast provisions.
29.877 Ice protection.

Subpart E—Powerplant

General

29.901 Installation.
29.903 Engines.
29.907 Engine vibration.

Rotor Drive System

29.917 Design.
29.921 Rotor brake.
29.923 Rotor drive system and control mechanism tests.
29.927 Additional tests.
29.931 Shafting critical speed.
29.935 Shafting joints.

Fuel System

29.951 General.
29.953 Fuel system independence.
29.955 Fuel flow.
29.957 Flow between interconnected tanks.
29.959 Unusable fuel supply.
29.961 Fuel system hot weather operation.
29.963 Fuel tanks: general.
29.965 Fuel tank tests.
29.967 Fuel tank installation.
29.969 Fuel tank expansion space.
29.971 Fuel tank sump.
29.973 Fuel tank filler connection.
29.975 Fuel tank vents and carburetor vapor vents.
29.977 Fuel tank outlet.
29.979 Pressure refueling and fueling provisions below fuel level.

Fuel System Components

29.991 Fuel pumps.
29.993 Fuel system lines and fittings.
29.995 Fuel valves.
29.997 Fuel strainer or filter.
29.999 Fuel system drains.

Oil System

29.1011 General.
29.1013 Oil tanks.
29.1015 Oil tank tests.
29.1017 Oil lines and fittings.
29.1019 Oil strainer or filter.
29.1021 Oil system drains.
29.1023 Oil radiators.
29.1025 Oil valves.

Cooling

29.1041 General.
29.1043 Cooling tests.
29.1045 Climb cooling test procedures.
29.1047 Takeoff cooling test procedures.
29.1049 Hovering cooling test procedures.

Induction System

29.1091 Air induction.
29.1093 Induction system icing protection.
29.1101 Carburetor air preheater design.
29.1103 Induction system ducts.
29.1105 Induction system screens.
29.1107 Inter-coolers and after-coolers.
29.1109 Carburetor air cooling.

Exhaust System

29.1121 General.
29.1123 Exhaust piping.
29.1125 Exhaust heat exchangers.

Powerplant Controls and Accessories

29.1141 Powerplant controls: general.
29.1143 Throttle and antidetonant injection system controls.
29.1145 Ignition switches.
29.1147 Mixture controls.
29.1151 Rotor brake controls.
29.1157 Carburetor air temperature controls.
29.1159 Supercharger controls.
29.1163 Powerplant accessories.
29.1165 Engine ignition systems.

Powerplant Fire Protection

29.1181 Designated fire zones: regions included.
29.1183 Lines and fittings.
29.1185 Flammable fluids.
29.1187 Drainage and ventilation of fire zones.
29.1189 Shutoff means.
29.1191 Firewalls.
29.1193 Engine cowling and engine compartment covering.
29.1195 Fire-extinguishing systems.
29.1197 Fire-extinguishing agents.
29.1199 Extinguishing agent containers.
29.1201 Fire-extinguishing system materials.
29.1203 Fire-detector systems.

Subpart F—Equipment

General

29.1301 Function and installation.
29.1303 Flight and navigation instruments.
29.1305 Powerplant instruments.
29.1307 Miscellaneous equipment.
29.1309 Equipment, systems, and installations.

Instruments: Installation

29.1321 Arrangement and visibility.
29.1323 Airspeed indicating system.
29.1325 Static air vent and pressure altimeter systems.
29.1327 Magnetic direction indicator.
29.1329 Automatic pilot system.
29.1331 Instruments using a power supply.
29.1333 Duplicate instrument systems.
29.1337 Powerplant instruments.

Electrical Systems and Equipment

29.1351 General.
29.1353 Electrical equipment and installations.
29.1355 Distribution system.
29.1357 Circuit protective devices.
29.1359 Electrical system fire and smoke protection.
29.1363 Electrical system tests.

Lights

29.1381 Instrument lights.
29.1383 Landing lights.
29.1385 Position light system installation.
29.1387 Position light system dihedral angles.
29.1389 Position light distribution and intensities.
29.1391 Minimum intensities in the horizontal plane of forward and rear position lights.
29.1393 Minimum intensities in any vertical plane of forward and rear position lights.
29.1395 Maximum intensities in overlapping beams of forward and rear position lights.
29.1397 Color specifications.
29.1399 Riding light.
29.1401 Anticollision light system.

Safety Equipment

29.1411 General.
29.1413 Safety belts: passenger warning device.
20.1415 Ditching equipment.

Miscellaneous Equipment

29.1431 Electronic equipment.
29.1433 Vacuum systems.
29.1435 Hydraulic systems.
29.1439 Protective breathing equipment.

Subpart G—Operating Limitations and Information

29.1501 General.

Operating Limitations

29.1503 Airspeed limitations: general.
29.1505 Never-exceed speed.
29.1509 Rotor speed.
29.1517 Limiting height-speed envelope.
29.1519 Weight and center of gravity.
29.1521 Powerplant limitations.
29.1523 Minimum flight crew.
29.1525 Kinds of operation.
29.1529 Maintenance manual.

Markings and Placards

29.1541 General.
29.1543 Instrument markings: general.
29.1545 Airspeed indicator.
29.1547 Magnetic direction indicator.
29.1549 Powerplant instruments.
29.1551 Oil quantity indicator.
29.1553 Fuel quantity indicator.
29.1555 Control markings.
29.1557 Miscellaneous markings and placards.
29.1559 Operating limitations placard.
29.1561 Safety equipment.
29.1565 Tail rotor.

Rotorcraft Flight Manual

29.1581 General.
29.1583 Operating limitations.
29.1585 Operating procedures.
29.1587 Performance information.
29.1589 Loading information.

AUTHORITY: The provisions of this Part 29 issued under secs. 313(a), 601, 603, Federal Aviation Act of 1958; 49 U.S.C. 1354(a), 1421, 1423.

## Subpart A—General

**§ 29.1 Applicability.**

(a) This part prescribes airworthiness standards for the issue of type certificates, and changes to those certificates, for—

(1) Multiengine rotorcraft that meet the requirements for transport category A;

(2) Rotorcraft with maximum weights of 20,000 pounds or less that meet the requirements for transport category B; and

(3) Multiengine rotorcraft that meet the requirements for transport category A or B.

(b) Each person who applies under Part 21 [New] for a certificate or change described in paragraph (a) of this section must show compliance with the applicable requirements of this part.

## Subpart B—Flight

### General

**§ 29.21 Proof of compliance.**

(a) Each requirement of this subpart must be met at each appropriate combination of weight and center of gravity within the range of loading conditions for which certification is requested. This must be shown—

(1) By tests upon a rotorcraft of the type for which certification is requested, or by calculations based on, and equal in accuracy to, the results of testing; and

(2) By systematic investigation of each required combination of weight and center of gravity, if compliance cannot be reasonably inferred from combinations investigated.

(b) The controllability, stability, and trim of the rotorcraft must be shown for each altitude up to the maximum expected in operation.

**§ 29.25 Weight limits.**

(a) *Maximum weight.* The maximum weight (the highest weight at which compliance with each applicable requirement of this part is shown) or, at the option of the applicant, the highest weight for each altitude and for each practicably separable operating condition, such as takeoff, en route operation, and landing, must be established so that it is not more than—

(1) The highest weight selected by the applicant;

(2) The design maximum weight (the highest weight at which compliance with each applicable structural loading condition of this part is shown); or

(3) The highest weight at which compliance with each applicable flight requirement of this part is shown.

(b) *Minimum weight.* The minimum weight (the lowest weight at which compliance with each applicable requirement of this part is shown) must be established so that it is not less than—

(1) The lowest weight selected by the applicant;

(2) The design minimum weight (the lowest weight at which compliance with each structural loading condition of this part is shown); or

(3) The lowest weight at which compliance with each applicable flight requirement of this part is shown.

**§ 29.27 Center of gravity limits.**

The extreme forward and the extreme aft center of gravity must be established for each weight established under § 29.25. Such an extreme may not lie beyond—

(a) The extremes selected by the applicant;

(b) The extremes within which the structure is proven; or

(c) The extremes within which compliance with the applicable flight requirements is shown.

**§ 29.29 Empty weight and corresponding center of gravity.**

(a) The empty weight and corresponding center of gravity must be determined by weighing the rotorcraft without the crew and payload, but with—

(1) Fixed ballast;

(2) Unusable fuel;

(3) Undrainable oil;

(4) Engine coolant; and

(5) Hydraulic fluid.

(b) The condition of the rotorcraft at the time of determining empty weight must be one that is well defined and can be easily repeated, particularly with respect to the weights of fuel, oil, coolant, and installed equipment.

**§ 29.31 Removable ballast.**

Removable ballast may be used in showing compliance with the flight requirements of this subpart.

**§ 29.33 Main rotor speed and pitch limits.**

(a) *Main rotor speed limits.* A range of main rotor speeds must be established that—

(1) With power on, provides adequate margin to accommodate the variations in rotor speed occurring in any appropriate maneuver, and is consistent with the kind of governor or synchronizer used; and

(2) With power off, allows each appropriate autorotative maneuver to be performed throughout the ranges of airspeed and weight for which certification is requested.

(b) *Normal main rotor pitch limits.* The range of main rotor pitch settings must be limited as follows:

(1) A means must be provided so that the normal high pitch limit, with full throttle, does not result in rotor speeds substantially less than the minimum approved for any sustained flight condition. This means need not be provided, however, if—

(i) The inherent characteristics of the rotorcraft make it unnecessary; or

(ii) There are adequate means to warn the pilot of unsafe main rotor speeds.

(2) With power off, the low pitch limit must—

(i) Provide rotor speeds within the approved range for autorotative conditions under the most critical combinations of weight and airspeed; and

(ii) Allow the pilot, without exceptional skill, to prevent overspeeding of the rotor.

(c) *Emergency high pitch.* A main rotor pitch higher than the normal high pitch limit prescribed in paragraph (b)(1) of this section may be made available for emergency use if the normal high pitch limit cannot be exceeded inadvertently.

### Performance

**§ 29.45 General.**

(a) The performance prescribed in this subpart must be determined—

(1) With normal piloting skill;

(2) Without exceptionally favorable conditions; and

(3) With each powerplant accessory absorbing the amount of power that is normal for the flight condition being investigated.

(b) Compliance with the performance requirements of this subpart must be shown—

(1) For still air at sea level with a standard atmosphere;

(2) For the range of atmospheric variables selected by the applicant; and

(3) Where engine power affects performance, with air at 80 percent relative humidity, or 0.7" Hg. vapor pressure, whichever is less.

**§ 29.51 Takeoff data: general.**

(a) The takeoff data required by §§ 29.53(b), 29.59, 29.63, and 29.67(a)(1) and (2) must be determined—

(1) At each weight, altitude, and temperature selected by the applicant; and

(2) With the operating engines within approved operating limitations.

(b) Takeoff data must—

(1) Be determined on a smooth, dry, hard surface; and

(2) Be corrected to assume a level takeoff surface.

(c) No takeoff made to determine the data required by this section may require exceptional piloting skill or alertness, or exceptionally favorable conditions.

**§ 29.53 Takeoff: category A.**

(a) *General.* The takeoff performance must be determined and scheduled so that, if one engine fails at any time after the start of takeoff, the rotorcraft can—

(1) Return to, and stop safely on, the takeoff area; or

(2) Continue the takeoff and climbout, and attain a configuration and airspeed allowing compliance with § 29.67(a)(2).

(b) *Critical decision point.* The critical decision point must be a combination of height and speed selected by the applicant in establishing the flight paths under § 29.59. The critical decision point must be obtained so as to avoid the critical areas of the limiting height-speed envelope established under § 29.79.

**§ 29.59 Takeoff path: category A.**

(a) The takeoff climbout path, and the rejected takeoff path must be established so that the takeoff, climbout, and rejected takeoff are accomplished with a safe, smooth transition between each stage of the maneuver. The takeoff may be begun in any manner if—

(1) The takeoff surface is defined; and

(2) Adequate safeguards are maintained to ensure proper center of gravity and control positions.

(b) The rejected takeoff path must be established with takeoff power on each engine from the start of takeoff to the critical decision point, at which point it is assumed that the critical engine becomes inoperative, and that the rotorcraft is brought to a safe stop with the remaining engines operating within approved operating limitations.

(c) The takeoff climbout path must be established with takeoff power on each engine from the start of takeoff to the critical decision point, at which point it is assumed that the critical engine becomes inoperative. With the remaining engines operating within approved operating limitations, the rotorcraft must be accelerated to the takeoff safety speed by the end of the rejected takeoff distance, and the climbout must be made—

(1) At not less than the takeoff safety speed used in meeting the rate of climb requirements of § 29.67(a)(1); and

(2) So that the airspeed and configuration used in meeting the climb requirement of § 29.67(a)(2) are attained.

**§ 29.63 Takeoff: category B.**

The takeoff and climbout must be established with the most unfavorable center of gravity. The takeoff may be begun in any manner if—

(a) The takeoff surface is defined;

(b) Adequate safeguards are maintained to ensure proper center of gravity and control positions; and

(c) A landing can be made safely at any point along the flight path if an engine fails.

**§ 29.65 Category B climb: all engines operating.**

(a) The steady rate of climb at $V_Y$ must be determined for each category B rotorcraft—

(1) With maximum continuous power on each engine;

(2) With the landing gear retracted; and

(3) For the weights, altitudes, and temperatures for which certification is requested.

(b) For each category B rotorcraft except helicopters, the rate of climb determined under paragraph (a) of this section must provide a steady climb gradient of at least 1:6 under standard sea level conditions.

**§ 29.67 Climb: one engine inoperative.**

(a) For category A rotorcraft, the following apply:

(1) The steady rate of climb without ground effect must be at least 100 feet per minute for each weight, altitude, and temperature for which takeoff data are to be scheduled, with—

(i) The critical engine inoperative and the remaining engines within approved operating limitations;

(ii) The most unfavorable center of gravity for takeoff;

(iii) The landing gear extended;

(iv) The speed selected by the applicant; and

(v) Cowl flaps or other means of controlling the engine-cooling air supply in the position that provides adequate cooling at the temperatures and altitudes for which certification is requested.

(2) The steady rate of climb without ground effect must be at least 150 feet per minute for each weight, altitude, and temperature for which takeoff data are to be scheduled, with—

(i) The critical engine inoperative and the remaining engines at maximum continuous power;

(ii) The most unfavorable center of gravity for takeoff;

(iii) The landing gear retracted;

(iv) The speed selected by the applicant; and

(v) Cowl flaps or other means of controlling the engine-cooling air supply in the position that provides adequate cooling at the temperatures and altitudes for which certification is requested.

(3) The steady rate of climb, in feet per minute, at any altitude at which the rotorcraft is expected to operate, and at any weight within the range of weights for which certification is requested, must be determined with—

(i) The critical engine inoperative, and the remaining engines at the maximum continuous power available at each altitude;

(ii) The most unfavorable center of gravity;

(iii) The landing gear retracted;

(iv) The speed selected by the applicant; and

(v) Cowl flaps or other means of controlling the engine-cooling air supply in the position that provides adequate cooling at the temperatures and altitudes for which certification is requested.

(b) For multiengine category B helicopters meeting the requirements for category A in § 29.79, the steady rate of climb (or descent) must be determined at the speed for best rate of climb (or minimum rate of descent) with one engine inoperative and the remaining engines at maximum continuous power.

**§ 29.71 Helicopter angle of glide: category B.**

For each category B helicopter, the steady angle of glide must be determined in autorotation—

(a) At the maximum and minimum rates of descent;

(b) At maximum weight; and

(c) With the optimum forward speed.

**§ 29.73 Performance at minimum operating speed.**

(a) For each category A rotorcraft, the hovering performance must be determined over the ranges of weight, altitude, and temperature for which takeoff data are scheduled—

(1) With not more than takeoff power on each engine;

(2) With the landing gear extended; and

(3) At a height consistent with the procedure used in establishing the takeoff climbout and rejected takeoff paths.

(b) For each category B helicopter—

(1) The hovering performance must be determined over the ranges of weight, altitude, and temperature for which certification is requested, with—

(i) Takeoff power on each engine;

(ii) The landing gear extended; and

(iii) The helicopter in ground effect at a height consistent with normal takeoff procedures; and

(2) The hovering ceiling determined under subparagraph (1) of this paragraph must be at least 4,000 feet with maximum weight and standard atmosphere.

(c) For rotorcraft other than helicopters, the steady rate of climb at the minimum operating speed must be determined, over the ranges of weight, altitude, and temperature for which certification is requested, with—

(1) Takeoff power; and

(2) The landing gear extended.

**§ 29.75 Landing.**

(a) *General.* For each rotorcraft—

(1) The corrected landing data must—

(i) Be determined on a smooth, dry, hard surface; and

(ii) Assume a level landing surface;

(2) The approach and landing may not require exceptional piloting skill or exceptionally favorable conditions;

(3) The landing must be made without excessive vertical acceleration or tendency to bounce, nose over, ground loop, porpoise, or water loop; and

(4) The landing data required by paragraphs (b) and (c) of this section and by § 29.77 must be determined—

(i) At each weight, altitude, and temperature selected by the applicant; and

(ii) With each operating engine within approved operating limitations.

(b) *Category A.* For category A rotorcraft—

(1) The landing performance must be determined and scheduled so that, if one engine fails at any point in the approach path, the rotorcraft can either land and stop safely or climb out from a point in the approach path and attain a rotorcraft configuration and speed allowing compliance with the climb requirement of § 29.67(a)(2);

(2) The approach, balked landing, and landing paths must be established, with one engine inoperative, so that the transition between each stage can be made smoothly and safely;

(3) The approach and landing speeds must be selected by the applicant and must be appropriate to the type of rotorcraft;

(4) The approach and landing path must be established to avoid the critical areas of a limiting height-speed envelope established—

(i) Under § 29.79; or

(ii) For the landing condition with one engine inoperative;

(5) It must be possible to make a safe landing on a prepared landing surface after complete power failure occurring during normal cruise; and

(6) The maximum allowable rate of descent in autorotation must be determined.

(c) *Category B.* For each category B rotorcraft—

(1) The horizontal distance required to land and come to a complete stop (or to a speed of approximately three m.p.h. for water landings), from a point 50 feet above the landing surface, must be determined with—

(i) Glide speeds appropriate to the type of rotorcraft and chosen by the applicant; and

(ii) The approach and landing made with power off and entered from steady autorotation; and

(2) Each multiengine category B rotorcraft that meets the powerplant installation requirements for category A must meet the requirements of—

(i) Subparagraph (1) of this paragraph; or

(ii) Paragraph (b) (2) through (6) of this section:

**§ 29.77 Balked landing: category A.**

For category A rotorcraft, the balked landing path must be established so that—

(a) With one engine inoperative, the transition from each stage of the maneuver to the next stage can be made smoothly and safely; and

(b) From a combination of height and speed in the approach path selected by the applicant, a safe climbout can be made at speeds allowing compliance with the climb requirements of § 29.67(a) (1) and (2).

**§ 29.79 Limiting height-speed envelope.**

(a) If there is any combination of height and forward speed (including hover) under which a safe landing cannot be made under the applicable power failure condition in paragraph (b) of this section, a limiting height-speed envelope must be established for that condition.

(b) The applicable power failure conditions are—

(1) For category A rotorcraft, sudden failure of the critical engine with the remaining engines at takeoff power;

(2) For category B rotorcraft, complete power failure; and

(3) For multiengine, category B rotorcraft for which certification under the powerplant installation requirements of category A is requested, the condition specified in either subparagraph (1) or (2) of this paragraph.

FLIGHT CHARACTERISTICS

**§ 29.141 General.**

The rotorcraft must—

(a) Meet the requirements of this section and of §§ 29.143, 29.161, and 29.171 through 29.175—

(1) At the normally expected operating altitudes;

(2) Under any critical loading condition within the range of weights and centers of gravity for which certification is requested; and

(3) Under any condition of speed, power, and rotor r.p.m. for which certification is requested;

(b) Be able to maintain any required flight condition and make a smooth transition from any flight condition to any other flight condition without exceptional piloting skill, alertness or strength, and without danger of exceeding the limit load factor under any operating condition probable for the type, including sudden powerplant failure; and

(c) Have any additional characteristics required for night or instrument operation, if certification for those kinds of operation is requested.

**§ 29.143 Controllability and maneuverability.**

(a) The rotorcraft must be safely controllable and maneuverable—

(1) During steady flight; and

(2) During any maneuver appropriate to the type, including—

(i) Takeoff;

(ii) Climb;

(iii) Level flight;

(iv) Turning flight;

(v) Glide; and

(vi) Landing (power on and power off).

(b) The margin of cyclic control must allow satisfactory roll and pitch control at $V_{NE}$, with—

(1) Maximum weight;

(2) Critical center of gravity;

(3) Critical rotor r.p.m.; and

(4) Power on and power off.

(c) A wind velocity of not less than 20 miles per hour must be established in which the rotorcraft can be operated without loss of control on or near the ground in any maneuver appropriate to the type (such as crosswind takeoffs, sideward flight, and rearward flight), with—

(1) Critical center of gravity; and

(2) Critical rotor r.p.m.

(d) The rotorcraft, after power failure, must be controllable over the range of speeds and altitudes for which certification is requested, when the power failure occurs with maximum continuous power and critical weight. No corrective action time delay for any condition following power failure may be less than—

(1) For the cruise condition, one second, or normal pilot reaction time (whichever is greater); and

(2) For any other condition, normal pilot reaction time.

**§ 29.161 Trim control.**

The trim control—

(a) Must trim any steady longitudinal and lateral control forces to zero in level flight at any appropriate speed; and

(b) May not introduce any undesirable discontinuities in control force gradients.

**§ 29.171 Stability: general.**

The rotorcraft must be able to be flown, without undue pilot fatigue or strain, in any normal maneuver for a period of time as long as that expected in normal operation. At least three landings and takeoffs must be made during this demonstration.

**§ 29.173 Static longitudinal stability.**

(a) The longitudinal cyclic control must be designed so that, for the ranges of altitude and rotor r.p.m. for which certification is requested, and with throttle and collective pitch held constant during the maneuvers specified in § 29.175—

(1) A rearward movement of the control is necessary to obtain airspeeds less than the trim speed; and

(2) A forward movement of the control is necessary to obtain airspeeds greater than the trim speed.

(b) The stick position versus speed curve may have a negative slope within the speed ranges specified for each maneuver in § 29.175 (a) through (c) if the necessary negative stick travel is not greater than ten percent of the total stick travel.

**§ 29.175 Demonstration of static longitudinal stability.**

(a) *Climb.* Static longitudinal stability must be shown in the climb condition at speeds from 0.85 $V_Y$ to 1.2 $V_Y$, with—

(1) Critical weight;

(2) Critical center of gravity;

(3) Maximum continuous power;

(4) The landing gear retracted; and

(5) The rotorcraft trimmed at $V_Y$.

(b) *Cruise.* Static longitudinal stability must be shown in the cruise condition at speeds from 0.7 $V_H$ or 0.7 $V_{NE}$, whichever is less, to 1.1 $V_H$ or 1.1 $V_{NE}$, whichever is less, with—

(1) Critical weight;

(2) Critical center of gravity;

(3) Power for level flight at 0.9 $V_H$ or 0.9 $V_{NE}$, whichever is less;

(4) The landing gear retracted; and

(5) The rotorcraft trimmed at 0.9 $V_H$ or 0.9 $V_{NE}$, whichever is less.

(c) *Autorotation.* Static longitudinal stability must be shown in autorotation throughout the speed range for which certification is requested, with—

(1) Critical weight;

(2) Critical center of gravity;

(3) Power off;

(4) The landing gear (i) retracted and (ii) extended; and

(5) The rotorcraft trimmed at the speed for minimum rate of descent.

(d) *Hovering.* For helicopters in the hovering condition—

(1) The longitudinal cyclic control must operate with the sense and direction of motion prescribed in § 29.173; and

(2) The stick position curve must have a stable slope, between the maximum approved rearward speed and a forward speed of 20 miles per hour, with—

(i) The determined hovering weight (for category A helicopters), or critical weight (for other helicopters);

(ii) The critical center of gravity;

(iii) Power required for hovering in still air;

(iv) The landing gear retracted; and

(v) The helicopter trimmed for hovering.

GROUND AND WATER HANDLING CHARACTERISTICS

**§ 29.231 General.**

The rotorcraft must have satisfactory ground and water handling characteristics, including freedom from uncontrollable tendencies in any condition expected in operation.

**§ 29.235 Taxiing condition.**

The rotorcraft must be designed to withstand the loads that would occur when the rotorcraft is taxied over the roughest ground that may reasonably be expected in normal operation.

**§ 29.239 Spray characteristics.**

If certification for water operation is requested, no spray characteristics during taxiing, takeoff, or landing may obscure the vision of the pilot or damage the rotors, propellers, or other parts of the rotorcraft.

**§ 29.241 Ground resonance.**

The rotorcraft may have no dangerous tendency to oscillate on the ground with the rotor turning.

MISCELLANEOUS FLIGHT REQUIREMENTS

**§ 29.251 Vibration.**

Each part of the rotorcraft must be free from excessive vibration under each appropriate speed and power condition.

## Subpart C—Strength Requirements

GENERAL

**§ 29.301 Loads.**

(a) Strength requirements are specified in terms of limit loads (the maximum loads to be expected in service) and ultimate loads (limit loads multiplied by prescribed factors of safety). Unless otherwise provided, prescribed loads are limit loads.

(b) Unless otherwise provided, the specified air, ground, and water loads must be placed in equilibrium with inertia forces, considering each item of mass in the rotorcraft. These loads must be distributed to closely approximate or conservatively represent actual conditions.

(c) If deflections under load would significantly change the distribution of external or internal loads, this redistribution must be taken into account.

**§ 29.303 Factor of safety.**

Unless otherwise provided, a factor of safety of 1.5 must be used. This factor applies to external and inertia loads unless its application to the resulting internal stresses is more conservative.

**§ 29.305 Strength and deformation.**

(a) The structure must be able to support limit loads without detrimental or permanent deformation. At any load up to limit loads, the deformation may not interfere with safe operation.

(b) The structure must be able to support ultimate loads without failure. This must be shown by—

(1) Applying ultimate loads to the structure in a static test for at least three seconds; or

(2) Dynamic tests simulating actual load application.

**§ 29.307 Proof of structure.**

(a) Compliance with the strength and deformation requirements of this subpart must be shown for each critical loading condition. Structural analysis may be used only if the structure conforms to those for which experience has shown this method to be reliable. In other cases, substantiating load tests must be made.

(b) Proof of compliance with the strength requirements of this subpart must include—

(1) Dynamic and endurance tests of rotors, rotor drives, and rotor controls;

(2) Limit load tests of the control system, including control surfaces;

(3) Operation tests of the control system;

(4) Flight stress measurement tests;

(5) Landing gear drop tests; and

(6) Any additional tests required for new or unusual design features.

**§ 29.309 Design limitations.**

The following values and limitations must be established to show compliance with the structural requirements of this subpart:

(a) The design maximum and design minimum weights.

(b) The main rotor r.p.m. ranges, power on and power off.

(c) The maximum forward speeds for each main rotor r.p.m. within the ranges determined under paragraph (b) of this section.

(d) The maximum rearward and sideward flight speeds.

(e) The center of gravity limits corresponding to the limitations determined under paragraphs (b), (c), and (d) of this section.

(f) The rotational speed ratios between each powerplant and each connected rotating component.

(g) The positive and negative limit maneuvering load factors.

FLIGHT LOADS

**§ 29.321 General.**

(a) The flight load factor must be assumed to act normal to the longitudinal axis of the rotorcraft, and to be equal in magnitude and opposite in direction to the rotorcraft inertia load factor at the center of gravity.

(b) Compliance with the flight load requirements of this subpart must be shown—

(1) At each weight from the design minimum weight to the design maximum weight; and

(2) With any practical distribution of disposable load within the operating limitations in the Rotorcraft Flight Manual.

**§ 29.337 Limit maneuvering load factor.**

The rotorcraft must be designed for—

(a) A positive limit maneuvering load factor of 3.5 and a negative limit maneuvering load factor of 1.0; or

No. 235——5

(b) Any lesser positive limit maneuvering load factor not less than 2.0, and lesser negative limit maneuvering load factor not less than 0.5, for which—

(1) The probability of being exceeded is shown by analysis and flight tests to be extremely remote; and

(2) The selected values are appropriate to each weight condition between the design maximum and design minimum weights.

**§ 29.339 Resultant limit maneuvering loads.**

The loads resulting from the application of limit maneuvering load factors are assumed to act at the center of each rotor hub and at each auxiliary lifting surface, and to act in directions and with distributions of load among the rotors and auxiliary lifting surfaces, so as to represent each critical maneuvering condition, including power-on and power-off flight with the maximum design rotor tip speed ratio. The rotor tip speed ratio is the ratio of the rotorcraft flight velocity component in the plane of the rotor disc to the rotational tip speed of the rotor blades, and is expressed as follows:

$$\mu = \frac{V \cos \alpha}{\Omega R}$$

where—

$V$ = The airspeed along the flight path (f.p.s.);

$\alpha$ = The angle between the projection, in the plane of symmetry, of the axis of no feathering and a line perpendicular to the flight path (radians, positive when axis is pointing aft);

$\Omega$ = The angular velocity of rotor (radians per second); and

$R$ = The rotor radius (ft.).

**§ 29.341 Gust loads.**

Each rotorcraft must be designed to withstand, at each critical airspeed including hovering, the loads resulting from vertical and horizontal gusts of 30 feet per second.

**§ 29.351 Yawing conditions.**

(a) Each rotorcraft must be designed for the loads resulting from the maneuver specified in paragraph (b) of this section, with—

(1) Unbalanced aerodynamic moments about the center of gravity reacted in a rational or conservative manner considering the principal masses furnishing the reacting inertia forces;

(2) Maximum main rotor speed; and

(3) Forward speeds up to $V_{NE}$ or $V_H$, whichever is less.

(b) In unaccelerated flight with zero yaw, it is assumed that—

(1) The cockpit directional control is suddenly displaced to the maximum deflection limited by the control stops or by maximum pilot effort;

(2) The rotorcraft then yaws to a resulting sideslip angle; and

(3) The directional control is then suddenly returned to neutral.

**§ 29.361 Engine torque.**

The limit engine torque may not be less than—

(a) For turbine engines, the mean torque for maximum continuous power multiplied by a factor of 1.25; and

(b) For reciprocating engines, the mean torque multiplied by—

(1) 1.33, for engines with five or more cylinders; and

(2) Two, three, and four, for engines with four, three, and two cylinders, respectively.

CONTROL SURFACE AND SYSTEM LOADS

**§ 29.391 General.**

Each auxiliary rotor, each fixed or movable stabilizing or control surface, and each system operating any flight control must meet the requirements of §§ 29.395 through 29.403, 29.411, and 29.413.

**§ 29.395 Control system.**

(a) The reaction to the loads prescribed in § 29.397 must be provided by—

(1) The control stops only;

(2) The control locks only;

(3) The irreversible mechanism only (with the mechanism locked and with the control surface in the critical positions for the effective parts of the system within its limit of motion);

(4) The attachment of the control system to the rotor blade pitch control horn only (with the control in the critical positions for the affected parts of the system within the limits of its motion); and

(5) The attachment of the control system to the control surface horn (with the control in the critical positions for the affected parts of the system within the limits of its motion).

(b) Each primary control system, including its supporting structure, must be designed to withstand the loads resulting from the limit pilot forces prescribed in § 29.397, or the maximum loads that can be obtained in normal operation, including any single power boost system failure, whichever are greater. Where the system design or the normal operating loads are such that a part of the system cannot react the pilot-applied forces prescribed in § 29.397, that part of the system must be designed to withstand the maximum loads that can be obtained in normal operation. The minimum design loads must, in any case, provide a rugged system for service use, including consideration of fatigue, jamming, ground gusts, control inertia, and friction loads. In the absence of a rational analysis, the design loads resulting from 0.60 of the specified pilot-applied forces are acceptable minimum design loads.

**§ 29.397 Limit pilot forces.**

The limit pilot forces are as follows:

(a) For foot controls, 130 pounds.

(b) For stick controls, 100 pounds fore and aft, and 67 pounds laterally.

(c) For wheel controls, 100 pounds fore and aft, and a lateral couple of $53D$ inch-pounds applied at the rim of the control wheel (where $D$ is the wheel diameter in inches).

**§ 29.399 Dual control system.**

Each dual primary flight control system must be able to withstand the loads that result when pilot forces not less than 0.75 times those obtained under § 29.395 are applied—

(a) In opposition; and

(b) In the same direction.

**§ 29.401 Auxiliary rotor assemblies.**

(a) *Auxiliary rotor assemblies.* Each auxiliary rotor assembly must be tested as prescribed in § 29.923.

(b) *Assemblies with detachable blades.* Each auxiliary rotor assembly with detachable blades must be designed to withstand the centrifugal loads resulting from the maximum design rotor r.p.m.

(c) *Highly stressed metal components.* For each auxiliary rotor with highly stressed metal components, the vibration stresses must be determined in flight and shown not to exceed safe values for continuous operation.

**§ 29.403 Auxiliary rotor attachment structure.**

The attachment structure for each auxiliary rotor must be designed to withstand a limit load equal to the maximum loads occurring in the structure in any flight and landing condition.

**§ 29.411 Ground clearance: tail rotor guard.**

(a) It must be impossible for the tail rotor to contact the landing surface during a normal landing.

(b) If a tail rotor guard is required to show compliance with paragraph (a) of this section—

(1) Suitable design loads must be established for the guard; and

(2) The guard and its supporting structure must be designed to withstand those loads.

**§ 29.413 Stabilizing and control surfaces.**

(a) Each stabilizing and control surface must be designed so that—

(1) Limit loads are not less than the greater of—

(i) 15 pounds per square foot; or

(ii) The load resulting where $C_N$ equals 0.55 at the maximum design speed; and

(2) The surface can withstand the critical loads resulting from maneuvers and from combined maneuvers and gusts.

(b) Compliance with paragraph (a) of this section must be shown with load distributions that closely simulate actual pressure distribution conditions.

GROUND LOADS

**§ 29.471 General.**

(a) *Loads and equilibrium.* For limit ground loads—

(1) The limit ground loads obtained in the landing conditions in this part must be considered to be external loads that would occur in the rotorcraft structure if it were acting as a rigid body; and

(2) In each specified landing condition, the external loads must be placed in equilibrium with linear and angular inertia loads in a rational or conservative manner.

(b) *Critical centers of gravity.* The critical centers of gravity within the range for which certification is requested must be selected so that the maximum design loads are obtained in each landing gear element.

**§ 29.473 Ground loading conditions and assumptions.**

(a) For specified landing conditions, a design maximum weight must be used that is not less than the maximum weight. A rotor lift may be assumed to act through the center of gravity throughout the landing impact. This lift may not exceed—

(1) Two-thirds of the design maximum weight; or

(2) Any greater lift proven to be appropriate by tests or data that are applicable to the particular rotorcraft.

(b) Unless otherwise prescribed, for each specified landing condition, the rotorcraft must be designed for a limit load factor of not less than the limit inertia load factor substantiated under §§ 29.725 and 29.727.

**§ 29.475 Tires and shock absorbers.**

Unless otherwise prescribed, for each specified landing condition, the tires must be assumed to be in their static position and the shock absorbers to be in their most critical position.

**§ 29.477 Landing gear arrangement.**

Sections 29.235, 29.479 through 29.485, and 29.493 apply to landing gear with two wheels aft, and one or more wheels forward, of the center of gravity.

**§29.479 Level landing conditions.**

(a) *Attitudes.* Under each of the loading conditions prescribed in paragraph (b) of this section, the rotorcraft is assumed to be in each of the following level landing attitudes:

(1) An attitude in which each wheel contacts the ground simultaneously.

(2) An attitude in which the aft wheels contact the ground with the forward wheels just clear of the ground.

(b) *Loading conditions.* The rotorcraft must be designed for the following landing loading conditions:

(1) Vertical loads applied under § 29.471.

(2) The loads resulting from a combination of the loads applied under subparagraph (1) of this paragraph with drag loads at each wheel of not less than 25 percent of the vertical load at that wheel.

(3) The vertical load at the instant of peak drag load combined with a drag component simulating the forces required to accelerate the wheel rolling assembly up to the specified ground speed, with—

(i) The ground speed for determination of the spin-up loads being at least 75 percent of the optimum forward flight speed for minimum rate of descent in autorotation; and

(ii) The loading conditions of this subparagraph applied to the landing gear and its attaching structure only.

(4) If there are two wheels forward, a distribution of the loads applied to those wheels under subparagraphs (1) and (2) of this paragraph in a ratio of 40:60.

(c) *Pitching moments.* Pitching moments are assumed to be resisted by—

(1) In the case of the attitude in paragraph (a)(1) of this section, the forward landing gear; and

(2) In the case of the attitude in paragraph (a)(2) of this section, the angular inertia forces.

**§ 29.481 Tail-down landing conditions.**

(a) The rotorcraft is assumed to be in the maximum nose-up attitude allowing ground clearance by each part of the rotorcraft.

(b) In this attitude, ground loads are assumed to act perpendicular to the ground.

**§ 29.483 One-wheel landing conditions.**

For the one-wheel landing condition, the rotorcraft is assumed to be in the level attitude and to contact the ground on one aft wheel. In this attitude—

(a) The vertical load must be the same as that obtained on that side under § 29.479(b)(1); and

(b) The unbalanced external loads must be reacted by rotorcraft inertia.

**§ 29.485 Lateral drift landing conditions.**

(a) The rotorcraft is assumed to be in the level landing attitude, with—

(1) Side loads combined with one-half of the maximum ground reactions obtained in the level landing conditions of § 29.479(b)(1); and

(2) The loads obtained under subparagraph (1) of this paragraph applied—

(i) At the ground contact point; or

(ii) For full-swiveling gear, at the center of the axle.

(b) The rotorcraft must be designed to withstand, at ground contact—

(1) When only the aft wheels contact the ground, side loads of 0.8 times the vertical reaction acting inward on one side and 0.6 times the vertical reaction acting outward on the other side, all combined with the vertical loads specified in paragraph (a) of this section; and

(2) When the wheels contact the ground simultaneously—

(i) For the aft wheels, the side loads specified in subparagraph (1) of this paragraph; and

(ii) For the forward wheels, a side load of 0.8 times the vertical reaction combined with the vertical load specified in paragraph (a) of this section.

**§ 29.493 Braked roll conditions.**

Under braked roll conditions with the shock absorbers in their static positions—

(a) The limit vertical load must be based on a load factor of at least—

(1) 1.33, for the attitude specified in § 29.479(a)(1); and

(2) 1.0, for the attitude specified in § 29.479(a)(2); and

(b) The structure must be designed to withstand, at the ground contact point of each wheel with brakes, a drag load of at least the lesser of—

(1) The vertical load multiplied by a coefficient of friction of 0.8; and

(2) The maximum value based on limiting brake torque.

**§ 29.497 Ground loading conditions: landing gear with tail wheels.**

(a) *General.* Rotorcraft with landing gear with two wheels forward and one wheel aft of the center of gravity must be designed for loading conditions as prescribed in this section.

(b) *Level landing attitude with only the forward wheels contacting the ground.* In this attitude—

(1) The vertical loads must be applied under §§ 29.471 through 29.475;

(2) The vertical load at each axle must be combined with a drag load at that axle of not less than 25 percent of that vertical load; and

(3) Unbalanced pitching moments are assumed to be resisted by angular inertia forces.

(c) *Level landing attitude with all wheels contacting the ground simultaneously.* In this attitude, the rotorcraft must be designed for landing loading conditions as prescribed in paragraph (b) of this section.

(d) *Maximum nose-up attitude with only the rear wheel contacting the ground.* The attitude for this condition must be the maximum nose-up attitude expected in normal operation, including autorotative landings. In this attitude—

(1) The appropriate ground loads specified in paragraph (b) (1) and (2) of this section must be determined and applied, using a rational method to account for the moment arm between the rear wheel ground reaction and the rotorcraft center of gravity; or

(2) The probability of landing with initial contact on the rear wheel must be shown to be extremely remote.

(e) *Level landing attitude with only one forward wheel contacting the ground.* In this attitude, the rotorcraft must be designed for ground loads as specified in paragraph (b) (1) and (3) of this section.

(f) *Side loads in the level landing attitude.* In the attitudes specified in paragraphs (b) and (c) of this section, the following apply:

(1) The side loads must be combined at each wheel with one-half of the maximum vertical ground reactions obtained for that wheel under paragraphs (b) and (c) of this section. In this condition, the side loads must be—

(i) For the forward wheels, 0.8 times the vertical reaction (on one side) acting inward, and 0.6 times the vertical reaction (on the other side) acting outward; and

(ii) For the rear wheel, 0.8 times the vertical reaction.

(2) The loads specified in subparagraph (1) of this paragraph must be applied—

(i) At the ground contact point with the wheel in the trailing position (for non-full swiveling landing gear or for full swiveling landing gear with a lock, steering device, or shimmy damper to keep the wheel in the trailing position); or

(ii) At the center of the axle (for full swiveling landing gear without a lock, steering device, or shimmy damper).

(g) *Braked roll conditions in the level landing attitude.* In the attitudes specified in paragraphs (b) and (c) of this section, and with the shock absorbers in their static positions, the rotor-

craft must be designed for braked roll loads as follows:

(1) The limit vertical load must be based on a limit vertical load factor of not less than—

(i) 1.0, for the attitude specified in paragraph (b) of this section; and

(ii) 1.33, for the attitude specified in paragraph (c) of this section.

(2) For each wheel with brakes, a drag load must be applied, at the ground contact point, of not less than the lesser of—

(i) 0.8 times the vertical load; and

(ii) The maximum based on limiting brake torque.

(h) *Rear wheel turning loads in the static ground attitude.* In the static ground attitude, and with the shock absorbers and tires in their static positions, the rotorcraft must be designed for rear wheel turning loads as follows:

(1) A vertical ground reaction equal to the static load on the rear wheel must be combined with an equal side load.

(2) The load specified in subparagraph (1) of this paragraph must be applied to the rear landing gear—

(i) Through the axle, if there is a swivel (the rear wheel being assumed to be swiveled 90 degrees to the longitudinal axis of the rotorcraft); or

(ii) At the ground contact point if there is a lock, steering device or shimmy damper (the rear wheel being assumed to be in the trailing position).

(i) *Taxiing condition.* The rotorcraft and its landing gear must be designed for the loads that would occur when the rotorcraft is taxied over the roughest ground that may reasonably be expected in normal operation.

**§ 29.505 Ski landing conditions.**

If certification for ski operation is requested, the rotorcraft, with skis, must be designed to withstand the following loading conditions (where $P$ is the maximum static weight on each ski with the rotorcraft at design maximum weight, and $n$ is the limit load factor determined under § 29.473(b)):

(a) Up-load conditions in which—

(1) A vertical load of $Pn$ and a horizontal load of $Pn/4$ are simultaneously applied at the pedestal bearings; and

(2) A vertical load of 1.33 $P$ is applied at the pedestal bearings.

(b) A side load condition in which a side load of 0.35 $Pn$ is applied at the pedestal bearings in a horizontal plane perpendicular to the centerline of the rotorcraft.

(c) A torque-load condition in which a torque load of 1.33 $P$ (in foot-pounds) is applied to the ski about the vertical axis through the centerline of the pedestal bearings.

WATER LOADS

**§ 29.521 Float landing conditions.**

If certification for float operation is requested, the rotorcraft, with floats, must be designed to withstand the following loading conditions (where the limit load factor is determined under § 29.473(b) or assumed to be equal to that determined for wheel landing gear):

(a) Up-load conditions in which—

(1) A load is applied so that, with the rotorcraft in the static level attitude, the resultant water reaction passes vertically through the center of gravity; and

(2) The vertical load prescribed in subparagraph (1) of this paragraph is applied simultaneously with an aft component of 0.25 times the vertical component.

(b) A side load condition in which—

(1) A vertical load of 0.75 times the total vertical load specified in paragraph (a)(1) of this section is divided equally among the floats; and

(2) For each float, the load share determined under subparagraph (1) of this paragraph, combined with a total side load of 0.25 times the total vertical load specified in subparagraph (1) of this paragraph, is applied to that float only.

MAIN COMPONENT REQUIREMENTS

**§ 29.547 Main rotor structure.**

(a) Each main rotor assembly (including rotor hubs and blades) must be designed as prescribed in this section.

(b) Each hub, blade, blade attachment, and blade control subject to alternating stresses must be designed to withstand any repeated loading conditions likely to occur within their established service lives. In addition—

(1) The stresses of critical parts must be determined in flight in each attitude appropriate to the type of rotorcraft throughout the ranges of limitations prescribed in § 29.309; and

(2) The service life of each critical part must be established on the basis of—

(i) Fatigue tests; or

(ii) Any other acceptable method.

(c) The main rotor structure must be designed to withstand the following loads prescribed in §§ 29.337 through 29.341, and 29.351:

(1) Critical flight loads.

(2) Limit loads occurring under normal conditions of autorotation.

(d) The main rotor structure must be designed to withstand loads simulating—

(1) For the rotor blades, hubs, and flapping hinges, the impact force of each blade against its stop during ground operation; and

(2) Any other critical condition expected in normal operation.

(e) The main rotor structure must be designed to withstand the limit torque at any rotational speed, including zero. In addition:

(1) The limit torque need not be greater than the torque defined by a torque limiting device (where provided), and may not be less than the greater of—

(i) The maximum torque likely to be transmitted to the rotor structure, in either direction, by the rotor drive or by sudden application of the rotor brake; and

(ii) The limit engine torque specified in § 29.361.

(2) The limit torque must be equally and rationally distributed to the rotor blades.

**§ 29.549 Fuselage and rotor pylon structures.**

(a) Each fuselage and rotor pylon structure must be designed to withstand—

(1) The critical loads prescribed in §§ 29.337 through 29.341, and 29.351;

(2) The applicable ground loads prescribed in §§ 29.235, 29.471 through 29.485, 29.493, 29.497, 29.505, and 29.521; and

(3) The loads prescribed in § 29.547 (d)(1) and (e)(1)(i).

(b) Auxiliary rotor thrust, the torque reaction of each rotor drive system, and the balancing air and inertia loads occurring under accelerated flight conditions, must be considered.

(c) Each engine mount and adjacent fuselage structure must be designed to withstand the loads occurring under accelerated flight and landing conditions, including engine torque.

(d) For critical parts (parts whose sudden failure would threaten the structural integrity of the rotorcraft) the following apply:

(1) Each part must be designed to withstand any repeated loading conditions likely to occur within its established service life.

(2) Stresses must be determined in flight—

(i) For each attitude appropriate to the rotorcraft; and

(ii) For each attitude, throughout the ranges of limitations prescribed in § 29.309.

(3) The service life of each part must be established by—

(i) Fatigue tests; or

(ii) Any other acceptable method.

**§ 29.551 Auxiliary lifting surfaces.**

Each auxiliary lifting surface must be designed to withstand—

(a) The critical flight loads in §§ 29.337 through 29.341, and 29.351;

(b) the applicable ground loads in §§ 29.235, 29.471 through 29.485, 29.493, 29.505, and 29.521; and

(c) Any other critical condition expected in normal operation.

EMERGENCY LANDING CONDITIONS

**§ 29.561 General.**

(a) The rotorcraft, although it may be damaged in emergency landing conditions on land or water, must be designed as prescribed in this section to protect the occupants under those conditions.

(b) The structure must be designed to give each occupant every reasonable chance of escaping serious injury in a minor crash landing when—

(1) Proper use is made of seats, belts, and other safety design provisions;

(2) The wheels are retracted (where applicable); and

(3) The occupant experiences the following ultimate inertia forces relative to the surrounding structure:

(i) Upward—1.5 $g$.

(ii) Forward—4.0 $g$.

(iii) Sideward—2.0 $g$.

(iv) Downward—4.0 $g$, or any lower force that will not be exceeded when the rotorcraft absorbs the landing loads resulting from impact with an ultimate descent velocity or five f.p.s. at design maximum weight.

(c) The supporting structure must be designed to restrain, under any load up to those specified in paragraph (b)(3) of this section, any item of mass that could injure an occupant if it came loose in a minor crash landing.

(d) Any fuselage structure in the area of internal fuel tanks below the passenger floor level must be designed to resist the crash impact loads specified in this section, and to protect the fuel tanks from rupture, if rupture is likely when those loads are applied to that area.

## Subpart D—Design and Construction

GENERAL

**§ 29.601 Design.**

(a) The rotorcraft may have no design features or details that experience has shown to be hazardous or unreliable.

(b) The suitability of each questionable design detail and part must be established by tests.

**§ 29.603 Materials.**

The suitability and durability of materials used in the structure must—

(a) Be established on the basis of experience or tests; and

(b) Meet approved specifications that ensure their having the strength and other properties assumed in the design data.

**§ 29.605 Fabrication methods.**

The methods of fabrication used must produce consistently sound structures. If a fabrication process (such as gluing, spot welding, or heat-treating) requires close control to reach this objective, the process must be performed according to an approved process specification.

**§ 29.607 Self-locking nuts.**

No self-locking nut may be used on any bolt subject to rotation in operation.

**§ 29.609 Protection of structure.**

Each part of the structure must—

(a) Be suitably protected against deterioration or loss of strength in service due to any cause, including—

(1) Weathering;

(2) Corrosion; and

(3) Abrasion; and

(b) Have provisions for ventilation and drainage where necessary to prevent the accumulation of corrosive, flammable, or noxious fluids.

**§ 29.611 Inspection provisions.**

There must be means to allow close examination of each part that requires—

(a) Recurring inspection;

(b) Adjustment for proper alignment and functioning; or

(c) Lubrication.

**§ 29.613 Material strength properties and design values.**

(a) Material strength properties must be based on enough tests of material meeting specifications to establish design values on a statistical basis;

(b) Design values must be chosen so that the probability of any structure being understrength because of material variations is extremely remote;

(c) The strength, detail design, and fabrication of the structure must minimize the probability of disastrous fatigue failure, particularly at points of stress concentration;

(d) Unless they are inapplicable in a particular case, the design values must be those contained in the following publications, obtainable from the Superintendent of Documents, Government Printing Office, Washington, D.C., 20401:

(1) MIL—HDBK–5, "Metallic Materials and Elements for Flight Vehicle Structure".

(2) MIL—HDBK–17, "Plastics for Flight Vehicles".

(3) ANC–18, "Design of Wood Aircraft Structures".

(4) MIL—HDBK–23, "Composite Construction for Flight Vehicles".

**§ 29.619 Special factors.**

(a) The special factors prescribed in §§ 29.621 through 29.625 apply to each part of the structure whose strength is—

(1) Uncertain;

(2) Likely to deteriorate in service before normal replacement; or

(3) Subject to appreciable variability due to—

(i) Uncertainties in manufacturing processes; or

(ii) Uncertainties in inspection methods.

(b) For each part of the rotorcraft to which §§ 29.621 through 29.625 apply, the factor of safety prescribed in § 29.303 must be multiplied by a special factor equal to—

(1) The applicable special factors prescribed in §§ 29.621 through 29.625; or

(2) Any other factor great enough to ensure that the probability of the part being understrength because of the uncertainties specified in paragraph (a) of this section is extremely remote.

**§ 29.621 Casting factors.**

(a) *General.* The factors, tests, and inspections specified in paragraphs (b) and (c) of this section must be applied in addition to those necessary to establish foundry quality control. The inspec-

tions must meet approved specifications. Paragraphs (c) and (d) of this section apply to structural castings except castings that are pressure tested as parts of hydraulic or other fluid systems and do not support structural loads.

(b) *Bearing stresses and surfaces.* The casting factors specified in paragraphs (c) and (d) of this section—

(1) Need not exceed 1.25 with respect to bearing stresses regardless of the method of inspection used; and

(2) Need not be used with respect to the bearing surfaces of a part whose bearing factor is larger than the applicable casting factor.

(c) *Critical castings.* For each casting whose failure would preclude continued safe flight and landing of the rotorcraft or result in serious injury to any occupant, the following apply:

(1) Each critical casting must—

(i) Have a casting factor of not less than 1.25; and

(ii) Receive 100 percent inspection by visual, radiographic, and magnetic particle (for ferromagnetic materials) or penetrate (for nonferromagnetic materials) inspection methods or approved equivalent inspection methods.

(2) For each critical casting with a casting factor less than 1.50, three sample castings must be static tested and shown to meet—

(i) The strength requirements of § 29.305 at an ultimate load corresponding to a casting factor of 1.25; and

(ii) The deformation requirements of § 29.305 at a load of 1.15 times the limit load.

(d) *Noncritical castings.* For each casting other than those specified in paragraph (c) of this section, the following apply:

(1) Except as provided in subparagraphs (2) and (3) of this paragraph, the casting factors and corresponding inspections must meet the following table:

| *Casting factor* | *Inspection* |
|---|---|
| 2.0 or greater | 100 percent visual. |
| Less than 2.0, greater than 1.5. | 100 percent visual, and magnetic particle (ferromagnetic materials), penetrant (nonferromagnetic materials), or approved equivalent inspection methods. |
| 1.25 through 1.50 | 100 percent visual, and magnetic particle (ferromagnetic materials), penetrant (nonferromagnetic materials), and radiographic or approved equivalent inspection methods. |

(2) The percentage of castings inspected by nonvisual methods may be reduced below that specified in subparagraph (1) of this paragraph when an approved quality control procedure is established.

(3) For castings procured to a specification that guarantees the mechanical properties of the material in the casting and provides for demonstration of these properties by test of coupons cut from the castings on a sampling basis—

(i) A casting factor of 1.0 may be used; and

(ii) The castings must be inspected as provided in subparagraph (1) of this paragraph for casting factors of "1.25 through 1.50" and tested under paragraph (c)(2) of this section.

**§ 29.623 Bearing factors.**

(a) Except as provided in paragraph (b) of this section, each part that has clearance (free fit), and that is subject to pounding or vibration, must have a bearing factor large enough to provide for the effects of normal relative motion.

(b) No bearing factor need be used on a part for which any larger special factor is prescribed.

**§ 29.625 Fitting factors.**

For each fitting (part or terminal used to join one structural member to another) the following apply:

(a) For each fitting whose strength is not proven by limit and ultimate load tests in which actual stress conditions are simulated in the fitting and surrounding structures, a fitting factor of at least 1.15 must be applied to each part of—

(1) The fitting;

(2) The means of attachment; and

(3) The bearing on the joined members.

(b) No fitting factor need be used—

(1) For joints made under approved practices and based on comprehensive test data (such as continuous joints in metal plating, welded joints, and scarf joints in wood); and

(2) With respect to any bearing surface for which a larger special factor is used.

(c) For each integral fitting, the part must be treated as a fitting up to the point at which the section properties become typical of the member.

**§ 29.629 Flutter.**

Each part of the rotorcraft must be free from flutter under each appropriate speed and power condition.

MAIN ROTOR

**§ 29.653 Pressure venting and drainage of main rotor blades.**

For each main rotor blade—

(a) There must be means for venting the internal pressure of the blade;

(b) Drainage holes must be provided for the blade; and

(c) The blade must be designed to prevent water from becoming trapped in it.

**§ 29.659 Mass balance.**

The rotors and blades must be mass balanced as necessary to—

(a) Prevent excessive vibration; and

(b) Prevent flutter at any speed up to the maximum forward speed.

**§ 29.661 Rotor blade clearance.**

There must be enough clearance between the main rotor blades and other parts of the structure to prevent the blades from striking any part of the structure during any operating condition.

CONTROL SYSTEMS

**§ 29.671 General.**

(a) Each control and control system must operate with the ease, smoothness, and positiveness appropriate to its function.

(b) Each element of each flight control system must be designed, or distinctively and permanently marked, to minimize the probability of any incorrect assembly that could result in the malfunction of the system.

**§ 29.675 Stops.**

(a) Each control system must have stops that positively limit the range of motion of the pilot's controls.

(b) Each stop must be located in the system so that the range of travel of its control is not appreciably affected by—

(1) Wear;

(2) Slackness; or

(3) Takeup adjustments.

(c) Each stop must be able to withstand the loads corresponding to the design conditions for the system.

(d) For each main rotor blade—

(1) The blade must have stops, appropriate to the design, to limit its travel about its hinges; and

(2) There must be means to keep the blade from hitting the droop stops during any operation other than starting and stopping the rotor.

**§ 29.679 Control system locks.**

If there is a device to lock the control system with the rotorcraft on the ground or water, there must be means to—

(a) Automatically disengage the lock when the pilot operates the controls in a normal manner, or limit the operation of the rotorcraft so as to give unmistakable warning to the pilot before takeoff; and

(b) Prevent the lock from engaging in flight.

**§ 29.681 Limit load static tests.**

(a) Compliance with the limit load requirements of this part must be shown by tests in which—

(1) The direction of the test loads produces the most severe loading in the control system; and

(2) Each fitting, pulley, and bracket used in attaching the system to the main structure is included;

(b) Compliance must be shown (by analyses or individual load tests) with the special factor requirements for control system joints subject to angular motion.

**§ 29.683 Operation tests.**

It must be shown by operation tests that, when the controls are operated from the pilot compartment with the control system loaded to correspond with loads specified for the system, the system is free from—

(a) Jamming;

(b) Excessive friction; and

(c) Excessive deflection.

**§ 29.685 Control system details.**

(a) Each detail of each control system must be designed to prevent jamming, chafing, and interference from cargo, passengers, or loose objects.

(b) There must be means in the cockpit to prevent the entry of foreign objects into places where they would jam the system.

(c) There must be means to prevent the slapping of cables or tubes against other parts.

(d) Cable systems must be designed as follows:

(1) Cables, cable fittings, turnbuckles, splices, and pulleys must be of an acceptable kind.

(2) The design of cable systems must prevent any hazardous change in cable tension throughout the range of travel under any operating conditions and temperature variations.

(3) No cable smaller than 1/8 inch diameter may be used in any primary control system.

(4) Pulley kinds and sizes must correspond to the cables with which they are used. The pulley-cable combinations and strength values specified in MIL-HDBK-5 must be used unless they are inapplicable.

(5) Pulleys must have close fitting guards to prevent the cables from being displaced or fouled.

(6) Pulleys must lie close enough to the plane passing through the cable to prevent the cable from rubbing against the pulley flange.

(7) No fairlead may cause a change in cable direction of more than three degrees.

(8) No clevis pin subject to load or motion and retained only by cotter pins may be used in the control system.

(9) Turnbuckles attached to parts having angular motion must be installed to prevent binding throughout the range of travel.

(10) There must be means for visual inspection at each fairlead, pulley, terminal, and turnbuckle.

(e) Control system joints subject to angular motion must incorporate the following special factors with respect to the ultimate bearing strength of the softest material used as a bearing:

(1) 3.33 for push-pull systems other than ball and roller bearing systems.

(2) 2.0 for cable systems.

(f) For control system joints, the manufacturer's static, non-Brinell rating of ball and roller bearings may not be exceeded.

**§ 29.687 Spring devices.**

(a) Each control system spring device whose failure could cause flutter or other unsafe characteristics must be reliable.

(b) Compliance with paragraph (a) of this section must be shown by tests simulating service conditions.

**§ 29.691 Autorotation control mechanism.**

Each main rotor blade pitch control mechanism must allow rapid entry into autorotation after power failure.

**§ 29.695 Power boost and power-operated control system.**

(a) If a power boost or power-operated control system is used, an alternate system must be immediately available that allows continued safe flight and landing in the event of—

(1) Any single failure in the power portion of the system; or

(2) The failure of all engines.

(b) Each alternate system may be a duplicate power portion or a manually operated mechanical system. The power portion includes the power source (such as hydraulic pumps), and such items as valves, lines, and actuators.

(c) The failure of mechanical parts (such as piston rods and links), and the jamming of power cylinders, must be considered unless they are extremely improbable.

**§ 29.723 Shock absorption tests.**

The landing inertia load factor and the reserve energy absorption capacity of the landing gear must be substantiated by the tests prescribed in §§ 29.725 and 29.727, respectively. These tests must be conducted on the complete rotorcraft or on units consisting of wheel, tire, and shock absorber in their proper relation.

**§ 29.725 Limit drop test.**

The limit drop test must be conducted as follows:

(a) The drop height must be—

(1) 13 inches from the lowest point of the landing gear to the ground; or

(2) Any lesser height, not less than eight inches, resulting in a drop contact velocity equal to the greatest probable sinking speed likely to occur at ground contact in normal power-off landings.

(b) If considered, the rotor lift specified in § 29.473(a) must be introduced into the drop test by appropriate energy absorbing devices or by the use of an effective mass.

(c) Each landing gear unit must be tested in the attitude simulating the landing condition that is most critical from the standpoint of the energy to be absorbed by it.

(d) When an effective mass is used in showing compliance with paragraph (b) of this section, the following formulae may be used instead of more rational computations.

$$W_e = W\left[\frac{h+(1-L)d}{h+d}\right]; \text{ and } n = n_j\frac{W_e}{W}+L$$

where:

$W_e$ = the effective weight to be used in the drop test (lbs.).

$W = W_M$ for main gear units (lbs.), equal to the static reaction on the particular unit with the rotorcraft in the most critical attitude. A rational method may be used in computing a main gear static reaction, taking into consideration the moment arm between the main wheel reaction and the rotorcraft center of gravity.

$W = W_N$ for nose gear units (lbs.), equal to the vertical component of the static reaction that would exist at the nose wheel, assuming that the mass of the rotorcraft acts at the center of gravity and exerts a force of $1.0g$ downward and $0.25g$ forward.

$W = W_T$ for tailwheel units (lbs.) equal to whichever of the following is critical—

(1) The static weight on the tailwheel with the rotorcraft resting on all wheels; or

(2) The vertical component of the ground reaction that would occur at the tailwheel assuming that the mass of the rotorcraft acts at the center of gravity and exerts a force of $1g$ downward with the rotorcraft in the maximum nose-up attitude considered in the nose-up landing conditions.

$h$ = specified free drop height (inches).

$L$ = ratio of assumed rotor lift to the rotorcraft weight.

$d$ = deflection under impact of the tire (at the proper inflation pressure) plus the vertical component of the axle travel (inches) relative to the drop mass.

$n$ = limit inertia load factor.

$n_j$ = the load factor developed during impact on the mass used in the drop test (i.e., the acceleration $dv/dt$ in $g$'s recorded in the drop test plus 1.0).

**§ 29.727 Reserve energy absorption drop test.**

The reserve energy absorption drop test must be conducted as follows:

(a) The drop height must be 1.5 times that specified in § 29.725(a).

(b) Rotor lift, where considered in a manner similar to that prescribed in § 29.725(b), may not exceed 1.5 times the lift allowed under that paragraph.

(c) The landing gear must withstand this test without collapsing.

**§ 29.729 Retracting mechanism.**

(a) *General.* The landing gear, retracting mechanism, wheel well doors, and supporting structure must be designed for—

(1) The loads occurring in any maneuvering condition with the gear retracted;

(2) The combined friction, inertia, and air loads occurring during retraction and extension at any airspeed up to the design maximum landing gear operating speed; and

(3) The flight loads, including those in yawed flight, occurring with the gear extended at any airspeed up to the design maximum landing gear extended speed.

(b) *Landing gear lock.* A positive means must be provided to keep the gear extended.

(c) *Emergency operation.* When other than manual power is used to operate the gear, emergency means must be provided for extending the gear in the event of—

(1) Any reasonably probable failure in the normal retraction system; or

(2) The failure of any single source of hydraulic, electric, or equivalent energy.

(d) *Operation tests.* The proper functioning of the retracting mechanism must be shown by operation tests.

(e) *Position indicator.* There must be means to indicate to the pilot when the gear is secured in the extreme positions.

(f) *Control.* The location and operation of the retraction control must meet the requirements of § 29.777.

**§ 29.731 Wheels.**

(a) Each landing gear wheel must be approved.

(b) The maximum static load rating of each wheel may not be less than the corresponding static ground reaction with—

(1) Maximum weight; and

(2) Critical center of gravity.

(c) The maximum limit load rating of each wheel must equal or exceed the maximum radial limit load determined under the applicable ground load requirements of this part.

**§ 29.733 Tires.**

Each landing gear wheel must have a tire—

(a) That is a proper fit on the rim of the wheel; and

(b) Of a rating that is not exceeded under—

(1) The design maximum weight;

(2) A load on each main wheel tire equal to the static ground reaction corresponding to the critical center of gravity; and

(3) A load on nose wheel tires (to be compared with the dynamic rating established for those tires) equal to the reaction obtained at the nose wheel, assuming that the mass of the rotorcraft acts at the most critical center of gravity and exerts a force of 1.0 $g$ downward and 0.25 $g$ forward, the reactions being distributed to the nose and main wheels according to the principles of statics with the drag reaction at the ground applied only at wheels with brakes.

**§ 29.735 Brakes.**

A braking device must be installed that is—

(a) Controllable by the pilot;

(b) Usable during power-off landings; and

(c) Adequate to—

(1) Counteract any normal unbalanced torque when starting or stopping the rotor; and

(2) Hold the rotorcraft parked on a 10 degree slope on a dry, smooth pavement.

**§ 29.737 Skis.**

(a) The maximum limit load rating of each ski must equal or exceed the maximum limit load determined under the applicable ground load requirements of this part.

(b) There must be a stabilizing means to maintain the ski in an appropriate position during flight. This means must have enough strength to withstand the maximum aerodynamic and inertia loads on the ski.

FLOATS AND HULLS

**§ 29.751 Main float buoyancy.**

(a) For main floats, the buoyancy necessary to support the maximum weight of the rotorcraft in fresh water must be exceeded by—

(1) 50 percent, for single floats; and

(2) 60 percent, for multiple floats.

(b) Each main float must have at least five watertight compartments approximately equal in volume.

**§ 29.753 Main float design.**

(a) *Bag floats.* Each bag float must be designed to withstand—

(1) The maximum pressure differential that might be developed at the maximum altitude for which certification with that float is requested; and

(2) The vertical loads prescribed in § 29.521(a), distributed along the length of the bag over three-quarters of its projected area.

(b) *Rigid floats.* Each rigid float must be able to withstand the vertical, horizontal, and side loads prescribed in § 29.521. An appropriate load distribution under critical conditions must be used.

**§ 29.755 Hulls.**

For each rotorcraft, with a hull and auxiliary floats, that is to be approved for both taking off from and landing on water, the hull and auxiliary floats must have enough watertight compartments so that, with any single compartment flooded, the buoyancy of the hull and auxiliary floats (and wheel tires if used) provides a margin of positive stability great enough to minimize the probability of capsizing.

PERSONNEL AND CARGO ACCOMMODATIONS

**§ 29.771 Pilot compartment.**

For each pilot compartment—

(a) The compartment and its equipment must allow each pilot to perform his duties without unreasonable concentration or fatigue;

(b) If there is provision for a second pilot, the rotorcraft must be controllable with equal safety from either pilot seat;

(c) The vibration and noise characteristics of cockpit appurtenances may not interfere with safe operation;

(d) Inflight leakage of rain or snow that could distract the crew or harm the structure must be prevented;

(e) A passageway must be provided between the pilot compartment and the passenger compartment; and

(f) There must be suitable means to prevent passengers from entering the pilot compartment without permission.

**§ 29.773 Pilot compartment view.**

(a) *Nonprecipitation conditions.* For nonprecipitation conditions, the following apply:

(1) Each pilot compartment must be arranged to give the pilots a sufficiently extensive, clear, and undistorted view for safe operation.

(2) Each pilot compartment must be free of glare and reflection that could interfere with the pilot's view. If certification for night operation is requested, this must be shown by night flight tests.

(b) *Precipitation conditions.* For precipitation conditions, the following apply:

(1) Each pilot must have a sufficiently extensive view for safe operation—

(i) In heavy rain at forward speeds up to $V_H$; and

(ii) In the most severe icing condition for which certification is requested.

(2) The pilots must have a window that—

(i) Is openable under the conditions prescribed in subparagraph (1) of this paragraph; and

(ii) Provides the view prescribed in that subparagraph.

**§ 29.775 Windshield and windows.**

Nonsplintering safety glass must be used in glass windshields and windows.

**§ 29.777 Cockpit controls.**

Cockpit controls must be—

(a) Located to provide convenient operation and to prevent confusion and inadvertent operation; and

(b) Located and arranged with respect to the pilot's seats so that there is full and unrestricted movement of each control without interference from the cockpit structure or the pilot's clothing when pilots from 5'2" to 6'0" in height are seated.

**§ 29.783 Doors.**

(a) Each closed cabin must have at least one adequate and easily accessible external door.

(b) No passenger door may be located with respect to any rotor disc so as to endanger persons following appropriate instructions for the use of that door.

(c) There must be means for locking crew and external passenger doors and for preventing their opening in flight inadvertently or as a result of mechanical failure. It must be possible to open external doors from inside and outside the cabin with the rotorcraft on the ground. The means of opening must be simple, obvious, and so arranged and marked that it can be readily located and operated.

(d) There must be reasonable provisions to prevent the jamming of any external door, in a minor crash, as a result of fuselage deformation.

(e) There must be means for direct visual inspection of the locking mechanism by crewmembers to determine whether the external doors (including passenger, crew, service, and cargo doors) are fully locked. There must be visual means to signal to appropriate crewmembers when normally used external doors are closed and fully locked.

(f) For outward opening external doors usable for entrance or egress, there must be an auxiliary safety latching device to prevent the door from opening when the primary latching mechanism fails. If the door does not meet the requirements of paragraph (c) of this section with this device in place, suitable operating procedures must be established to prevent the use of the device during takeoff and landing.

**§ 29.785 Seats, safety belts, and harnesses.**

(a) The seats, safety belts, shoulder harnesses, and adjacent parts of the rotorcraft, at each station designated for occupancy during takeoff and landing, must be designed so that a person making proper use of these facilities will not suffer serious injury in an emergency landing as a result of the inertia forces specified in § 29.561.

(b) Each seat must be approved.

(c) Each occupant must be protected from head injury by—

(1) A safety belt and harness that will prevent the head from contacting any injurious object;

(2) A safety belt plus the elimination of any injurious objects within striking radius of the head; or

(3) A safety belt plus a cushioned rest that will support the arms, shoulders, head, and spine.

(d) If seat backs do not have a firm handhold, there must be hand grips or rails along each aisle to let the occupants steady themselves while using the aisle in moderately rough air; and

(e) Each projecting object that would injure persons seated or moving about in the rotorcraft in normal flight must be padded.

(f) Each seat and its supporting structure must be designed for an occupant weight of 170 pounds, considering the maximum load factors, inertia forces, and reactions between the occupant, seat, and safety belt or harness corresponding with the applicable flight and ground load conditions, including the emergency landing conditions of § 29.561. In addition—

(1) Each pilot seat must be designed for the reactions resulting from the application of the pilot forces prescribed in § 29.397; and

(2) The inertia forces prescribed in § 29.561 must be multiplied by a factor of 1.33 in determining the strength of the attachment of—

(i) Each seat to the structure; and

(ii) Each safety belt or harness to the seat or structure.

**§ 29.787 Cargo and baggage compartments.**

(a) Each cargo and baggage compartment must be designed for its placarded maximum weight of contents and for the critical load distributions at the appropriate maximum load factors corresponding to the specified flight and ground load conditions, except the emergency landing conditions of § 29.561.

(b) There must be means to prevent the contents of any compartment from becoming a hazard by shifting under the loads specified in paragraph (a) of this section.

(c) There must be means to protect each occupant from injury by the contents of any compartment when the ultimate forward inertia force is 4 $g$.

**§ 29.803 Emergency evacuation.**

(a) Each crew and passenger area must have means for rapid evacuation in a crash landing, with the landing gear (1) extended and (2) retracted, considering the possibility of fire.

(b) Passenger entrance, crew, and service doors may be considered as emergency exits if they meet the requirements of this section and of §§ 29.805 through 29.815.

**§ 29.805 Flight crew emergency exits.**

For rotorcraft with passenger emergency exits that are not convenient to the flight crew, there must be flight crew emergency exits in the crew area for rapid evacuation. These exits must be located—

(a) On both sides of the rotorcraft; or

(b) As a top hatch.

**§ 29.807 Passenger emergency exits.**

(a) *Type.* For the purpose of this part, the types of passenger emergency exit are as follows:

(1) *Type I.* This type must have a rectangular opening at least 24 inches wide by 48 inches high, with corner radii not greater than four inches, in the passenger area in the side of the fuselage at floor level and as far away as practicable from areas that might become potential fire hazards in a crash.

(2) *Type II.* This type is the same as Type I, except that the opening must be at least 20 inches wide by 44 inches high.

(3) *Type III.* This type is the same as Type I, except that—

(i) The opening must be at least 20 inches wide by 36 inches high; and

(ii) The exits need not be at floor level.

(4) *Type IV.* This type must have a rectangular opening at least 19 inches wide by 26 inches high, with corner radii not greater than four inches, in the side of the fuselage with a step-up inside the rotorcraft of not more than 29 inches.

Openings with dimensions larger than those specified in this section may be used, regardless of shape, if the base of the opening has a flat surface of not less than the specified width.

(b) *Passenger emergency exits; side-of-fuselage.* Emergency exits must be accessible to the passengers and must be provided in accordance with the following table:

| Passenger seating capacity | Emergency exits for each side of the fuselage | | | |
|---|---|---|---|---|
| | Type I | Type II | Type III | Type IV |
| 1 through 19 | | | 1 | |
| 20 through 39 | | 1 | | 1 |
| 40 through 69 | 1 | | | 1 |

(c) *Passenger emergency exits; other than side-of-fuselage.* In addition to the requirements of paragraph (b) of this section—

(1) There must be enough openings in the top, bottom, or ends of the fuselage to allow evacuation with the rotorcraft on its side; or

(2) The probability of the rotorcraft coming to rest on its side in a crash landing must be extremely remote.

(d) *Tests.* The proper functioning of each emergency exit must be shown by test.

**§ 29.809 Emergency exit arrangement.**

(a) Each emergency exit must consist of a movable door or hatch in the external walls of the fuselage and must provide an unobstructed opening to the outside.

(b) Each emergency exit must be openable from the inside and from the outside.

(c) The means of opening each emergency exit must be simple and obvious and may not require exceptional effort.

(d) There must be means for locking each emergency exit and for preventing opening in flight inadvertently or as a result of mechanical failure.

(e) There must be means to minimize the probability of the jamming of any emergency exit in a minor crash landing as a result of fuselage deformation.

(f) For each emergency exit (other than Type IV exits above a wing) that is more than six feet from the ground with the rotorcraft on the ground and the landing gear extended, there must be means to assist the occupants to the ground.

**§ 29.811 Emergency exit marking.**

(a) Each emergency exit, its means of access, and its means of opening must be conspicuously marked.

(b) The identity and location of each emergency exit must be recognizable from a distance equal to the width of the cabin.

(c) The location of each emergency exit operating handle and the instructions for opening must be marked on or near the emergency exit. This marking must be readable from a distance of 30 inches.

(d) A source of light, independent of the main lighting system, must be installed to light each emergency exit marking.

(e) Each exit light must be designed to function automatically in a crash landing and to operate manually.

(f) Each emergency exit and its means of opening must be marked on the outside of the rotorcraft.

**§ 29.813 Emergency exit access.**

(a) Each passageway between passenger compartments, and each passageway leading to Type I and Type II emergency exits, must be—

(1) Unobstructed; and

(2) At least 20 inches wide.

(b) For each emergency exit covered by § 29.809(f), there must be enough space adjacent to that exit to allow a crewmember to assist in the evacuation of passengers without reducing the unobstructed width of the passageway below that required for that exit.

**§ 29.815 Main aisle width.**

The main passenger aisle width between seats must equal or exceed the values in the following table:

| Passenger seating capacity | Minimum main passenger aisle width | |
|---|---|---|
| | Less than 25 inches from floor | 25 inches and more from floor |
| | *Inches* | *Inches* |
| 10 or less | 12 | 18 |
| 11 through 19 | 12 | 20 |
| 20 or more | 15 | 20 |

**§ 29.831 Ventilation.**

(a) Each passenger and crew compartment must be ventilated, and each

No. 235—6

crew compartment must have enough fresh air (but not less than 10 cu. ft. per minute per crewmember) to let crewmembers perform their duties without undue discomfort or fatigue.

(b) Crew and passenger compartment air must be free from harmful or hazardous concentrations of gases or vapors.

(c) The concentration of carbon monoxide may not exceed one part in 20,000 parts of air during forward flight. If the concentration exceeds this value under other conditions, there must be suitable operating restrictions.

(d) There must be means to ensure compliance with paragraphs (b) and (c) of this secton under any reasonably probable failure of any ventilating, heating, or other system or equipment.

**§ 29.833 Heaters.**

Each combustion heater must be approved.

FIRE PROTECTION

**§ 29.851 Fire extinguishers.**

(a) *Hand fire extinguishers.* For hand fire extinguishers the following apply:

(1) Each hand fire extingusher must be approved.

(2) The kinds and quantities of each extinguishing agent used must be appropriate to the kinds of fires likely to occur where that agent is used.

(3) Each extinguisher for use in a personnel compartment must be designed to minimize the hazard of toxic gas concentrations.

(b) *Built-in fire extinguishers.* If a built-in fire extinguishing system is required—

(1) The capacity of each system, in relation to the volume of the compartment where used and the ventilation rate, must be adequate for any fire likely to occur in that compartment.

(2) Each system must be installed so that—

(i) No extinguishing agent likely to enter personnel compartments will be present in a quantity that is hazardous to the occupants; and

(ii) No discharge of the extinguisher can cause structural damage.

**§ 29.853 Compartment interiors.**

For each compartment to be used by the crew or passengers—

(a) The materials must be at least flash-resistant;

(b) The wall and ceiling linings, and the covering of upholstery, floors, and furnishings must be at least flame resistant;

(c) Each compartment where smoking is to be allowed must have self-contained, removable ash trays, and other compartments must be placarded against smoking;

(d) Each receptacle for towels, paper, or waste must be at least fire-resistant and must have means for containing possible fires;

(e) There must be a hand fire extinguisher for the flight crewmembers; and

(f) At least the following number of hand fire extinguishers must be conveniently located in passenger compartments:

| Passenger capacity: | *Fire extinguishers* |
|---|---|
| 7 through 30 | 1 |
| 31 through 60 | 2 |

**§ 29.855 Cargo and baggage compartments.**

(a) Each cargo and baggage compartment must be constructed of, or lined with, materials that are at least fire resistant.

(b) No compartment may contain any controls, wiring, lines, equipment, or accessories whose damage or failure would affect safe operation, unless those items are protected so that—

(1) They cannot be damaged by the movement of cargo in the compartment; and

(2) Their breakage or failure will not create a fire hazard.

(c) The design and sealing of inaccessible compartments must be adequate to contain compartment fires until a landing and safe evacuation can be made.

(d) Each cargo and baggage compartment must be designed, or must have a device, to ensure detection of fires by a crewmember at his station and to prevent the entry of harmful quantities of smoke, flame, extinguishing agents, and other noxious gases into any crew or passenger compartment. This must be shown in flight.

**§ 29.859 Combustion heater fire protection.**

(a) *Combustion heater fire zones.* The following combustion heater fire zones must be protected against fire under the applicable provisions of §§ 29.1181 through 29.1191, and 29.1195 through 29.1203:

(1) The region surrounding any heater, if that region contains any flammable fluid system components (including the heater fuel system), that could—

(i) Be damaged by heater malfunctioning; or

(ii) Allow flammable fluids or vapors to reach the heater in case of leakage.

(2) Each part of any ventilating air passage that—

(i) Surrounds the combustion chamber; and

(ii) Would not contain (without damage to other rotorcraft components) any fire that may occur within the passage.

(b) *Ventilating air ducts.* Each ventilating air duct passing through any fire zone must be fireproof. In addition—

(1) Unless isolation is provided by fireproof valves or by equally effective means, the ventilating air duct downstream of each heater must be fireproof for a distance great enough to ensure that any fire originating in the heater can be contained in the duct; and

(2) Each part of any ventilating duct passing through any region having a flammable fluid system must be so constructed or isolated from that system that the malfunctioning of any component of that system cannot introduce flammable fluids or vapors into the ventilating airstream.

(c) *Combustion air ducts.* Each combustion air duct must be fireproof for a distance great enough to prevent damage from backfiring or reverse flame propagation. In addition—

(1) No combustion air duct may communicate with the ventilating airstream unless flames from backfires or reverse burning cannot enter the ventilating airstream under any operating condition, including reverse flow or malfunction of the heater or its associated components; and

(2) No combustion air duct may restrict the prompt relief of any backfire that, if so restricted, could cause heater failure.

(d) *Heater controls; general.* There must be means to prevent the hazardous accumulation of water or ice on or in any heater control component, control system tubing, or safety control.

(e) *Heater safety controls.* For each combustion heater, safety control means must be provided as follows:

(1) Means independent of the components provided for the normal continuous control of air temperature, airflow, and fuel flow must be provided, for each heater, to automatically shut off the ignition and fuel supply of that heater at a point remote from that heater, when—

(i) The heat exchanger temperature or ventilating air temperature exceeds safe limits; or

(ii) The combustion airflow or the ventilating airflow becomes inadequate for safe operation.

(2) The means of complying with subparagraph (1) of this paragraph for any individual heater must—

(i) Be independent of components serving any other heater whose heat output is essential for safe operation; and

(ii) Keep the heater off until restarted by the crew.

(3) There must be means to warn the crew when any heater whose heat output is essential for safe operation has been shut off by the automatic means prescribed in subparagraph (1) of this paragraph.

(f) *Air intakes.* Each combustion and ventilating air intake must be where no flammable fluids or vapors can enter the heater system under any operating condition—

(1) During normal operation; or

(2) As a result of the malfunction of any other component.

(g) *Heater exhaust.* Each heater exhaust system must meet the requirements of §§ 29.1121 and 29.1123. In addition—

(1) Each exhaust shroud must be sealed so that no flammable fluids or hazardous quantities of vapors can reach the exhaust systems through joints; and

(2) No exhaust system may restrict the prompt relief of any backfire that, if so restricted, could cause heater failure.

(h) *Heater fuel systems.* Each heater fuel system must meet the powerplant fuel system requirements affecting safe heater operation. Each heater fuel system component in the ventilating airstream must be protected by shrouds so that no leakage from those components can enter the ventilating airstream.

(i) *Drains.* There must be means for safe drainage of any fuel that might accumulate in the combustion chamber or the heat exchanger. In addition—

(1) Each part of any drain that operates at high temperatures must be protected in the same manner as heater exhausts; and

(2) Each drain must be protected against hazardous ice accumulation under any operating condition.

**§ 29.861 Fire protection of structure, controls, and other parts.**

Each part of the structure, controls, and the rotor mechanism, and other parts essential to controlled landing and (for category A) flight that would be affected by powerplant fires must be isolated under § 29.1191, or must be—

(a) For category A rotorcraft, fireproof; and

(b) For category B rotorcraft, protected so that they can perform their essential functions for at least five minutes under any foreseeable powerplant fire condition.

**§ 29.863 Flammable fluid fire protection.**

If flammable fluids or vapors might escape by the leakage of fluid systems, there must be means to—

(a) Prevent the ignition of those fluids or vapors by any other equipment; or

(b) Control any fire resulting from that ignition.

MISCELLANEOUS

**§ 29.871 Leveling marks.**

There must be reference marks for leveling the rotorcraft on the ground.

**§ 29.873 Ballast provisions.**

Ballast provisions must be designed and constructed to prevent inadvertent shifting of ballast in flight.

**§ 29.877 Ice protection.**

The rotorcraft must be able to operate safely throughout the range of icing conditions for which certification is requested.

## Subpart E—Powerplant

GENERAL

**§ 29.901 Installation.**

(a) For the purpose of this part, the powerplant installation includes each part of the rotorcraft (other than the main and auxiliary rotor structures) that—

(1) Is necessary for propulsion;

(2) Affects the control of the major propulsive units; or

(3) Affects the safety of the major propulsive units between normal inspections or overhauls.

(b) For each powerplant installation—

(1) The installation must meet the applicable provisions of this subpart and, for turbine powerplant installations, any other requirements necessary for safety;

(2) Each component of the installation must be constructed, arranged, and installed to ensure its continued safe operation between normal inspections or overhauls;

(3) Accessibility must be provided to allow any inspection and maintenance necessary for continued airworthiness; and

(4) Electrical interconnections must be provided to prevent differences of potential between major components of the installation and the rest of the rotorcraft.

**§ 29.903 Engines.**

(a) *Engine type certification.* Each engine must be type certificated under Part 33 [New].

(b) *Category A; engine isolation.* For each category A rotorcraft, the powerplants must be arranged and isolated from each other to allow operation, in at least one configuration, so that the failure or malfunction of any engine, or the failure of any system that can affect any engine, will not—

(1) Prevent the continued safe operation of the remaining engines; or

(2) Require immediate action by any crew member for continued safe operation.

(c) *Category A; control of engine rotation.* For each category A rotorcraft, there must be means for stopping and restarting any engine individually in flight. In addition—

(1) Each component for controlling engine rotation in flight that is on the engine side of any firewall and that might be exposed to fire must be at least fire-resistant; or

(2) Duplicate means must be available for this purpose and their controls must be where all are not likely to be damaged at the same time in case of fire.

(d) *Category A; engine cooling fan blade protection.* If an engine cooling fan is installed in a category A rotorcraft, there must be means to ensure that a fan blade failure will not affect the operation of the remaining engines or prevent continued safe operation.

(e) *Category B; engine cooling fan blade protection.* If an engine cooling fan is installed, there must be means to protect the rotorcraft and allow a safe landing if a fan blade fails. This must be shown by showing that—

(1) The fan blades are contained in case of failure;

(2) Each fan is located so that a failure will not jeopardize safety; or

(3) Each fan blade can withstand an ultimate load of 1.5 times the centrifugal force resulting from engine r.p.m. limited by either—

(i) The terminal engine r.p.m. under uncontrolled conditions; or

(ii) An overspeed limiting device.

**§ 29.907 Engine vibration.**

(a) Each engine must be installed to prevent the harmful vibration of any part of the engine or rotorcraft.

(b) The addition of the rotor and the rotor drive system to the engine may not subject the principal rotating parts of the engine to excessive vibration stresses. This must be shown by a vibration investigation.

ROTOR DRIVE SYSTEM

**§ 29.917 Design.**

(a) *General.* The rotor drive system includes any part necessary to transmit power from the engines to the rotor hubs. This includes gear boxes, shafting universal joints, couplings, rotor brake assemblies, clutches, supporting bearings for shafting, any attendant accessory pads or drives, and any cooling fans not included in the type certification of the engine.

(b) *Arrangement.* Rotor drive systems must be arranged as follows:

(1) Each rotor drive system of multiengine rotorcraft must be arranged so that each rotor necessary for operation

and control will continue to be driven by the remaining engines if any engine fails.

(2) For single-engine rotorcraft, each rotor drive system must be so arranged that each rotor necessary for control in autorotation will continue to be driven by the main rotors after disengagement of the engine from the main and auxiliary rotors.

(3) Each rotor drive system must incorporate a unit for each engine to automatically disengage that engine from the main and auxiliary rotors if that engine fails.

(4) If a torque limiting device is used in the rotor drive system, it must be located so as to allow continued control of the rotorcraft when the device is operating.

(5) If the rotors must be phased for intermeshing, each system must provide constant and positive phase relationship under any operating condition.

(6) If a rotor dephasing device is incorporated, there must be means to keep the rotors locked in proper phase before operation.

**§ 29.921 Rotor brake.**

If there is a means to control the rotation of the rotor drive system independently of the engine, any limitations on the use of that means must be specified, and the control for that means must be guarded to prevent inadvertent operation.

**§ 29.923 Rotor drive system and control mechanism tests.**

(a) *Endurance tests; general.* Each rotor drive system and rotor control mechanism must be tested for not less than 200 hours. These tests must be conducted—

(1) On the rotorcraft, with the power being absorbed by the actual rotors to be installed; and

(2) As prescribed in paragraphs (b) through (j) of this section in 10-hour test cycles.

(b) *Endurance tests; takeoff power run.* The takeoff power endurance test run must consist of one hour of alternate runs of five minutes at takeoff power and speed, and five minutes at as low an engine idle speed as practicable. The engine must be declutched from the rotor drive system, and the rotor brake, if furnished and so intended, must be applied during the first minute of the idle run. During the remaining four minutes of the idle run, the clutch must be engaged so that the engine drives the rotors at the minimum practical r.p.m. Acceleration of the engine and the rotor drive system must be accomplished at the maximum rate. When declutching the engine, it must be decelerated at a rate rapid enough to allow the operation of the overrunning clutch. If there is no takeoff rating, maximum continuous power and speed must be substituted for takeoff power and speed.

(c) *Endurance tests; maximum continuous run.* Three hours of continuous operation at maximum continuous power and speed must be conducted as follows:

(1) The main rotor controls must be operated at a minimum of 15 times each hour through the main rotor pitch positions of maximum vertical thrust, maximum forward thrust component, maximum aft thrust component, maximum left thrust component, and maximum right thrust component, except that the control movements need not produce loads or blade flapping motion exceeding the maximum loads or motions encountered in flight.

(2) The directional controls must be operated at a minimum of 15 times each hour through the control extremes of maximum right turning torque, neutral torque as required by the power applied to the main rotor, and maximum left turning torque.

(3) Each maximum control position must be held for at least 10 seconds, and the rate of change of control position must be at least as rapid as that for normal operation.

(d) *Endurance tests; 90 percent of maximum continuous run.* One hour of continuous operation at 90 percent of maximum continuous power must be conducted at maximum continuous speed.

(e) *Endurance tests; 80 percent of maximum continuous run.* One hour of continuous operation must be conducted at 80 percent of maximum continuous power and speed.

(f) *Endurance tests; 60 percent of maximum continuous run.* Two hours of continuous operation at 60 percent of maximum continuous power must be conducted at minimum desired cruising speed or at 90 percent of maximum continuous speed, whichever is less.

(g) *Endurance tests; engine malfunctioning run.* It must be determined whether malfunctioning of components such as the engine fuel or ignition systems, or whether unequal engine power can cause dynamic conditions detrimental to the drive system. If so, a suitable number of hours of operation must be accomplished under those conditions, one hour of which must be included in each cycle, and the remaining hours of which must be accomplished at the end of the 20 cycles. If no detrimental condition results, an additional hour of operation in compliance with paragraph (b) of this section must be conducted.

(h) *Endurance tests; overspeed run.* One hour of continuous operation at 110 percent of maximum continuous speed must be conducted at maximum continuous power. If the engines are limited by the manufacturer to an overspeed of less than 110 percent of maximum continuous speed for the periods required, the speed used must be the highest speed allowable for those engines.

(i) *Endurance tests; rotor control positions.* When the rotor controls are not being cycled during the tie-down tests, the rotor must be operated, using the procedures prescribed in paragraph (c) of this section, to produce each of the maximum thrust positions for the following percentages of test time (except that the control positions need not produce loads or blade flapping motion exceeding the maximum loads or motions encountered in flight):

(1) For full vertical thrust, 20 percent.

(2) For the forward thrust component, 50 percent.

(3) For the right thrust component, 10 percent.

(4) For the left thrust component, 10 percent.

(5) For the aft thrust component, 10 percent.

(j) *Endurance tests; clutch and brake engagements.* A total of at least 400 clutch and brake engagements, including the engagements of paragraph (b) of this section, must be made during the takeoff power runs and, if necessary, at each change of power and speed throughout the test. In each clutch engagement, the shaft on the driven side of the clutch must be accelerated from rest. The clutch engagements must be accomplished at the speed and by the method prescribed by the applicant. During deceleration after each clutch engagement, the engines must be stopped rapidly enough to allow the engines to be automatically disengaged from the rotors and rotor drives. If a rotor brake is installed for stopping the rotor, the clutch, during brake engagements, must be disengaged above 40 percent of maximum continuous rotor speed and the rotors allowed to decelerate to 40 percent of maximum continuous rotor speed, at which time the rotor brake must be applied. If the clutch design does not allow stopping the rotors with the engine running, or if no clutch is provided, the engine must be stopped before each application of the rotor brake, and then immediately be started after the rotors stop.

(k) *Overspeed test.* After completion of the 200-hour tie-down test, and without intervening major disassembly, the rotor drive system must be subjected to 50 overspeed runs, each 30±3 seconds in duration at 120 percent of maximum continuous speed. These runs must be conducted as follows:

(1) Overspeed runs must be alternated with stabilizing runs of from one to five minutes duration each at 60 to 80 percent of maximum continuous speed.

(2) Acceleration and deceleration must be accomplished in a period not longer than 10 seconds, and the time for changing speeds may not be deducted from the specified time for the overspeed runs.

(3) Overspeed runs must be made with the rotors in the flattest pitch for smooth operation.

(4) If the engines are limited by the engine manufacturer to an overspeed of less than 120 percent of maximum continuous speed for the periods required, the speed used must be the highest speed allowable for the engines involved.

(l) Any components that are affected by maneuvering and gust loads must be investigated for the same flight conditions as are the main rotors, and their service lives must be determined by fatigue tests or by other acceptable methods. In addition, a level of safety equal to that of the main rotors must be provided for—

(1) Each component in the rotor drive system whose failure would cause an uncontrolled landing;

(2) Each component essential to the phasing of rotors on multirotor rotorcraft, or that furnishes a driving link for the essential control of rotors in autorotation; and

(3) Each component common to two or more engines on multiengine rotorcraft.

(m) *Special tests.* Each rotor drive system designed to operate at two or more gear ratios must be subjected to special testing for durations necessary to substantiate the safety of the rotor drive system.

**§ 29.927 Additional tests.**

Any additional dynamic, endurance, and operational tests, and vibratory investigations necessary to determine that the rotor drive mechanism is safe, must be performed.

**§ 29.931 Shafting critical speed.**

(a) It must be determined whether the critical speeds of any shafting lie outside the range of allowable engine speeds under idling, power on, and autorotative conditions.

(b) Any critical vibration existing from (and including) clutch engagement to maximum overspeed, during acceleration or deceleration, must be shown to be within safe limits.

(c) If the demonstration required by paragraph (b) of this section is made during the endurance testing, the test schedule may substitute the critical vibratory conditions for equivalent time in appropriate parts of the endurance test procedure.

**§ 29.935 Shafting joints.**

Each universal joint, slip joint, and other shafting joints whose lubrication is necessary for operation must have provision for lubrication.

## FUEL SYSTEM

**§ 29.951 General.**

(a) Each fuel system must be constructed and arranged to ensure a flow of fuel at a rate and pressure established for proper engine functioning under any likely operating conditions, including the maneuvers for which certification is requested.

(b) Each fuel system must be arranged so that—

(1) No engine or fuel pump can draw fuel from more than one tank at a time; or

(2) There are means to prevent introducing air into the system.

**§ 29.953 Fuel system independence.**

(a) For category A rotorcraft—

(1) The fuel system must meet the requirements of § 29.903(b); and

(2) Unless other provisions are made to meet subparagraph (1) of this paragraph, the fuel system must allow fuel to be supplied to each engine through a system independent of those parts of each system supplying fuel to other engines.

(b) Each fuel system for a multiengine category B rotorcraft must meet the requirements of paragraph (a)(2) of this section. However, separate fuel tanks need not be provided for each engine.

**§ 29.955 Fuel flow.**

(a) Each fuel system must provide at least 100 percent of the fuel flow required under the intended operating conditions and maneuvers. This must be shown as follows:

(1) Fuel must be delivered to each engine at a pressure within the limits specified in the engine type certificate.

(2) The quantity of fuel in the tank may not exceed the sum of the amount established as the unusable fuel supply for that tank under §29.959 plus that necessary to show compliance with this section.

(3) Each main pump must be used that is necessary for each operating condition and attitude for which compliance with this section is shown, and the appropriate emergency pump must be substituted for each main pump so used.

(4) If there is a fuel flowmeter, it must be blocked and the fuel must flow through the meter or its bypass.

(b) If an engine can feed from more than one fuel tank, the fuel system must feed promptly when fuel becomes low in one tank and another tank is selected.

**§ 29.957 Flow between interconnected tanks.**

(a) Where tank outlets are interconnected and allow fuel to flow between them due to gravity or flight accelerations, it must be impossible for fuel to flow between tanks in quantities great enough to cause overflow from the tank vent in any sustained flight condition.

(b) If fuel can be pumped from one tank to another in flight—

(1) The design of the vents and the fuel transfer system must prevent structural damage to tanks from overfilling; and

(2) There must be means to warn the crew before overflow through the vents occurs.

**§ 29.959 Unusable fuel supply.**

The unusable fuel supply for each tank must be established as not less than the quantity at which the first evidence of malfunction occurs under the most adverse fuel feed condition occurring under any intended operations and flight maneuvers involving that tank.

**§ 29.961 Fuel system hot weather operation.**

(a) For each rotorcraft—

(1) The fuel system must be arranged to minimize the probability of vapor formation in the system under normal operating conditions; and

(2) Each suction lift fuel system and other fuel systems conducive to vapor formation must be free from vapor lock when using fuel at a temperature of at least 110 degrees F. under critical operating conditions.

(b) For each category A rotorcraft, satisfactory hot weather operation must be shown by showing that there is no evidence of vapor lock or other malfunction when the rotorcraft is climbed from the elevation of the airport selected by the applicant to an altitude of 5,000 feet above the airport elevation, or to the maximum altitude expected in operation, whichever is greater.

(c) Compliance with paragraph (b) of this section must be shown in flight, or on the ground under conditions closely simulating flight conditions, and with—

(1) The engines at takeoff power at the beginning of the test and for the maximum time approved for takeoff power, and at maximum continuous power thereafter;

(2) The weight including full fuel tanks, minimum crew, and only that ballast necessary to maintain the center of gravity within allowable limits;

(3) The speed for best rate of climb under the test conditions; and

(4) Fuel at a temperature of at least 110 degrees F. at the beginning of the demonstration.

(d) If compliance with paragraph (b) of this section is shown in weather cold enough to interfere with the proper conduct of the test, each fuel tank surface, fuel line, and other fuel system parts subject to cold air must be insulated to simulate, insofar as practicable, flight in hot weather.

**§ 29.963 Fuel tanks: general.**

(a) Each fuel tank must be able to withstand, without failure, the vibration, inertia, fluid, and structural loads to which it may be subjected in operation.

(b) Each fuel tank and its installation must be designed or protected to retain fuel without leakage under the emergency landing conditions in § 29.561.

(c) Each flexible fuel tank liner must be approved or shown to be suitable for the particular application.

(d) Each integral fuel tank must have facilities for inspection and repair of its interior.

**§ 29.965 Fuel tank tests.**

(a) Each fuel tank must be able to withstand the applicable pressure tests in this section without failure or leakage. If practicable, test pressures may be applied in a manner simulating the pressure distribution in service.

(b) Each conventional metal tank, each nonmetallic tank with walls that are not supported by the rotorcraft structure, and each integral tank must be subjected to a pressure of 3.5 p.s.i. unless the pressure developed during maximum limit acceleration or emergency deceleration with a full tank exceeds this value, in which case a hydrostatic head, or equivalent test, must be applied to duplicate the acceleration loads as far as possible. However, the pressure need not exceed 3.5 p.s.i. on surfaces not exposed to the acceleration loading.

(c) Each nonmetallic tank with walls supported by the rotorcraft structure must be subjected to the following tests:

(1) A pressure test of at least 2.0 p.s.i. This test may be conducted on the tank alone in conjunction with the test specified in subparagraph (2) of this paragraph.

(2) A pressure test, with the tank mounted in the rotorcraft structure,

equal to the load developed by the reaction of the contents, with the tank full, during maximum limit acceleration or emergency deceleration. However, the pressure need not exceed 2.0 p.s.i. on surfaces not exposed to the acceleration loading.

(d) Each tank with large unsupported or unstiffened flat areas, or with other features whose failure or deformation could cause leakage, must be subjected to the following test or its equivalent:

(1) Each complete tank assembly and its supports must be vibration tested while mounted to simulate the actual installation.

(2) The tank assembly must be vibrated for 25 hours while two-thirds full of any suitable fluid. The amplitude of vibration may not be less than one thirty-second of an inch, unless otherwise substantiated.

(3) The test frequency of vibration must be as follows:

(i) If no frequency of vibration resulting from any r.p.m. within the normal operating range of engine or rotor system speeds is critical, the test frequency of vibration, in number of cycles per minute, must be the number obtained by multiplying the maximum continuous engine speed (r.p.m.) by 0.9.

(ii) If only one frequency of vibration resulting from any r.p.m. within the normal operating range of engine or rotor system speeds is critical, that frequency of vibration must be the test frequency.

(iii) If more than one frequency of vibration resulting from any r.p.m. within the normal operating range of engine or rotor system speeds is critical, the most critical of these frequencies must be the test frequency.

(4) Under subparagraph (3) (ii) and (iii), the time of test must be adjusted to accomplish the same number of vibration cycles as would be accomplished in 25 hours at the frequency specified in subparagraph (3) (i).

(5) During the test, the tank assembly must be rocked at the rate of 16 to 20 complete cycles per minute through an angle of 15 degrees on both sides of the horizontal (30 degrees total), about the most critical axis, for 25 hours. If motion about more than one axis is likely to be critical, the tank must be rocked about each critical axis for 12½ hours.

**§ 29.967 Fuel tank installation.**

(a) Each fuel tank must be supported so that tank loads are not concentrated on unsupported tank surfaces. In addition—

(1) There must be pads, if necessary, to prevent chafing between each tank and its supports;

(2) The padding must be nonabsorbent or treated to prevent the absorption of fuel;

(3) If flexible tank liners are used, they must be supported so that they are not required to withstand fluid loads; and

(4) Each interior surface of tank compartments must be smooth and free of projections that could cause wear of the liner, unless—

(i) There are means for protection of the liner at those points; or

(ii) The construction of the liner itself provides such protection.

(b) Any spaces adjacent to tank surfaces must be adequately ventilated to avoid accumulation of fuel or fumes in those spaces due to minor leakage. If the tank is in a sealed compartment, ventilation may be limited to drain holes that prevent clogging and that prevent excessive pressure resulting from altitude changes. If flexible tank liners are installed, the venting arrangement for the spaces between the liner and its container must maintain the proper relationship to tank vent pressures for any expected flight condition.

(c) The location of each tank must meet the requirements of § 29.1185 (b) and (c).

(d) No rotorcraft skin immediately adjacent to a major air outlet from the engine compartment may act as the wall of an integral tank.

(e) Each fuel tank must be isolated from personnel compartments by a fumeproof and fuelproof enclosure.

(f) Each fuel tank close to personnel compartments, engines, or combustion heaters must be designed, or protected and installed, to retain its contents under the loads specified in § 29.561.

**§ 29.969 Fuel tank expansion space.**

Each fuel tank must have an expansion space of not less than two percent of the tank capacity. It must be impossible to fill the expansion space inadvertently with the rotorcraft in the normal ground attitude.

**§ 29.971 Fuel tank sump.**

(a) Each fuel tank must have a sump with a capacity of not less than the greater of—

(1) 0.10 per cent of the tank capacity; or

(2) 1/16 gallon.

(b) The capacity prescribed in paragraph (a) of this section must be effective with the rotorcraft in any normal attitude, and must be located so that the sump contents cannot escape through the tank outlet opening.

(c) Each fuel tank must allow drainage of hazardous quantities of water from each part of the tank to its sump with the rotorcraft in the ground attitude.

(d) Each fuel tank sump must have an accessible and easily operable drain that—

(1) Allows complete drainage of the sump on the ground;

(2) Discharges clear of the entire rotorcraft; and

(3) Has manual or automatic means for positive locking in the closed position.

**§ 29.973 Fuel tank filler connection.**

(a) Each fuel tank filler connection must prevent the entrance of fuel into any part of the rotorcraft other than the tank itself. In addition—

(1) Each filler must be marked as prescribed in § 29.1557(c) (1);

(2) Each recessed filler connection that can retain any appreciable quantity of fuel must have a drain that discharges clear of the entire rotorcraft; and

(3) Each filler cap must provide a fuel-tight seal under the pressure expected in normal operation.

(b) For category A rotorcraft, each filler cap or filler cap cover must warn when the cap is not fully locked or seated on the filler connection.

**§ 29.975 Fuel tank vents and carburetor vapor vents.**

(a) *Fuel tank vents.* Each fuel tank must be vented from the top part of the expansion space so that venting is effective under normal flight conditions. In addition—

(1) The vents must be arranged to avoid stoppage by dirt or ice formation;

(2) The vent arrangement must prevent siphoning of fuel during normal operation;

(3) The venting capacity and vent pressure levels must maintain acceptable differences of pressure between the interior and exterior of the tank, during—

(i) Normal flight operation;

(ii) Maximum rate of ascent and descent; and

(iii) Refueling and defueling (where applicable);

(4) Airspaces of tanks with interconnected outlets must be interconnected;

(5) There may be no point in any vent line where moisture can accumulate with the rotorcraft in the ground attitude or the level flight attitude, unless drainage is provided; and

(6) No vent or drainage provision may end at any point—

(i) Where the discharge of fuel from the vent outlet would constitute a fire hazard; or

(ii) From which fumes could enter personnel compartments.

(b) *Carburetor vapor vents.* Each carburetor with vapor elimination connections must have a vent line to lead vapors back to one of the fuel tanks. In addition—

(1) Each vent system must have means to avoid stoppage by ice; and

(2) If there is more than one fuel tank, and it is necessary to use the tanks in a definite sequence, each vapor vent return line must lead back to the fuel tank used for takeoff and landing.

**§ 29.977 Fuel tank outlet.**

There must be a fuel strainer with 8 to 16 meshes per inch for the fuel tank outlet or for the booster pump. In addition—

(a) The clear area of each fuel tank outlet strainer must be at least five times the area of the outlet line;

(b) The diameter of each strainer must be at least equal to that of the fuel tank outlet; and

(c) Each finger strainer must be accessible for inspection and cleaning.

**§ 29.979 Pressure refueling and fueling provisions below fuel level.**

(a) Each fueling connection below the fuel level in each tank must have means to prevent the escape of hazardous quantities of fuel from that tank in case of malfunction of the fuel entry valve.

(b) For systems intended for pressure refueling, a means in addition to the normal means for limiting the tank content must be installed to prevent damage to the tank in case of failure of the normal means.

FUEL SYSTEM COMPONENTS

**§ 29.991 Fuel pumps.**

(a) *Main pumps.* Each fuel pump required for proper engine operation, or required to meet the fuel system requirements of this subpart (other than those in paragraph (b) of this section), is a main pump. For each main pump, provision must be made to allow the bypass of positive displacement fuel pumps other than a fuel injection pump (a pump that supplies the proper flow and pressure for fuel injection when that injection is not accomplished in a carburetor) approved as part of an engine.

(b) *Emergency pumps.* There must be emergency pumps to feed the engines immediately after the failure of any main pump (other than a fuel injection pump approved as part of the engine).

(c) *Installation.* There must be means to maintain the fuel pressure, at the inlet to the carburetor, within the range of limits established for proper engine operation. In addition—

(1) When necessary for the maintenance of the proper fuel pressure—

(i) A connection must be provided to transmit the carburetor air intake static pressure to the proper fuel pump relief valve connection; and

(ii) The gauge balance lines must be independently connected to the carburetor inlet pressure to avoid incorrect fuel pressure readings;

(2) The installation of fuel pumps having seals or diaphragms that may leak must have means for draining leaking fuel; and

(3) Each drain line must discharge where it will not create a fire hazard.

**§ 29.993 Fuel system lines and fittings.**

(a) Each fuel line must be installed and supported to prevent excessive vibration and to withstand loads due to fuel pressure, valve actuation, and accelerated flight conditions.

(b) Each fuel line connected to components of the rotorcraft between which relative motion could exist must have provisions for flexibility.

(c) Each flexible connection in fuel lines that may be under pressure or subjected to axial loading must use flexible hose assemblies.

(d) Flexible hose must be approved.

(e) No flexible hose that might be adversely affected by high temperatures may be used where excessive temperatures will exist during operation or after engine shutdown.

**§ 29.995 Fuel valves.**

In addition to meeting the requirements of § 29.1189, each fuel valve must—

(a) Have positive stops or suitable index provisions in the "on" and "off" positions; and

(b) Be supported so that no loads resulting from their operation or from accelerated flight conditions are transmitted to the lines attached to the valve.

**§ 29.997 Fuel strainer or filter.**

(a) There must be a fuel strainer or filter incorporating a sediment trap and drain in the fuel system between the fuel tanks and the engine. This strainer must be installed in an accessible location.

(b) Each strainer or filter must protect the fuel pumps, fuel controls, and the engine against any foreign matter that might be in the fuel.

(c) Each screening or straining element must be easily cleanable.

(d) Each strainer or filter must be mounted so that its weight is not supported by any connecting line or by the inlet or outlet connections of the strainer or filter itself.

**§ 29.999 Fuel system drains.**

(a) Drainage of the fuel system must be accomplished by fuel strainer drains and by the drains prescribed in § 29.971.

(b) Each drain must discharge clear of the entire rotorcraft and must have manual or automatic means for positive locking in the closed position.

OIL SYSTEM

**§ 29.1011 General.**

(a) Each engine must have an independent oil system that can supply it with an appropriate quantity of oil at a temperature not above that safe for continuous operation.

(b) The oil system for components of the rotor drive system that require continuous lubrication must be sufficiently independent of the lubrication systems of the engines to ensure—

(1) Operation with any engine inoperative; and

(2) Safe autorotation.

(c) The usable oil capacity of each system may not be less than the product of the endurance of the rotorcraft under critical operating conditions and the maximum allowable oil consumption of the engine under the same conditions, plus a suitable margin to ensure adequate circulation and cooling. Instead of a rational analysis of endurance and consumption, a usable oil capacity of one gallon for each 40 gallons of usable fuel may be used for reciprocating engine installations.

(d) Oil-fuel ratios lower than those prescribed in paragraph (c) of this section may be used if they are substantiated by data on the oil consumption of the engine.

(e) The ability of the engine and rotor drive system oil cooling provisions to maintain the oil temperature at or below the maximum established value must be shown under the applicable requirements of §§ 29.1041 through 29.1049.

**§ 29.1013 Oil tanks.**

(a) *Installation.* Each oil tank installation must meet the requirements of § 29.967. However, an engine oil tank may be in a designated fire zone if the tank and its supports are fireproof to the extent that damage by fire to any non-fireproof part will not cause leakage or spillage of oil.

(b) *Expansion space.* Oil tank expansion space must be provided so that—

(1) Each oil tank has an expansion space of not less than the greater of—

(i) 10 percent of the tank capacity; or

(ii) 0.5 gallon;

(2) Each reserve oil tank not directly connected to any engine has an expansion space space of not less than two percent of the tank capacity; and

(3) It is impossible to fill the expansion space inadvertently with the rotorcraft in the normal ground attitude.

(c) *Filler connection.* Each recessed oil tank filler connection that can retain any appreciable quantity of oil must have a drain that discharges clear of the entire rotorcraft. In addition—

(1) Each oil tank filler cap must provide an oil-tight seal under the pressure expected in operation;

(2) For category A rotorcraft, each oil tank filler cap or filler cap cover must incorporate features that provide a warning when caps are not fully locked or seated on the filler connection; and

(3) Each oil filler must be marked under § 29.1557(c)(2).

(d) *Vent.* Oil tanks must be vented as follows:

(1) Each oil tank must be vented from the top part of the expansion space so that venting is effective under all normal flight conditions.

(2) Oil tank vents must be arranged so that condensed water vapor that might freeze and obstruct the line cannot accumulate at any point.

(e) *Outlet.* There must be means to prevent entrance into the tank itself, or into the tank outlet, of any object that might obstruct the flow of oil through the system. No oil tank outlet may be enclosed by a screen or guard that would reduce the flow of oil below a safe value at any operating temperature.

(f) *Flexible liners.* Each flexible oil tank liner must be approved or shown to be suitable for the particular installation.

**§ 29.1015 Oil tank tests.**

Each oil tank must be designed and installed so that—

(a) It can withstand, without failure, any vibration, inertia, and fluid loads to which it may be subjected in operation; and

(b) It meets the requirements of § 29.965, except that the test pressure specified in § 29.965(b) must be five p.s.i.

**§ 29.1017 Oil lines and fittings.**

(a) Each oil line must meet the requirements of § 29.993.

(b) Breather lines must be arranged so that—

(1) Condensed water vapor that might freeze and obstruct the line cannot accumulate at any point;

(2) The breather discharge will not constitute a fire hazard if foaming occurs, or cause emitted oil to strike the pilot's windshield; and

(3) The breather does not discharge into the engine air induction system.

**§ 29.1019 Oil strainer or filter.**

Each oil strainer or filter in the powerplant installation must be constructed and installed so that oil will flow at the normal rate through the rest of the system with the strainer or filter element completely blocked.

**§ 29.1021 Oil system drains.**

There must be at least one accessible drain that—

(a) Allows safe drainage of the entire oil system; and

(b) Has manual or automatic means for positive locking in the closed position.

**§ 29.1023 Oil radiators.**

(a) Each oil radiator must be able to withstand any vibration, inertia, and oil pressure loads to which it would be subjected in operation.

(b) Each oil radiator air duct must be located, or equipped, so that, in case of fire, and with the airflow as it would be with and without the engine operating, flames cannot directly strike the radiator.

**§ 29.1025 Oil valves.**

(a) Each oil shutoff must meet the requirements of § 29.1189.

(b) The closing of oil shutoffs may not prevent autorotation.

(c) Each oil valve must have positive stops or suitable index provisions in the "on" and "off" positions and must be supported so that no loads resulting from its operation or from accelerated flight conditions are transmitted to the lines attached to the valve.

COOLING

**§ 29.1041 General.**

(a) The powerplant cooling provisions must be able to maintain the temperatures of powerplant components, engine fluids, and the carburetor intake air within safe values under any critical surface (ground or water) and flight operating conditions.

(b) There must be cooling provisions to maintain the fluid temperatures in any power transmission within safe values under any critical surface (ground or water) and flight operating conditions.

(c) Compliance with paragraphs (a) and (b) of this section must be shown by flight tests in which the temperatures of selected powerplant component, engine, and transmission fluids are obtained under the conditions prescribed in those paragraphs.

**§ 29.1043 Cooling tests.**

(a) *General.* For the tests prescribed in § 29.1041(c), the following apply:

(1) If the tests are conducted under conditions deviating from the maximum anticipated air temperature specified in paragraph (b) of this section, the recorded powerplant temperatures must be corrected under paragraphs (c) and (d) of this section, unless a more rational correction method is applicable.

(2) No corrected temperature determined under subparagraph (1) of this paragraph may exceed established limits.

(3) The fuel used during the cooling tests must be of the minimum grade approved for the engines, and the mixture settings must be those used in normal operation.

(4) The test procedures must be as prescribed in §§ 29.1045 through 29.1049.

(b) *Maximum anticipated air temperature.* For cooling tests, the maximum anticipated temperature (hot-day condition) is 100 degrees F. at sea level, decreasing from this value at the rate of 3.6 degrees F. per thousand feet of altitude above sea level up to the altitude at which a temperature of −69.7 degrees F. is reached, above which altitude the temperature is constant at −69.7 degrees F.

(c) *Correction factor for cylinder head, oil inlet, carburetor air, and engine and transmission coolant outlet temperatures.* The cylinder head, oil inlet, carburetor air, and engine coolant outlet temperatures must be corrected by adding to them the difference between the maximum anticipated air temperature and the temperature of the ambient air at the time of the first occurrence of the maximum head, oil, air, or coolant temperatures recorded during the cooling test.

(d) *Correction factor for cylinder barrel temperatures.* Cylinder barrel temperatures must be corrected by adding to them 0.7 times the difference between the maximum anticipated air temperatures and the temperature of the ambient air at the time of the first occurrence of the maximum cylinder barrel temperature recorded during the cooling test.

**§ 29.1045 Climb cooling test procedures.**

(a) Climb cooling tests must be conducted under this section for—

(1) Category A rotorcraft; and

(2) Multiengine category B rotorcraft for which certification is requested under the category A powerplant installation requirements, and under the requirements of § 29.861(a) at the steady rate of climb or descent established under § 29.67(b).

(b) The climb or descent cooling tests must be conducted with the engine inoperative that produces the most adverse cooling conditions for the remaining engines and powerplant components.

(c) Each operating engine must be at maximum continuous power or at full throttle when above the critical altitude.

(d) After temperatures have stabilized in flight, the climb must be—

(1) Begun from an altitude not greater than the lower of—

(i) 1,000 feet below the engine critical altitude; and

(ii) 1,000 feet below the maximum altitude at which the rate of climb is 150 f.p.m.; and

(2) Continued for at least five minutes after the occurrence of the highest temperature recorded, or until the rotorcraft reaches the maximum altitude for which certification is requested.

(e) For category B rotorcraft without a positive rate of climb, the descent must begin at the all-engine-critical altitude and end at the higher of—

(1) The maximum altitude at which level flight can be maintained with one engine operative; and

(2) Sea level.

(f) The climb or descent must be conducted at an airspeed representing a normal operational practice for the configuration being tested. However, if the cooling provisions are sensitive to rotorcraft speed, the most critical airspeed must be used, but need not exceed the speeds established under § 29.67(a)(2) or § 29.67(b). The climb cooling test may be conducted in conjunction with the takeoff cooling test of § 29.1047.

**§ 29.1047 Takeoff cooling test procedures.**

(a) *Category A.* For each category A rotorcraft, cooling must be shown during takeoff and subsequent climb as follows:

(1) Each temperature must be stabilized while hovering in ground effect with—

(i) The power necessary for hovering;

(ii) The appropriate cowl flap and shutter settings; and

(iii) The maximum weight.

(2) After the temperatures have stabilized, a climb must be started at the lowest practicable altitude and must be conducted with one engine inoperative.

(3) The operating engines must be at takeoff r.p.m. and power (or at full throttle when above the takeoff critical altitude) for the same time interval as takeoff power is used in determining the takeoff flight path under § 29.59.

(4) At the end of the time interval prescribed in subparagraph (3) of this paragraph, the power must be reduced to maximum continuous power and the climb must be continued for at least five minutes after the occurrence of the highest temperature recorded.

(5) The speeds must be those used in determining the takeoff flight path under § 29.59.

(b) *Category B.* For each category B rotorcraft, cooling must be shown during takeoff and subsequent climb as follows:

(1) Each temperature must be stabilized while hovering in ground effect with—

(i) The power necessary for hovering;

(ii) The appropriate cowl flap and shutter settings; and

(iii) The maximum weight.

(2) After the temperatures have stabilized, a climb must be started at the lowest practicable altitude with takeoff power.

(3) Takeoff power must be used for the same time interval as takeoff power is used in determining the takeoff flight path under § 29.63.

(4) At the end of the time interval prescribed in subparagraph (3) of this paragraph, the power must be reduced to maximum continuous power and the climb must be continued for at least five minutes after the occurrence of the highest temperature recorded.

(5) The cooling test must be conducted at an airspeed corresponding to normal operating practice for the configuration being tested. However, if the cooling provisions are sensitive to rotorcraft speed, the most critical airspeed must be used, but need not exceed the speed for best rate of climb with maximum continuous power.

No. 235——7

**§ 29.1049 Hovering cooling test procedures.**

The hovering cooling provisions must be shown—

(a) At maximum weight or at the greatest weight at which the rotorcraft can hover (if less), at sea level, with the power required to hover but not more than maximum continuous power, in the ground effect in still air, until at least five minutes after the occurrence of the highest temperature recorded; and

(b) With maximum continuous power, maximum weight, and at the altitude resulting in zero rate of climb for this configuration, until at least five minutes after the occurrence of the highest temperature recorded.

INDUCTION SYSTEM

**§ 29.1091 Air induction.**

(a) The air induction system for each engine must supply the air required by that engine under the operating conditions for which certification is requested.

(b) Each engine air induction system must provide air for proper fuel metering and mixture distribution with the induction system valves in any position.

(c) No air intake may open within the engine accessory section or within other areas of any powerplant compartment where emergence of backfire flame would constitute a fire hazard.

(d) Each engine must have an alternate air source.

(e) Each alternate air intake must be located to prevent the entrance of rain, ice, or other foreign matter.

**§ 29.1093 Induction system icing protection.**

Each engine air induction system must have means to prevent and eliminate icing. Unless this is done by other means, it must be shown that, in air free of visible moisture at a temperature of 30 degrees F., and with the engines at 60 percent of maximum continuous power—

(a) Each rotorcraft with sea level engines using conventional venturi carburetors has a preheater that can provide a heat rise of 90 degrees F.;

(b) Each rotorcraft with sea level engines using carburetors tending to prevent icing has a preheater that can provide a heat rise of 70 degrees F.;

(c) Each rotorcraft with altitude engines using conventional venturi carburetors has a preheater that can provide a heat rise of 120 degrees F.; and

(d) Each rotorcraft with altitude engines using carburetors tending to prevent icing has a preheater that can provide a heat rise of 100 degrees F.

**§ 29.1101 Carburetor air preheater design.**

Each carburetor air preheater must be designed and constructed to—

(a) Ensure ventilation of the preheater when the engine is operated in cold air;

(b) Allow inspection of the exhaust manifold parts that it surrounds; and

(c) Allow inspection of critical parts of the preheater itself.

**§ 29.1103 Induction system ducts.**

(a) Each induction system duct upstream of the first stage of the supercharger must have a drain to prevent the hazardous accumulation of fuel and moisture in the ground attitude. No drain may discharge where it might cause a fire hazard.

(b) Each duct must be strong enough to prevent induction system failure from normal backfire conditions.

(c) Each duct connected to components between which relative motion could exist must have means for flexibility.

(d) Each duct within any fire zone for which a fire-extinguishing system is required must be at least—

(1) Fireproof, if it passes through any firewall; or

(2) Fire resistant, for other ducts.

**§ 29.1105 Induction system screens.**

If induction system screens are used—

(a) Each screen must be upstream of the carburetor;

(b) No screen may be in any part of the induction system that is the only passage through which air can reach the engine, unless it can be deiced by heated air;

(c) No screen may be deiced by alcohol alone; and

(d) It must be impossible for fuel to strike any screen.

**§ 29.1107 Inter-coolers and after-coolers.**

Each inter-cooler and after-cooler must be able to withstand the vibration, inertia, and air pressure loads to which it would be subjected in operation.

**§ 29.1109 Carburetor air cooling.**

It must be shown under § 29.1043 that each installation using two-stage superchargers has means to maintain the air temperature, at the carburetor inlet, at or below the maximum established value.

EXHAUST SYSTEM

**§ 29.1121 General.**

(a) Each exhaust system must ensure safe disposal of exhaust gases without fire hazard or carbon monoxide contamination in any personnel compartment.

(b) Unless suitable precautions are taken, no exhaust system part may be dangerously close to any system carrying flammable fluids or vapors, or under any such system that may leak.

(c) Each component upon which hot exhaust gases could impinge, or that could be subjected to high temperatures from exhaust system parts, must be fireproof. Each exhaust system component must be separated by a fireproof shield from adjacent parts of the rotorcraft that are outside the engine compartment.

(d) No exhaust gases may discharge so as to cause a fire hazard with respect to any flammable fluid vent or drain.

(e) No exhaust gases may discharge where they will cause a glare seriously affecting pilot vision at night.

(f) Each exhaust system component must be ventilated to prevent points of excessively high temperature.

(g) Each exhaust shroud must be ventilated or insulated to avoid, during normal operation, a temperature high enough to ignite any flammable fluids or vapors outside the shroud.

**§ 29.1123 Exhaust piping.**

(a) Exhaust piping must be heat and corrosion resistant, and must have provisions to prevent failure due to expansion by operating temperatures.

(b) Exhaust piping must be supported to withstand any vibration and inertia loads to which it would be subjected in operation.

(c) Exhaust piping connected to components between which relative motion could exist must have provisions for flexibility.

**§ 29.1125 Exhaust heat exchangers.**

(a) Each exhaust heat exchanger must be constructed and installed to withstand the vibration, inertia, and other loads to which it would be subjected in operation. In addition—

(1) Each exchanger must be suitable for continued operation at high temperatures and resistant to corrosion from exhaust gases;

(2) There must be means for inspecting of the critical parts of each exchanger;

(3) Each exchanger must have cooling provisions wherever it is subject to contact with exhaust gases; and

(4) No exhaust heat exchanger or muff may have stagnant areas or liquid traps that would increase the probability of ignition of flammable fluids or vapors that might be present in case of the failure or malfunction of components carrying flammable fluids.

(b) If an exhaust heat exchanger is used for heating ventilating air used by personnel—

(1) There must be a secondary heat exchanger between the primary exhaust gas heat exchanger and the ventilating air system; or

(2) Other means must be used to prevent harmful contamination of the ventilating air.

POWERPLANT CONTROLS AND ACCESSORIES

**§ 29.1141 Powerplant controls: general.**

(a) Powerplant controls must be located and arranged under § 29.777 and marked under § 29.1555.

(b) Each control must be located so that it cannot be inadvertently operated by persons entering, leaving, or moving normally in, the cockpit.

(c) Each flexible powerplant control must be approved.

(d) Each control must be able to maintain any set position without—

(1) Constant attention; or

(2) Tendency to creep due to control loads or vibration.

(e) Each control must be able to withstand operating loads without excessive deflection.

**§ 29.1143 Throttle and antidetonant injection system controls.**

(a) There must be a separate throttle control for each engine.

(b) Throttle controls must be arranged to allow ready synchronization of all engines by—

(1) Separate control of each engine; and

(2) Simultaneous control of all engines.

(c) Each throttle control must provide a positive and immediately responsive means of controlling its engine.

(d) Each antidetonant injection system control must be in the throttle controls. However, the antidetonant injection pump may have a separate control.

**§ 29.1145 Ignition switches.**

(a) Ignition switches must control each ignition circuit on each engine.

(b) There must be means to quickly shut off all ignition by the grouping of switches or by a master ignition control.

(c) Each master ignition control must have a guard to prevent its inadvertent operation.

**§ 29.1147 Mixture controls.**

(a) If there are mixture controls, each engine must have a separate control, and the controls must be arranged to allow—

(1) Separate control of each engine; and

(2) Simultaneous control of all engines.

(b) Each intermediate position of the mixture controls that corresponds to a normal operating setting must be identifiable by feel and sight.

**§ 29.1151 Rotor brake controls.**

(a) It must be impossible to apply the rotor brake inadvertently in flight.

(b) There must be means to warn the crew if the rotor brake has not been completely released before takeoff.

**§ 29.1157 Carburetor air temperature controls.**

There must be a separate carburetor air temperature control for each engine.

**§ 29.1159 Supercharger controls.**

Each supercharger control must be accessible to—

(a) The pilots; or

(b) (If there is a separate flight engineer station with a control panel) the flight engineer.

**§ 29.1163 Powerplant accessories.**

(a) Each engine-mounted accessory must—

(1) Be approved for mounting on the engine involved; and

(2) Use the provisions on the engine for mounting.

(b) Electrical equipment subject to arcing or sparking must be installed to minimize the probability of igniting flammable fluids or vapors.

(c) If, continued rotation of an engine-driven cabin supercharger or any remote accessory driven by the engine will be a hazard if they malfunction, there must be means to prevent their hazardous rotation without interfering with the continued operation of the engine.

**§ 29.1165 Engine ignition systems.**

(a) Each battery ignition system must be supplemented with a generator that is automatically available as an alternate source of electrical energy to allow continued engine operation if any battery becomes depleted.

(b) The capacity of batteries and generators must be large enough to meet the simultaneous demands of the engine ignition system and the greatest demands of any electrical system components that draw from the same source.

(c) The design of the engine ignition system must account for—

(1) The condition of an inoperative generator;

(2) The condition of a completely depleted battery with the generator running at its normal operating speed; and

(3) The condition of a completely depleted battery with the generator operating at idling speed, if there is only one battery.

(d) Magneto ground wiring (for separate ignition circuits) that lies on the engine side of any firewall must be installed, located, or protected, to minimize the probability of the simultaneous failure of two or more wires as a result of mechanical damage, electrical fault, or other cause.

(e) No ground wire for any engine may be routed through a fire zone of another engine unless each part of that wire within that zone is fireproof.

(f) Each ignition system must be independent of any electrical circuit not used for analyzing the operation of that system.

(g) There must be means to warn appropriate crewmembers if the malfunctioning of any part of the electrical system is causing the continuous discharge of any battery necessary for engine ignition.

POWERPLANT FIRE PROTECTION

**§ 29.1181 Designated fire zones; regions included.**

(a) Designated fire zones are—

(1) The engine power section;

(2) The engine accessory section;

(3) Any complete powerplant compartment in which there is no isolation between the engine power section and the engine accessory section;

(4) Any auxiliary power unit compartment; and

(5) Any fuel-burning heater and other combustion equipment installation described in § 29.859.

(b) Each designated fire zone must meet the requirements of §§ 29.1183 through 29.1203.

**§ 29.1183 Lines and fittings.**

(a) Except as provided in paragraph (b) of this section, each line and fitting carrying flammable fluids in any area subject to engine fire conditions, and each oil line or fitting in a designated fire zone, must meet the following requirements:

(1) The line and fitting must be at least fire resistant.

(2) Flexible hose assemblies (hose and end fittings) must be approved.

(b) Paragraph (a) of this section does not apply to—

(1) Lines and fittings forming an integral part of an engine; and

(2) Vent and drain lines, and their fittings, whose failure will not result in or add to, a fire hazard.

**§ 29.1185 Flammable fluids.**

(a) No tank or reservoir that is part of a system containing flammable fluids or gases may be in a designated fire zone unless the fluid contained, the design of the system, the materials used in the tank and its supports, the shutoff means, and the connections, lines, and controls provide a degree of safety equal to that which would exist if the tank or reservoir were outside such a zone.

(b) Each fuel tank must be isolated from the engines by a firewall or shroud.

(c) There must be at least one-half inch of clear airspace between each tank or reservoir and each firewall or shroud isolating a designated fire zone, unless equivalent means are used to prevent heat transfer from the fire zone to the flammable fluid.

(d) Absorbent material close to flammable fluid system components that might leak must be covered or treated to prevent the absorption of hazardous quantities of fluids.

**§ 29.1187 Drainage and ventilation of fire zones.**

(a) There must be complete drainage of each part of each designated fire zone to minimize the hazards resulting from failure or malfunction of any component containing flammable fluids. The drainage means must be—

(1) Effective under conditions expected to prevail when drainage is needed; and

(2) Arranged so that no discharged fluid will cause an additional fire hazard.

(b) Each designated fire zone must be ventilated to prevent the accumulation of flammable vapors.

(c) No ventilation opening may be where it would allow the entry of flammable fluids, vapors, or flame from other zones.

(d) Ventilation means must be arranged so that no discharged vapors will cause an additional fire hazard.

(e) For category A rotorcraft, there must be means to allow the crew to shut off the sources of forced ventilation in any fire zone (other than the engine power section of the powerplant compartment) unless the amount of extinguishing agent and the rate of discharge are based on the maximum airflow through that zone.

**§ 29.1189 Shutoff means.**

(a) Except for lines forming an integral part of an engine, and except for engine oil systems in category B rotorcraft using engines of less than 500 cubic inches displacement, there must be means to shut off or otherwise prevent hazardous quantities of fuel, oil, deicing fluid, and other flammable fluids from flowing into, within, or through any designated fire zone.

(b) The closing of any fuel shutoff valve for any engine may not make fuel unavailable to the remaining engines.

(c) For category A rotorcraft, no hazardous quantity of flammable fluid may drain into any designated fire zone after shutoff has been accomplished, nor may the closing of any fuel shutoff valve for an engine make fuel unavailable to the remaining engines.

(d) The operation of any shutoff may not interfere with the later emergency operation of any other equipment, such as the means for declutching the engine from the rotor drive.

(e) Each shutoff must be outside of designated fire zones, unless an equal degree of safety is otherwise provided.

(f) There must be means to prevent inadvertent operation of each shutoff and to make it possible for the crew to reopen it in flight after it has been closed.

**§ 29.1191 Firewalls.**

(a) Each engine must be isolated by a firewall, shroud, or equivalent means, from personnel compartments, structures, controls, rotor mechanisms, and other parts that are—

(1) Essential to controlled flight and landing; and

(2) Not protected under § 29.861.

(b) Each auxiliary power unit, combustion heater, and other combustion equipment to be used in flight, must be isolated from the rest of the rotorcraft by firewalls, shrouds, or equivalent means.

(c) Each firewall or shroud must be constructed so that no hazardous quantity of air, fluid, or flame can pass from any engine compartment to other parts of the rotorcraft.

(d) Each opening in the firewall or shroud must be sealed with close-fitting fireproof grommets, bushings, or firewall fittings.

(e) Each firewall and shroud must be fireproof and protected against corrosion.

(f) In meeting this section, account must be taken of the probable path of a fire as affected by the airflow in normal flight and in autorotation.

**§ 29.1193 Cowling and engine compartment covering.**

(a) Each cowling and engine compartment covering must be constructed and supported so that it can resist the vibration, inertia, and air loads to which it may be subjected in operation.

(b) Cowling must meet the drainage and ventilation requirements of § 29.1187.

(c) On rotorcraft with a diaphragm isolating the engine power section from the engine accessory section, each part of the accessory section cowling subject to flame in case of fire in the engine power section of the powerplant must—

(1) Be fireproof; and

(2) Meet the requirements of § 29.1191.

(d) Each part of the cowling or engine compartment covering subject to high temperatures due to its nearness to exhaust system parts or exhaust gas impingement must be fireproof.

(e) Each category A rotorcraft must—

(1) Be designed and constructed so that no fire originating in any fire zone can enter, either through openings or by burning through external skin, any other zone or region where it would create additional hazards;

(2) Meet the requirements of subparagraph (1) of this paragraph with the landing gear retracted (if applicable); and

(3) Have fireproof skin in areas subject to flame if a fire starts in the engine power or accessory sections.

**§ 29.1195 Fire extinguishing systems.**

(a) Each rotorcraft, other than category B rotorcraft with engines of 1,500 cubic inches displacement or less, must have a fire extinguishing system for the designated fire zones. The fire extinguishing system must be able to simultaneously protect each zone of each powerplant compartment for which protection is provided.

(b) For multiengine rotorcraft—

(1) The fire extinguishing system, the quantity of extinguishing agent, and the rate of discharge must provide at least two adequate discharges, or, in the case of auxiliary power units and combustion equipment, at least one adequate discharge; and

(2) It must be possible to direct both discharges of the fire extinguishing system to any main engine installation.

(c) For single engine rotorcraft, the quantity of extinguishing agent and the rate of discharge must provide at least one adequate discharge for the engine compartment.

**§ 29.1197 Fire extinguishing agents.**

(a) Extinguishing agents must be methyl bromide, carbon dioxide, or any agent with equal extinguishing action.

(b) If methyl bromide, carbon dioxide, or any other toxic extinguishing agent is used, it must be shown by test that entry of harmful concentrations of fluid or fluid vapors into any personnel compartment (due to leakage during normal operation of the rotorcraft, or discharge on the ground or in flight) is prevented, even though a defect may exist in the extinguishing system.

(c) Each methyl bromide container must be charged with a dry agent and sealed. This must be done by—

(1) The fire extinguisher manufacturer; or

(2) Any person using appropriate recharging equipment.

**§ 29.1199 Extinguishing agent containers.**

(a) Each extinguishing agent container must have a pressure relief to prevent bursting of the container by excessive internal pressures.

(b) Each discharge line from a relief connection must end outside the rotorcraft in a location convenient for inspection on the ground.

(c) There must be a visual discharge indicator at the discharge end of each discharge line.

(d) The temperature of each container must be maintained, under intended operating conditions, to prevent the pressure in the container from—

(1) Falling below that necessary to provide an adequate rate of discharge; or

(2) Rising high enough to cause premature discharge.

**§ 29.1201 Fire extinguishing system materials.**

(a) No materials in any fire extinguishing system may react chemically with any extinguishing agent so as to create a hazard.

(b) Each system component in an engine compartment must be fireproof.

**§ 29.1203 Fire detector systems.**

(a) For rotorcraft other than category B rotorcraft with engines of 900 cubic inches displacement or less, there must be approved, quick-acting fire detectors in designated fire zones in numbers and locations ensuring prompt detection of fire in those zones.

(b) Each fire detector must be constructed and installed to withstand any vibration, inertia, and other loads to which it would be subjected in operation.

(c) No fire detector may be affected by any oil, water, other fluids, or fumes that might be present.

(d) There must be means to allow crewmembers to check, in flight, the functioning of each fire detector system electrical circuit.

(e) The wiring and other components of each fire detector system in an engine compartment must be at least fire resistant.

(f) No fire detector system component for any fire zone may pass through another fire zone, unless—

(1) It is protected against the possibility of false warnings resulting from fires in zones through which it passes; or

(2) The zones involved are simultaneously protected by the same detector and extinguishing systems.

## Subpart F—Equipment

### GENERAL

**§ 29.1301 Function and installation.**

Each item of installed equipment must—

(a) Be of a kind and design appropriate to its intended function;

(b) Be labeled as to its identification, function, or operating limitations, or any applicable combination of these factors;

(c) Be installed according to limitations specified for that equipment; and

(d) Function properly when installed.

**§ 29.1303 Flight and navigation instruments.**

The following are required flight and navigational instruments:

(a) An airspeed indicating system.

(b) A sensitive altimeter.

(c) A magnetic direction indicator.

(d) A clock (sweep-second).

(e) A free-air temperature indicator.

(f) A non-tumbling gyroscopic bank and pitch indicator.

(g) A gyroscopic rate-of-turn indicator with bank indicator.

(h) A gyroscopic direction indicator.

(i) A rate-of-climb (vertical speed) indicator.

**§ 29.1305 Powerplant instruments.**

The following are required powerplant instruments:

(a) For each rotorcraft—

(1) A carburetor air temperature indicator for each engine;

(2) A cylinder head temperature indicator for each air-cooled engine, and a coolant temperature indicator for each liquid-cooled engine;

(3) A fuel quantity indicator for each fuel tank;

(4) If an engine can be supplied with fuel from more than one tank, a warning device to indicate, for each tank, when a five-minute usable fuel supply remains when the rotorcraft is in the most adverse fuel feed condition for that tank, regardless of whether that condition can be sustained for the five minutes;

(5) A manifold pressure indicator, for each altitude engine;

(6) An oil pressure warning device for each pressure-lubricated gearbox to indicate when the oil pressure falls below a safe value;

(7) An oil quantity indicator for each oil tank and each rotor drive gearbox, if lubricant is self contained;

(8) An oil temperature indicator for each engine;

(9) An oil temperature warning device to indicate when the oil temperature exceeds a safe value in each main rotor drive gearbox (including all gearboxes essential to rotor phasing) having an oil system independent of the engine oil system;

(10) At least one tachometer to indicate as applicable—

(i) The r.p.m. of the single main rotor;

(ii) The common r.p.m. of any main rotors whose speeds cannot vary appreciably with respect to each other; and

(iii) The r.p.m. of each main rotor whose speed can vary appreciably with respect to that of another main rotor; and

(11) A tachometer for each engine that, if combined with the applicable instrument required by subparagraph (10) of this paragraph, indicates rotor r.p.m. during autorotation.

(b) For category A rotorcraft—

(1) An individual oil pressure indicator for each engine, and either an independent warning device for each engine or a master warning device for the engines with means for isolating the individual warning circuit from the master warning device;

(2) An individual fuel pressure indicator for each engine, and either an independent warning device for each engine or a master warning device for the engines with means for isolating the individual warning circuit from the master warning device; and

(3) Fire warning indicators.

(c) For category B rotorcraft—

(1) An individual oil pressure indicator for each engine;

(2) An individual fuel pressure indicator for each engine; and

(3) Fire warning indicators, when fire detection is required.

**§ 29.1307 Miscellaneous equipment.**

The following is required miscellaneous equipment:

(a) An approved seat for each occupant.

(b) An approved safety belt for each occupant.

(c) A master switch arrangement for electrical circuits other than ignition.

(d) An adequate source of electrical energy.

(e) Electrical protective devices.

(f) Hand fire extinguishers.

(g) A windshield wiper or equivalent device for each pilot station.

(h) A two-way radio communication system.

(i) An ignition switch for each, and for all, engines, as prescribed in § 29.1145.

**§ 29.1309 Equipment, systems, and installations.**

(a) *Functioning and reliability.* The equipment, systems, and installations whose functioning is required by this subchapter must be designed and installed to ensure that they perform their intended functions under any foreseeable operating condition.

(b) *Hazards.* The equipment, systems, and installations must be designed to prevent hazards to the rotorcraft if they malfunction or fail.

(c) *Electrical systems.* For electrical systems, equipment, and installations, critical environmental conditions must be considered in meeting the requirements of paragraphs (a) and (b) of this section.

(d) *Category A; power supply.* Each installation whose functioning is required by this subchapter and that requires a power supply is an "essential load" on the power supply. The power sources and the system must be able to supply the following power loads in probable operating combinations and for probable durations:

(1) Loads connected to the system with the system functioning normally.

(2) Essential loads, after failure of any one prime mover, power converter, or energy storage device.

(3) Essential loads, after failure of—

(i) Any one engine, on rotorcraft with two or three engines; and

(ii) Any two engines, on rotorcraft with four or more engines.

(e) *Category A; assumptions.* In determining compliance with paragraph (d) (2) and (3), the power loads may be assumed to be reduced under a monitoring procedure consistent with safety in the kinds of operation authorized. Loads not required for controlled flight need not be considered for the two-engine-inoperative condition on rotorcraft with four or more engines.

### INSTRUMENTS INSTALLATION

**§ 29.1321 Arrangement and visibility.**

(a) Each flight, navigation, and powerplant instrument for use by any pilot must be easily visible to him from his station with the minimum practicable deviation from his normal position and line of vision when he is looking forward along the flight path.

(b) Each instrument necessary for safe operation, including the airspeed indicator, gyroscopic direction indicator, gyroscopic bank and pitch indicator, gyroscopic turn and bank indicator, altimeter, rate-of-climb indicator, rotor tachometers, and manifold pressure indicator, must be grouped and centered as nearly as practicable about the vertical plane of the pilot's forward vision.

(c) Other required powerplant instruments must be closely grouped on the instrument panel.

(d) Identical powerplant instruments for the engines must be located so as to prevent any confusion as to which engine each instrument relates.

(e) Each powerplant instrument vital to safe operation must be plainly visible to appropriate crewmembers.

(f) Instrument panel vibration may not damage, or impair the readability or accuracy of, any instrument.

**§ 29.1323 Airspeed indicating system.**

For each airspeed indicating system, the following apply:

(a) Each airspeed indicating instrument must be calibrated to indicate true airspeed (at sea level with a standard atmosphere) with a minimum practicable instrument calibration error when the corresponding pitot and static pressures are applied.

(b) Each system must be calibrated to determine the system error, that is, the relation between IAS and CAS. This calibration must be determined, over an appropriate range of speeds—

(1) In flight, for the flight conditions of climb, level flight, and autorotation; and

(2) In ground effect, during the accelerated takeoff run.

(c) For multiengine rotorcraft, the airspeed error of the installation, including the airspeed indicator instrument calibration error, may not exceed three percent, or five m.p.h., whichever is greater—

(1) Throughout the speed range in level flight at forward speeds of 10 m.p.h. or over; and

(2) Throughout the speed range in climb from 10 m.p.h. below the takeoff climbout safety speed to 10 m.p.h above the best rate-of-climb speed.

(d) For single engine rotorcraft, calibration of the airspeed indicator must be made in flight at forward speeds of 10 m.p.h. or over. The airspeed error of the installation, including the airspeed indicator instrument calibration error, may not exceed three percent, or five m.p.h., whichever is greater, at any forward speed above 80 percent of the climbout speed.

(e) Each system must be arranged, so far as practicable, to prevent malfunction or serious error due to the entry of moisture, dirt, or other substances.

(f) Each system must have a heated pitot tube or an equivalent means of preventing malfunction due to icing.

**§ 29.1325 Static air vent and pressure altimeter systems.**

(a) Each instrument with static air case connections must be vented to the outside atmosphere through an appropriate piping system.

(b) Each vent must be located where its orifices are least affected by airflow variation, moisture, or other foreign matter.

(c) Except for the vent into the atmosphere, each system must be airtight.

(d) Each pressure altimeter must be approved and calibrated to indicate pressure altitude in a standard atmosphere with a minimum practicable calibration error when the corresponding static pressures are applied.

(e) Each system must be designed and installed so that the error in indicated pressure altitude at sea level with a standard atmosphere, excluding instrument calibration error, does not result in an error of more than ±30 feet in the level flight speed range from 0 m.p.h. to 0.9 $V_H$.

**§ 29.1327 Magnetic direction indicator.**

(a) Each magnetic direction indicator must be installed so that its accuracy is not excessively affected by the rotorcraft's vibration or magnetic fields.

(b) The compensated installation may not have a deviation, in level flight, greater than 10 degrees on any heading.

**§ 29.1329 Automatic pilot system.**

(a) Each automatic pilot system must be approved, and must be designed so that the automatic pilot can—

(1) Be quickly and positively disengaged by the pilots to prevent it from interfering with their control of the rotorcraft; or

(2) Be sufficiently overpowered by one pilot to let him control the rotorcraft.

(b) Unless there is automatic synchronization, each system must have a means to readily indicate to the pilot the alignment of the actuating device in relation to the control system it operates.

(c) Each manually operated control for the system's operation must be readily accessible to the pilots.

(d) The system must be designed and adjusted so that, within the range of adjustment available to the pilot, it cannot produce hazardous loads on the rotorcraft, or create hazardous deviations in the flight path, under any flight condition appropriate to its use, either during normal operation or in the event of a malfunction, assuming that corrective action begins within a reasonable period of time.

**§ 29.1331 Instruments using a power supply.**

For category A rotorcraft—

(a) Each required flight instrument using a power supply must have—

(1) Two independent sources of power;

(2) A means of selecting either power source; and

(3) A means to indicate the adequacy of the power being supplied; and

(b) The installation and power supply system must be such that failure of any flight instrument connected to one source, or of the energy supply from one source, or a fault in any part of the power distribution system does not interfere with the proper supply of energy from any other source.

**§ 29.1333 Duplicate instrument systems.**

If duplicate flight instruments are required by any operating rule in this chapter—

(a) Each operating system for flight instruments for the first pilot and that is required to be duplicated at other flight crew stations must be independent of the operating system for other flight crew stations;

(b) Only the required flight instruments, and duplicates of required instruments, provided for the first pilot, may be connected to the operating system provided for him; and

(c) If instruments other than required instruments and their duplicates are connected to systems other than the first pilot's operating system, there must be means to disconnect or isolate those instruments in flight.

**§ 29.1337 Powerplant instruments.**

(a) *Instrument lines.* Each powerplant instrument line must meet the requirements of §§ 29.993 and 29.1183. Each line carrying flammable fluids or gases under pressure must have restricting orifices or equivalent safety devices at the source of pressure to prevent the escape of excessive fluid or gas if the line fails.

(b) *Fuel quantity indicator.* There must be means to indicate to the flight crew members the quantity, in gallons or equivalent units, of usable fuel in each tank during flight. In addition—

(1) Each fuel quantity indicator must be calibrated to read "zero" during level flight when the quantity of fuel remaining in the tank is equal to the unusable fuel supply determined under § 29.959;

(2) When two or more tanks are closely interconnected by a gravity feed system and vented, and when it is impossible to feed from each tank separately, at least one fuel quantity indicator must be installed;

(3) Tanks with interconnected outlets and airspaces may be treated as one tank and need not have separate indicators; and

(4) Each exposed sight gauge used as a fuel quantity indicator must be protected against damage.

(c) *Fuel flowmeter system.* If a fuel flowmeter system is installed, each metering component must have a means for bypassing the fuel supply if malfunction of that component severely restricts fuel flow.

(d) *Oil quantity indicator.* There must be a stick gauge or equivalent means to indicate the quantity of oil—

(1) In each tank, and

(2) In each transmission gearbox.

### ELECTRICAL SYSTEMS AND EQUIPMENT

**§ 29.1351 General.**

(a) *Electrical system capacity.* The required generating capacity and the number and kind of power sources must—

(1) Be determined by an electrical load analysis; and

(2) Meet the requirements of § 29.1309.

(b) *Generating system.* The generating system includes electrical power sources, main power busses, transmission cables, and associated control, regulation, and protective devices. It must be designed so that—

(1) Power sources function properly when independent and when connected in combination;

(2) No failure or malfunction of any power source can create a hazard or impair the ability of remaining sources to supply essential loads;

(3) The system voltage and frequency (as applicable) at the terminals of essential load equipment can be maintained within the limits for which the equipment is designed, during any probable operating condition;

(4) System transients due to switching, fault clearing, or other causes do not make essential loads inoperative, and do not cause a smoke or fire hazard;

(5) There are means accessible in flight to appropriate crewmembers for the individual and collective disconnection of the electrical power sources from the main bus; and

(6) There are means to indicate to appropriate crewmembers the generating system quantities essential for the safe operation of the system, such as the voltage and current supplied by each generator.

**§ 29.1353 Electrical equipment and installations.**

(a) Electrical equipment, controls, and wiring must be installed so that operation of any one unit or system of units will not adversely affect the simultaneous operation of any other electrical unit or system essential to safe operation.

(b) Cables must be grouped, routed, and spaced so that damage to essential circuits will be minimized if there are faults in heavy current-carrying cables.

(c) Storage batteries must be designed and installed as follows:

(1) Safe cell temperatures and pressures must be maintained during any probable charging and discharging condition. No uncontrolled increase in cell temperature may result when the battery is recharged (after previous complete discharge)—

(i) At maximum regulated voltage;

(ii) During a flight of maximum duration; and

(iii) Under the most adverse cooling condition likely in service.

(2) Compliance with subparagraph (1) of this paragraph must be shown by test unless experience with similar batteries and installations has shown that maintaining safe cell temperatures and pressures presents no problem.

(3) No explosive or toxic gases emitted by any battery in normal operation, or as the result of any probable malfunction in the charging system or battery installation, may accumulate in hazardous quantities within the rotorcraft.

(4) No corrosive fluids or gases that may escape from the battery may damage surrounding structures or adjacent essential equipment.

**§ 29.1355 Distribution system.**

(a) The distribution system includes the distribution busses, their associated feeders, and each control and protective device.

(b) Each system must be designed so that—

(1) For category A rotorcraft, individual distribution systems ensure that essential load circuits can be supplied in the event of reasonably probable faults or open circuits; and

(2) If two independent sources of electrical power for particular equipment or systems are required by this chapter, their energy supply is ensured.

**§ 29.1357 Circuit protective devices.**

(a) Automatic protective devices must be used to minimize distress to the electrical system and hazard to the rotorcraft in the event of wiring faults or serious malfunction of the system or connected equipment.

(b) For category A rotorcraft, there must be means in the generating system to automatically de-energize and disconnect from the main bus any power source developing hazardous overvoltage.

(c) Each resettable circuit protective device must be designed so that, when an overload or circuit fault exists, it will open the circuit regardless of the position of the operating control.

(d) If the ability to reset a circuit breaker or replace a fuse is essential to safety in flight, that device must be located and identified so that it can be readily reset or replaced in flight.

(e) Each circuit for essential loads must have individual circuit protection.

(f) If fuses are used, there must be spare fuses for use in flight equal to at least 50 percent of the number of fuses of each rating required for complete circuit protection.

**§ 29.1359 Electrical system fire and smoke protection.**

(a) Components of the electrical system must meet the applicable fire and smoke protection provisions of §§ 29.831 and 29.863.

(b) Electrical cables, terminals, and equipment, in designated fire zones, and that are used in emergency procedures, must be at least fire resistant.

**§ 29.1363 Electrical system tests.**

(a) When laboratory tests of the electrical system are conducted—

(1) The tests must be performed on a mock-up using the same generating equipment used in the rotorcraft;

(2) The equipment must simulate the electrical characteristics of the distribution wiring and connected loads to the extent necessary for valid test results; and

(3) Laboratory generator drives must simulate the prime movers on the rotorcraft with respect to their reaction to generator loading, including loading due to faults.

(b) For each flight condition that cannot be simulated adequately in the laboratory or by ground tests on the rotorcraft, flight tests must be made.

## LIGHTS

**§ 29.1381 Instrument lights.**

The instrument lights must—

(a) Make each instrument, switch, and other device for which they are provided easily readable; and

(b) Be installed so that—

(1) Their direct rays are shielded from the pilot's eyes; and

(2) No objectionable reflections are visible to the pilot.

**§ 29.1383 Landing lights.**

(a) Each required landing or hovering light must be approved.

(b) Each landing light must be installed so that—

(1) No objectionable glare is visible to the pilot;

(2) The pilot is not adversely affected by halation; and

(3) It provides enough light for night operation, including hovering and landing.

(c) At least one separate switch must be provided, as applicable—

(1) For each separately installed landing light; and

(2) For each group of landing lights installed at a common location.

**§ 29.1385 Position light system installation.**

(a) *General.* Each part of each position light system must meet the applicable requirements of this section and each system as a whole must meet the requirements of §§ 29.1387 through 29.1397.

(b) *Forward position lights.* Forward position lights must consist of a red and a green light spaced laterally as far apart as practicable and installed forward on the rotorcraft so that, with the rotorcraft in the normal flying position, the red light is on the left side, and the green light is on the right side. Each light must be approved.

(c) *Rear position light.* The rear position light must be a white light mounted as far aft as practicable, and must be approved.

(d) *Circuit.* The two forward position lights and the rear position light must make a single circuit.

(e) *Light covers and color filters.* Each light cover or color filter must be at least flame resistant and may not change color or shape or lose any appreciable light transmission during normal use.

**§ 29.1387 Position light system dihedral angles.**

(a) Each forward and rear position light must, as installed, show unbroken light within the dihedral angles described in this section.

(b) Dihedral angle *L* (left) is formed by two intersecting vertical planes, the first parallel to the longitudinal axis of the rotorcraft, and the other at 110 degrees to the left of the first, as viewed when looking forward along the longitudinal axis.

(c) Dihedral angle *R* (right) is formed by two intersecting vertical planes, the first parallel to the longitudinal axis of the rotorcraft, and the other at 110 degrees to the right of the first, as viewed when looking forward along the longitudinal axis.

(d) Dihedral angle *A* (aft) is formed by two intersecting vertical planes making angles of 70 degrees to the right and to the left, respectively, to a vertical plane passing through the longitudinal axis, as viewed when looking aft along the longitudinal axis.

**§ 29.1389 Position light distribution and intensities.**

(a) *General.* The intensities prescribed in this section must be provided by new equipment with light covers and color filters in place. Intensities must be determined with the light source operating at a steady value equal to the average luminous output of the source at the normal operating voltage of the rotorcraft. The light distribution and intensity of each position light must meet the requirements of paragraph (b) of this section.

(b) *Forward and rear position lights.* The light distribution and intensities of forward and rear position lights must be expressed in terms of minimum intensities in the horizontal plane, minimum intensities in any vertical plane, and maximum intensities in overlapping beams, within dihedral angles, *L*, *R*, and *A*, and must meet the following requirements:

(1) *Intensities in the horizontal plane.* Each intensity in the horizontal plane (the plane containing the longitudinal axis of the rotorcraft and perpendicular to the plane of symmetry of the rotorcraft), must equal or exceed the values in § 29.1391.

(2) *Intensities in any vertical plane.* Each intensity in any vertical plane (the plane perpendicular to the horizontal plane) must equal or exceed the appropriate value in § 29.1393 where *I* is the minimum intensity prescribed in § 29.1391 for the corresponding angles in the horizontal plane.

(3) *Intensities in overlaps between adjacent signals.* No intensity in any overlap between adjacent signals may exceed the values in § 29.1395, except that higher intensities in overlaps may be used with the use of main beam intensities substantially greater than the minima specified in §§ 29.1391 and 29.1393 if the overlap intensities in relation to the main beam intensities do not adversely affect signal clarity.

**§ 29.1391 Minimum intensities in the horizontal plane of forward and rear position lights.**

Each position light intensity must equal or exceed the applicable values in the following table:

| Dihedral angle (light included) | Angle from right or left of longitudinal axis, measured from dead ahead | Intensity (candles) |
|---|---|---|
| *L* and *R* (forward red and green) | 0° to 10° | 40 |
| | 10° to 20° | 30 |
| | 20° to 110° | 5 |
| *A* (rear white) | 110° to 180° | 20 |

**§ 29.1393 Minimum intensities in any vertical plane of forward and rear position lights.**

Each position light intensity must equal or exceed the applicable values in the following table.

| Angle above or below the horizontal plane: | *Intensity* |
|---|---|
| 0° | 1.00 *I.* |
| 0° to 5° | 0.90 *I.* |
| 5° to 10° | 0.80 *I.* |
| 10° to 15° | 0.70 *I.* |
| 15° to 20° | 0.50 *I.* |
| 20° to 30° | 0.30 *I.* |
| 30° to 40° | 0.10 *I.* |
| 40° to 90° | 0.05 *I.* |

**§ 29.1395 Maximum intensities in overlapping beams of forward and rear position lights.**

No position light intensity may exceed the applicable values in the following table, except as provided in § 29.1389 (b) (3).

| Overlaps | Maximum intensity | |
|---|---|---|
| | Area A (candles) | Area B (candles) |
| Green in dihedral angle *L* | 10 | 1 |
| Red in dihedral angle *R* | 10 | 1 |
| Green in dihedral angle *A* | 5 | 1 |
| Red in dihedral angle *A* | 5 | 1 |
| Rear white in dihedral angle *L* | 5 | 1 |
| Rear white in dihedral angle *R* | 5 | 1 |

Where—

(a) Area A includes all directions in the adjacent dihedral angle that pass through the light source and intersect the common boundary plane at more than 10 degrees but less than 20 degrees; and

(b) Area B includes all directions in the adjacent dihedral angle that pass through the light source and intersect the common boundary plane at more than 20 degrees.

**§ 29.1397 Color specifications.**

Each position light color must have the applicable International Commission on Illumination chromaticity coordinates as follows:

(a) *Aviation red*—

"*y*" is not greater than 0.335; and
"*z*" is not greater than 0.002.

(b) *Aviation green*—

"*x*" is not greater than $0.440-0.320y$;
"*x*" is not greater than $y-0.170$; and
"*y*" is not less than $0.390-0.170x$.

(c) *Aviation white*—

"*x*" is not less than 0.350;
"*x*" is not greater than 0.540; and
"$y-y_0$" is not numerically greater than 0.01, "$y_0$" being the *y* coordinate of the Planckian radiator for which $x_0=x$.

**§ 29.1399 Riding light.**

(a) Each riding light required for water operation must be installed so that it can—

(1) Show a white light for at least two miles at night under clear atmospheric conditions; and

(2) Show a maximum practicable unbroken light with the rotorcraft on the water.

(b) Externally hung lights may be used.

**§ 29.1401 Anticollision light system.**

(a) *General.* If certification for night operation is requested, the rotorcraft must have an anticollision light system that—

(1) Consists of one or more approved anticollision lights located so that their emitted light will not impair the crew's vision or detract from the conspicuity of the position lights; and

(2) Meets the requirements of paragraphs (b) through (f) of this section.

(b) *Field of coverage.* The system must consist of enough lights to illuminate the vital areas around the rotorcraft, considering the physical configuration and flight characteristics of the rotorcraft. The field of coverage must extend in each direction within at least 30 degrees above and 30 degrees below the horizontal plane of the rotorcraft, except that there may be solid angles of obstructed visibility totaling not more than 0.5 steradians.

(c) *Flashing characteristics.* The arrangement of the system, that is, the number of light sources, beam width, speed of rotation, and other characteristics, must give an effective flash frequency of not less than 40, nor more than 100, cycles per minute. The effective flash frequency is the frequency at which the rotorcraft's complete anticollision light system is observed from a distance, and applies to each sector of light including any overlaps that exist when the system consists of more than one light source. In overlaps, flash frequencies may exceed 100, but not 180, cycles per minute.

(d) *Color.* Each anticollision light must be aviation red and must meet the requirements of § 29.1397(a).

(e) *Light intensity.* The minimum light intensities in any vertical plane, measured with the red filter and expressed in terms of "effective" intensities, must meet the requirements of paragraph (f) of this section. The following relation must be assumed:

$$Ie=\frac{\int_{t_1}^{t_2} I(t)\,dt}{0.2+(t_2-t_1)}$$

where:

$I_e$ = effective intensity (candles).
$I(t)$ = instantaneous intensity as a function of time.
$t_2-t_1$ = flash time interval (seconds).

Normally, the maximum value of effective intensity is obtained when $t_1$ and $t_2$ are chosen so that the effective intensity is equal to the instantaneous intensity at $t_2$ and $t_1$.

(f) *Minimum effective intensities for anticollision lights.* Each anticollision light effective intensity must equal or exceed the applicable values in the following table.

| Angle above or below the horizontal plane: | *Effective intensity (candles)* |
|---|---|
| 0° to 5° | 100 |
| 5° to 10° | 60 |
| 10° to 20° | 20 |
| 20° to 30° | 10 |

## SAFETY EQUIPMENT

**§ 29.1411 General.**

(a) *Accessibility.* Required safety equipment to be used by the crew in an emergency, such as automatic liferaft releases, must be readily accessible.

(b) *Stowage provisions.* Stowage provisions for required emergency equipment must be furnished and must—

(1) Be arranged so that the equipment is directly accessible and its location is obvious; and

(2) Protect the safety equipment from inadvertent damage.

(c) *Emergency exit descent device.* The stowage provisions for the emergency exit descent device required by § 29.809(f) must be at the exits for which they are intended.

(d) *Liferafts.* Liferafts must be stowed near exits through which the rafts can be launched during an unplanned ditching. Rafts automatically or remotely released outside the rotorcraft must be attached to the rotorcraft by the static line prescribed in § 29.1415.

(e) *Long-range signaling device.* The stowage provisions for the long-range signaling device required by § 29.1415 must be near an exit available during an unplanned ditching.

(f) *Life preservers.* Each life preserver must be within easy reach of each occupant while seated.

**§ 29.1413 Safety belts: passenger warning device.**

If there are means to indicate to the passengers when safety belts should be fastened, they must be installed to be operated from either pilot seat.

**§ 29.1415 Ditching equipment.**

(a) Emergency flotation and signaling equipment required by any operating rule of this chapter must meet the requirements of this section.

(b) Each liferaft and each life preserver must be approved. In addition—

(1) Unless excess rafts of enough capacity are provided, the buoyancy and seating capacity beyond the rated capacity of the rafts must accommodate all occupants of the rotorcraft in the event of a loss of one raft of the largest rated capacity; and

(2) Each raft must have a trailing line, and must have a static line designed to hold the raft near the rotorcraft but to release it if the rotorcraft becomes totally submerged.

(c) Approved survival equipment must be attached to each liferaft.

(d) There must be an approved long-range signaling device for use in one liferaft.

MISCELLANEOUS EQUIPMENT

**§ 29.1431 Electronic equipment.**

(a) Radio communication and navigation equipment installations must be free from hazards in themselves, in their method of operation, and in their effects on other components, under any critical environmental conditions.

(b) Radio communication and navigation equipment, controls, and wiring must be installed so that operation of any one unit or system of units will not adversely affect the simultaneous operation of any other radio or electronic unit, or system of units, required by this chapter.

**§ 29.1433 Vacuum systems.**

(a) There must be means, in addition to the normal pressure relief, to automatically relieve the pressure in the discharge lines from the vacuum air pump when the delivery temperature of the air becomes unsafe.

(b) Each vacuum air system line and fitting on the discharge side of the pump that might contain flammable vapors or fluids must meet the requirements of § 29.1183 if they are in a designated fire zone.

(c) Other vacuum air system components in designated fire zones must be at least fire resistant.

**§ 29.1435 Hydraulic systems.**

(a) *Design.* Each hydraulic system must be designed as follows:

(1) Each element of the hydraulic system must be designed to withstand, without detrimental, permanent deformation, any structural loads that may be imposed simultaneously with the maximum operating hydraulic loads.

(2) Each element of the hydraulic system must be designed to withstand pressures sufficiently greater than those prescribed in paragraph (b) of this section to show that the system will not rupture under service conditions.

(3) There must be means to indicate the pressure in each main hydraulic power system.

(4) There must be means to ensure that no pressure in any part of the system will exceed a safe limit above the maximum operating pressure of the system, and to prevent excessive pressures resulting from any fluid volumetric change in lines likely to remain closed long enough for such a change to take place. The possibility of detrimental transient (surge) pressures during operation must be considered.

(5) Each hydraulic line, fitting, and component must be installed and supported to prevent excessive vibration and to withstand inertia loads. Each element of the installation must be protected from abrasion, corrosion, and mechanical damage.

(6) Means for providing flexibility must be used to connect points, in a hydraulic fluid line, between which relative motion or differential vibration exists.

(b) *Tests.* Each element of the system must be tested to a proof pressure of 1.5 times the maximum pressure to which that element will be subjected in normal operation, without failure, malfunction, or detrimental deformation of any part of the system.

(c) *Fire protection.* Each hydraulic system using flammable hydraulic fluid must meet the applicable requirements of §§ 29.861, 29.1183, 29.1185, and 29.1189.

**§ 29.1439 Protective breathing equipment.**

(a) If one or more cargo or baggage compartments are to be accessible in flight, protective breathing equipment must be available for an appropriate crewmember.

(b) For protective breathing equipment required by paragraph (a) of this section or by any operating rule of this chapter—

(1) That equipment must be designed to protect the crew from smoke, carbon dioxide, and other harmful gases while on flight deck duty;

(2) That equipment must include—

(i) Masks covering the eyes, nose, and mouth; or

(ii) Masks covering the nose and mouth, plus accessory equipment to protect the eyes; and

(3) That equipment must supply protective oxygen of 10 minutes duration per crewmember at a pressure altitude of 8,000 feet with a respiratory minute volume of 30 liters per minute BTPD.

No. 235—8

## Subpart G—Operating Limitations and Information

**§ 29.1501 General.**

Each operating limitation specified in §§ 29.1503 through 29.1525, and other information necessary for safe operation, must be—

(a) Included in the Rotorcraft Flight Manual;

(b) Expressed in markings and placards; and

(c) Made available by any other means that will convey the information to the crewmembers.

OPERATING LIMITATIONS

**§ 29.1503 Airspeed limitations: general.**

(a) An operating speed range must be established.

(b) When airspeed limitations are a function of weight, weight distribution, altitude, rotor speed, power, or other factors, airspeed limitations corresponding with the critical combinations of these factors must be established.

**§ 29.1505 Never-exceed speed.**

(a) The never-exceed speed $V_{NH}$ must be established so that it is—

(1) Not less than $V_Y$ with the engines at maximum continuous power; and

(2) Not more than the lesser of—

(i) 0.9$V$ established under § 29.309; and

(ii) 0.9 times the maximum speed shown under §§ 29.251 and 29.629.

(b) $V_{NH}$ may vary with altitude and rotor r.p.m., if the ranges of these variables are large enough to allow an operationally practical and safe variation of $V_{NE}$.

**§ 29.1509 Rotor speed.**

(a) *Maximum power-off (autorotation).* The maximum power-off rotor speed must be established so that it does not exceed 95 percent of the lesser of—

(1) The maximum design r.p.m. determined under § 29.309(b); and

(2) The maximum r.p.m. shown during the type tests.

(b) *Minimum power-off.* The minimum power-off rotor speed must be established so that it is not less than 105 percent of the greater of—

(1) The minimum shown during the type tests; and

(2) The minimum determined by design substantiation.

(c) *Minimum power-on.* The minimum power-on rotor speed must be established so that it is—

(1) Not less than the greater of—

(i) The minimum shown during the type tests; and

(ii) The minimum determined by design substantiation; and

(2) Not more than a value determined under § 29.33 (a) (1) and (c) (1).

**§ 29.1517 Limiting height-speed envelope.**

If a range of heights exists at any speed, including zero, within which it is not possible to make a safe landing following power failure, the range of heights and its variation with forward speed must be established, together with any other pertinent information, such as the kind of landing surface.

**§ 29.1519 Weight and center of gravity.**

The weight and center of gravity limitations determined under §§ 29.25 and 29.27, respectively, must be established as operating limitations.

**§ 29.1521 Powerplant limitations.**

(a) *General.* The powerplant limitations prescribed in this section must be established so that they do not exceed the corresponding limits for which the engines are type certificated.

(b) *Takeoff operation.* The powerplant takeoff operation must be limited by—

(1) The maximum rotational speed, which may not be greater than—

(i) The maximum value determined by the rotor design; or

(ii) The maximum value shown during the type tests;

(2) The maximum allowable manifold pressure (for reciprocating engines);

(3) The time limit for the use of the power corresponding to the limitations established in subparagraphs (1) and (2) of this paragraph; and

(4) If the time limit in subparagraph (3) of this paragraph exceeds two minutes, the maximum allowable cylinder head, coolant outlet, and oil temperatures.

(c) *Continuous operation.* The continuous operation must be limited by—

(1) The maximum rotational speed, which may not be greater than—

(i) The maximum value determined by the rotor design; or

(ii) The maximum value shown during the type tests;

(2) The maximum allowable manifold pressure;

(3) The maximum allowable cylinder head or coolant outlet and oil temperatures; and

(4) The minimum rotational speed shown under the rotor speed requirements in § 29.1509(c).

(d) *Fuel grade or designation.* The minimum fuel grade (for reciprocating engines) or fuel designation (for turbine engines) must be established so that it is not less than that required for the operation of the engines within the limitations in paragraphs (b) and (c) of this section.

(e) *Cooling limitations.* The maximum sea level temperature established for satisfactory cooling must be shown.

**§ 29.1523 Minimum flight crew.**

The minimum flight crew must be established so that it is sufficient for safe operation, considering—

(a) The workload on individual crewmembers;

(b) The accessibility and ease of operation of necessary controls by the appropriate crewmember; and

(c) The kinds of operation authorized under § 29.1525.

**§ 29.1525 Kinds of operation.**

The kinds of operation to which the rotorcraft is limited are established by the flight characteristics and installed equipment.

**§ 27.1529 Maintenance manual.**

Each rotorcraft must have a maintenance manual containing the information that the applicant considers essential for proper maintenance, including recommended limits on service life or retirement periods for major components. These components must be identified by serial number or equivalent means.

MARKINGS AND PLACARDS

**§ 29.1541 General.**

(a) The rotorcraft must contain—

(1) The markings and placards specified in §§ 29.1545 through 29.1565; and

(2) Any additional information, instrument markings, and placards required for the safe operation of the rotorcraft if it has unusual design, operating or handling characteristics.

(b) Each marking and placard prescribed in paragraph (a) of this section—

(1) Must be displayed in a conspicuous place; and

(2) May not be easily erased, disfigured, or obscured.

**§ 29.1543 Instrument markings: general.**

For each instrument—

(a) When markings are on the cover glass of the instrument there must be means to maintain the correct alignment of the glass cover with the face of the dial; and

(b) Each arc and line must be wide enough, and located to be clearly visible to the pilot.

**§ 29.1545 Airspeed indicator.**

(a) Each airspeed indicator must be marked to show indicated airspeed.

(b) The following markings must be made:

(1) For the limit beyond which operation is dangerous, a red radial line.

(2) For the caution range, a yellow arc.

(3) For the safe operating range, a green arc.

**§ 29.1547 Magnetic direction indicator.**

(a) A placard meeting the requirements of this section must be installed on or near the magnetic direction indicator.

(b) The placard must show the calibration of the instrument in level flight with the engines operating.

(c) The placard must state whether the calibration was made with radio receivers on or off.

(d) Each calibration reading must be in terms of magnetic heading in not more than 45 degree increments.

**§ 29.1549 Powerplant instruments.**

For each required powerplant instrument—

(a) Each maximum and, if applicable, minimum safe operating limit must be marked with a red radial line;

(b) Each normal operating range must be marked with a green arc not extending beyond the maximum and minimum safe operating limits;

(c) Each takeoff and caution range must be marked with a yellow arc; and

(d) Each engine and rotor speed range that is restricted because of excessive vibration stresses must be marked with a red arc.

**§ 29.1551 Oil quantity indicator.**

Each oil quantity indicator must be marked with enough increments to indicate readily and accurately the quantity of oil.

**§ 29.1553 Fuel quantity indicator.**

If the unusable fuel supply for any tank exceeds one gallon, or five percent of the tank capacity, whichever is greater, a red arc must be marked on its indicator extending from the calibrated zero reading to the lowest reading obtainable in level flight.

**§ 29.1555 Control markings.**

(a) Each cockpit control must be plainly marked as to its function and method of operation.

(b) For powerplant fuel controls—

(1) Each fuel tank selector valve control must be marked to indicate the position corresponding to each tank and to each existing cross feed position;

(2) If safe operation requires the use of any tanks in a specific sequence, that sequence must be marked on, or adjacent to, the selector for those tanks; and

(3) Each valve control for any engine of a multiengine rotorcraft must be marked to indicate the position corresponding to each engine controlled.

(c) The capacity of each tank must be marked on or near each selector controlling that tank.

(d) For accessory, auxiliary, and emergency controls—

(1) Each essential visual position indicator, such as those showing rotor pitch or landing gear position, must be marked so that each crewmember can determine at any time the position of the unit to which it relates; and

(2) Each emergency control must be red and must be marked as to method of operation.

**§ 29.1557 Miscellaneous markings and placards.**

(a) *Baggage and cargo compartments, and ballast location.* Each baggage and cargo compartment, and each ballast location must have a placard stating any limitations on contents, including weight, that are necessary under the loading requirements.

(b) *Seats.* If the maximum allowable weight to be carried in a seat is less than 170 pounds, a placard stating the lesser weight must be permanently attached to the seat structure.

(c) *Fuel and oil filler openings.* The following must be marked on or near each appropriate filler cover:

(1) The word "fuel", the minimum fuel grade or designation for the engines, and the usable fuel tank capacity.

(2) The word "oil" and the oil tank capacity.

(d) *Emergency exit placards.* Each placard and operating control for each emergency exit must be red. A placard must be near each emergency exit control and must clearly indicate the location of that exit and its method of operation.

**§ 29.1559 Operating limitations placard.**

There must be a placard in clear view of the pilot stating: "This (helicopter, gyrodyne, etc.) must be operated in compliance with the operating limitations specified in the FAA approved Rotorcraft Flight Manual."

**§ 29.1561 Safety equipment.**

(a) Each safety equipment control to be operated by the crew in emergency, such as controls for automatic liferaft releases, must be plainly marked as to its method of operation.

(b) Each location, such as a locker or compartment, that carries any fire extinguishing, signaling, or other life saving equipment, must be so marked.

(c) Stowage provisions for required emergency equipment must be conspicuously marked to identify the contents and facilitate removal of the equipment.

(d) Each liferaft must have obviously marked operating instructions.

(e) Approved survival equipment must be marked for identification and method of operation.

**§ 29.1565 Tail rotor.**

Each tail rotor must be marked so that its disc is conspicuous under normal ground conditions.

ROTORCRAFT FLIGHT MANUAL

**§ 29.1581 General.**

(a) A Rotorcraft Flight Manual must be furnished with each rotorcraft.

(b) Each part of the manual listed in §§ 29.1583 through 29.1589 must be verified and approved, and must be segregated, identified, and clearly distinguished from each unapproved part of that manual.

(c) Any information not specified in §§ 29.1583 through 29.1589 that is required for safe operation because of unusual design, operating, or handling characteristics, must be furnished.

**§ 29.1583 Operating limitations.**

(a) *Airspeed and rotor limitations.* Information necessary for the marking of airspeed and rotor limitations on or near their respective indicators must be furnished. The significance of each limitation and of the color coding must be explained.

(b) *Powerplant limitations.* Information must be furnished to explain the powerplant limitations, and to allow marking the instruments under §§ 29.1549 through 29.1553.

(c) *Weight and loading distribution.* The weight and center of gravity limits required by §§ 29.25 and 29.27, respectively, must be furnished, together with the items included in the empty weight in § 29.29(a). If the variety of possible loading conditions warrants, instructions must be included to allow ready observance of the limitations.

(d) *Flight crew.* When a flight crew of more than one is required, the number and functions of the minimum flight crew determined under § 29.1523 must be furnished.

(e) *Kinds of operation.* Each kind of operation for which the rotorcraft and its equipment installations are approved must be listed.

(f) *Limiting heights.* Enough information must be furnished to allow compliance with § 29.1517.

(g) *Unusable fuel.* If the unusable fuel in any tank exceeds one gallon, or five percent of tank capacity, whichever is greater, there must be means to warn the flight personnel that the fuel remaining in that tank when the quantity indicator reads "zero" cannot be safely used in flight.

**§ 29.1585 Operating procedures.**

The parts of the manual containing operating procedures must have information concerning any normal and emergency procedures, and other information necessary for safe operation, including the applicable procedures, such as those involving minimum speeds, to be followed if an engine fails.

**§ 29.1587 Performance information.**

(a) *Category A.* For each category A rotorcraft, the Rotorcraft Flight Manual must contain a summary of the performance data, including data necessary for the application of any operating rule of this chapter, together with descriptions of the conditions, such as airspeeds, under which this data was determined, and must contain—

(1) The indicated airspeeds corresponding with those determined for takeoff, and the procedures to be followed if the critical engine fails during takeoff;

(2) The airspeed calibrations;

(3) The techniques, associated airspeeds, and rates of descent for autorotative landings; and

(4) The maximum allowable wind for safe operation near the ground.

(b) *Category B.* For each category B rotorcraft, the Rotorcraft Flight Manual must contain—

(1) The takeoff distance and the takeoff safety airspeed together with the pertinent information defining the flight path with respect to autorotative landing if an engine fails, including the calculated effects of altitude and temperature;

(2) The steady rates of climb and hovering ceiling, together with the corresponding airspeeds and other pertinent information, including the calculated effects of altitude and temperature;

(3) The landing distance, appropriate glide airspeed, and kind of landing surface, together with any pertinent information that might affect this distance, including the calculated effects of altitude and temperature;

(4) The maximum safe wind for operation near the ground;

(5) The airspeed calibrations; and

(6) Any additional performance data necessary for the application of any operating rule in this chapter.

**§ 29.1589 Loading information.**

There must be loading instructions for each possible loading condition between the maximum and minimum weights determined under § 29.25 that can result in a center of gravity beyond any extreme prescribed in § 29.27, assuming any probable occupant weights.

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Alteration of Control Zone

The purpose of this amendment to Part 71 [New] of the Federal Aviation Regulations is to revoke an extension of the Fargo, N. Dak., control zone.

The Fargo, N. Dak., radio beacon is scheduled to be relocated. Approach procedures requiring a control zone extension designated with reference to the radio beacon, have been cancelled. This will make the controlled airspace based on the beacon unnecessary.

Since the action contemplated by this amendment is less restrictive in nature and imposes no additional burden on any person, notice and public procedure hereon are unnecessary and the amendment may become effective without regard to the 30 day statutory period.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective upon publication in the FEDERAL REGISTER, as hereinafter set forth.

In § 71.171 (29 F.R. 1101) the Fargo, N. Dak., control zone is amended by deleting "within 2 miles either side of the 089° bearing from the Fargo RBN extending from the 5-mile radius zone to 12 miles E. of the RBN" from the text.

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348)

Issued in Kansas City, Mo., on November 23, 1964.

EDWARD C. MARSH,
*Director, Central Region.*

[Airspace Docket No. 64–CE–12]

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Designation of Transition Area

On September 22, 1964, a notice of proposed rule making was published in the FEDERAL REGISTER (29 F.R. 13144) stating that the Federal Aviation Agency proposed to designate a transition area at Harrisburg, Ill.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 [New] of the Federal Aviation Regulations is amended, effective 0001 e.s.t., February 4, 1965, as hereinafter set forth.

In § 71.181 (29 F.R. 1160) the following is added:

HARRISBURG, ILLINOIS

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Harrisburg-Raleigh Airport (latitude 37°48'50" N., longitude 88°32'56" W.), and within 2 miles each side of the 064° bearing extending from the RBN to a point 8 miles northeast; and that airspace extending upward from 1,200 feet above the surface within 10 miles northwest and 5 miles southeast of the 064° and 244° bearing from the RBN, extending from a point 6 miles southwest to 15 miles northeast of the RBN.

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348)

Issued at Kansas City, Mo., on November 23, 1964.

EDWARD C. MARSH,
*Director, Central Region.*

[F.R. Doc. 64–12302; Filed, Dec. 2, 1964; 8:45 a.m.]

[Airspace Docket No. 64–CE–44]

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Alteration of Transition Area

On September 23, 1964, a notice of proposed rule making was published in the FEDERAL REGISTER (29 F.R. 13209) stating that the Federal Aviation Agency proposed to alter a transition area at Detroit, Mich.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 [New] of the Federal Aviation Regulations is amended, effective 0001 e.s.t., February 4, 1965, as hereinafter set forth.

In § 71.181 (29 F.R. 1160) the Detroit, Mich., transition area is amended to read:

DETROIT, MICHIGAN

That airspace extending upward from 700 feet above the surface within an 8-mile radius of Detroit Metropolitan Wayne County Airport (latitude 42°13'06" N., longitude 83°-

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348)

Issued at Kansas City, Mo., on November 23, 1964.

EDWARD C. MARSH,
*Director, Central Region.*

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Designation of Transition Area

On September 26, 1964, a notice of proposed rule making was published in the FEDERAL REGISTER (29 F.R. 13403) stating that the Federal Aviation Agency proposed to designate a transition area at Parsons, Kans.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 [New] of the Federal Aviation Regulations is amended, effective 0001 e.s.t., February 4, 1965, as hereinafter set forth.

In § 71.181 (29 F.R. 1160) the following is added:

PARSONS, KANSAS

That airspace extending upward from 700 feet above the surface within a 6-mile radius of the Tri-City Airport (latitude 37°20'00" N., longitude 95°30'30" W.), and within 5 miles E and 8 miles W of a 359° bearing from the Tri-City Airport, extending from the Airport to a point 12 miles N; and that airspace extending upward from 1,200 feet above the surface within 5 miles NE and 5 miles SW of the Oswego VOR 306° radial extending from the Oswego VOR to the Tri-City Airport, and within 5 miles E and 5 miles W of the Chanute VOR 166° radial extending from the Chanute VOR to the Tri-City Airport excluding the Oswego and Chanute transition areas.

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348)

Issued at Kansas City, Mo., on November 23, 1964.

EDWARD C. MARSH,
*Director, Central Region.*

[F.R. Doc. 64-12304; Filed, Dec. 2, 1964; 8:45 a.m.]

[Airspace Docket No. 64-EA-21]

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

## PART 73—SPECIAL USE AIRSPACE [NEW]

### Alteration of Restricted Area

On August 21, 1964, a notice of proposed rule making was published in the FEDERAL REGISTER (29 F.R. 11979) stating that the Federal Aviation Agency proposed to modify the Westhampton Beach, N.Y. (Suffolk AFB), Restricted Area/Military Climb Corridor, R-5205.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

In consideration of the foregoing, Parts 71 and 73 [New] of the Federal Aviation Regulations are amended, effective 0001 e.s.t., February 4, 1965, as hereinafter set forth.

1. In § 73.52 (29 F.R. 1267), R-5205 Westhampton Beach, N.Y. (Suffolk AFB), Restricted Area/Military Climb Corridor, delete the boundaries and designated altitudes in their entirety and substitute therefor,

*Boundaries.* From a point of beginning at latitude 40°52'19" N., longitude 72°35'45" W., the area centered on the Suffolk Air Force Base TACAN 040° True radial, extending to a point 30 nmi northeast, having a width of 1 nmi at the beginning and expanding uniformly to a width of 6 nmi at the outer extremity.

*Designated altitudes:*

Surface to flight level 240 from the point of beginning to 3 nmi northeast.

2,000 feet MSL to flight level 240 from 3 to 6 nmi northeast of the point of beginning.

5,000 feet MSL to flight level 240 from 6 to 11 nmi northeast of the point of beginning.

10,000 feet MSL to flight level 240 from 11 to 15 nmi northeast of the point of beginning.

14,000 feet MSL to flight level 240 from 15 to 19 nmi northeast of the point of beginning.

16,000 feet MSL to flight level 240 from 19 to 25 nmi northeast of the point of beginning.

20,000 feet MSL to flight level 240 from 25 to 30 nmi northeast of the point of beginning.

*Time of designation.* Continuous.

*Using Agency.* Suffolk AFB Approach Control.

2. In § 71.163 (29 F.R. 1068), Control 1169, delete, "excluding the airspace below 2,000 feet MSL outside the United States." and substitute therefor, "excluding the portion within the Westhampton Beach, N.Y., Restricted Area/Military Climb Corridor R-5205, and the airspace below 2,000 feet MSL outside the United States."

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348)

Issued in Washington, D.C., on November 25, 1964.

CLIFFORD P. BURTON,
*Acting Director, Air Traffic Service.*

[F.R. Doc. 64-12306; Filed, Dec. 2, 1964; 8:45 a.m.]

[Airspace Docket No. 64-EA-52]

## PART 73—SPECIAL USE AIRSPACE [NEW]

### Alteration of Restricted Area

The purpose of this amendment to Part 73 [New] is to modify the designated ceiling altitudes of the Bangor, Maine (Dow AFB), Restricted Area/Military Climb Corridor R-3903.

The modification is to change the ceiling altitudes of the corridor from FL 270 to FL 240. The Air Force has determined that the airspace above FL 240 is not needed for operations in the climb corridor and the modification also will be less restrictive to IFR operations on Jet Routes Nos. 29 and 49 in the vicinity of the Bangor, Maine, VORTAC.

Since the airspace within the climb corridor is restrictive only when in use by the military, releasing of such airspace above FL 240 therein will be less restrictive to the public. For this reason, notice and public procedure hereon are unnecessary and the amendment is effective upon publication of this rule in the FEDERAL REGISTER.

In consideration of the foregoing, Part 73 [New] is amended as hereinafter set forth.

1. In § 73.39 (29 F.R. 1254), the Bangor, Maine (Dow AFB), Restricted Area/Military Climb Corridor R-3903 is amended by deleting from the description of the designated altitudes in the text "flight level 270" wherever it appears and substituting "flight level 240" therefor.

(Sec. 307(a), Federal Aviation Act of 1958; (49 U.S.C. 1348))

Issued in Washington, D.C., on November 25, 1964.

CLIFFORD P. BURTON,
*Acting Director, Air Traffic Service.*

[F.R. Doc. 64-12305; Filed, Dec. 2, 1964; 8:45 a.m.]

# Title 7—AGRICULTURE

## Chapter VII—Agricultural Stabilization and Conservation Service (Agricultural Adjustment), Department of Agriculture

SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENTS

[Amdt. 1]

## PART 717—HOLDING OF REFERENDA ON MARKETING QUOTAS

### Subpart—Regulations Governing the Holding of Referenda on Marketing Quotas

1. *Basis and purpose.* (a) This amendment is issued pursuant to the provisions of the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1281 et seq.), and relates to the holding of referenda on marketing quotas. This amendment removes the limitation of six on the number of regular members permitted on a community referendum committee. Two regular members must be provided at each polling place and some referendum communities should have more than three polling places. This amendment would make such action possible.

(b) Referenda will be held for upland and extra long staple cotton on December 15, 1964. Therefore, it is necessary that this amendment be made effective as soon as possible in order that county committees may have time to set up an adequate number of polling places and name community referendum committeemen to man such polling places. Accordingly, it is hereby determined and found that compliance with the public notice, procedure, and effective date requirements of section 4 of the Administrative Procedure Act (5 U.S.C. 1003) is impracticable and contrary to the public interest and this amendment shall become effective upon filing this document with the Director, Office of the Federal Register.

2. Section 717.2(b) of the Regulations Governing the Holding of Referenda on Marketing Quotas (28 F.R. 13249) is amended by deleting the third sentence thereof which reads: "In no event shall the regular membership exceed six members".

(Secs. 312, 336, 343, 354, 358, 375, 52 Stat. 46, 55, 56, 61, 66, as amended, 55 Stat. 88; 70 Stat. 206, as amended; secs. 106, 112, 70 Stat. 191, 195; 7 U.S.C. 1312, 1336, 1343, 1354, 1358, 1375, 1377, 1824, 1836)

Effective date: Date of filing document with the Director, Office of the Federal Register.

Signed at Washington, D.C., on November 27, 1964.

H. D. GODFREY,
*Administrator, Agricultural Stabilization and Conservation Service.*

[F.R. Doc. 64-12360; Filed, Dec. 2, 1964; 8:48 a.m.]

[Amdt. 1]

## PART 719—RECONSTITUTION OF FARMS, ALLOTMENTS, AND BASES

### Location of Farm for Administrative Purposes

(a) This amendment is issued pursuant to section 375(b) of the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1375(b)), section 124 of the Soil Bank Act (7 U.S.C. 1812), and the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590 g-p). This amendment provides that a farm on an Indian reservation operated by a grazing association may be administratively located in the county in which the headquarters of such grazing association is located.

(b) Since there are farms now operated by such grazing associations, it is desirable that the county ASCS office records be relocated as soon as possible for any farms affected by this amendment. Accordingly, it is essential that this amendment be made effective as soon as possible. It is hereby determined and found that compliance with the notice and public procedure requirements and the thirty-day effective date requirement of section 4 of the Administrative Procedure Act (60 Stat. 238; 5 U.S.C. 1003) is impracticable and contrary to the public interest and this amendment shall be effective upon filing this document with the Director, Office of the Federal Register.

Section 719.3(c) of the regulations for Reconstitution of Farms, Allotments, and Bases (29 F.R. 13370) is amended by adding a new subparagraph as follows:

§ 719.3 Farm constitution.

* * * * * *

(c) *Location of farm for administrative purposes.* * * *

(3) Notwithstanding the provisions of subparagraphs (1) and (2) of this paragraph, if the land in the farm is part of an Indian reservation and is operated by a grazing association, the farm may be administratively located in the county where such grazing association has its headquarters if the county committees involved and the farm operator agree to such location, provided the persons using the land do not reside thereon and the geographic features are such that administrative access would be more practical.

(Sec. 375, 52 Stat. 66, as amended, 7 U.S.C. 1375; sec. 124, 70 Stat. 198, 7 U.S.C. 1812; secs. 16(b), 74 Stat. 1030, 16(c), 75 Stat. 5, 16(d), 75 Stat. 302, 105(c), 75 Stat. 301, 16(h), 77 Stat. 45, 16 U.S.C. 590 p).

Effective date: Date of filing this document with the Director, Office of the Federal Register.

Signed at Washington, D.C., on November 27, 1964.

H. D. GODFREY,
*Administrator, Agricultural Stabilization and Conservation Service.*

[Amdt. 4]

## PART 729—PEANUTS

### Subpart—Allotment and Marketing Quota Regulations for Peanuts of the 1963 and Subsequent Crops

1. *Basis and purpose.* (a) The amendment contained herein is issued pursuant to the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1281 et seq.), to revise the Allotment and Marketing Quota Regulations for Peanuts of the 1963 and Subsequent Crops (27 F.R. 11920, 28 F.R. 11811, 29 F.R. 7801, 7983, 13027). The amendment (1) provides that the current farm peanut allotment shall be preserved as history acreage for a farm, (a) if for the current year or either of the two preceding years an acreage equal to 75 per centum or more of the farm peanut acreage allotment, after reduction for violation and temporary release of acreage, but before reapportionment of released acreage or increase for a type in short supply, was actually planted or regarded as planted to peanuts under the Conservation Reserve, Cropland Conversion or Great Plains Programs as determined in accordance with Part 719 of this chapter, (b) the farm allotment is or was in an allotment pool, or (c) the farm is Federally-owned and there is in effect a restrictive lease prohibiting the production of peanuts, (2) changes from November 1 to December 1 the date by which the farm operator must file a written request for adjustment in the history acreage for abnormal conditions affecting the farm peanut acreage.

(b) The provisions of this amendment with respect to the preservation of allotments for history acreage purposes are required by law and the change of the date by which a written request for adjustment for abnormal conditions must be made effective as soon as possible as farm peanut history acreages for 1964 are currently being determined for the purpose of establishing farm peanut acreage allotments for 1965. Accordingly, it is hereby determined and found that compliance with the notice, public procedure and effective date requirements of the Administrative Procedure Act (5 U.S.C. 1001-1011) is impractical and contrary to the public interest and this amendment shall become effective upon the date of filing with the Director, Office of the Federal Register.

2. The Allotment and Marketing Quota Regulations for Peanuts of the 1963 and Subsequent Crops (27 F.R. 11920, 28 F.R. 11811, 29 F.R. 7801, 7983, 13027) are hereby amended as follows:

a. Paragraph (b) and paragraph (c) (1), as amended, of § 729.1424 are amended to read as follows:

§ 729.1424 Determination of farm peanut history acreage.

* * * * * *

(b) *Full allotment preserved as history acreage.* For any year the entire farm peanut allotment shall be preserved as peanut history acreage if:

(1) For the current year or either of the two preceding years:

(i) The sum of the final acreage and the acreage regarded as planted to peanuts under the Conservation Reserve, Cropland Conversion and Great Plains Programs, as determined pursuant to Part 719 of this chapter, was as much as 75 per centum of the farm allotment after reduction for violation pursuant to § 729.1434, temporary release of acreage but before reapportionment of released acreage pursuant to § 729.1435, or increase for a type in short supply pursuant to § 729.1437.

(ii) The farm allotment is or was in an eminent domain allotment pool pursuant to Part 719 of this chapter.

(2) The farm is Federally-owned and there is in effect a restrictive lease prohibiting the production of peanuts.

(c) * * *

(1) The final acreage, adjusted to compensate for abnormal conditions affecting acreage, if the county committee determine that such action is necessary to maintain equitable allotments: *Provided,* That the farm operator files a written request for such an adjustment

at the office of the county committee prior to December 1 of the current year.

* * * * * *

(Secs. 358, 375, 377, 378, 55 Stat. 88, as amend-

by the Department hereunder) agree to obtain, keep as part of his records, and enforce an assurance, in writing, from each prospective exhibitor to the follow-

Fiber Products Identification Act by deceptive advertising in catalogs which falsely represented that certain fibers were present in advertised products; de-

on the stamp, tag, label or other means of identification under section 4(b) (1) and (2) of the Textile Fiber Products Identification Act is contained in the

211, and Investment Company Act of 1940 Release No. 4074 published in the FEDERAL REGISTER for November 14, 1964,

*Effective date.* The Commission finds that the foregoing actions relate to agency organization, procedure or prac-

at the office of the county committee prior to December 1 of the current year.

* * * * *

(Secs. 358, 375, 377, 378, 55 Stat. 88, as amended, 52 Stat. 66, as amended, 70 Stat. 206, as amended, 72 Stat. 995, as amended, secs. 106, 112, 70 Stat. 191, 196, as amended, sec. 101, 76 Stat. 606; 7 U.S.C. 1358, 1375, 1377, 1378, 1824, 1836, 16 U.S.C. 590g)

Effective date: Date of filing with the Director, Office of the Federal Register.

Signed at Washington, D.C., on November 27, 1964.

# Title 15—COMMERCE AND FOREIGN TRADE

## Chapter III—Bureau of International Commerce, Department of Commerce

### SUBCHAPTER A—MISCELLANEOUS REGULATIONS

### PART 365—MOBILE TRADE FAIRS

### Requests for Assistance by Operators

Section 365.1 *Requests for assistance by mobile trade fair operators* is amended in the following respects:

Paragraph (a)(2), relating to advertising expenses, is amended by adding thereto the following clause: "and except that not more than 90% (ninety percent) of the total of such allowable advertising expenses will be defrayed by the Department."

Paragraph (b)(2), *Funds* is amended by adding thereto the following sentence: "With respect to funds made available to the Department for such purpose out of fiscal year 1965 appropriations, no funds for financial assistance will be allocated by the Department prior to December 15, 1964, and such funds will be allocated only for requests received and approved subsequent to the date of publication of this amendment in the FEDERAL REGISTER."

Paragraph (c), *Requests for financial assistance; information required* is amended by adding the following unnumbered paragraph at the end thereof:

It is the policy of the Department (now also in effect for participations in the Department's trade center and international trade fair programs abroad) that any product exhibited through a mobile trade fair project must be labeled and marketed under the name of a U.S. firm and, if produced or assembled outside the United States, must contain U.S. components valued at more than 50% (fifty percent) of the value of the finished product. Accordingly, the request for assistance must contain a statement that the applicant operator of the mobile trade fair project undertakes to abide by the foregoing policy and that the operator will (if a contract extending assistance is entered into with him by the Department hereunder) agree to obtain, keep as part of his records, and enforce an assurance, in writing, from each prospective exhibitor to the following effect: "The _____ (exhibitor) represents to the _____ (operator) that every product which will be exhibited by the exhibitor through the mobile trade fair project will be labeled and marketed under the name of a U.S. firm and, if produced or assembled outside the United States, will contain U.S. components valued at more than 50% (fifty percent) of the value of the finished product. The exhibitor understands that failure to comply with the foregoing undertaking will be a ground for termination, in whole or in part, of the exhibitor's participation in the mobile trade fair project."

The foregoing are amendments of procedures involving the extension of grants and benefits and are therefore exempt from the provisions of section 4 of the Administrative Procedure Act (5 U.S.C. 1003).

Dated: November 30, 1964.

EUGENE M. BRADERMAN,
*Director,*
*Bureau of International Commerce.*

# Title 16—COMMERCIAL PRACTICES

## Chapter I—Federal Trade Commission

[Docket No. C-858]

### PART 13—PROHIBITED TRADE PRACTICES

### Saul S. Siegal Co. et al.

Subpart—Advertising falsely or misleadingly: § 13.30 *Composition of goods:* 13.30-75 Textile Fiber Products Identification Act. Subpart—Misbranding or mislabeling: § 13.1185 *Composition:* 13.-1185-80 Textile Fiber Products Identification Act; § 13.1212 *Formal regulatory and statutory requirements:* 13.1212-80 Textile Fiber Products Identification Act. Subpart—Neglecting, unfairly or deceptively, to make material disclosure: § 13.1852 *Formal regulatory and statutory requirements:* 13.1852-70 Textile Fiber Products Identification Act; §13.1900 *Source or origin:* 13.1900-80 Textile Fiber Products Identification Act. Subpart—Using misleading name—Goods: § 13.2280 *Composition:* 13.2280-70 Textile Fiber Products Identification Act.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 72 Stat. 1717; 15 U.S.C. 45, 70) [Cease and desist order, Saul S. Siegal Co., et al., Chicago, Ill., Docket C-858, Nov. 16, 1964]

*In the Matter of Saul S. Siegal Co., a Corporation, and Saul S. Siegal, Leon Siegal, and Morris Siegal, Individually and as Officers of Said Corporation*

Consent order requiring Chicago distributors of drapery, and furniture and wall fabrics, to cease violating the Textile Fiber Products Identification Act by deceptive advertising in catalogs which falsely represented that certain fibers were present in advertised products; described products by terms—such as "Chromespun", "Dacron", "Fortisan" and "Sateens"—which failed to set forth the generic name and percentage of fibers present; and failed to comply in other respects with requirements of the Act; and by failing to show, on labels, the generic name and percentage of fibers present, and to identify the manufacturer.

The order to cease and desist, including further order requiring report of compliance therewith is as follows:

*It is ordered,* That respondents Saul S. Siegal Co., a corporation, and its officers, and Saul S. Siegal, Leon Siegal and Morris Siegal, individually and as officers of said corporation, and respondents' representatives, agents and employees, directly or through any corporate or other device, in connection with the introduction, delivery for introduction, sale, advertising, or offering for sale, in commerce, or the transportation or causing to be transported in commerce, or the importation into the United States, of any textile fiber product; or in connection with the sale, offering for sale, advertising, delivery, transportation, or causing to be transported, of any textile fiber product which has been advertised or offered for sale in commerce; or in connection with the sale, offering for sale, advertising, delivery, transportation, or causing to be transported, after shipment in commerce, of any textile fiber product, whether in its original state or contained in other textile fiber products, as the terms "commerce" and "textile fiber product" are defined in the Textile Fiber Products Identification Act, do forthwith cease and desist from:

A. Misbranding textile fiber products by:

1. Falsely or deceptively stamping, tagging, labeling, invoicing, advertising or otherwise identifying such products as to the name or amount of constituent fibers contained therein.

2. Falsely or deceptively stamping, tagging, labeling, invoicing, advertising or otherwise identifying such products by representing either directly or by implication, through the use of such terms as "hand print mohair", "modern print on mohair antique satin", "Linen-Cotton-Acetate and Silk Noil face casement", "Linen casement with metallic", or "Metallic Boucle" or any other terms, that any fibers are present in a textile fiber product when such is not the case.

3. Failing to affix labels to such products showing in a clear, legible and conspicuous manner each element of information required to be disclosed by section 4(b) of the Textile Fiber Products Identification Act.

B. Falsely and deceptively advertising textile fiber products by:

1. Making any representations, by disclosure or by implication, as to the fiber contents or any textile fiber product in any written advertisement which is used to aid, promote, or assist, directly or indirectly, in the sale or offering for sale of such textile fiber product, unless the same information required to be shown on the stamp, tag, label or other means of identification under section 4(b) (1) and (2) of the Textile Fiber Products Identification Act is contained in the said advertisement, in the manner and form required except that the percentages of the fibers present in the textile fiber product need not be stated.

2. Using a fiber trademark in advertisements without a full disclosure of the required content information in at least one instance in the said advertisement.

3. Using a fiber trademark in advertising textile fiber products containing more than one fiber without such fiber trademark appearing in the required fiber content information in immediate proximity and conjunction with the generic name of the fiber in plainly legible type or lettering of equal size and conspicuousness.

4. Using a fiber trademark in advertising textile fiber products containing only one fiber without such fiber trademark appearing at least once in the advertisement, in immediate proximity and conjunction with the generic name of the fiber, in plainly legible and conspicuous type.

5. Using a generic name of a fiber in nonrequired information in advertising textile fiber products in such a manner as to be false, deceptive or misleading as to fiber content or to indicate, directly or indirectly, that such textile fiber products are composed wholly or in part of such fiber when such is not the case.

6. Using non-required information and representations in said advertising in such a manner as to be false, deceptive or misleading as to the fiber content of the textile fiber products or so as to interfere with, minimize or detract from required information.

*It is further ordered,* That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with this order.

Issued: November 16, 1964.

By the Commission.

[SEAL] JOSEPH W. SHEA,
*Secretary.*

# Title 17—COMMODITY AND SECURITIES EXCHANGES

## Chapter II—Securities and Exchange Commission

[Release 33-4735, 34-7468, 39-212, 40-4086]

### PART 200—ORGANIZATION; CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

### Delegated Authority

On November 10, 1964 in Securities Act of 1933 Release No. 4731, Securities Exchange Act of 1934 Release No. 7457, Trust Indenture Act of 1939 Release No. 211, and Investment Company Act of 1940 Release No. 4074 published in the FEDERAL REGISTER for November 14, 1964, 29 F.R. 15282. The Securities and Exchange Commission announced certain allocation of functions between the Division of Corporation Finance and the Division of Corporate Regulations. In connection therewith, the Commission, among other things, amended Articles 30-1 and 30-2 of Subpart A of its Statement of Organization, Conduct and Ethics, and Information and Requests (17 CFR 200.30-1, 200.30-2). Reference was made therein to certain delegated authority under "Rule 3(b) of the Commission's rules of practice".

In view of the Commission's revision of its rules of practice and adoption of its Rules Relating to Investigations, as announced in Securities Act of 1933 Release No. 4677, Securities Exchange Act of 1934 Release No. 7264, Holding Company Act of 1935 Release No. 15028, Trust Indenture Act of 1939 Release No. 198, Investment Company Act of 1940 Release No. 3927 and Investment Advisers Act of 1940 Release No. 160, 29 F.R. 3619, such references to Rule 3(b) of the rules of practice would no longer be applicable, and the appropriate reference in that connection should be to Rule 6 of the Commission's Rules Relating to Investigations, 17 CFR 203.6. Accordingly, Articles 30-1 and 30-2 are amended by the Commission to conform thereto.

The Commission's action is as follows:

1. In § 200.30-1(b), subparagraph (2) is amended by changing "Rule 3(b) of the Commission's rules of practice, 17 CFR 201.3(b)" to read "Rule 6 of the Commission's Rules Relating to Investigations, 17 CFR 203.6." As so amended, § 200.30-1(b)(2) reads as follows:

**§ 200.30-1 Delegation of authority to Director of Division of Corporation Finance.**

* * * * * * *

(b) * * *

(2) In nonpublic investigatory proceedings within the responsibility of the director, to grant requests of persons submitting data or evidence to retain or procure copies of their data or transcripts of their testimony pursuant to Rule 6 of the Commission's Rules Relating to Investigations, 17 CFR 203.6.

* * * * * * *

2. In § 200.30-2(f), subparagraph (2) is amended by changing "Rule 3(b) of the Commission's rules of practice, 17 CFR 201.3(b)" to read "Rule 6 of the Commission's Rules Relating to Investigations, 17 CFR 203.6." As so amended, § 200.30-2(f)(2) reads as follows:

**§ 200.30-2 Delegation of authority to Director of Division of Corporate Regulation.**

* * * * * * *

(f) * * *

(2) In nonpublic investigatory proceedings within the responsibility of the director, to grant requests of persons submitting data or evidence to retain or procure copies of their data or transcripts of their testimony pursuant to Rule 6 of the Commission's rules Relating to Investigations, 17 CFR 203.6.

* * * * * * *

(Sec. 1, 76 Stat. 394, 15 U.S.C. 78d-1)

*Effective date.* The Commission finds that the foregoing actions relate to agency organization, procedure or practice and that compliance with sections 4 (a), (b), and (c) of the Administrative Procedure Act is unnecessary. Accordingly, the foregoing action, which was taken pursuant to Public Law No. 87-592, 76 Stat. 394, becomes effective immediately upon publication in the FEDERAL REGISTER.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

NOVEMBER 25, 1964.

[F.R. Doc. 64-12312; Filed, Dec. 2, 1964; 8:46 a.m.]

# Title 18—CONSERVATION OF POWER AND WATER RESOURCES

## Chapter IV—Office of Water Resources Research, Department of the Interior

### WATER RESOURCES RESEARCH

Notice was published in the FEDERAL REGISTER of October 29, 1964 (23 F.R. 14746-14752), that pursuant to the authority vested in the Secretary of the Interior by section 104 of the Water Resources Research Act of 1964 (Public Law 88-379), it was proposed to adopt regulations for carrying out the provisions of the Act.

Interested persons were given 20 days within which to submit written comments, suggestions or objections with respect to the proposed regulations. All comments received were carefully considered. The following changes have been made in the regulations as proposed:

1. In § 501.2(b), the description of the delegation to the Director has been revised.

2. A new § 501.3(d) has been added and the succeeding paragraphs have been redesignated.

3. In §§ 501.5(c)(2), 502.1(f)(1), and 502.2(f)(1) the words "(or supported)" have been added after the word "conducted."

4. In § 501.5(c)(3) and in § 502.1(b) the word "Director" has been substituted for the word "Secretary."

5. At the end of § 502.1(d) the following language has been added: "and an acknowledgement of the institute's responsibility for planning, work performance, and reporting for the entire program of the institute."

6. At the beginning of § 502.1(g), the following words have been added: "A statement that the institute is willing to enter into * * *."

7. The word "Evidence" has been added at the beginning of § 503.1(c)(15).

8. A reference to § 501.7(b) has been added to § 503.2(a).

9. New paragraphs (b) and (c) have been added to § 504.2.

10. A new paragraph (c) has been added to § 504.3.

11. Revised paragraphs (b) and (c) have been substituted for paragraphs (b), (c), and (d) in § 504.4.

12. A reference to § 501.7(b) has been added to § 504.5(a).

13. The first four lines of § 505.1(a)(1) have been revised.

The regulations set forth below are hereby adopted. They should become effective without awaiting the expiration of a full period of 30 days in order that water resources research institutes and other potential recipients of assistance pursuant to the Act can effectively schedule and utilize, during the current academic year, Federal support available in Fiscal Year 1965. Accordingly, the regulations shall become effective upon the date of their publication in the FEDERAL REGISTER.

STEWART L. UDALL,
*Secretary of the Interior.*

NOVEMBER 30, 1964.

Part
501 General.
502 Requests for allotments to institutes.
503 Applications for grants, contracts, matching or other arrangements.
504 Approval of allotments and applications.
505 Fiscal and accounting.
506 Progress and accomplishment reports.
507 Consultation and coordination.
508 Audits and inspections.

## PART 501—GENERAL

Sec.
501.1 Purpose.
501.2 Office of Water Resources Research.
501.3 Definition of terms.
501.4 Allotments to institutes.
501.5 Programs of institutes
501.6 Grants to institutes of matching funds for specific projects.
501.7 Grants to, and contracts, matching or other arrangements with, entities other than institutes.

AUTHORITY: The provisions of this Part 501 issued under sec. 104, 78 Stat. 331.

### § 501.1 Purpose.

The regulations in this chapter are issued pursuant to the Water Resources Research Act of 1964 (Public Law 88-379), which authorizes appropriations to, and confers authority upon, the Secretary of the Interior in order to promote a more adequate national program of water research.

### § 501.2 Office of Water Resources Research.

(a) The Office of Water Resources Research has been established as a component of the Department of the Interior. It reports to the Secretary of the Interior and is administered by a Director.

(b) The Secretary has delegated to the Director authority to take the actions and make the determinations that, under the Act, are the responsibility of the Secretary, except for determinations under section 303 of the Act, the issuance of regulations, reporting to the President, and reporting to the Congress. The Director has redelegated to the Associate Director the authority of the Director, to be exercised under his general administrative direction.

### § 501.3 Definition of terms.

As used in this chapter, the term—

(a) "Act" means the Water Resources Research Act of 1964 (Public Law 88-379),

(b) "Allotment" means the funds made available to an institute in a particular fiscal year pursuant to section 100 of the Act and the regulations in this chapter,

(c) "Director" means the Director, Office of Water Resources Research,

(d) "Fiscal year" means a twelve-month period ending on June 30,

(e) "Institute" means a water resources research institute, center, or equivalent agency established in accordance with provisions of Title I of the Act,

(f) "Scientists" includes individuals in any professional discipline including individuals in the life, physical, or social sciences, and engineers,

(g) "Secretary" means the Secretary of the Interior or his authorized representative, and

(h) "State" includes each of the fifty States, and Puerto Rico.

### § 501.4 Allotments to institutes.

(a) Subject to the availability of appropriated funds, an allotment of $75,000 in the first fiscal year, $87,500 in each of the second and third fiscal years, and $100,000 in each fiscal year thereafter will be available to each State to assist in establishing and carrying on the work of an institute.

(b) An institute must be identified with a college or university in a State, unless two or more States cooperate in the designation of a single interstate or regional institute, in which event the sums assignable to all of the cooperating States shall be paid to such institute.

(c) An institute, as authorized by appropriate State authority, may, and is encouraged to, arrange with other colleges and universities within the State to participate in the institute's work. Such participation will not make the other colleges and universities ineligible for assistance under section 200 of the Act.

(d) Prior to receiving an allotment, each institute must meet certain qualifications prescribed in the Act and the regulations in this chapter.

### § 501.5 Programs of institutes.

(a) It shall be the duty of each institute to plan and conduct or arrange for a component or components of the college or university with which it is identified to conduct—

(1) Competent research, investigations, and experiments of either a basic or practical nature, or both, in relation to water resources, and

(2) Training of scientists through such research, investigations, and experiments.

(b) Such research, investigations, experiments, and training may include, without being limited to:

(1) Aspects of the hydrologic cycle,

(2) Supply and demand for water,

(3) Conservation and best use of available supplies of water,

(4) Methods of increasing such supplies, and

(5) Economic, legal, social, engineering, recreational, biological, geographic, ecological, and other aspects of water problems.

(c) Institutes shall give due regard to:

(1) The varying conditions and needs of the respective States,

(2) Water research projects being conducted (or supported) by agencies of the Federal and State governments, the agricultural experiment stations, and others,

(3) Advice and assistance as provided by the Director pursuant to section 104 of the Act,

(4) Coordination of their programs with programs of other institutes and agencies, and

(5) Avoidance of any undue displacement of scientists elsewhere engaged in water resources research.

(d) An institute may also plan for research, investigations, and experiments to be conducted as part of the institute's program at colleges and universities other than the college or university with which the institute is identified. For purposes of financial management, reporting, and other research program management and administration activities, the institute shall be responsible for performance of the activities of other participating colleges and universities. The activities of participating colleges and universities must meet all of the requirements (such as scope of work, qualifications, coordination with other research) that are applicable to other portions of an institute's program.

### § 501.6 Grants to institutes of matching funds for specific projects.

(a) Section 101 of the Act provides for grants to institutes with the condition that such grants be matched on not less than a dollar-for-dollar basis with funds from States or other non-Federal sources. Appropriations are authorized in the following amounts:

| Fiscal year: | *Amount* |
|---|---|
| 1965 | $1,000,000 |
| 1966 | 2,000,000 |
| 1967 | 3,000,000 |
| 1968 | 4,000,000 |
| 1969 and each following year | 5,000,000 |

(b) Subject to the availability of appropriations, such matching grants may be made to provide funds to meet the necessary expenses of specific water resources research projects, including the expenses of planning and coordinating regional water resources research projects by two or more institutes, if the projects for which such grants are sought—

(1) Could not otherwise be undertaken were it not for the Federal grant, and

(2) Are approved by the Director on the basis of—

(i) Merit of the project,

(ii) Need for the knowledge it is expected to produce when completed, and

(iii) The opportunity it provides for the training of scientists.

### § 501.7 Grants to, and contracts, matching or other arrangements with entities other than institutes.

(a) Grants, contracts, matching or other arrangements may be made, pursuant to section 200 of the Act, for research into any aspects of water problems related to the mission of the Department of the Interior that are not otherwise being studied, when such research is deemed desirable by the Director.

(b) Subject to the availability of appropriated funds, such grants may be made to, or contracts, matching or other arrangements made with, any of the following:

(1) Educational institutions (other than those establishing institutes under Title I of the Act),
(2) Private foundations,
(3) Other institutions,
(4) Private firms,
(5) Individuals,
(6) Local government agencies,
(7) State government agencies, or
(8) Federal Government agencies.

## PART 502—REQUESTS FOR ALLOTMENTS TO INSTITUTES

Sec.
502.1 Initial allotment.
502.2 Allotments after first fiscal year.

AUTHORITY: The provisions of this Part 502 issued under sec. 104, 78 Stat. 331.

### § 502.1 Initial allotment.

In order to obtain an initial allotment, an institute should submit to the Director, Office of Water Resources Research, Department of the Interior, Washington, D.C., 20240, a request (in six copies) containing the following information:

(a) Evidence that the institute conforms to the requirements of subsection 100(a) of the Act in that—

(1) The institute has been established at the college or university in the State that was established in accordance with the Act of July 2, 1862 (12 Stat. 503) or, if established at some other institution, the institute is at a college or university that has been designated by act of the legislature of the State for the purposes of section 100 of the Act, or

(2) If there is in the State more than one college or university established in accordance with the Act of July 2, 1862 and no designation has been made by act of the legislature of the State for the purposes of section 100 of the Act, the institute has been established at the one such college or university designated by the Governor of the State to receive the allotment, or

(3) The institute has been designated as an interstate or regional institute by two or more States in cooperation as provided by section 100 of the Act.

(b) Evidence of the appointment by the governing authority of the institute of an officer to receive and account for all funds paid under the provisions of the Act and to make annual reports to the Director on work accomplished and the status of projects under way, together with a detailed statement of the amounts received under any provision of the Act during the preceding fiscal year, and of its disbursement, on schedules prescribed by the Secretary.

(c) Evidence that the institute has plans for, and will conduct or arrange for a component or components of the college or university with which it is identified to conduct—

(1) Competent research, investigations, and experiments of either a basic or practical nature, or both, in relation to water resources, and

(2) The training of scientists through such research, investigations, and experiments.

(d) Names of other colleges or universities, if any, within the State with which arrangements have been made for their participation in the work of the institute, with indication of the nature and extent of such participation and an explanation of the arrangements by which such participation becomes a part of the work of the institute, and an acknowledgment of the institute's responsibility for planning, work performance, and reporting for the entire program of the institute.

(e) Evidence that the institute has, or may reasonably be expected to have, the capability of doing effective work in one or more of the various water resources research activities contemplated by the Act, which evidence shall include:

(1) The proposed general plan of operation of the institute showing its organization and a summary of the institute program activities, by project or other appropriate headings, which includes information concerning the substantive character and the anticipated magnitude, in man-years, of proposed activities,

(2) Description of facilities to be utilized,

(3) A list of staff personnel with specific details as to academic and professional training, research experience, and other pertinent qualifications, and the time they will devote to research, training, or other activities of the institute,

(4) The money, facilities, services, property, and other contributions, from sources other than the annual allotment of Federal funds, that will be available to the institute in the initial fiscal year.

(f) Evidence that the institute is giving due regard to

(1) Water research projects being conducted (or supported) by agencies of the Federal and State governments, the agricultural experiment stations, and others,

(2) Avoidance of any undue displacement of scientists elsewhere engaged in water resources research,

(3) Water resources conditions and needs of the State (or States, in the case of a regional institute) as ascertained by consultation with appropriate State officials and by other means,

(4) Advice and assistance as provided by the Director pursuant to Section 104 of the Act and section 501.2 of this chapter, and

(5) Coordination of its program with programs of other institutes and agencies.

(g) A statement that the institute is willing to enter into an agreement, in a form approved by the Secretary and the Attorney General, that all information, uses, products, processes, patents, and other developments resulting from any scientific or technological research or development activity financed with funds supplied pursuant to the Act will (with such exceptions and limitations as the Secretary may determine, after consultation with the Secretary of Defense, to be necessary in the interest of the national defense) be made freely and fully available to the general public.

(h) A financial plan relating expenditures to scheduled activity and rate of effort to be expended, and indicating the times at which there will be need for specified amounts of allotted Federal funds.

(i) An appropriate "Notice of Research Project," and supplementary documentation as may be requested by the Director, for each separately identifiable research project the institute proposes to undertake during the year, for submission, when the allotment is approved, to the Science Information Exchange for publication in a catalog of water resources research.

### § 502.2 Allotments after first fiscal year.

After the first fiscal year, in order to obtain an allotment, an institute should submit to the Director a request (in six copies) containing the following information:

(a) All amendments, deletions, and additions to previously submitted information that are necessary to make it currently applicable,

(b) Evidence that all reports due under Part 506 of this chapter have been submitted,

(c) Evidence that any moneys received by the institute under the Act that have been found by the Director to have been improperly diminished, lost, or misapplied have been replaced, and safeguards have been established by the institute that will assure proper handling of funds received under the Act in the future,

(d) An outline explaining any changes in its program the institute plans to make during the forthcoming fiscal year,

(e) A financial plan relating expenditures to scheduled activity and rate of effort to be expended, and indicating the times at which there will be need for specified amounts of allotted Federal funds,

(f) Evidence that the institute's program is effective and is giving due regard to:

(1) Water research projects being conducted (or supported) by agencies of the Federal and State governments, the agricultural experiment stations, and others,

(2) Avoidance of any undue displacement of scientists elsewhere engaged in water resources research,

(3) Water resources conditions and needs of the State (or States, in the case of a regional institute) as ascertained by consultation with appropriate State officials and by other means,

(4) Advice and assistance as provided by the Director pursuant to Section 104 of the Act and Section 501.2 of this chapter, and

(5) Coordination of its program with programs of other institutes and agencies.

## PART 503—APPLICATIONS FOR GRANTS, CONTRACTS, MATCHING OR OTHER ARRANGEMENTS

Sec.
503.1 Applications by institutes for grants of matching funds for specific projects.
503.2 Applications for research grants, contracts, matching or other arrangements by entities other than institutes.

AUTHORITY: The provisions of this Part 503 issued under sec. 104, 78 Stat. 331.

**§ 503.1 Applications by institutes for grants of matching funds for specific projects.**

(a) *Manner of submission.* An application for a matching grant under section 101 of the Act for a specific water resources research project should be submitted by an institute in 15 copies to the Director, Office of Water Resources Research, Department of the Interior, Washington, D.C., 20240.

(b) *Definition of funds eligible for matching.* Non-Federal funds which may be used to match a grant of Federal funds, on not less than a dollar-for-dollar basis, are those that have been or will be made available to an institute by State or other non-Federal sources during the duration of the project for which the grant is sought to meet the necessary expenses of a specific water resources research project, including the expenses of planning and coordinating regional water resources projects by two or more institutes. The fair value of services, facilities, property, or other contributions supplied from non-Federal sources, but excluding the cost of permanent buildings, may also be included. Title requirements for property purchased with non-Federal funds and used to match grants under the Act are set forth in section 505.5 of this chapter.

(c) *Information required with application.* Applications for matching grants shall be in the form of proposals to undertake specific water resources research projects. Such proposals shall set forth for each project—

(1) The nature and scope of the project to be undertaken,

(2) The period during which it will be pursued,

(3) The name and qualifications of the person who will direct the project,

(4) The number and general qualifications of the personnel who will work on the project, with the name, education, experience, and accomplishments of the principal scientist who will be assigned to it,

(5) The location or locations at which the project will be pursued,

(6) The importance of the project to the water economy of the Nation, the region, and the State concerned,

(7) The relation of the project to the over-all program of the institute,

(8) The relation of the project to other known research projects theretofore pursued or currently being pursued by the institute and by others (including but not limited to projects listed by the Science Information Exchange),

(9) The extent to which the project will provide opportunity for the training of scientists,

(10) A financial plan setting forth cash requirements, subdivided between grant and non-Federal funds—

(i) For each quarter of the first fiscal year, and

(ii) For each subsequent fiscal year during the proposed life of the project,

(11) The facilities that will be devoted to the project,

(12) The salient points of the plan that will be followed in pursuing the project, including a financial plan in which expenditures are related to activity and rate of effort to be expended,

(13) The intended method of publishing the results of the project on a timely basis,

(14) The basis for a determination that the project could not be undertaken without the grant for which application is made,

(15) Evidence that all reports due under Part 506 of this chapter have been submitted,

(16) The names of other colleges or universities, if any, within the State with which arrangements have been made for their participation in the project, with indication of the nature and extent of such participation, an explanation of the arrangements by which such participation becomes a part of the work of the institute, and an acknowledgment of the institute's responsibility for the planning, work performance, and reporting for the entire project,

(17) Assurance that, if the grant is made, the required matching funds from non-Federal sources will be forthcoming, and

(18) Information as to whether the project has been or will be submitted to organizations other than the Office of Water Resources Research for the purpose of obtaining a contract or grant, with the names of any such organizations. Similar information, with the part (or parts) of the project appropriately identified, shall be provided when only a part (or parts) of the project has been or will be submitted to another organization.

(d) *Additional requirement.* There must be attached to the application an appropriate "Notice of Research Project", and supplementary documentation information as may be requested by the Director, for submission, if the project is approved, to the Science Information Exchange for publication in a catalog of water resources research.

**§ 503.2 Applications for research grants, contracts, matching or other arrangements by entities other than institutes.**

(a) *Eligible applicants.* As provided in paragraph (b) of § 501.7 of this chapter, individuals and organizations other than an institute established under Title I of the Act and the educational institution with which the institute is identified are eligible to apply for Federal funds under section 200 of the Act to assist them in undertaking research into any aspects of water problems related to the mission of the Department of the Interior that are not otherwise being studied.

(b) *Manner of submission.* An application should be submitted in 15 copies to the Director, Office of Water Resources Research, Department of the Interior, Washington, D.C., 20240. A separate application must be submitted for each project. If an application is signed by an authorized representative of an applicant, evidence of the authority of the representative must be attached.

(c) *Information required with application.* (1) If the applicant is an individual, the application should include a statement in reasonable detail of his education, experience, accomplishments, and special qualifications for conducting the project for which application is being made.

(2) If the applicant is an organization, the application should include a statement as to its nature, officers, principal business, experience, and special qualifications for conducting the project for which application is being made.

(3) Each application shall also set forth the information specified in paragraphs (c) and (d) of § 503.1 to the extent applicable. (There is no requirement that matching funds be supplied from non-Federal sources in order to receive assistance under section 200 of the Act.)

## PART 504—APPROVAL OF ALLOTMENTS AND APPLICATIONS

Sec.
504.1 Return of defective submissions.
504.2 Approval of initial allotments to institutes.
504.3 Approval of allotments to institutes after the first year.
504.4 Approval of grants to institutes of matching funds for specific projects.
504.5 Approval of grants to, and contracts, matching or other arrangements with, entities other than institutes established pursuant to the Act.

AUTHORITY: The provisions of this Part 504 issued under sec. 104, 78 Stat. 331.

**§ 504.1 Return of defective submissions.**

(a) Upon receipt of a request for approval of an allotment or upon receipt of an application for a grant, contract, matching or other arrangement pursuant to the Act, the Director shall determine whether the submission conforms to the requirements of Part 502 or Part 503 of this chapter as appropriate. Non-conforming submissions will be returned with statements of the reasons for their return.

**§ 504.2 Approval of initial allotments to institutes.**

(a) The Director will approve the initial allotment to an institute when he has determined that the institute—

(1) Has been organized in conformity with subsection 100(a) of the Act,

(2) Has, or may reasonably be expected to have, the capability of doing effective work under the Act.

(3) Is committed to a program of work and a plan of operation that conform with the provisions of the Act and provide for activities that will not duplicate established water research programs, and

(4) Has a financial plan in which proposed expenditures have a reasonable relationship to the probable value of the results of the institute's activities.

(b) When the Director has determined that the initial allotment should be made to an institute, he will draft and sign a proposed continuing agreement setting forth the general terms and conditions of allotments, and forward five copies of it to the institute. The institute shall sign and return to the Director three copies of the continuing agreement. Such continuing agreement will also apply to grants to institutes of matching funds for specific projects, pursuant to section 101 of the Act, if such grants are approved by the Director.

(c) The Director will also draft, sign, and forward to the institute five copies of an annual allotment agreement covering the initial annual allotment. The institute shall sign and return to the Director three copies of the annual allotment agreement.

**§ 504.3 Approval of allotments to institutes after the first year.**

(a) Each fiscal year after the first, the Director will approve an allotment to an institute when he has determined that the institute—

(1) Has, since receiving its preceding allotment, undergone no changes in its form of organization, finances, and plan of operation that disqualify it for an allotment pursuant to section 100 of the Act,

(2) Has submitted, in satisfactory form, all reports required in Part 506 of this chapter,

(3) Is committed to a program of work and a plan of operation that conform to the provisions of section 100 of the Act and provide for activities that will not duplicate established water research programs,

(4) Is engaged in, and is committed to, a program of research, investigations, and experiments and the training of scientists through such activities that represent competent and effective work of the types and in the manner provided for in the Act,

(5) Has properly accounted for all funds received pursuant to the Act and, if the Director has determined that any portion of such funds were improperly diminished, lost, or misapplied, has replaced them and supplied evidence that it has instituted safeguards that will assure proper handling of funds received under the Act in the future, and

(6) Has a financial plan in which proposed expenditures have a reasonable relationship to the probable value of the results of the institute's activities.

(b) In evaluating the plans of an institute, the Director will give due regard to the varying conditions and needs of the respective States.

(c) The Director will draft, sign, and forward to the institute five copies of an annual allotment agreement. The institute shall sign and return to the Director three copies of the annual allotment agreement.

**§ 504.4 Approval of grants to institutes of matching funds for specific projects.**

(a) The Director will approve an institute's application for a matching-fund grant under section 101 of the Act to assist in financing a specific project after determining that—

(1) The applicant is a qualified institute,

(2) Satisfactory assurance has been furnished that funds from non-Federal sources that will be devoted to the project will equal or exceed the amount of the proposed matching grant, and

(3) The proposed project is deserving of approval on the basis of its over-all merits, including consideration of—

(i) The need for the knowledge it is expected to produce when completed,

(ii) The opportunity it provides for the training of scientists,

(iii) The probability that it will be pursued with competence and completed within a reasonable time,

(iv) The relationship between the amount of the grant and the probable results to be achieved,

(v) Freedom from unnecessary duplication of work being performed by others, and

(vi) Evidence that the proposed project could not be undertaken without the aid of the requested grant.

(b) When the Director has determined that a matching grant should be made to an institute for a matching fund project, and if the institute has not previously executed the proposed continuing agreement required by paragraph (b) of § 504.2, he will forward such proposed continuing agreement to the institute for execution. The Director will also draft and sign a proposed matching grant agreement and forward five copies of it to the institute. The institute shall sign and return three copies of the proposed matching grant agreement, and, if one is submitted, three copies of the continuing agreement.

(c) If the proposed matching grant agreement, together with the continuing agreement if not previously executed, is not formally signed by the institute and returned to the Director within 30 days, the proposed matching grant agreement may be withdrawn by the Director.

**§ 504.5 Approval of grants to, and contracts, matching or other arrangements with, entities other than institutes established pursuant to the Act.**

The Director may approve proposals submitted under section 200 of the Act and § 503.2 of this chapter after determining that—

(a) The applicant for such grant, contract, matching or other arrangement is, as provided in paragraph (b) of § 501.7 of this chapter, a bona fide individual or organization, other than an institute established pursuant to the Act or the educational institution identified with such an institute, that has qualifications to perform work contemplated by section 200 of the Act,

(b) The proposal was properly signed by the applicant or its duly authorized agent,

(c) The work to be undertaken represents research into aspects of water problems related to the mission of the Department of the Interior,

(d) Such research is desirable and covers aspects of water problems not otherwise being studied,

(e) A reasonable relationship exists between the cost to the Government and the probable results to be achieved, and

(f) The applicant has expressed a willingness to enter into a research project agreement acceptable to the Director.

## PART 505—FISCAL AND ACCOUNTING

Sec.
505.1 Procedure for obtaining payments.
505.2 Cost computation principles.
505.3 Capital and related expenditures.
505.4 Credits against cost and repayments to the Government.
505.5 Title to property.
505.6 Accounting records.

AUTHORITY: The provisions of this Part 505 issued under sec. 104, 78 Stat. 331.

**§ 505.1 Procedure for obtaining payments.**

(a) *Allotments.* (1) After the Director has determined that an institute's qualifications and plans are acceptable, and after the applicable agreements required by paragraphs (b) and (c) of § 504.2 of this chapter and paragraph (c) of § 504.3 of this chapter have been executed, he will provide the institute with public vouchers that it may sign and return for certification by the Director and payment. Each voucher will be in five copies. Two copies may be retained by the institute; three must be returned to the Director.

(2) The amounts and dates of such vouchers will be those that the Director decides, on the basis of the financial plan and reports the institute has submitted, will provide funds as they are needed by the institute to liquidate the liabilities it expects to incur.

(b) *Grants.* (1) After the grant agreement has been formally signed, payments of grant funds to the grantee will be made on public vouchers prepared, signed, and submitted by the grantee in three copies to the Director. Such vouchers will provide for amounts to be paid to the grantee as funds are required for the liquidation of liabilities the grantee expects to incur pursuant to the terms of the grant.

(2) In support of each such voucher the grantee will relate it to the approved financial plan.

(3) In the case of matching grants, the grantee will also submit evidence that a proper relationship is being maintained between expenditures of grant and non-Federal funds.

(c) *Contracts and other arrangements.* Individuals and organizations that conduct research under contracts or other arrangements pursuant to section 200 of the Act will submit to the Director, not more frequently than monthly, public vouchers in three copies, claiming payment or reimbursement as called for by the terms of the contract or other arrangement. Such vouchers shall detail deliveries, performance, expenditure or such other criteria for payment as are required by or are appropriate under the contract or other arrangement. Educational institutions and non-profit organizations may obtain advance payments of initial expenses upon submission of a voucher in three copies when, in the opinion of the Director, such payment is necessary to facilitate the work being done under contracts or other arrangements pursuant to the Act.

**§ 505.2 Cost computation principles.**

(a) *Applicability to allotments and grants.* The cost-computation principles prescribed in this section shall be utilized in the cost accounting required with respect to allotments and grants under the Act to provide evidence that the recipient has discharged the obli-

gation it assumed, when accepting these funds, to expend them solely for costs necessary for the accomplishment of the work for which they were received. These principles will also be applied in accounting for funds from other sources to the extent that such funds are applied to meet the requirement that grants be matched with non-Federal funds.

(b) *Applicability to contracts.* Computation of costs in accordance with the principles prescribed in this section is a prerequisite of payments from funds provided under the Act to a contractor under cost-reimbursement-type contracts. Such cost computation is also necessary for fixed-price contracts if they are terminated prior to completion or contain price-redetermination, renegotiation, or similar clauses.

(c) *Basic cost formulas.* Costs will be computed:

(1) By institutes and educational institutions, in accordance with Bureau of the Budget Circular A–21, as revised, except as provided in section 505.3.

(2) By all entities other than educational institutions and institutes, in accordance with the Federal Procurement Regulations (second edition) (Title 41, Code of Federal Regulations, Subpart 1–15.2) (29 F.R. 10288), except as provided in § 505.3.

### § 505.3 Capital and related expenditures.

(a) In no instance shall the Director approve payments pursuant to the Act which include any amounts representing, either directly or indirectly, the cost of permanent buildings. In no instance shall recipients of funds pursuant to the Act use such funds either directly or indirectly to pay the cost of permanent buildings.

(b) Payments received pursuant to the Act may be applied to capital expenditures, other than for permanent buildings, to the extent that such expenditures are provided for in plans for projects and other activities that have been approved by the Director.

### § 505.4 Credits against cost and repayments to the Government.

(a) Incidental income resulting from operations: (1) Income resulting from the work financed by allotments, grants, contracts, and other arrangements under the Act may be added to the funds in the hands of the allottee, grantee, or contractor and used for expenses of water resources research activities. Examples of such income are: Proceeds from the sale of scrap, water and other material produced as a by-product of, or remaining after use in, research activities; sale of, or royalties on, publications; etc. It is a responsibility of those receiving Federal funds under the Act to realize such incidental income to the maximum extent possible consistent with the purposes of the Act.

(2) In instances in which such incidental income results from joint expenditures of funds provided by the Act and of funds from other sources, such income shall be credited to their various sources in the ratio in which each contributed to the generation of the incidental income.

(b) Any interest earned on any funds received as allotments or grants under the Act shall accrue to the benefit of the United States and each institute or grantee shall submit as a part of its annual report a statement showing the amount of such interest earned during the period covered by the report.

(c) In the event an institute is dissolved or a research project conducted under a grant is completed or terminated prior to completion, all funds provided under the Act that remain in the hands of the allottee or grantee after liquidation of the costs chargeable to the allotment or grant will be returned to the Director.

(d) Similarly, any supplies and equipment or other assets that were purchased with funds provided under the Act as allotments may be disposed of by the Director at his discretion upon dissolution of an institute or, if purchased with grant funds, upon completion or termination of the project for which the funds were furnished.

### § 505.5 Title to property.

(a) Title to property purchased with Federal funds allotted to institutes pursuant to section 100 of the Act shall be in the name of the institute and not that of the State or the college or university with which the institute is identified. However, in instances in which a formal document evidencing title is prepared, and State law precludes its issuance in the name of the institute, titles such as the following will be satisfactory:

---------- University [or ---------- State] for the use and benefit of the ---------- Water Resources Research Institute.

(b) Title to property purchased with funds from non-Federal sources used to match grants under section 101 of the Act, shall, similarly, be vested in, or held for the use and benefit of, the institute. In the case of property purchased with non-Federal funds that is applied to meet matching requirements for grants under section 200 of the Act, title shall be vested in the grantee.

(c) In the case of reimbursement-type contracts, the title of property shall pass to and vest in the Government.

(1) Upon its delivery to the contractor if its purchase is paid for with funds supplied under the Act or the cost is reimbursable to the contractor from such funds, or

(2) Upon issuance of such property for use in the performance of the contract, or commencement of processing or use of such property in the performance of the contract, or reimbursement of the cost thereof by the Government, whichever first occurs.

(d) Title to property purchased with grant funds made available either under section 101 or under section 200 of the Act shall vest in the Government when acquired by the grantee, unless the grantee is a non-profit institution of higher education or a non-profit organization whose primary purpose is the conduct of scientific research and the Director determines that vesting title in such grantee would further the objectives of the Act.

### § 505.6 Accounting records.

(a) The officers of institutes appointed in compliance with section 102 of the Act, and appropriate officials of entities other than institutes, that receive funds under the Act, shall be responsible for maintaining books of account that clearly, accurately, and currently reflect the financial transactions involving allotments, grants, contracts, and other arrangements financed under the Act and also transactions financed with matching funds from sources other than the Federal Government. In addition, they shall maintain files of all papers necessary to explain and prove the validity of the transactions recorded.

(b) Such records, with all supporting and related documents shall, at all reasonable times, be made available, upon request, for inspection and audit by representatives of the Director and of the Comptroller General of the United States.

(c) Records relating to each allotment and each grant shall be retained and made available until the expiration of three years after the allottee's or grantee's last disbursement of such funds. Records with respect to contracts shall be retained and made available until the expiration of three years after the last payment thereunder was received by the contractor.

(d) The books and records maintained shall include a record of all property

(1) Received from the Federal Government,

(2) Charged as a cost of activities financed with funds provided by the Act,

(3) Included in costs paid with non-Federal funds to match grant funds, and

(4) Included in reimbursable costs under cost-reimbursement-type contracts.

(e) An accountability record shall be maintained for all items of such property that are nonexpendable and have an acquisition cost of $100 or more.

(f) Institutes, grantees, and contractors shall include the following provision in any contract or subcontract for services, equipment, or supplies they make that requires payments exceeding $2,500 from funds furnished under the Act or non-Federal funds used to match such Federal funds:

Representatives of the Director of the Office of Water Resources Research or of the Comptroller General of the United States shall, until the expiration of three years after final payment under this contract, have access to and the right to examine any directly pertinent books, documents, papers, and records relating to this contract.

For the purposes of this requirement, contracts or subcontracts for public utility services at rates established for uniform applicability to the general public are excluded.

## PART 506—PROGRESS AND ACCOMPLISHMENT REPORTS

Sec.
506.1 Project completion or termination reports.
506.2 Annual reports by institutes.
506.3 Annual reports by entities other than institutes.
506.4 Special reports.
506.5 Annual reports to the Congress.
506.6 Acknowledgment of Federal Government participation.

AUTHORITY: The provisions of this Part 506 issued under sec. 104, 78 Stat. 331.

### § 506.1 Project completion or termination reports.

(a) Recipients of funds under the provisions of sections 100, 101, and 200 of the Act are encouraged to publish, as technical literature, the findings, results, and conclusions relating to separately identifiable research projects undertaken pursuant to the Act. Fifty copies of such documents shall be furnished to the Director, together with supplementary information suitable for project documentation purposes.

(b) If a publication such as is described in paragraph (a) of this section has not been prepared with respect to a specific research project, recipients of funds under the provisions of sections 100, 101, and 200 of the Act shall, in conjunction with the completion or termination of the project, prepare a report which sets forth the findings, results, and conclusions relating to such project. Fifty copies of the report shall be furnished to the Director, together with supplementary information suitable for project documentation purposes.

### § 506.2 Annual reports by institutes.

(a) On or before September 1 of each year, each institute shall make an annual report relating to its program and activities conducted pursuant to sections 100 and 101 of the Act, for the year ending June 30, to the Director, in fifteen copies, which provides information as indicated in paragraphs (b), (c), and (d) of this section.

(b) Relating to the institute's program conducted pursuant to an allotment of funds and section 100 of the Act, the report shall provide—

(1) For each separately identified research project that was included as a part of the institute's annual program—

(i) A description of research performed and any findings, results, or conclusions relating thereto,

(ii) Supplementary information suitable for project documentation purposes,

(iii) A listing of any project-related publications or reports issued and papers prepared (with copies of such publications, reports, or papers being attached to each copy of the annual report),

(iv) In lieu of the information requested in subdivisions (i), (ii), and (iii) of this subparagraph (1), an appropriate reference to a project completion or termination report which contains similar information and which was submitted to the Director in accordance with the provisions of § 506.1, and

(v) Statements of project work remaining to be accomplished,

(2) A description of any other activities or work accomplished or remaining to be accomplished by the institute, including reports or publications issued and presented but not previously covered in subparagraph (1) of this paragraph (b),

(3) A record of training of scientists, and

(4) The nature and extent of activities conducted in cooperation with other institutes and research organizations.

(c) Relating to projects carried on pursuant to matching-fund grants and section 101 of the Act, the report shall provide, separately, for each project—

(1) Information similar to that prescribed in paragraph (b) of this section, and

(2) Other information relating to the project, as deemed appropriate by the institute.

(d) Relating to funds, the report shall provide detailed statements of the amounts received under the Act, and the disbursements thereof, on schedules prescribed by the Director—

(1) For the institute's annual program carried on pursuant to an allotment of funds under section 100 of the Act, and

(2) For each project carried on pursuant to a matching-fund grant under section 101 of the Act.

(e) In addition to information provided in their annual reports as prescribed above, institutes are encouraged to add a report section which provides general accounts of other significant or interesting water resources research developments and prospects, and analyses of local, State, regional or national water needs in relation to the program of the institute.

### § 506.3 Annual reports by entities other than institutes.

(a) On or before September 1 of each year each entity that has received funds under section 200 of the Act shall make a report relating to its activity for the year ending June 30 and submit such report to the Director, in fifteen copies. If there was more than one grant, contract, matching, or other arrangement in effect with the entity during the year covering more than one specific research project, the annual report shall be made up of separate sections, one for each such project, which provide—

(1) A description of research accomplished and the findings, results, and conclusions relating thereto,

(2) Supplementary information suitable for project documentation purposes,

(3) A listing of project-related publications or reports issued and papers presented (with copies of such publications being attached to each copy of the annual report),

(4) Statements of project work remaining to be accomplished,

(5) The nature and extent of activities conducted in cooperation with institutes or other research organizations, and

(6) A detailed statement of the amounts received during the year under grant, contract, matching, or other arrangement, and disbursements thereof, on schedules prescribed by the Director.

(b) If the entity has submitted to the Director a project completion or termination report in accordance with the provisions of section 506.1 of this chapter, the entity may make, in lieu of providing the information requested in subparagraphs (1), (2), and (3) of paragraph (a) of this section, an appropriate reference to such project completion or termination report.

### § 506.4 Special reports.

All organizations and individuals receiving funds under grants, contracts, or other arrangements pursuant to the Act shall submit such reasonable special or interim reports as may from time to time be specifically requested by the Director.

### § 506.5 Annual reports to the Congress.

Each year the Director shall prepare a recommended report suitable for transmission by the Secretary to the Congress, which report shall—

(a) Summarize the receipts and expenditures and work of the institutes in all States and of others that have received funds under the provisions of the Act,

(b) Indicate whether any portion of an appropriation available for allotment to any State has been withheld and, if so, the reasons therefor, and

(c) Summarize the advice and comments relative to needs and problems of the program authorized by the Act as such advice and comments may have been expressed by institutes and in the consultations described in Part 507 of this chapter, together with advice relative to the overall program secured by the Director from a special panel constituted by the Director for that purpose, which panel shall be composed of outstanding scientists, engineers, and laymen experienced in public affairs related to water resources.

### § 506.6 Acknowledgment of Federal Government participation.

Appropriate acknowledgment shall be given by institutes, grantees, and contractors to the Department of the Interior's participation in financing research carried out under provisions of the Act. Such acknowledgment shall be included in publications, news releases, and other information media developed by institutes and others to publicize, describe or report upon research activities and accomplishments carried out in whole or in part with funds received under provisions of the Act.

## PART 507—CONSULTATION AND COORDINATION

Sec.
507.1 Cooperation.
507.2 Advice, assistance, and coordination.
507.3 Consultations.
507.4 Cooperation with cataloging center.

AUTHORITY: The provisions of this Part 507 issued under sec. 104, 78 Stat. 331.

### § 507.1 Cooperation.

The Director shall encourage and assist in the establishment and maintenance of cooperation by and between the institutes and between them and other research organizations, the United States Department of the Interior, and other Federal establishments.

### § 507.2 Advice, assistance, and coordination.

The Director shall furnish such advice and assistance as will best promote the purposes of the Act, participation in co-

ordinating research initiated under the Act by the institutes, and indicate to them such lines of inquiry as to him seem most important.

**§ 507.3 Consultations.**

The Director shall consult with and obtain the continuing advice and cooperation of all agencies of the Federal Government concerned with water problems, of State and local governments, and of private institutions and individuals, to—

(a) Assure that the programs authorized by the Act will not duplicate established water research programs,

(b) Stimulate research in otherwise neglected areas,

(c) Contribute to a comprehensive, nationwide program of water and related resources research, and

(d) Obtain assistance in evaluating programs of the institutes, proposals for grants, contracts or other arrangements, reports of work, and the activities carried on pursuant to the Act.

**§ 507.4 Cooperation with cataloging center.**

The Director will cooperate with the cataloging center (established in such agency and location as the President determines to be desirable) by providing information to the center on work underway or scheduled pursuant to provisions of the Act, and otherwise as appropriate for the purpose of improving communication of information on water resources research. Such information will be used for cataloging current and projected scientific research in all fields of water resources.

---

## PART 508—AUDITS AND INSPECTIONS

Sec.
508.1 Introduction.
508.2 Audits.
508.3 Inspections.

AUTHORITY: The provisions of this Part 508 issued under sec. 104, 78 Stat. 331.

**§ 508.1 Introduction.**

Representatives of the Director and of the Comptroller General of the United States may conduct on-site audits and inspections of institutes and other entities which have received Federal funds pursuant to the Act.

**§ 508.2 Audits.**

Audits conducted at the direction or on behalf of the Director will extend to a determination and appropriate finding of fact concerning compliance with the provisions of the Act, the regularity and accuracy of financial transactions and recording, adequacy of property accountability and internal control, and reliability of financial reporting. As a part of such audits, examinations will be made on a selective basis to determine that matching funds (as defined in section 503.1 of this chapter) have been received and properly expended by recipients of matching-fund grants under the Act and that grantees maintain a proper relationship between costs paid with funds from non-Federal sources and with matching grant funds provided under the Act. Professional audit techniques will be applied and accepted principles of business administration will be the governing criteria.

**§ 508.3 Inspections.**

In relation to the substantive scientific research operations of allottees, grantees, contractors and others, the Director may, with such personnel as he considers qualified and with such procedures as he determines to be suitable, perform inspections of activities authorized and financed pursuant to the Act. Such inspections will cover acceptability of progress, consistency with approved plans, and other factors the Director deems important to enable him to discharge his responsibilities for achievements consistent with purposes of the Act.

# Title 21—FOOD AND DRUGS

## Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

### SUBCHAPTER B—FOOD AND FOOD PRODUCTS

### REVISION OF PART HEADINGS

EDITORIAL NOTE: The headings of certain parts in Chapter I, Title 21 of the Code of Federal Regulations, are revised to read as follows:

Part 14—Cacao products.
Part 15—Cereal flours and related products.
Part 16—Macaroni and noodle products.
Part 17—Bakery products.
Part 18—Milk and cream.
Part 19—Cheeses, processed cheeses, cheese foods, cheese spreads, and related foods.
Part 20—Frozen desserts.
Part 22—Food flavorings.
Part 27—Canned fruits and fruit juices.
Part 29—Fruit butters, fruit jellies, fruit preserves, and related products.
Part 37—Fish.
Part 42—Eggs and egg products.
Part 45—Oleomargarine, margarine.
Part 46—Nut products.
Part 51—Canned vegetables.
Part 53—Tomato products.

# Title 32—NATIONAL DEFENSE

## Chapter VI—Department of the Navy

### SUBCHAPTER A—OFFICIAL RECORDS

### PART 701—AVAILABILITY OF OFFICIAL RECORDS

### SUBCHAPTER C—PERSONNEL

### PART 719—NONJUDICIAL PUNISHMENT, NAVAL COURTS AND CERTAIN FACT-FINDING BODIES

### Miscellaneous Amendments

*Scope and purpose.* Section 701.3 is amended to authorize the release of copies of certain traffic accident investigative reports. Section 719.101 is amended in regard to the administration of discipline under article 15 of the Uniform Code of Military Justice (10 U.S.C 815) in multiservice commands with headquarters and field organizations. The amendments correspond to revisions included in Change 11 to the Manual of the Judge Advocate General, which change will be distributed to Navy and Marine Corps commands in due course.

1. Section 701.3 is amended by revising paragraph (a) to read as follows:

**§ 701.3 Production of official records in the absence of court order.**

(a) *Furnishing information from personnel and related records to personnel concerned.* Whether or not litigation is involved, naval personnel, civilian employees of the Naval Establishment, their personal representatives, e.g., executors, guardians, etc., or other properly interested parties may be furnished copies of records or information therefrom relating to death, personal injury, loss, or property damage to or involving such personnel, without following the procedures prescribed in either paragraph (c) or (d) of § 701.2, provided the interests of the United States are not prejudiced thereby. All such requests (except requests for medical records, for such traffic accident reports as described in subparagraph (2) of this paragraph, and for records relating to matters under the cognizance of the General Counsel) shall be referred to the Judge Advocate General, Navy Department, Washington, D.C., 20350, or, in the 11th, 12th, 13th, 14th, and 17th Naval Districts, to the Director, Office of the Judge Advocate General, West Coast, San Bruno, Calif., 94067.

(1) *Medical records.* Requests for medical records shall be processed in accordance with the Department of Defense policy set forth in Part 66 of this title, as implemented by the Manual of the Medical Department. If, in processing such a request for medical records, it appears that the interests of the United States may be involved, then such requests shall be referred to the Judge Advocate General. Production of medical certificates or other medical reports concerning civilian employees is controlled by the provisions of the Executive Order and the Navy Civilian Personnel Instruction referred to in § 701.2(e).

(2) *Provost marshal or base police reports of traffic accidents.* Local commanders are authorized to release copies of traffic accident investigative reports where service personnel are not involved and where no government vehicle is involved, provided the interests of the United States will not be prejudiced thereby. Release may be made to any properly interested party or his authorized representative. If it appears that the interests of the United States may be involved, then such requests shall be referred to the Judge Advocate General or, in the 11th, 12th, 13th, 14th, and 17th Naval Districts, to the Director, Office of the Judge Advocate General, West Coast. (Charges will be made in accordance with the schedule of fees published in Part 288 of this title (minimum fee $2.50). Fees collected will be credited as set forth in the Navy Comptroller Manual, paragraph 043145.)

* * * * *

2. Section 719.101 is amended by revising paragraph (a)(1) to read as follows:

**§ 719.101 General provisions.**

(a) *Authority to impose.*—(1) *Multiservice commands.* In addition to the category of officers authorized to impose nonjudicial punishment under article 15(a) of the Code, the commander of a multiservice command to whose staff or command members of the naval service are assigned may designate one or more naval units and may for each such naval unit designate a commissioned officer of the naval service as commanding officer for the administration of discipline under article 15 of the Code. A copy of any such designation by the commander of a multiservice command shall be furnished to the Chief of Naval Personnel or the Commandant of the Marine Corps, as appropriate, and to the Judge Advocate General.

# Title 46—SHIPPING

## Chapter IV—Federal Maritime Commission

### SUBCHAPTER A—GENERAL PROVISIONS

### PART 506—FOREIGN DISCRIMINATION AFFECTING U.S. SHIPS

### Discriminations in the U.S.-Uruguayan Trade

Pursuant to the authority of section 19(1) of the Merchant Marine Act, 1920, the Federal Maritime Commission is authorized and directed to make rules and regulations affecting shipping in the foreign trade in order to adjust and meet general or specific conditions unfavorable to shipping in that trade, whether in any particular trade or upon any particular route, or in commerce generally, and which arise out of or result from foreign laws, rules or regulations, or from competitive methods or practices employed by owners, operators, agents or masters of vessels of a foreign country. Section 506.3 of this part also provides for the issuance of appropriate rules or regulations to counter any such discriminatory situations.

By decree dated June 13, 1963, the Government of Uruguay established certain preferences for goods shipped on Uruguayan national ships, as follows:

(a) Articles, merchandise, products and goods imported in national flag dry cargo ships shall be exonerated from fifty percent of the surcharge established by Article 1 of the decree dated April 14, 1963. (This surcharge amounts to twenty percent CIF value.)

(b) Articles, merchandise, products and goods not subject to surcharge and included within the provisions of Article 5 of law 12670 of December 17, 1959, shall be exempted from the six percent tax on transfer of funds abroad established by Article 6 of law 11924 of March 27, 1953, when they are imported in national flag dry cargo ships.

In the opinion of the Commission, the preferences established by said decree of June 13, 1963, artificially divert commercial shipments to Uruguayan national flag vessels, discriminate against vessels of the United States registry, and result in conditions which are detrimental to the free flow of international trade, thereby creating a condition unfavorable to shipping in the foreign trade between the United States and Uruguay. Despite the repeated representations of the United States Government, the Government of Uruguay has not removed these discriminations which are causing conditions unfavorable to United States shipping in the trade between the United States and Uruguay, and the Commission regrets that it now finds it necessary to invoke its powers under section 19(1)(b) of the Merchant Marine Act, 1920, to correct these discriminations. The Commission considers that notice and public procedure would be contrary to the public interest because of the detrimental effects to the commerce of the United States now being incurred as a result of the discriminations of the Government of Uruguay.

Therefore, as directed by section 19(1)(b) of the Merchant Marine Act, 1920, the Federal Maritime Commission hereby amends Part 506, Title 46, CFR, by the addition of a new section, § 506.4, as follows:

**§ 506.4 Discriminations in the U.S.-Uruguayan trade.**

(a) The Federal Maritime Commission has determined that the Government of Uruguay is engaged in discriminatory practices against vessels of United States registry and in favor of national flag vessels of Uruguay. Such national flag vessels are herein referred to as "favored vessels."

(b) The owner of any favored vessel carrying exports from the United States to Uruguay, or the operator of such vessel if operated by a person or company other than the owner, shall within four (4) days after departure of the vessel from the last United States port of call file with the Federal Maritime Commission, Office of International Affairs and Relations, Washington, D.C., 20573, a complete manifest of all such cargo carried by such vessel. Such manifest shall show for each shipment thereon the origin, destination, quantity or description, and the CIF value, and shall further stipulate whether such shipment is entitled to exoneration from 50 percent of the surcharge established by Article 1 of the decree dated April 14, 1963, or is exempt from the 6 percent tax on transfer of funds abroad established by Article 6 of law 11924 of March 27, 1953.

(c) The owner or operator of every favored vessel shall take appropriate steps to obtain the information and documents required in order to comply with the provisions of this section.

(d) In order to adjust or meet the unfavorable conditions caused by the decree of June 13, 1963, the owner or operator of each favored vessel carrying exports between the United States and Uruguay shall be subject, insofar as goods covered by Article 1 of the decree of April 14, 1963, are concerned, to an equalizing charge of 10 percent of the CIF value of all such cargoes covered. On the cargoes which are covered by the provisions of Article 5 of law 12670 of December 17, 1959, an equalizing charge of 6 percent of the CIF value shall be assessed. Such charges shall be paid directly to the Federal Maritime Commission, Washington, D.C., 20573, for the account of the Treasurer of the United States, and shall be remitted within ten (10) days after demand for payment.

(e) Whoever fails to comply with the provisions of this section shall be subject to all applicable remedies and penalties provided by law, in addition to the charges imposed by paragraph (d) of this section.

(f) The provisions of this section shall not apply to exports from the United States to Uruguay as to which the Federal Maritime Commission hereafter finds Uruguay has ceased to employ or enforce its preferential and discriminatory surcharges and transfer taxes. The Federal Maritime Commission may from time to time by appropriate notice modify the charge prescribed by paragraph (d) of this section, if the Commission finds that such modification is required in order to adjust or meet the discriminatory routing practices of Uruguay.

*Effective date.* This amendment shall become effective thirty days from the date of publication of this notice in the FEDERAL REGISTER.

By the Commission.

THOMAS LISI,
*Secretary.*

# Title 47—TELECOMMUNICATION

## Chapter I—Federal Communications Commission

[Docket No. 15628; FCC 64-1099]

## PART 73—RADIO BROADCAST SERVICES

### Table of Assignments, FM Broadcast Stations; Pekin, Ill.

*Report and order.* 1. The Commission has before it for consideration its notice of proposed rule making (FCC 64-862) issued in this proceeding on September 18, 1964, inviting comments on a proposal to assign Channel 285A to Pekin, Illinois in addition to its presently assigned Channel 237A. No oppositions were filed to the proposal.

2. At the present time Pekin has assigned to it one Class A FM assignment, Channel 237A, on which a construction permit has been granted. Pekin, a community of 28,146 persons is located in Tazewell County, which has a population of 99,789. The only radio station on the air in Pekin is a daytime-only station. We are of the view that Pekin is large and important enough to warrant the assignment of a second FM assignment and that adoption of the subject proposal would serve the public interest.

3. Authority for the adoption of the amendment contained herein is contained in sections 4(i), 303, and 307(b) of the Communications Act of 1934, as amended.

4. In view of the foregoing: *It is ordered,* That effective January 7, 1965, the FM Table of Assignments contained in § 73.202 of the Commission's rules and regulations is amended, insofar as the community named is concerned, to read as follows:

| City: | *Channel No.* |
|---|---|
| Pekin, Ill | 237A, 285A |

5. *It is further ordered,* That this proceeding is terminated.

(Secs. 4, 303, 307, 48 Stat. 1066, as amended, 1082, as amended, 1083; 47 U.S.C. 154, 303, 307)

Adopted: November 25, 1964.

Released: November 27, 1964.

FEDERAL COMMUNICATIONS COMMISSION [1]
[SEAL] BEN F. WAPLE,
*Secretary.*

## PART 81—STATIONS ON LAND IN THE MARITIME SERVICES

### Notifying the Federal Aviation Agency About Antenna Structures; Miscellaneous Amendments

*Order.* The Commission having under consideration the desirability of making editorial changes in Part 81 of its rules;

It appearing, that the amendments adopted herein are for the purpose of conforming the provisions of §§ 81.31, 81.32, and 81.36 to the rule change in § 17.4(f) which became effective November 9, 1964; and

It further appearing, that these conforming amendments relate to FCC Form 714 whereby an applicant for a nonbroadcast station informs the Commission whether notice has been given to Federal Aviation Agency concerning a proposed antenna structure in accordance with Part 77 of the Federal Aviation Agency rules; and

It further appearing, that the amendments adopted herein are editorial in nature, and, therefore, compliance with the rule making procedures and effective date provisions of section 4 of the Administrative Procedure Act is not required; and

It further appearing, that authority for these amendments is set forth in sections 4(i), 5(d)(1), and 303(r) of the Communications Act of 1934, as amended, and in § 0.261(a) of the Commission's rules;

*It is ordered,* This 24th day of November 1964, that effective December 7, 1964, Part 81 of the Commission's rules is amended as set forth below.

(Secs. 4, 5, 303, 48 Stat. 1066, as amended, 1068, as amended, 1082, as amended; 47 U.S.C. 154, 155, 303)

[1] Commissioner Hyde absent.

Released: November 27, 1964.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
*Secretary.*

APPENDIX

A. Part 81 is amended as follows:

1. Section 81.31 is amended by adding a new paragraph (g) thereto:

§ 81.31 Establishment of station.

* * * * *

(g) An application for construction permit, filed pursuant to this section, which shows on its face that the antenna structure will extend more than 20 feet above the ground or natural formation or more than 20 feet above an existing man-made structure (other than an antenna structure) shall be accompanied by FCC Form 714 indicating that notification has or has not been submitted to the Federal Aviation Agency.

2. Section 81.32 is amended by adding a new paragraph (d) thereto:

§ 81.32 Changes prior to completion of station.

* * * * *

(d) An application for modification of construction permit, filed pursuant to this section, which shows on its face that the antenna structure will extend more than 20 feet above the ground or natural formation or more than 20 feet above an existing man-made structure (other than an antenna structure) shall be accompanied by FCC Form 714 indicating that notification has or has not been submitted to the Federal Aviation Agency.

3. Section 81.36 is amended by adding a new paragraph (e) thereto:

§ 81.36 Changes during license term.

* * * * *

(e) An application for construction permit, filed pursuant to this section, which shows on its face that the antenna structure will extend more than 20 feet above the ground or natural formation or more than 20 feet above an existing man-made structure (other than an antenna structure) shall be accompanied by FCC Form 714 indicating that notification has or has not been submitted to the Federal Aviation Agency.

# Proposed Rule Making

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

[7 CFR Part 1036]

[Docket No. AO-179-A24]

### MILK IN NORTHEASTERN OHIO MARKETING AREA

### Notice of Recommended Decision and Opportunity To File Written Exceptions on Proposed Amendments to Tentative Marketing Agreement and to Order

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of this recommended decision with respect to proposed amendments to the tentative marketing agreement and order regulating the handling of milk in the Northeastern Ohio marketing area. Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington, D.C., 20250, by the 5th day after publication of this decision in the FEDERAL REGISTER. The exceptions should be filed in quadruplicate. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

*Preliminary statement.* The hearing on the record of which the proposed amendments, as hereinafter set forth, to the tentative marketing agreement and to the order as amended, were formulated, was conducted at Cleveland, Ohio, on October 20-21, 1964, pursuant to notice thereof which was issued September 24, 1964 (29 F.R. 13483).

The material issues on the record of the hearing relate to:

1. Diversion of producer milk;
2. Qualifications for attaining pool plant status;
3. Accounting for bulk tank milk under certain specified conditions;
4. Classification provisions;
5. The Class I milk price;
6. The Class II milk price;
7. Location differentials;
8. Seasonal incentive payments; and
9. Miscellaneous and conforming changes.

This decision is concerned only with that portion of Issue No. 5 relating to the use of market statistics of the North Central Ohio milk order (Part 1037) in the computation of the supply-demand adjustment under the Northeastern Ohio milk order. Other aspects of the Class I pricing provisions and the remaining issues of the hearing will be considered in a further decision.

*Findings and conclusions.* The following findings and conclusions on the material issue are based on evidence presented at the hearing and the record thereof:

The use of North Central Ohio order (Order 37) supplies and sales data in the Northeastern Ohio supply-demand adjustment provision should be discontinued and the "standard utilization percentages" adjusted to compensate for the elimination of such data.

The supply-demand adjustment is computed by comparing the "current utilization percentage" (i.e., the ratio of combined producer receipts to combined Class I sales during the second and third months preceding the pricing month) with a standard utilization percentage or "norm" applicable for the pricing month. The Class I price adjustment is based on the deviation of the current utilization percentage above or below this norm. At the present time the supply-demand adjustor is reducing the Northeastern Ohio Class I price.

On November 13, 1964, a decision was issued which would consolidate the North Central Ohio and Toledo, Ohio orders into a single regulation (tentatively designated as the Northwestern Ohio order). This decision also would expand the marketing area and provide for a marketwide pooling provision.[1] From the effective date of the Northwestern Ohio order, the supplies and sales data for the North Central Ohio order will no longer be available for use in the Order 36 supply-demand computation in the manner provided in the present order.

There was no testimony offered on the record of this hearing as to whether market data for the consolidated and expanded order should be included in the Order 36 supply-demand computation. In any event, a decision on this matter would be premature without some experience under the consolidated order.

The individual-handler pool market of North Central Ohio historically has maintained a higher Class I utilization than Northeastern Ohio. To avoid unwarranted price changes through the elimination of Order 37 data, the standard utilization percentages should be increased four percentage points in each month of the year.

Proponent cooperative associations testified that an increase of five percentage points in the standard utilization percentages would be necessary to maintain the present price level. A handler representative stated that an increase of three percentage points would accomplish this end.

[1] Official notice is taken of the final decision on this matter which was issued on November 13, 1964 (29 F.R. 15416).

The "current utilization percentages" used to compute the supply-demand adjustment averaged 158 during 1963. Excluding data for North Central Ohio, such percentages would have averaged 163, or five points higher than the actual average percentages. For the 11-month period of January-November 1964 (data for December are not yet available) the current utilization percentages used to compute the supply-demand adjustment averaged 149. Excluding Order 37 data, such percentages would have averaged 153, or four points higher than the actual percentages. Increasing the standard utilization percentages four percentage points and eliminating Order 37 data would not have changed the Class I price in any month during this 23-month period. An increase of five points, however, would have caused a 7-cent higher Class I price in one month (January 1964). An increase of four percentage points will offset the exclusion of North Central Ohio producer receipts and Class I sales, and thus maintain the present annual Class I price level.

Other proposed amendments to the Class I pricing provisions were offered at the hearing. However, to expedite the decision on the above matter, the remaining proposals will be considered in a later decision. Accordingly, no further changes are proposed at this time, and the present level and seasonality of the Class I price are retained.

*Rulings on proposed findings and conclusions.* Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

*General findings.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price

of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

*Recommended marketing agreement and order amending the order.* The following order amending the order as amended regulating the handling of milk in the Northeastern Ohio marketing area is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be the same as those contained in the order, as hereby proposed to be amended:

Subparagraphs (1) and (2) of § 1036.51 (a) are revised to read as follows:

**§ 1036.51 Class I milk prices.**

* * * * *

(a) * * *

(1) Divide the total quantity of producer milk during the second and third months preceding by the gross quantity of milk utilized as Class I (adjusted to eliminate duplications due to interhandler transfers) at pool plants in the same two months, multiply the result by 100, and round to the nearest whole number. The result shall be known as the "current utilization percentage".

(2) Compute a "deviation percentage" by subtracting from the current utilization percentage as computed in subparagraph (1) of this paragraph, the "standard utilization percentage" shown below:

| *Month for which the price is being computed* | *Standard utilization percentage* |
|---|---|
| January | 130 |
| February | 129 |
| March | 129 |
| April | 130 |
| May | 131 |
| June | 132 |
| July | 141 |
| August | 149 |
| September | 142 |
| October | 128 |
| November | 126 |
| December | 128 |

## [7 CFR Part 1126]

[Docket No. AO-231-A23]

## MILK IN NORTH TEXAS MARKETING AREA

### Notice of Recommended Decision and Opportunity To File Written Exceptions on Proposed Amendments to Tentative Marketing Agreement and to Order

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of this recommended decision with respect to proposed amendments to the tentative marketing agreement and order regulating the handling of milk in the North Texas marketing area. Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington, D.C., 20250, not later than the close of business the 10th day after publication of this decision in the FEDERAL REGISTER. The exceptions should be filed in quadruplicate.

All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

*Preliminary statement.* The hearing on the record of which the proposed amendments, as hereinafter set forth, to the tentative marketing agreement and to the order as amended, were formulated, was conducted at Dallas, Texas, on August 26, 1964, pursuant to notice thereof which was issued August 18, 1964 (29 F.R. 11974). This was a joint hearing at which Issue Nos. 1 and 4 concerned the orders regulating the handling of milk in the Lubbock-Plainview (Part 1120), North Texas (Part 1126), San Antonio, Tex. (Part 1127), Central West Texas (Part 1128), Austin-Waco, Tex. (Part 1129), and Corpus Christi, Tex. (Part 1130) marketing areas.

The material issues on the record of the hearing related to:

1. The need for an emergency increase in the Class I milk prices established by the order regulating the handling of milk in the above designated marketing areas;

2. Class II classification of dumped milk, half and half, coffee cream and whipping cream;

3. Revision of the method for computing producer butterfat differentials; and

4. Whether an emergency exists concerning Issue No. 1 which requires the omission of a recommended decision and opportunity for interested persons to file exceptions thereto and the immediate issuance of a final decision.

A final decision containing the findings and conclusions on Issue No. 1 and Issue No. 4 was issued September 24, 1964 (29 F.R. 13397) and a final order on September 28, 1964 (29 F.R. 13475). This concluded action on all issues affecting orders other than that for the North Texas marketing area (Part 1126). This decision is concerned with the remaining issues, all of which relate to the North Texas order only.

*Findings and conclusions.* The following findings and conclusions on the remaining material issues (No. 2 and No. 3) are based on evidence presented at the hearing and the record thereof:

2. *Classification in the North Texas order of (a) half and half, coffee cream and whipping cream; and (b) dumped milk.* (a) Half and half, coffee cream and whipping cream should not be classified as Class II milk under the North Texas order.

A handler contended that his firm is meeting adverse competition in the distribution of coffee cream and half and half. The testimony was that substitute products made from mixtures of nonfat dry milk and vegetable fat have caused the handler to lose a substantial volume of the restaurant business for these products in the Dallas portion of the North Texas market.

Sales data for the three products were introduced in evidence. The utilization of butterfat in half and half increased 2.2 percent during the 12-month period ending July 1964 as compared with the same period a year earlier. At the same time, its utilization in coffee cream decreased 26 percent, and in whipping cream remained the same for the periods compared. The total utilization of butterfat in the three products decreased 9.1 percent as compared with a year earlier. About 40 percent of the butterfat used in the three products is disposed of in half and half, 31 percent in coffee cream, and 29 percent in whipping cream.

It may be that coffee cream sales have been lost to substitute products. The data indicate the probability that some of the decrease in butterfat used for coffee cream has been absorbed by the increased utilization of butterfat in half and half. Coffee cream and half and half are interchangeable as dairy products for "creaming" beverages and cereals.

The most important consideration, however, is that health authorities require that the three products be made from inspected milk. So long as this requirement is in effect, the fact that substitute products that do not have to be made from inspected milk may be sold at lower prices is not a convincing reason for changing the classification.

Producers should continue to receive the Class I price for milk sold in these products under the Grade A label, rather than the Class II price which they receive for reserve milk disposed of in dairy products which do not require health department inspection. Under present marketing conditions, the Class II classification of skim milk and butterfat in half and half, coffee cream and whipping cream is unwarranted and is therefore denied.

(b) Class II classification should be provided for milk that is dumped because buttermilk has not been produced from skim milk to which buttermilk culture or "starter" has been added. Class II classification for other fluid milk products dumped should not be provided on the basis of this record.

A handler proposed that "dumped" milk be classified as Class II milk. There is presently no specific provision for classification of milk so disposed of. It is therefore treated as unaccounted for milk, or "shrinkage" for which amounts within specified limits may be accounted for as Class II milk, but amounts in excess of such limits are Class I milk.

Two situations were described in which "dumping" (pouring down the drain) of fluid milk products have reached proportions exceeding the shrinkage limits of the order. One such problem was the failure of buttermilk to "set-up". For three months of the past year, the proponent handler's allowable plant shrinkage was insufficient to accommodate the volume dumped from this cause.

Cultured buttermilk is produced by the addition of culture or "starter" to pasteurized skim milk, which is then held at an appropriate temperature until the desired acidity results. When this degree of acidity is achieved, the buttermilk has "set". At this point the product normally contains less than one percent butterfat.

Buttermilk sometimes fails to set because of improper temperature, substances in the skim milk which inhibit the growth of bacteria (such as antibiotics), bad starter and improper sterilization and cleaning of equipment. Laboratory tests made on buttermilk which fails to set do not reveal conclusively which of these causes may be responsible for such failure in a given situation. Whatever the cause, the resulting product frequently must be dumped because it has no commercial value and must be disposed of promptly. For this reason, it should be provided that when starter has been added to skim milk and the buttermilk fails to set, Class II classification should apply to the product if dumped.

Since the amount of fat contained in the product at this point in processing is normally less than one percent, it would be unreasonable to charge handlers Class I for the fat included in the dumped milk on the supposition that it can be salvaged and used again in a Class I product. It is concluded that the butterfat as well as the skim milk dumped under the conditions described should be classified as Class II.

Dumped milk involves the disappearance of product from the pool accounting problem. Provision is needed to preclude the use of self-serving records by handlers in claiming Class II classification for dumped milk. For this reason it should be provided that the handler give prior notification to and opportunity for verification by the market administrator in such manner as he may require.

Another problem described concerned off-flavored milk. During June and July 1964, about 20 percent of the milk delivered to a North Texas handler's plant was rejected because of bad flavor, and shipped to manufacturing plants. About 40 percent of all milk received is carried over to the next day for processing. The plant runs tests for acidity, butterfat, bacteria and added moisture. Even so, rancidity sometimes develops between the time the milk is received and the time it is processed. It is apparent that this problem results most often from errors made in accepting milk that should have been rejected during the receiving operation.

Ordinarily, the proponent handler's plant shrinkage is about one percent per month, including dumped milk, and is well within the allowable plant shrinkage provided in the order. This being the case, the proposal to extend Class II classification for dumped milk beyond the provision for buttermilk which does not "set" is unnecessary and is therefore denied.

3. *Butterfat differentials.* The producer butterfat differential should be calculated as an average of the Class I and Class II handler butterfat differentials weighted by the proportion of butterfat in producer milk in each class during the month, and should be calculated to the nearest one-tenth cent.

The North Texas order adjusts the uniform price to producers for milk above and below 3.5 percent butterfat content on the basis of a schedule of butterfat differentials directly related to a designated range of butter prices. The butter prices are those which are reported by the Department each month for 92-score bulk creamery butter at Chicago. This method of computation, however, does not relate the producer butterfat differential to the class-use of butterfat in the North Texas market.

Fluid milk products must meet more exacting health standards than milk for manufacturing purposes. The value of butterfat in Class I milk is higher in the North Texas market than is the value of butterfat in Class II milk. It would be more appropriate, therefore, to compute the producer butterfat differential on the basis of a weighted average of the Class I and Class II utilization of butterfat in producer milk. This technique is similar to the one which is followed in computing the uniform price paid to producers. Producers will be more appropriately compensated by adjusting their uniform prices in relation to the class-use of butterfat in producer milk.

The present producer butterfat differential has been relatively inflexible. During the 28 months ending with July 1964, it remained constant at six cents for each one-tenth of one percent butterfat content. The method recommended herein for computing the producer butterfat differential will reflect the relative utilization of butterfat in Class I and Class II milk. It will also be more responsive to changes in the price of butter. It will be consistent with the provisions of most Federal orders which adjust uniform prices to producers with producer butterfat differentials based on a weighted average of the handler butterfat differentials.

*Rulings on proposed findings and conclusions.* Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

*Recommended marketing agreement and order amending the order.* The following order amending the order as amended regulating the handling of milk in the North Texas marketing area is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be the same as those contained in the order, as hereby proposed to be amended:

1. In § 1126.41, a new subparagraph (b)(8) is added to read as follows:

**§ 1126.41 Classes of utilization.**

* * * * *

(b) * * *

(8) Dumped because buttermilk is not produced from skim milk to which buttermilk culture has been added, if the handler gives prior notification to and opportunity for verification by the market administrator in such manner as the market administrator may require.

2. In § 1126.91, paragraph (a) is revised to read as follows:

**§ 1126.91 Butterfat and location differentials to producers.**

(a) In making payments to producers pursuant to § 1126.90 (a) or (c), the uniform prices shall be increased or decreased by each one-tenth of one percent which the butterfat content of his milk is above or below 3.5 percent, respectively, at the rate determined by multiplying the total pounds of butterfat in the producer milk allocated to Class I and Class II milk during the month pursuant to § 1126.46 by the respective butterfat differential in each class, dividing the sum of such values by the total pounds of such butterfat, and rounding the resultant figure to the nearest one-tenth of a cent.

[Docket No. AO 299-A7]

## MILK IN MICHIGAN UPPER PENINSULA MARKETING AREA

### Decision on Proposed Amendments to Tentative Marketing Agreement and to Order

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held at Escanaba, Michigan, on August 20, 1964, pursuant to notice thereof issued July 22, 1964 (29 F.R. 10399).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, Regulatory Programs, on November 3, 1964 (29 F.R. 15084; F.R. Doc. 64-11430) filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

The material issue on the record of the hearing related to incorporating a separate Class I price provision in the order.

*Findings and conclusions.* The following findings and conclusions on the material issue are based on evidence presented at the hearing and the record thereof:

The Class I price provision of the Michigan Upper Peninsula order should be revised but the Class I price level should not be changed. To accomplish this, the Class I price provision of the order should provide a Class I price determined by a stated Class I differential added to a basic formula price, subject to adjustments based on the same supply-demand adjustment factor contained in the Northeastern Wisconsin order and presently effective under this order. This would replace the direct tie to the Northeastern Wisconsin order Class I price but would maintain the same price level.

The monthly average price received by farmers for manufacturing grade milk in Minnesota and Wisconsin as published by the Department on about the fifth day following the month (adjusted to a 3.5 percent butterfat basis) should be the basic formula price from which the Class I milk price is computed in this order. This is the same basic formula price as that used in the Northeastern Wisconsin order Class I price computation to which the Class I price of the Michigan Upper Peninsula order is now linked and is the price series presently used to determine the Class II price of the Michigan Upper Peninsula order.

A method for adjusting the price to a 3.5 percent butterfat basis must be adopted for the order because the Class I price is announced on this basis. For this purpose a generally recognized butterfat value, 0.120 times the average wholesale price for 92-score butter at Chicago, should be used. This method of adjustment is employed under the Northeastern Wisconsin order to adjust the basic formula price and is used under this order to adjust the Class II price to a 3.5 percent butterfat basis.

The Class I price under this order now is the Northeastern Wisconsin order Class I price, adjusted by the supply-demand adjustment of that order, plus a differential of 11 cents for plants in Zone 1(a), 21 cents for plants in Zone 1 and 41 cents for plants in Zone 2.

A producer association, representing a majority of producers in the market, proposed that the order be amended to provide an independent formula for computing the Class I price. It was supported in its request by two other producer associations. There was no opposition to the proposal.

A separate Class I price provision should be adopted in the order. This will more effectively accommodate its operation on an independent basis. The pricing formula proposed herein will provide such independent pricing but will maintain the present price level by incorporating the same basic formula and supply-demand adjustment now under the Northeastern Wisconsin order. The stated differential is comprised of the Class I differential under the Northeastern Wisconsin order plus the increments by which the present Michigan Upper Peninsula order Class I prices in the three zones are above the Northeastern Wisconsin price.

The Class II price provision of the order should be revised to refer to the basic formula price as the Class II price in each month. This is a conforming editorial change and does not change the Class II price level.

At the hearing a producer association representative proposed that the Class I price in Zone 1(a) be increased 10 cents to the level of the Zone 1 price. As justification for such action, it was pointed out that premiums above the order minimum price are paid in this area by the association. The witness indicated, however, that any general Class I price increase in this market should not be made because it could disrupt price alignment with the Northeastern Wisconsin order.

There is no basis for increasing the Zone 1(a) Class I price under the requirements of the Agricultural Marketing Agreement Act of 1937, the statutory authority under which milk marketing orders are issued. This Act requires that prices be established at a level that will tend to obtain an adequate supply of milk to meet the fluid needs of the market, plus a necessary reserve for fluctuations in demand.

At this time an adequate supply of milk is available in Zone 1(a) to meet fluid needs at the present price for that zone. In the first seven months of 1964, 67 percent of producer receipts at plants in Zone 1(a) was used for Class I sales compared to 74 percent in the same period a year earlier. For the year of 1963, 72 percent of producer receipts in this zone was used for fluid purposes; down two percent from 1962. The reserve supply of milk is adequate to meet the current and prospective fluid needs of the market in Zone 1(a) as indicated by the above percentages of producer receipts used in Class I. Moreover, the proportion of milk in the zone available for Class I uses has continued to increase at a steady rate since 1962.

A suggestion was made at the hearing that the supply-demand adjustment to the Class I price be made inoperative during the July-August vacation period of high Class I sales. However, it was requested that no action be taken on the request unless at the same time such action could be taken in the Northeastern Wisconsin order.

The Northeastern Wisconsin order cannot be amended on the basis of this record. Furthermore, it is inappropriate to consider increasing the Michigan Upper Peninsula order Class I price seasonally by eliminating the effect of the supply-demand adjustor. In July, the relationship of Class I sales to producer receipts is normally about the same as the yearly average and the Class I differential is equal to the annual average differential. While August normally is the month of highest Class I sales in relation to producer receipts the present August Class I price differential is 20 cents more than July to recognize this seasonal difference in supply and sales. Hence, there is no evidence to justify increasing the Class I price in July and August.

*Rulings on proposed findings and conclusions.* A brief and proposed findings and conclusions were filed by an interested party. This brief, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by the interested party are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

*General findings.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

*Rulings on exceptions.* In arriving at the findings and conclusions, and the regulatory provisions of this decision, the exception received was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that the findings and conclusions, and the regulatory provisions of this decision are at variance with the exception, the exception is hereby overruled for the reasons previously stated in this decision.

*Marketing agreement and order.* Annexed hereto and made a part hereof are two documents entitled, respectively, "Marketing Agreement Regulating the Handling of Milk in the Michigan Upper Peninsula Marketing Area", and "Order Amending the Order Regulating the Handling of Milk in the Michigan Upper Peninsula Marketing Area", which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

*It is hereby ordered,* That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order as hereby proposed to be amended by the attached order which will be published with this decision.

Determination of representative period. The month of September 1964 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the attached order amending the order regulating the handling of milk in the Michigan Upper Peninsula marketing area, is approved or favored by producers, as defined under the terms of the order as hereby proposed to be amended, and who, during such representative period, were engaged in the production of milk for sale within the aforesaid marketing area.

Signed at Washington, D.C., on November 30, 1964.

GEORGE L. MEHREN,
*Assistant Secretary.*

Order [1] *Amending the Order Regulating the Handling of Milk in the Michigan Upper Peninsula Marketing Area*

**§ 1044.0 Findings and determinations.**

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Michigan Upper Peninsula marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

*Order relative to handling.* It is therefore ordered, that on and after the effective date hereof the handling of milk in the Michigan Upper Peninsula marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, as follows:

**§ 1044.22 [Amended]**

1. In § 1044.22(i)(1), the reference "§ 1044.50" is revised to read "§ 1044.51".

2. Section 1044.50 is revised to read as follows:

**§ 1044.50 Basic formula price.**

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the Department for the month. Such price shall be adjusted to a 3.5 percent butterfat basis at the rate of the butter price times 0.120 and rounded to the nearest cent.

3. Section 1044.51 is revised to read as follows:

**§ 1044.51 Class prices.**

Subject to the provisions of § 1044.52, the class prices per hundredweight for the month shall be as follows:

(a) *Class I milk price.* The Class I milk price shall be the basic formula price for the preceding month plus $0.65 in Zone 1(a), $0.75 in Zone 1 and $0.95 in Zone 2 March through June; plus $1.05 in Zone 1(a), $1.15 in Zone 1 and $1.35 in Zone 2 August through November; and plus $0.85 in Zone 1(a), $0.95 in Zone 1 and $1.15 in Zone 2 in all other months, plus or minus a supply-demand adjustment of not more than 24 cents. For plants located outside of the marketing area and west of Lake Michigan, the price (subject to § 1044.53) shall be that specified for Zone 1 and for plants located outside the marketing area and east of Lake Michigan, the price (subject to § 1044.53) shall be that specified for Zone 2. The supply-demand adjustment shall be computed as follows:

(1) Calculate a "current utilization percentage" for each month by dividing the total pounds of Class I milk (excluding interhandler transfers) disposed of from fluid milk plants under the terms of this order and pool plants under the order regulating the handling of milk in the Northeastern Wisconsin marketing area (Part 1045 of this chapter) for the second and third preceding months into the total hundredweight of producer milk received at such plants during the same months, multiply by 100 and round to the nearest whole number;

(2) Calculate a "net deviation percentage" as follows:

(i) If the current utilization percentage is neither less than the minimum standard utilization percentage specified below, nor in excess of the maximum standard utilization percentage specified below, the net deviation percentage is zero;

(ii) Any amount by which the current utilization percentage is less than the minimum standard utilization percentage specified below is a "minus net deviation percentage;" and

(iii) Any amount by which the current utilization percentage exceeds the maximum standard utilization percentage specified below is a "plus net deviation percentage."

| Month for which price applies | Month for which utilization is computed | Standard utilization range | |
|---|---|---|---|
| | | Minimum | Maximum |
| January | October-November | 123 | 128 |
| February | November-December | 128 | 133 |
| March | December-January | 130 | 135 |
| April | January-February | 133 | 138 |
| May | February-March | 135 | 140 |
| June | March-April | 140 | 145 |
| July | April-May | 145 | 150 |
| August | May-June | 150 | 155 |
| September | June-July | 145 | 150 |
| October | July-August | 130 | 135 |
| November | August-September | 123 | 128 |
| December | September-October | 123 | 128 |

(3) For a minus or a plus net deviation percentage the Class I price shall be increased or decreased, respectively, by two cents for each percentage unit of net deviation: *Provided,* That for each month, the supply-demand adjustment shall differ by not more than four cents from that calculated for the preceding month.

(b) *Class II milk price.* The Class II milk price shall be the basic formula price for the month.

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

§ 1044.63 [Amended]

4. In § 1044.63, the reference "§ 1044.50" is revised to read "§ 1044.51".

[F.R. Doc. 64-12383; Filed, Dec. 2, 1964; 8:50 a.m.]

# FEDERAL AVIATION AGENCY

## [ 14 CFR Part 71 [New] ]

[Airspace Docket No. 64-CE-83]

## CONTROL ZONE AND TRANSITION AREA

### Proposed Designation and Alteration

The Federal Aviation Agency is considering an amendment to Part 71 [New] of the Federal Aviation Regulations to alter controlled airspace in the Fort Dodge, Iowa, terminal area.

The Fort Dodge transition area is presently designated as that airspace extending upward from 700 feet above the surface within 10 miles SW and 7 miles NE of the Fort Dodge VOR 127° and 307° radials, extending from 15 miles SE to 13 miles NW of the VOR. There is no control zone presently designated at Fort Dodge, Iowa.

To implement the provisions of Amendments 60-21 and 60-29 of Part 60 of the Civil Air Regulations, the Federal Aviation Agency proposes to take the following airspace actions:

1. Designate a control zone at Fort Dodge, Iowa, to comprise that airspace within a 5-mile radius of the Fort Dodge Municipal Airport (latitude 42°33'05'' N., longitude 94°11'21'' W.). This control zone shall be effective during the times established by a Notice to Airmen and continuously published in the Airman's Guide, or its successor publication, the Airman's Information Manual, now planned for publication on December 10, 1964.

2. Alter the transition area in the Fort Dodge, Iowa, terminal area by redesignating it as that airspace extending upward from 700 feet above the surface within a 7-mile radius of Fort Dodge Municipal Airport (latitude 42°33'05'' N., longitude 94°11'21'' W.); and that airspace extending upward from 1200 feet above the surface within a 15-mile radius of the Fort Dodge VORTAC; and within the area bounded by a line 5 miles NW of and parallel to the Fort Dodge VORTAC 056° radial extending from the 15-mile radius area NE to the arc of a 26-mile radius circle centered on the Fort Dodge VORTAC, thence clockwise around the arc of the 26-mile radius circle to and NE along a line 5 miles NW of and parallel to the Fort Dodge VORTAC 222° radial to the 15-mile radius area.

The designated control zone would provide protection for aircraft departing from and executing prescribed missed approach procedures at the Fort Dodge Municipal Airport until they reach an altitude of 700 feet above the surface, during the hours of operation of the weather reporting service to be provided by duly certificated personnel of Ozark Airlines. The normal hours for the taking of these weather observations and the dissemination of this information are from 0700 hours to 2200 hours local time daily. However, in the case of airline schedule changes, these hours may be changed. Normally 30 days notice will be given in case of change. Notice of the change will be given by Notice to Airmen and published in the Airman's Guide, or its successor publication, the Airman's Information Manual, now planned for publication on December 10, 1964. Communications within the control zone will be provided by the Mason City Flight Service Station through remote radio transmitting and receiving facilities located at the Fort Dodge Municipal Airport. The proposed 700-foot and 1200-foot transition areas are necessary to contain all holding, departure and missed approach procedures.

Certain minor revisions to prescribed instrument procedures would be effected in conjunction with the actions proposed herein but operational complexity would not increase nor would aircraft performance or present landing minimums be adversely affected.

Specific details of procedures and minimum instrument flight rule altitudes that would be required may be examined by contacting the Chief, Airspace Branch, Air Traffic Division, Central Region, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Director, Central Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The public Docket will be available for examination by interested persons in the office of the Regional Counsel, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110.

This amendment is proposed under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued at Kansas City, Mo., on November 24, 1964.

HENRY L. NEWMAN,
*Acting Director, Central Region.*

[F.R. Doc. 64-12307; Filed, Dec. 2, 1964; 8:45 a.m.]

[Airspace Docket No. 64-CE-86]

## CONTROL ZONE, TRANSITION AREA, AND CONTROL AREA EXTENSION

### Proposed Alteration, Designation, and Revocation

The Federal Aviation Agency is considering amendments to Part 71 [New] of the Federal Aviation Regulations, which would alter the controlled airspace in the Waterloo, Iowa, terminal area.

The following controlled airspace is presently designated in the Waterloo, Iowa, terminal area:

1. The Waterloo control zone which lies within a 5-mile radius of Waterloo Municipal Airport (latitude 42°33'22'' N., longitude 92°23'59'' W.); within 2 miles either side of the Waterloo VORTAC 120° and 314° radials extending from the 5-mile radius zone to 12 miles SE and NW of the VORTAC and within 2 miles either side of the ILS localizer NW course extending from the 5-mile radius zone to the OM.

2. The Waterloo control area extension which lies within a 37-mile radius of the Waterloo VORTAC excluding the portion N. of a line 12 miles N. of and parallel to the Waterloo VORTAC 099° radial and E. of a line 12 miles E. of and parallel to the Waterloo VORTAC 353° radial; and the airspace SE of Waterloo within 12 miles SW and 8 miles NE of the Waterloo VORTAC 146° radial extending from the Waterloo 37-mile radius area to the Cedar Rapids, Iowa VORTAC.

The Federal Aviation Agency, having completed a comprehensive review of the terminal airspace structural requirements in the Waterloo, Iowa, terminal area, including studies attendant to the implementation of the provisions of the Civil Air Regulations Amendments 60-21/60-29, proposes the following airspace actions:

1. Redesignate the Waterloo control zone as that airspace within a 5-mile radius of the Waterloo Municipal Airport (latitude 42°33'22'' N., longitude 92°-23'59'' W.); within 2 miles each side of the Waterloo VORTAC 078° and 200° radials extending from the 5-mile radius zone to 8 miles E. and 8 miles S. of the VORTAC; and within a 1-mile radius of the Leibundguth Airport (latitude 42°-28' N., longitude 92°29' W.).

2. Designate the Waterloo transition area as that airspace extending upward from 700 feet above the surface within a 7-mile radius of the Waterloo Municipal Airport (latitude 42°33'22'' N., longitude 92°23'59'' W.); within 2 miles each side of the Waterloo VORTAC 120° radial extending from the 7-mile radius area to 13 miles SE of the VORTAC; within 2 miles each side of the Waterloo ILS NW course extending from the 7-mile radius area to 10 miles NW of the OM; within 5 miles S. and 8 miles N. of the Waterloo VORTAC 078° radial extending from the VORTAC to 12 miles E. of the VORTAC; and within 5 miles E. and 8 miles W. of the Waterloo VORTAC 200° radial extending from the VORTAC to 12 miles S. of the VORTAC; and that airspace extending upward from 1,200 feet above the surface beginning NE of Waterloo at the intersection of lines 8 miles E. and 8 miles N. of and parallel to the Waterloo VORTAC 353° and 099° radials, thence E. along the line 8 miles N. of and parallel to the Waterloo VORTAC 099° radial to the arc of a 29-mile radius circle centered on the Waterloo VORTAC, thence clockwise around this arc to 8 miles E. of the Waterloo VORTAC 353° radial, thence S. to the point of beginning; and within 6 miles NW and 8 miles SE of the Waterloo VORTAC 241° radial extending from the 29-mile arc to 36 miles SW of the VORTAC.

3. Revoke the Waterloo, Iowa, control area extension.

The proposed control zone will provide protection for aircraft departing from and executing prescribed missed approach procedures at Waterloo Municipal Airport during their climb to 700 feet above the surface. The proposed extensions to the east and south will provide protection for aircraft during their execution of the final approach courses of VOR approaches to runways 24 and 36 at Waterloo Municipal Airport. To insure adequate safety measures it is also necessary to include the Leibundguth Airport within the control zone. The proposed transition area with a floor of 700 feet above the surface will provide protection for aircraft executing departure and missed approach procedures until reaching 1,200 feet above the surface. The 700-foot transition area extensions to the NW and SE will contain the final approach courses of the VOR/DME approach procedures to runway 30 and the ADF/ILS approach procedures to runway 12, and the final transition from Shell Rock intersection. The transition area extensions to the E. and S. will provide protection for aircraft executing VOR approaches to runways 24 and 36. The proposed transition area with a floor of 1,200 feet above the surface will provide protection to aircraft while they are in the terminal area holding pattern and during their execution of the VOR/DME approach procedures to runway 30.

Certain minor revisions to prescribed instrument procedures would be effected in conjunction with the actions proposed herein but operational complexity would not be increased nor would aircraft performance or landing minimums be adversely affected.

Specific details of procedures and minimum instrument flight rule altitudes that would be required may be examined by contacting the Chief, Airspace Branch, Air Traffic Division, Central Region, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Director, Central Region, ATTN: Chief, Air Traffic Division, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The public Docket will be available for examination by interested persons in the office of the Regional Counsel, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110.

This amendment is proposed under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued at Kansas City, Mo., on November 24, 1964.

## [ 14 CFR Part 71 [New] ]

[Airspace Docket No. 64-CE-17]

## TRANSITION AREA AND CONTROL ZONE

### Proposed Alteration and Designation

The Federal Aviation Agency is considering an amendment to Part 71 [New] of the Federal Aviation Regulations to alter controlled airspace in the Rhinelander, Wis., terminal area.

The following controlled airspace is presently designated in the Rhinelander, Wis., terminal area:

The Rhinelander, Wis., transition area is designated as that airspace extending upward from 700 feet above the surface within a 12-mile radius of the Rhinelander VOR, and within a 5-mile radius of the Drott Airport (latitude 45°30'45'' N., longitude 89°33'35'' W.).

The Federal Aviation Agency, having completed a comprehensive review of the terminal airspace structure requirements in the Rhinelander terminal area, including studies attendant to the implementation of the provisions of Civil Air Regulations Amendments 60-21 and 60-29, proposes to take the following airspace actions.

1. Designate a control zone at Rhinelander, Wis., to comprise that airspace within a 5-mile radius of Oneida County Airport, Rhinelander, Wis. (latitude 45°37'53'' N., longitude 89°27'40'' W.); and within 2 miles each side of the Rhinelander VOR 321° radial, extending from the 5-mile radius zone to 8 miles NW of the VOR; and within 2 miles each side of the Rhinelander VOR 228° radial, extending from the 5-mile radius zone to 8 miles SW of the VOR; and within 2 miles each side of the 231° bearing from Oneida County Airport, extending from the 5-mile radius zone to 8 miles SW of the airport. This control zone shall be effective during the times established by a Notice to Airmen and continually published in the Airman's Guide or its successor publication, the Airman's Information Manual, now planned for publication on December 10, 1964.

2. Alter the Rhinelander, Wis., transition area by redesignating it as that airspace extending upward from 700 feet above the surface within a 5-mile radius of Oneida County Airport, Rhinelander, Wis. (latitude 45°37'53'' N., longitude 89°27'40'' W.); and within 2 miles each side of the Rhinelander VOR 321° radial extending from the 5-mile radius area to 8 miles NW of the VOR; and within 2 miles each side of the 231° bearing from Oneida County Airport, extending from the 5-mile radius area to 8 miles SW of the airport; and within 5 miles W. and 8 miles E. of the Rhinelander VOR 163° radial extending from the VOR to 17 miles S. of the VOR; and within a 5-mile radius of Drott Airport, Tomahawk, Wis. (latitude 45°30'45'' N., longitude 89°33'-35'' W.); and that airspace extending upward from 1200 feet above the surface within a 12-mile radius of Rhinelander VOR.

Oneida County Airport, Rhinelander, Wis., meets the communications, navigation aid, and instrument approach criteria for the establishment of a control zone. The weather reporting service is to be provided by North Central Airlines. Since the hours during which this reporting service will be available depend on the airline schedules, they may be subject to change. Consequently the hours in which the control zone will be effective will be subject to change. At the present time, the weather reporting service is available from 0700 hours to 1900 hours local time daily. Any changes in these hours resulting from changes in the airline schedules will be given by Notice to Airmen and published in the Airman's Guide or its successor publication, the Airman's Information Manual, now planned for publication on December 10, 1964. Normally, 30 days notice will be given of any change in the hours of operation. This control zone will provide controlled airspace for aircraft executing prescribed public and special instrument approach procedures at Oneida County Airport during the descent below 1000 feet above the surface.

Alteration of the 700-foot floor transition area would provide controlled airspace for aircraft executing prescribed public and special instrument approach procedures at Oneida County and Drott Airports for the portions of those procedures which are executed below 1500 feet above the surface. It will also provide controlled airspace for aircraft departing Drott Airport during climb from 700 to 1200 feet above the surface. It will provide the same protection for aircraft departing Oneida County Airport during the times that the control zone is not designated.

The proposed 1200 foot floor transition area would provide controlled airspace protection for the procedure turn and missed approach areas of prescribed public and special instrument approach procedures for Oneida County and Drott Airports. It would also provide controlled airspace for aircraft holding at the Rhinelander VOR.

Certain minor revisions to prescribed instrument procedures would be effected in conjunction with the actions proposed herein, but operational complexity would not be increased nor would aircraft performance or present landing minimums be adversely affected.

The floors of the airway segments which would lie within the boundaries of the transition areas proposed for designation herein would automatically coincide with the floor of the transition area.

Specific details of the changes in procedures and minimum instrument flight rule altitudes that would be required may be examined by contacting the Chief, Airspace Branch, Air Traffic Division, Central Region, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Director, Central Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The public Docket will be available for examination by interested persons in the office of the Regional Counsel, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110.

This amendment is proposed under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued at Kansas City, Mo., on November 23, 1964.

EDWARD C. MARSH,
*Director, Central Region.*

[F.R. Doc. 64-12309; Filed, Dec. 2, 1964; 8:45 a.m.]

## [ 14 CFR Part 71 [New] ]

[Airspace Docket No. 64-CE-64]

## CONTROL ZONE AND TRANSITION AREA

### Proposed Alteration and Designation; Supplemental Notice

The Federal Aviation Agency is considering a revised proposal with respect to designation of controlled airspace at Glasgow AFB, Montana.

In the notice of proposed rule making published in the FEDERAL REGISTER on October 23, 1964 (29 F.R. 14547), the Federal Aviation Agency proposed, in part, to designate a Glasgow AFB, Montana, transition area as that airspace extending upward from 700 feet above the surface within a 9-mile radius of Glasgow AFB (latitude 48°25'00" N., longitude 106°31'40" W.); and that airspace extending upward from 1200 feet above the surface within a 35-mile radius of Glasgow AFB.

Subsequent to publication of the notice of proposed rule making, it has been determined that the recommended radius of the Glasgow AFB, Montana, transition area with a floor of 1200 feet would be inadequate for the control of aircraft. Additional area, increasing the radius of the proposed 1200-foot transition area from 35 miles to 50 miles, is necessary in order to provide adequate controlled airspace for en route turbo jet IFR penetrations, for radar vectoring, and for the protection of aircraft during the time they are holding on the 16 nautical mile arc of the Glasgow AFB TACAN.

Accordingly, the notice is amended to propose that the Glasgow AFB, Montana, transition area be designated as that airspace extending upward from 700 feet above the surface within a 9-mile radius of Glasgow AFB (latitude 48°25'00" N., longitude 106°31'40" W.); and that airspace extending upward from 1200 feet above the surface within a 50-mile radius of Glasgow AFB, excluding the portion north of latitude 49°00'00" N.

Interested persons are invited to participate in the amended proposal by submitting such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Director, Central Region, ATTN: Chief, Air Traffic Division, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110. All communications received on or before December 21, 1964, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this amended notice in order to become part of the record for consideration. The proposal contained in this amended notice may be changed in the light of comments received.

The public Docket will be available for examination by interested persons in the office of the Regional Counsel, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110.

This amendment is proposed under the authority of sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued at Kansas City, Mo., on November 24, 1964.

HENRY L. NEWMAN,
*Acting Director, Central Region.*

[F.R. Doc. 64-12310; Filed, Dec. 2, 1964; 8:45 a.m.]

# FEDERAL COMMUNICATIONS COMMISSION

## [ 47 CFR Part 21 ]

[Docket No. 15015; FCC 64-1063]

## DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE

### Proposed Restriction of Location of Rural Subscriber Stations (Rural Radio Service) and Dispatch Stations Associated With Base Stations

*Report and order.* 1. The Commission, on March 21, 1963, issued a notice of proposed rule making in the above-entitled matter (28 F.R. 2992, March 27, 1964) to amend certain rules governing the Domestic Public Land Mobile Radio Service in order to restrict the location of rural subscriber stations (Rural Radio Service) and dispatch stations. It was proposed to amend paragraph (f) of § 21.509 and paragraph (a) of § 21.515 so as to limit the location of rural subscriber stations (Rural Radio Service) and dispatch stations to the reliable service areas (described by a field strength contour of 37 decibels above one microvolt per meter (37 dbu)) of their associated base stations,[1] except that communications common carriers could establish such stations in areas where a service by a similarly classified (landline or miscellaneous) carrier has not been authorized.[2]

2. The Commission on April 25, 1963, granted a petition by National Mobile Radio System and extended the time for filing comments in this proceeding to July 1, 1963.

3. Comments in this proceeding have been filed by the following:

Fresno Mobile Radio, Inc. (Fresno).
Kern Radio Dispatch (Kern).
Kidd's Communications Center (Kidd).
Mobilfone of Boston (Mobilfone).
Daryal A. Myse (Myse).
National Mobile Radio System (NMRS).
Radio Dispatch Fresno (Radio Dispatch).
United States Independent Telephone Association (USITA).

4. Negative comments were filed concerning the propriety of using the theoretical standard of "a field strength contour of 37 decibels above one microvolt per meter" for limiting the location of rural subscriber stations and dispatch stations. NMRS states that its membership is opposed to the proposed restrictions and that the proposed rule is not in the public interest. In fact, NMRS is sharply critical of the Commission's concern over possible adverse economic impact situations caused by fixed stations in the subject service. Kern argues that the purpose of the 37 dbu definition of service area was to estimate a station's coverage prior to construction and he claims that once the station is constructed its only limitation should be that it be dedicated to the public use and its services offered without discrimination. Radio Dispatch, Myse and NMRS declare that the 37 dbu contour specified in our rules does not establish the actual reliable service area for dispatch and rural subscriber stations since current limitations on effective radiated power, antenna height and antenna radiation pattern permit useful service by such fixed stations well beyond the 37 dbu contour of most base stations. Myse further states that "The limiting factors of field intensities varying with location and noise levels in urban areas, ordinarily applicable to service to mobile stations, are not normally applicable to rural subscriber and dispatch station locations outside of the 37 dbu contour." Therefore, Myse and NMRS conclude that the Commission's concept of service area is irrelevant to the location of such fixed stations.

5. Kern asserts that "The rulemaking requires that the carrier deny service even though the subscriber may be well within the practical definitions of 'service area of base station' § 21.1,[3] but outside the theoretical 37 dbu contour concept (see § 21.504)." Kern is also concerned about possible discrimination against subscribers outside of the theoretical reliable service area. Myse believes that the proposed restriction on the location of a rural subscriber is discriminating against those persons who can not afford or obtain wireline communications to the particular base station required. With concern for the needs of certain subscribers, Mobilfone shows that dispatch stations may be required by users whose business offices are outside of the 37 dbu contour of base stations capable of serving their mobile units, but within the 37 dbu contour of another carrier. At least in that situation, Mobilfone finds the proposed rule to be contrary to the public interest. On the same subject, Myse notes that a "subscriber may need communications to a given base station or through it to mobile stations or other rural subscriber stations even though his rural subscriber or dispatch station is located physically within the 37 dbu mobile service area of another station." He concludes that there can be no adverse economic impact on the licensee within whose mobile service area the rural subscriber or dispatch station is physically located unless such licensee is capable of rendering the required service. Radio Dispatch would expect adverse economic impact situations to "balance out."

6. Mobilfone understands that the Commission's proposal to amend § 21.515(a) would restrict the location of dispatch stations, leaving dispatch points as the only alternative in certain cases, forcing the payment of "excessive landline telephone circuit charges." Noting that the subject proposals may place upon the common carrier operator the responsibility of defining precisely several 37 dbu contours (his own and those of adjacent carriers) for each new installation, Kern complains that the proposed rule change would place a new financial burden upon carriers. On the other hand, Fresno supports the idea that a miscellaneous common carrier would receive no protection as against the establishment of a rural subscriber station within its protected contour by a telephone company, and vice versa, but suggests that the proposed rule be revised to permit dispatch and rural subscriber stations in another carrier's service area upon the written consent of that carrier. Auto-Phone does not favor a hard and fast rule but supports the Fresno approach of making an exception where a competing carrier consents. USITA would vary the proposal by permitting the establishment of rural subscriber stations anywhere within the franchised area of a telephone company, even though such fixed stations may fall within the reliable service area of another telephone company.

7. In concluding the proceedings herein we have carefully considered all the comments and suggestions filed plus other relevant information brought to our attention. These proceedings are based on the assumption that satisfactory service to fixed stations outside of the reliable service area can be rendered within the present limitations of the rules. Therefore, we shall not review the various comments designed to show the technical capabilities of systems in the Domestic Public Land Mobile Radio Service. However, we would remind all interested licensees that rural subscriber stations and dispatch stations have been authorized on a secondary basis, i.e., the pertinent frequencies have been allocated primarily for use by base stations and mobile stations in the Domestic Public Land Mobile Radio Service. In other words, considering the shortage of frequencies in the usable spectrum, we do not advocate the proliferation of remote fixed stations in this service. Nevertheless, in considering the establishment of such fixed stations, we do not intend to ignore the practical needs of potential subscribers to communications common carrier systems.

8. Comments which dwell on the lack of interest among miscellaneous common carriers in the economic protection offered by the proposed rule, supported by illustrations that the proposed rule might arbitrarily prohibit services which may well be required to satisfy the public necessity, have favorably impressed us and lead to the conclusion that there is no impelling need for the proposed restrictions now. As is shown by the various comments, the reliable service area is normally based on the calculated ability of a base station to render good service to mobile units. Therefore, the application of the same standard to point-to-point communications facilities would probably result in an unnecessary limitation on the carriers' ability to provide needed communications services. In view of the aforesaid findings, a detailed discussion of the suggestions to modify the proposed rule changes is not required.

9. It appears, therefore, that the record herein does not support the adoption of the amendments set forth in the notice of proposed rule making, and that the public interest, convenience and necessity will not be served by such amendments.

10. In accordance with the considerations set forth above: *It is ordered*, That the amendments to Part 21 of the Commission's rules as set forth in our notice of proposed rule making in this Docket are not adopted: *And it is further ordered*, That proceedings in this Docket are terminated.

Adopted: November 25, 1964.

Released: November 30, 1964.

FEDERAL COMMUNICATIONS COMMISSION,[4]
[SEAL] BEN F. WAPLE,
*Secretary.*

[F.R. Doc. 64-12348; Filed, Dec. 2, 1964; 8:47 a.m.]

[1] Section 21.504(a) of our rules provides as follows:

"§ 21.504 *Service area of base station.* (a) The limits of reliable service area of a base station are considered to be described by a field strength contour of 37 decibels above one microvolt per meter for stations engaged in two-way communication service with mobile stations and 43 decibels above one microvolt per meter for stations engaged in one-way signaling service. Service within that area is generally expected to have an average reliability of not less than 90 percent."

[2] Miscellaneous common carriers and landline telephone carriers are the two types of carriers in the subject service.

[3] The definition of the service area of a base station found in § 21.1 of our rules is as follows:

"*Service area of base station.* The limits of reliable service area of a base station are considered to be described by the field strength contour within which the reliability of communication service is 90 percent, i.e., within the area circumscribed by such contour, nine out of every ten calls initiated by the base station can be satisfactorily received by the mobile unit."

[4] Commissioner Lee absent and Commissioner Cox dissenting.

## [ 47 CFR Part 73 ]

[Docket No. 15716; FCC 64-1098]

## FM BROADCAST STATIONS

### Proposed Table of Assignments

In the matter of amendment of § 73.202, Table of Assignments, FM Broadcast Stations (Lyons, Kans.; Creston, Iowa; Ellwood City, Pa.; Scottsburg, Ind.; Natchez, Miss.; Oshkosh, Wis.; Wilmington, N.C.; McKenzie, Tenn.; Yankton, S. Dak.; Ebensburg, Pa.; Phillipsburg, Pa.; Gouverneur, and Watertown, N.Y.; Dalton, Ga.; Merkel, Tex.); Docket No. 15716, RM-654, RM-635, RM-657, RM-637, RM-658, RM-639, RM-669, RM-655, RM-648, RM-660, RM-671.

1. Notice is hereby given of proposed rule making in connection with the above-listed requests to change the Table of FM Assignments, § 73.202 of the Commission's rules. All proposals meet mileage separations.

2. RM-654, Lyons, Kans. (Ly-Kan Broadcasting Co.), RM-657, Creston, Iowa (Southwest Iowa Broadcasting Co.), RM-658, Ellwood City, Pa. (B.B.P.S. Broadcasting Co.), RM-669, Scottsburg, Ind. (Howell B. Phillips): In these four petitions, it is requested that a Class A

channel be assigned to a community not now having an FM assignment, without necessitating any other changes in the Table. In the case of Creston, the request is in the alternative. All of the communities mentioned are of substantial size, 3,800 persons or more. It appears that rule making should be instituted on the proposed additions, and comments are invited on the following:

| City | Channel No. | |
|---|---|---|
| | Present | Proposed |
| Lyons, Kans. | | 288A |
| Creston, Iowa | | 269A or 296A |
| Ellwood City, Pa. | | 221A |
| Scottsburg, Ind. | | 265A |

3. RM-648, Natchez, Miss. (Old South Broadcasting Co., Inc.), RM-671, Oshkosh, Wis. (Value Radio Corp.): Natchez, Miss. (population 23,791)[1] and Oshkosh, Wis. (population 45,110) each now has one FM channel, a Class A channel, assigned. The listed petitions, filed by AM licensees in these cities, would change the assignment situation therein without making any other changes in the Table. The Natchez petition would substitute a Class C channel (236) for the present Class A assignment; the Oshkosh request is for a second Class A assignment to that city. In view of the size of these communities, it appears that the assignments requested may be appropriate. Comment is invited on the following:

| City | Channel No. | |
|---|---|---|
| | Present | Proposed |
| Natchez, Miss. | 237A | 236 |
| Oshkosh, Wis. | 244A | 244A, 296A |

4. RM-635, Wilmington, N.C.: On July 21, 1964, Dunlea Broadcasting Industries, Inc., licensee of radio Station WMFD, Wilmington, N.C., filed a petition requesting the addition of Channel 265A to Wilmington. This community has been assigned two Class C channels, 247 and 260. A construction permit has been issued for a new station on Channel 260 at Burgaw, N.C. (under the 25-mile rule) but no application has been filed as yet for Channel 247. Wilmington has a population of 44,013. It has four standard broadcast stations, one of which is a daytime-only station. Dunlea urges that a modest investment on a Class A channel will be more economically feasible and appropriate in the Wilmington market. It states that it has available low-power equipment formerly used in FM operation and that it is willing to serve Wilmington and the neighboring areas with station built and operated on a modest cost basis. Finally, Dunlea submits that Channel 265A may be assigned without adversely affecting any other station or assignment.

5. The above proposal would assign a Class A channel along with Class C channels at Wilmington. In the past, except where necessary, generally we have tried not to mix Class A and Class B or C assignments in the same community because of the competitive inequality which might result between stations on these channels. Comments are invited as to whether this consideration should apply in the situations covered herein. We are of the view that rule making should be instituted on petitioner's proposal, and invite comments on the following:

| City | Channel No. | |
|---|---|---|
| | Present | Proposed |
| Wilmington, N.C. | 247, 260 | 247, 260, 265A |

6. RM-637, McKenzie, Tenn. On July 28, 1964, The Tri-County Broadcasting Co., Inc., licensee of radio Station WHDM, McKenzie, Tenn., filed a petition requesting the assignment of Channel 269A to McKenzie. McKenzie is a community of 3,780 and has one FM assignment, Channel 295 on which Station WKTA operates. The sole radio station, WHDM, is a daytime-only station. Tri-County recites its past unsuccessful efforts to obtain an FM license in McKenzie. It urges that McKenzie needs the proposed FM assignment and that the proposal conforms to all the rules and policies of the Commission.

7. It is by no means apparent that the making of a second FM assignment, even a limited-coverage Class A assignment, to a community of this size is warranted. This is particularly true since it appears that there are larger communities in the area with no FM assignments, such as Martin, Tenn., where use of Channel 269A would be technically feasible. We are of the view that assignment of this channel in the general area is warranted, but not necessarily to McKenzie. Comments are invited on its use at Martin, McKenzie, or elsewhere where it can meet mileage separations as follows:

| City | Channel No. | |
|---|---|---|
| | Present | Proposed |
| Martin, Tenn. | | 269A |
| or | | |
| McKenzie, Tenn. | 295 | 269A, 295 |

Under the circumstances present here, the Commission will not necessarily be governed by the expression of immediate interest in the channel at McKenzie.
